

INDUSTRIAL AND MANUFACTURING ENGINEERING

Lean manufacturing has become a foundation for many companies throughout the world to remain competitive and achieve year over year improvements in Safety, Quality, Delivery and Cost. Join us for a one day workshop to learn what Lean is, how to apply it and experience first-hand through simulation why it works.

For more information or to register for the training please stop by the Industrial and Manufacturing Engineering Department.

Registration Deadline:
February 3, 2015

Lean Training
Saturday,
February 7, 2015
