## Tasty, Healthful Meals on a Budget

# Week 5: Time-saving Tips, Menus and Recipes

**Julie Garden-Robinson**, Ph.D., R.D., L.R.D. Food and Nutrition Specialist

### Time vs. Money

Which statement is true of you?  
 Mark with an "X."

- I plan menus and write grocery lists, so I have meal ideas and the food I need.
- I sometimes prepare portions of a meal in advance.
- I sometimes use leftovers as the basis for another meal.
- Other people in my household help with meal preparation and cleanup.
- I focus preparation efforts on one portion of the meal. For example, if the main course is time-consuming, I fix a simple vegetable or salad.
- I assemble equipment, cooking utensils and ingredients before I begin meal preparation.
- I use time-saving equipment, such as slow cookers and microwave ovens.
- I use the one-pot method. For example, I add vegetables to pasta that is cooking.

Think about the items you marked and the ones you did not mark. These are time-saving strategies, and some may work for you.

In today's busy world, cooking a meal completely from scratch may be difficult. However, convenience foods usually cost more and may be higher in calories, fat and sodium.

This is the fifth in a series of publications to help you eat well but spend less at the grocery store. It includes time/money-saving tips and sample menus with recipes that you can adapt to meet your family's tastes.

### Plan for Busy Times

Meal planning and advance food preparation can save you time and money. Find a block of time when you can make a few recipes at once and then freeze them for a later date. Invite your family to help. When you're in a time crunch, allow the dish to thaw in the refrigerator for the day. Reheat in a microwave, add a side salad and dinner is ready.

**Example 1:** Make extra chili on Monday for "planned-overs" on Wednesday. Use the rest of the chili to:

- Top baked potatoes
- Make an easy casserole by combining cooked pasta shells with planned-over chili
- Make a quick and easy taco salad by topping lettuce with planned-over chili, diced tomatoes and shredded cheese

**Example 2:** Use a slow cooker to simmer your evening meal to perfection while you are at work or busy doing other things. Mix planned-over beef or

chicken, vegetables and broth in your slow cooker before you leave in morning; set on low. Serve with bread, crackers and fruit for a hearty evening meal.

### Save Money When Eating Out

With busy lifestyles, sometimes grabbing a meal on the go is unavoidable. Eating out can be an occasional treat that does not have to break your budget. Consider these tips:

- When eating out, take advantage of “two for one” deals, coupons or “kids eat free” specials.
- Drink water instead of ordering soda pop.
- Share a meal, or have an appetizer as your main course.
- Order a kid’s combo when possible. Often the “kid-sized meal” has the accurate portion size for adults.
- If the portions are large, ask for a “to go” box early. Put half of your meal in the box and enjoy the rest for lunch the next day. This practice cuts calories, and it provides a second meal for you.

### MyPlate Portion Equivalents

The MyPlate food plan uses cups and ounces instead of “servings” and calls them “equivalents.” These are some of the equivalents for the food groups:

<b>Grain Group</b>	1 slice of bread 1 cup ready-to-eat cereal ½ c. cooked rice, pasta or cooked cereal	1 ounce
<b>Vegetable Group</b>	1 cup raw or cooked vegetables or vegetable juice, 2 cups raw leafy greens	1 cup
<b>Fruit Group</b>	1 cup 100% fruit juice, 1 cup fruit, ½ cup dried fruit	1 cup
<b>Dairy Group</b>	1 cup milk or yogurt, 1½ ounces natural cheese, 2 ounces processed cheese	1 cup
<b>Protein Foods Group</b>	1 egg; 1 ounce meat, poultry or fish; ¼ cup cooked dry beans; 1 tablespoon peanut butter; ½ ounce nuts or seeds	1 ounce

## What's Your MyPlate Plan?

You can find the latest nutrition recommendations at [www.choosemyplate.gov](http://www.choosemyplate.gov).

Each person has different needs based on gender, age and level of physical activity. Learn what each of your family members needs at his or her particular calorie levels by visiting the website or contacting your local Extension agent for “MyPlate Plans” handouts for different age groups. The MyPlate Plans are available online at <https://www.ag.ndsu.edu/publications/food-nutrition/myplate-plans-for-adults>.

### Size up your portions with these visual clues.

As shown, one-half of a baseball is the same size as ½ cup mashed potatoes.

 ½ baseball	=	½ cup of mashed potatoes
 large egg OR golf ball	=	¼ cup of dried cranberries
 pingpong ball	=	2 tablespoons of peanut butter
 check book	=	3 ounces of fish
 card deck	=	3 ounces of meat or poultry
 4 dice	=	1½ ounces of natural cheese (cheddar, Swiss)
 thumb tip	=	1 teaspoon of margarine or butter

Example:

**Look for Key Words on the Menu When Eating Out**

Some foods prepared with less fat are considered a healthier option when eating out. Try to choose items that are baked, broiled, grilled, roasted, poached, steamed or blackened. Limit fried, braised, basted, creamed, scalloped, au-gratin, sautéed or stuffed and any foods marinated in oil.

For a healthful twist on restaurant-style foods, try the recipes for “Oven Fries” and “Crispy Baked Chicken” included in this publication.

**Remember Food Safety on the Run**

If you bring food along, be sure to keep perishable foods, such as meat sandwiches, milk and cut-up fruit, cold. Use insulated lunch boxes and bags with frozen gel packs or frozen juice boxes.
