MESSAGE FROM THE PRESIDENT

North Dakota State University is an exciting, dynamic place to be. This vibrant institution is a leader among our peers - a university recognized for its quality education, leading-edge research and outstanding service.

But what truly sets NDSU apart is its unique and wonderful focus on students. That emphasis is what attracted me to this campus; students are incredibly important to me. You'll find the enthusiasm, energy and dedication of this university is truly something special.

NDSU's enrollment exceeds 14,000 students in our undergraduate and graduate programs. Our annual research expenditures surpass $110 million. We have more than 2,100 graduate students. Bison student-athletes compete and succeed in the ranks of NCAA Division I.

These are great times for NDSU. Across this outstanding institution, we continue to establish records, set new benchmarks and build on our many important connections with the community and state. I have no doubt the faculty, staff and students of NDSU will continue to excel.

I urge you to use this catalog to explore the many educational opportunities we offer. Join us as NDSU moves forward. I believe the best is yet to come.

Dean L. Bresciani
President
The Undergraduate Bulletin contains information about academic programs and student services offered by North Dakota State University, as well as academic policies and degree requirements. This bulletin (or catalog) is published online only. It is structured as a series of web links and printable PDF documents for ease of referencing, printing and archiving. The bulletin is intended to complement other university information including specific materials supplied by schools, colleges, departments, and programs.

- The information in the catalog applies to all undergraduate and professional students at the university regardless of their classification, program of study, department, school or college. Information in the individual college sections applies to students enrolled in those specific programs of study.

- The academic policies and information contained within this bulletin are effective for the 2010-2011 academic year, beginning on August 23, 2010 and ending on August 5, 2011.

- The curricula linked within the bulletin are effective for students who entered NDSU or who declared a new program of study during the 2010-2011 academic year. Continuing and returning students follow the curriculum in place at the time their program of study was officially declared with the University.

- Questions about academic policies and curriculum guides may be directed to the Office of Registration and Records.

- It is important for students to be familiar with all the information that applies to them, including policies and procedures related to registration, academic progress and degree requirements. Students are strongly encouraged, and may be required, to consult their advisors at least once each semester to ensure they are completing requirements applicable to their degree and major programs.

- All new, current and returning students should become well acquainted with the regulations regarding student academic and behavioral codes of conduct.

- Information about the Family Educational Rights and Privacy Act of 1974, as amended, is available online.
Disclaimer & Reservation of Rights

Disclaimer

The State Board of Higher Education requires that the following announcement be published in all catalogs and bulletins of information issued by the state educational institutions of North Dakota: "Institutions shall publish electronic and/or hard copies of catalogs and bulletins for the purpose of furnishing prospective students and other interested persons with information about the institutions. Announcements contained in such printed or electronic material are subject to change without notice, and may not be regarded in the nature of binding obligations on the institutions and the State."

Reservation of Rights

Every effort has been made to provide accurate and current information; however, the right is reserved to change any of the rules and regulations of the university at any time, including those relating to admission, instruction, and graduation. The right to withdraw curricula and specific courses, change or discontinue programs, alter course content, change the calendar, and to impose or increase tuition and fees similarly is reserved. In some cases, requirements for programs and prerequisites for courses offered are effective even if they are not listed in this bulletin. All such changes are effective at such times as the proper authorities determine, and may apply not only to prospective students but also to those who already are enrolled in the university.

Non-discrimination Policy

North Dakota State University does not discriminate on the basis of race, color, national origin, religion, sex, disability, age, Vietnam Era Veterans status, sexual orientation, marital status or public assistance status. Direct inquiries to the Executive Director and Chief Diversity Officer, 202 Old Main, (701) 231-7708.

Information in this bulletin will be made available in alternate formats upon request. Please place your request by calling 701-231-7981.
NDSU OVERVIEW

Mission
With energy and momentum, North Dakota State University addresses the needs and aspirations of people in a changing world by building on our land-grant foundation.

