

Another Type of Container

NDSU

THE BASICS

Selecting a Container

- Anything that can hold soil and has drainage holes in it is perfectly suitable!
- If you find a container that is appealing but doesn't have drainage, you may always drill some holes in it.
- Think of the purpose:
 - Vegetables
 - Flowers
 - Succulents
 - Herbs
 - Decorative (Focal point or eye catcher)

Soil Types

Soil-based mediums

- Pros: Heavier, retain moisture and nutrients
- Cons: Could contain insects, weed seeds, or disease

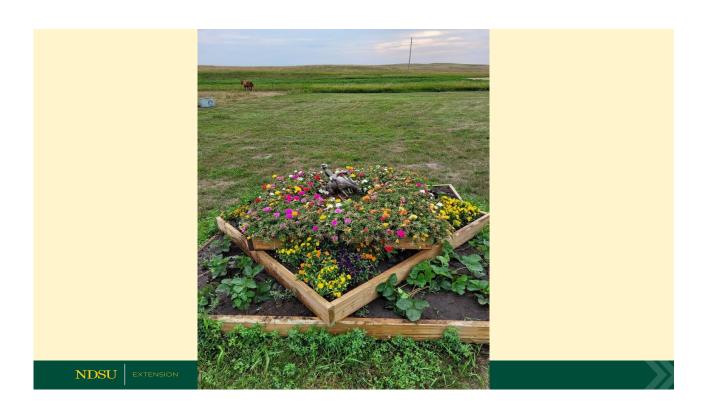

Soilless mediums

- Pros: Free of insects, weed seeds, and disease organisms
- Cons: Lacks longevity and Can be costly

Constructing Raised Bed

- Pressurized Treated Lumber
- Oak
- Redwood
- Cedar
- Tin, plastic, etc.
- Avoid railroad ties

NDSU

Location

- Again, ask yourself what growing conditions are needed for the plants you are growing.
- Typically, you will want a spot that receives full sun or more than 6 hours a day.
- Find a spot that wind isn't going to cause damage.

NDSU

Container Fillers

- Large containers can get very heavy depending on the how much growing medium is needed.
- Fillers are use to lighten the container and reduce the cost of growing mediums.
- Fillers to use:
 - Crush aluminum cans
 - Plastic milk jugs
 - Packing peanuts

NDSU

Square Foot Gardening

- Why?
 - Maximize Space
 - Less labor intensive
 - Set up is simple
 - Less weeding
 - Easier watering
 - No tilling
 - Crop rotation is achieved by simply moving into a new square
