## Tasty, Healthful Meals on a Budget

# Week 2: Grocery Shopping Tips, Menus and Recipes

**Julie Garden-Robinson**, Ph.D., R.D., L.R.D. Food and Nutrition Specialist  
**Grete Peterson**, Former Program Assistant  
**Tera Sandvik**, R.D., Former Project Assistant

Menu planning can help you serve your family healthier meals and it can help you save money at the grocery store. After planning your menus, the next step is developing a grocery list so you have all the necessary foods for each meal.

This is the second in a series of publications to help you eat well but spend less at the grocery store. It includes grocery shopping tips, sample menus and recipes that you can adapt to meet your family's tastes.

### Consider these tips. Which do you plan to use?

- Read your recipes and menus to see what you need.
- Write down all of the items you need based on your menu plans.
- Check your shelves and refrigerator for items you already have.
- Look in the newspapers or magazines for sales or coupons, but use coupons only for foods that you plan to use.
- Keep a grocery list on your refrigerator. Add items to the list as you need them.

### Why Write a Grocery List?

When you write down the food items you need, you can cut down on trips to the grocery store. This saves you time and could save you money on gas, too. When you buy only foods on your list, you will be able to estimate the amount of money you spend and avoid impulse buys.

### Use Coupons Wisely

Using coupons can save you money. Use coupons only to purchase foods you were planning to buy anyway. Sort coupons by food category and be aware of the expiration dates on the coupons.

### Food Safety Tips

Keep food safe from the grocery store to your home. Shop for milk, dairy, meat and frozen items last so they are not in room temperature for an extended amount of time. If you travel a distance for groceries, bring a cooler filled with ice to transport perishable foods (such as milk, meat) on warm days.

Consider these tips as you shop for groceries:

- **Produce:** Inspect fruits and vegetables and avoid ones that are bruised or damaged.
- **Meats:** Avoid cross-contamination. Put meat packages in a plastic bag (where available) in your cart. Keep meat packages separate from ready-to-eat foods to avoid cross-contamination.
- **Eggs:** Open the carton. Be sure the eggs are not cracked.

## What's **Your** MyPlate Plan?

You can find the latest nutrition recommendations at [www.choosemyplate.gov](http://www.choosemyplate.gov).

Each person has different needs based on gender, age and level of physical activity. Learn what each of your family members needs at his or her particular calorie levels by visiting the website or contacting your local Extension agent for “MyPlate Plans” handouts for different age groups. The MyPlate Plans are available online at <https://www.ag.ndsu.edu/publications/food-nutrition/myplate-plans-for-adults>.

### What Do the Dates On Food Products Mean?

Be sure to write the date of purchase on the foods you buy and arrange your cupboards “first in, first out.” In other words, place the oldest foods in the front so you use them first.

- **Sell-by date:** Stores should pull items from the shelves if they are not sold by this date. The products are still good for a while if they're stored properly at home.
- **Use-by date:** Food is guaranteed to be at high quality until this date. Although the foods are still safe to consume after the date, these items may have lower quality.
- **Expiration date:** Consume food or beverage by this date or throw it.

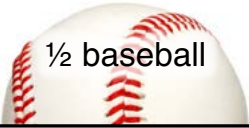

### MyPlate Portion Equivalents

The MyPlate food plan uses cups and ounces instead of “servings” and calls them “equivalents.” These are some of the equivalents for the food groups:

<b>Grain Group</b>	1 slice of bread 1 cup ready-to-eat cereal ½ c. cooked rice, pasta or cooked cereal	1 ounce
<b>Vegetable Group</b>	1 cup raw or cooked vegetables or vegetable juice, 2 cups raw leafy greens	1 cup
<b>Fruit Group</b>	1 cup 100% fruit juice, 1 cup fruit, ½ cup dried fruit	1 cup
<b>Dairy Group</b>	1 cup milk or yogurt, 1½ ounces natural cheese, 2 ounces processed cheese	1 cup
<b>Protein Foods Group</b>	1 egg; 1 ounce meat, poultry or fish; ¼ cup cooked dry beans; 1 tablespoon peanut butter; ½ ounce nuts or seeds	1 ounce

### Size up your portions with these visual clues.

As shown, one-half of a baseball is the same size as ½ cup mashed potatoes.

 ½ baseball	=	½ cup of mashed potatoes
 large egg OR golf ball	=	¼ cup of dried cranberries
 pingpong ball	=	2 tablespoons of peanut butter
 check book	=	3 ounces of fish
 card deck	=	3 ounces of meat or poultry
 4 dice	=	1½ ounces of natural cheese (cheddar, Swiss)
 thumb tip	=	1 teaspoon of margarine or butter

Example:

**Add Variety to Your Meals**  
 Mix up your plate with different textures, colors, shapes, sizes and temperatures each day. Incorporating a wide variety of foods from all the food groups into your meals will ensure that your family is getting the nutrients it needs. A colorful plate is a good indicator that you are getting a variety of nutrients and a balance of each of the food groups.

# A "Grocery List" of cost-savings ideas

Check the following if you use the tip or plan to use it.

Currently use    Plan to use    Not applicable

**Spend about 30 minutes planning your weekly menus.** Use the sale ads and write a shopping list. Keep the list in a handy spot.

**Avoid shopping when you're hungry or tired.** Almost everything looks tasty when you're hungry. If you're tired, you may be likely to grab convenience foods, which cost more and often are less nutritious.

**Avoid using a credit card for food purchases unless you intend to pay off the balance each month.** You may end up adding credit card interest rates onto the food cost.

**Shop in one or two stores. Consider your gas, too.** If you drive to several stores for special deals, it may not be a "deal."

**Be familiar with the store layout.** Only go down the aisles that include items on your list.

**For quick shopping trips, shop the perimeter of the store.** Most staples, such as milk, fresh produce and bread, are around the perimeter.

**Compare store brands with national brands and choose the one with the lower price.** Most store brands are similar in quality to name brands, but lower in price.

**Clip coupons, but only for the things you need.** Some stores double the value of coupons to a certain point.

**Compare price using "unit prices."** The unit pricing on the front edge of shelving helps you know quickly whether the regular-priced super-sized package is a better deal than the sale-priced regular-sized package.

      

**Check your receipt and change.** Although mistakes are not intentional, they can happen. Look carefully at your receipt to be sure you received the sale price.