Vision
We envision a vibrant university that will be globally identified as a contemporary metropolitan land-grant institution.

Core Values
NDSU is guided by the following key values and principles:

Land-grant
- We reflect and serve geographically and culturally diverse populations.
- We share institutional success across the university.
- We anticipate and welcome growth and service that will occur in ways yet to be conceived.
- We embrace our unique complexities as a land-grant university on the Northern Great Plains.
- We remain committed to serving people globally.

People
- We derive strength and vitality from each other and from the diverse communities we serve.
- We envision an academic and social environment that is conducive to intellectual and personal development by promoting the safety and welfare of all members of the university community.
- We promote excellence through individuals participating in decisions and value cooperation for the common good.

Scholarship
- We are an engaged university and acknowledge and pursue scholarship of all forms, including discovery, teaching, integration, and application.
- We uphold the rights and responsibilities of academic freedom.

Teaching and Learning
- We provide a superior teaching and learning environment within and outside of the traditional classroom.
- We promote and value liberal, graduate, and professional education in a collegial environment where divergent ideas can be shared.
- We foster an environment that promotes life-long learning with individually-defined goals.

Ethics
- We maintain our integrity through principled action and ethical decision-making.

Culture
- We will be the land-grant university that we want to be by welcoming and respecting differences in people and ideas.
- We support the goals of the North Dakota University System and value collaboration with colleges and universities around the world.
- We foster accessibility to our programs and services.
Accountability

- We have a special relationship with, and are accountable to, the people of North Dakota.
- We actively strive to contribute to our region's economic prosperity and to improve the quality of life.

Campus Themes

It's About People

North Dakota State University exists as a human endeavor; a means to accomplish a greater good. It's About People, acknowledges the service we do for our fellow citizens, but also emphasizes the institutional commitment to the people of NDSU and our desire to reward those whose efforts are serving the public's interests.

Students are Paramount

In recent years, NDSU has seen tremendous growth in the size of our student body. NDSU’s growth is grounded in the strength of our existing programs and fueled by the strategic addition of new programs. Undergraduate education remains the foundation of our educational offerings while new graduate programs are retaining and keeping young people in the state. NDSU students are active partners in our institutional transformation.

Programs

In the past few years, we have successfully launched many new undergraduate and graduate programs. We have reinforced the integrity of NDSU's academic offerings by emphasizing our faculty's expertise in research and creative activities while maintaining our focus on teaching and learning.

Leveraging Support

NDSU has responded to the opportunities allowed by the Roundtable for Higher Education and the aspirations of the North Dakota University System. For example, for every dollar of state support, NDSU has obtained nearly $10 in other funds. The economic impact of just the university's growth during the past 10 years is nearly $1 billion. NDSU's transformation into a leading academic institution received significant acknowledgment, as recognized by Moody's Economy.com in describing NDSU as an important driver of the state's economy. A recent Moody's report stated, "In the longer term, (increased state) funding will provide better resources for students and thereby enhance ND's human capital."

Stature

NDSU is experiencing a period of remarkable success. Few universities have experienced our growth in enrollment, research expenditures, program expansion, or growth in campus infrastructure in such a short time. Our faculty, staff and students have seized upon an opportunity to be more and have catapulted this university forward. NDSU's institutional stature also has increased through a highly successful transition in intercollegiate athletics to NCAA Division I. We are increasing awareness of our state and representing North Dakota with pride and competitive excellence.

NDSU in Perspective

A Bit of History

North Dakota had been a state less than a year when Gov. John Miller signed a bill on March 8, 1890, designating a square mile of land adjoining Fargo as the site of the new campus and demonstration farm under the name North Dakota Agricultural College and Agricultural Experiment Station.

With President Horace E. Stockbridge and five faculty members, the university opened for its first collegiate year on Sept. 8, 1891. A total of 30 students were listed in the 1891 Prospectus as being "matriculated in the Special Course."

