MINOR IN EMERGENCY MANAGEMENT: RISK AND RESILIENCE MANAGEMENT

6 CLASSES • 18 CREDITS

The number of natural and man-made disasters around the world has been increasing for decades as have the range of effects on people, property, infrastructure, businesses and the environment. The Risk Resilience Management minor focuses on understanding this trend and investigating options to reverse it.

The curriculum covers how construction, engineering, urban design and planning, environmental management and community development policies interact with hazards in positive or negative ways; how to understand and assess risks in those contexts; and how building capacity to withstand disasters is a critical part of community development. NDSU offers the only Emergency Management minor and Risk and Resilience Management concentration in the region.

Department of Emergency Management

Minard Hall 428 • 701-231-5595