Through its proud history, the campus has gained a strong reputation for quality in education, research and service. An engaged university and a leader among its peers, NDSU is emerging as a model of the contemporary metropolitan land-grant university.
The Land-Grant Heritage
Honoring the commitment of the Morrill Act of 1862, the land-grant universities were established to provide studies that were a blend of technical and academic subjects. Known as a "people's college," NDSU was part of the bold experiment to provide access to a college education for the common person.

NDSU, the state's first land-grant institution, is well positioned to prepare graduates for the global marketplace and technologically oriented economy. Through a statewide network of centers and electronic technology, NDSU provides a growing capability for delivering education, cultural activities and information to schools and homes throughout North Dakota. NDSU is a publicly supported comprehensive land-grant institution, with a strong agriculture and applied science tradition.

NDSU Today
NDSU is clearly an institution of choice. Having experienced a remarkable period of growth and with the development of expanded academic opportunities, NDSU is a national model of the contemporary land-grant institution.

A university with more than 14,000 students in its undergraduate and graduate programs, NDSU's research expenditures surpass $100 million annually.

The Carnegie Foundation for the Advancement of Teaching classifies NDSU among "Research Universities (high research activity)" in its new "basic" classifications of United States colleges and universities. NDSU is in the same Carnegie category as institutions such as Boston College, Brigham Young University, Clemson University, Marquette University, Temple University, and the University of Oregon.

An institution committed to progress, NDSU continues to advance in all areas because of the energy and dedication of faculty, staff, students, alumni, and friends.

Accreditation
NDSU is accredited as an institution by the North Central Association of Colleges and Schools. Inquiries may be directed to the Higher Learning Commission of the North Central Association of Colleges and Schools, 230 South LaSalle St., Suite 7-500, Chicago, IL 60604-1411. In addition, many programs are accredited or approved by their respective professional organizations and agencies. Program accreditation or approval is listed in the college sections of this bulletin.

The Faculty
NDSU has more than 650 resident faculty members. Because of the nature of a land-grant university, many faculty hold joint appointments with affiliated research organizations on the campus.

Divisions
- Division of Academic Affairs
- Division of Agriculture, Food Systems, and Natural Resources
- Division of Finance and Administration
- Division of Information Technology
- Division of Research, Creative Activities and Technology Transfer
- Division of Student Affairs
- Division of University Relations

The Campus
The NDSU campus in Fargo includes 119 buildings on approximately 42 square blocks or 258 acres. The campus has expanded into downtown Fargo, and is a small city within itself. Statewide, NDSU is located on 18,746 acres of North Dakota land, which includes the main Agricultural Experiment Station in Fargo and eight research centers throughout the state.
Academic Programs

NDSU offers more than 100 undergraduate and approximately 100 graduate degree programs of study in nine academic colleges. Degrees are awarded at the doctoral, master's, professional, and baccalaureate levels. Various undergraduate minors and certificate programs also are available. Programs offered at the time of this publication are listed in the Academic Information and Regulations section of this bulletin or may be viewed online at www.ndsu.edu/majors.
UNIVERSITY RESOURCES

- Alumni Association
- Centers and Institutes
- Extension Service
- Facilities Management
- Information Technology Services
- Institutional Research and Analysis
- NDSU Libraries
- NDSU Research and Technology Park
- Research Extension Centers
- Statistical Consulting Service
Problems/Complaints

The Vice President for Student Affairs Office has established a procedure for students to file complaints, concerns or issues. The purpose of the procedure is to provide an orderly collection of information, address students' complaints in a timely manner by appropriate university personnel, and help students learn effective conflict resolution skills.

A form is available in the Vice President for Student Affairs Office, 100 Old Main, or the Dean of Student Life Office, 250 Memorial Union, to assist students in stating the problem and desired problem resolution. Students also may arrange a meeting with the Associate Director of Student Rights and Responsibilities, 250 Memorial Union, at any time during the process for advice and direction in resolving the problem.
Admission of Early-Entry Students

High school juniors and seniors wishing to take coursework at NDSU prior to high school graduation may enroll as an early-entry student. Submit all of the following:

1. Completed application for admission and a $35 nonrefundable application fee;
2. High school transcript;
3. Early-entry permission form signed by a parent or guardian and by a high school counselor or principal;
4. Students seeking early-entry status must show evidence of strong academic ability and adequate progress toward meeting the core curriculum requirements. Credit earned will be made official upon receipt of the final high school transcript;
5. College credit may apply toward high school graduation requirements. Students should consult their high school policy regarding this issue and must initiate the Dual Credit Enrollment Application with the high school counselor.

Note: A cumulative grade-point average of 3.5 is recommended; however, each application will be reviewed on an individual basis.

Admission of Non-Degree Seeking Students

Special student status is reserved for non-degree seeking students who have already obtained a high school diploma or GED and wish to enroll in a limited number of courses at NDSU. Special students are permitted to register for up to 15 credits without submitting official transcripts (unless college coursework was attempted within one year prior to application). Interested students should request from and submit to the Office of Admission a Special Student Status Application and a $35 nonrefundable application fee. If students wish to take additional courses or become degree-seeking, appropriate high school and/or college transcripts must be submitted to be considered for admission.

Students currently enrolled at another college or university and planning to take limited coursework at NDSU with intention of transferring NDSU credits to their home institution should follow application procedures for special student status.

Admission by Examination (GED)

Persons 19 years of age or older may substitute satisfactory scores on the General Education Development (GED) tests in place of a high school diploma. North Dakota residents may take these tests by appointment at the NDSU Counseling Center or at high schools throughout the state. Others should consult with schools in their home state for details about testing centers.

Students who present an overall average score of 450 on the GED with no subject score lower than 410 will be considered for admission to the university. ACT/SAT scores are required if applicant is under 25 years of age.

Readmission of Returning Students

Returning students are those who have previously attended NDSU and are returning after a leave of absence of at least one full term, or following an academic suspension, exclusive of summer session. Returning undergraduate students should contact the Office of Registration and Records at least 30 days prior to their expected return so that records may be updated to permit further registration. Returning graduate students should contact the Graduate School for readmission information. Students who have enrolled in courses at
other institutions since leaving NDSU must arrange for official transcripts to be sent to the Office of Registration and Records, P.O. Box 5196, Fargo, ND 58105. Reactivation/Petition for Readmission forms are available online at www.ndsu.edu/bisonconnection. Failure to list all colleges, universities, and schools attended while away from NDSU may result in denial of readmission, rescission of admission, dismissal, loss of credit(s), or other appropriate sanctions.

---

**Selective and Limited Admission Programs**

Admission to a number of programs is selective and/or limited. Admission to the university does not guarantee entrance to a specific major. Supplemental applications may be required for students seeking admission to the professional-level programs. Some programs require that minimum standards be met and maintained for continuous enrollment and advancement in the program. Contact the respective department for further admission criteria and application deadlines for the following programs:

- Accountancy
- Accounting
- Agricultural Communication
- Architecture
- Business Administration
- Clinical Laboratory Science
- Computer Engineering
- Construction Engineering
- Construction Management
- Dietetics
- Electrical Engineering
- Environmental Design
- Exercise Science
- Finance
- Health Communication
- Industrial Engineering and Management
- Interior Design
- International Studies
- Journalism, Broadcasting and Mass Communication Technology
- Landscape Architecture
- Management
- Management Communication
- Management Information Systems
- Manufacturing Engineering
- Marketing
- Mechanical Engineering
- Music
- Nursing
- Pharmacy
- Public Relations and Advertising
- Radiologic Sciences
- Respiratory Care
- Sport and Recreation Studies
- Teacher Education (all disciplines)
- Veterinary Technology
STUDENT FINANCIAL INFORMATION

- Financial Aid
- Refund of Tuition and Fees
- Residency and Tuition Reciprocity
- Tuition and Fees
- Veteran's Affairs Education Benefits
Diverse services and reinforcement programs are available at NDSU. Each is aimed at enhancing student life by assisting students to gain the maximum benefit from their experiences.

- Academic Collegiate Enhancement (ACE) Tutoring
- Air Force ROTC
- Army ROTC
- Athletics
- Bison Connection
- Career Center
- Center for Writers
- Counseling Center
- Dining Services
- Disability Services
- Distance and Continuing Education
- Financial Aid
- Information Technology Services (ITS)
- International Programs
- Memorial Union
- Multicultural Student Services
- Native American Pharmacy Program
- NDSU Bookstore
- NDSU Libraries
- Orientation and Student Success
- Residence Life
- Student Activities
- Study Abroad
- Tri-College University
- TRIO Programs
- Wallman Wellness Center
- University Honors (Scholars) Program
- Veterans & Student Soldiers
Degrees at both the undergraduate and graduate levels are offered at NDSU. For more information about the various programs of study leading toward baccalaureate degrees, consult the Academic Colleges section of this bulletin. Graduate degree requirements and fields of study are summarized in the Graduate Bulletin.

### Undergraduate Areas of Study

Coursework is available in the areas listed by major within each college according to the categories indicated.

**Key:**
- M Undergraduate/Baccalaureate major
- o Option (area of emphasis, concentration, or specialization within a major)
- m Undergraduate minor

1 B.A. degree with this major only available through the College of Science and Mathematics.
2 Offered only when taken concurrently with another major.
ACADEMIC POLICIES

Academic Credit
A credit is a unit used to compute the amount of work required for graduation. One semester credit is equivalent to one lecture period (50 minutes) in class per week for one regular semester. In the case of laboratories, a minimum of two 50-minute periods per week for one semester is equivalent to one credit. Minimum hours are prorated accordingly for variable length courses. One credit of field experience (courses numbered 196-496; 595-795) requires a minimum of 40 hours of experience/internship, up to 15 credits, with the number of credits to be determined in consultation with the student's academic advisor/department. Cooperative Education credit limits are determined by the Career Center. On average, students should expect to spend two hours of study or preparation for each hour spent in class. Preparation time varies for laboratories.

General Education Program
The purpose of general education at NDSU is to ensure that students acquire knowledge, perspectives, and skills basic to a university education. The program is designed so that graduates will be able to adapt to and anticipate changes in their profession and in society. Graduates also will be able to integrate and use the knowledge and perspectives they have gained to live productive, intellectually rewarding and meaningful lives.

Intended Student Outcomes
The intended student outcomes resulting from general education include the following abilities:

1. Communicate effectively in a variety of contexts and formats.
2. Locate and use information for making appropriate personal and professional decisions.
3. Comprehend the concepts and perspectives needed to function in national and international societies.
4. Comprehend intrapersonal and interpersonal dynamics.
5. Comprehend concepts and methods of inquiry in science and technology, and their applications for society.
6. Integrate knowledge and ideas in a coherent and meaningful manner.
7. Comprehend the need for lifelong learning.

General Education Requirements

- Courses Approved for General Education

General Education Category Descriptions
The following descriptions are elaborations of the general education categories approved by the University Senate.

- Communication is the clear, precise, and purposeful exchange of information in a variety of contexts, using either written or oral means.
- Cultural diversity focuses on the social, personal, and interpersonal effects of variety and differences among cultures.
- Fine arts, as an integral component of the humanities, promote the appreciation of aesthetics and the expression of creativity.
- Global perspectives focus on analysis of worldwide issues illustrating the interdependence of the world and its people.
- Humanities systematically explore cultural and intellectual forces shaping events, individual expression, and social values.
- Quantitative reasoning is an organized set of quantitative methods used to solve problems or extend knowledge. Quantitative methods are a set of principles and procedures that could be used to manipulate numerical data.
- Science is an organized body of knowledge, including principles and procedures based on scientific methods, used to explain physical or biological phenomena.
• **Social and behavioral sciences** use scientific methods to analyze the behaviors, structures, and processes of individuals and groups.

• **Wellness** is a dynamic and integrative process of becoming aware of healthy lifestyles, of learning to make informed choices, and of developing a balanced approach to living.

**General Education Program Assessment**

General education assessment has three basic purposes:

1. To improve student learning and development by identifying the intended student outcomes for the program.
2. To provide feedback on the progress toward the intended student outcomes.
3. To use the feedback to modify aspects of the program to ensure that the outcomes are being achieved and that student learning is improved.

Assessment activities are valued at NDSU and include the participation of students. Results will not be used to penalize students or faculty. Student performance on assessment of the general education program will not become part of the transcript.

**General Education Administrative Policies**

1. General education courses may be used to satisfy requirements for both general education requirements and the major, minor, and program emphases, where applicable.

2. Departments or colleges may preclude their students from double counting general education courses.

3. Department or college requirements for graduation may exceed the minimum general education requirements.

4. Except for courses that meet the cultural diversity or global perspectives requirements, no course can fulfill the requirements for more than one general education category.

5. General education requirements can be met through the College Level Examination Program (CLEP), DSST, International Baccalaureate (IB), departmental examinations, the Advanced Placement program (AP) of the College Entrance Examination Board, or equivalents.

6. General education requirements can be met by successful completion of a course for which an approved general education course in the same department is a prerequisite or by successful completion of an advanced course in the same department with comparable course content.

7. No general education course may be taken for graduate credit.

8. Except for courses offered only on a pass/fail basis, no courses taken to meet the general education requirements may be taken for pass/fail grades.

9. The general education minimum requirements apply to all undergraduate degree programs as well as the professional degree program in pharmacy.

10. Transfer students meet NDSU's general education "College Composition I and/or College Composition II" requirement in the lower-division Communication category if they have credit in any English course (in composition, composition and literature, or the equivalent) totaling at least 2.67 semester credits per course. Transfer students who have only partially fulfilled general education category requirements by transfer-approved courses must complete the requirements in approved courses within the NDSU deficient categories. No category credit requirement may be deficient by more than a partial semester credit. However, in the communication category, if the transfer course(s) have been evaluated as equivalent to ENGL 110, 120, and COMM 110 and total no less than eight semester credits, the lower-division category requirement has been met. The total for all general education categories must be at least 39/40 semester credits for new students.

11. Students may receive placement credit for ENGL 110 based on composite ACT score and satisfactory performance in ENGL 120 or equivalent.

12. A student who has completed a general education program consisting of a minimum of 36 semester credits at a regionally accredited institution and who transfers to NDSU or who pursues a second baccalaureate degree at NDSU is considered to have completed his or her lower-division general education requirements at NDSU.

13. General education courses at other accredited institutions, which do not have equivalent courses or general education status at NDSU, may be accepted in transfer as part of the general education requirements at NDSU.
General Education Transfer

Students transferring general education credits within the North Dakota University System need to consult with advisors in their academic programs at NDSU for two reasons. First, degree requirements of individual programs and colleges at NDSU may exceed the university-wide general education requirements. Second, meeting the university-wide general education requirements by transfer credits may not necessarily prepare students for advanced, upper-division study in an academic major at NDSU.

North Dakota University System Transfer Agreement

The North Dakota University System (NDUS) General Education Requirements Transfer Agreement (GERTA) was established by the State Board of Higher Education to ease student transfers within the system. Although subject to revision by the board, the policies at the time of printing were the following:

1. If students have completed the lower-division general education course requirements (36 credits or more) at one NDUS institution and transfer to another NDUS institution, then the lower-division general education requirements will have been met.
2. If the general education requirements have not been completed before transferring, the general education courses from the indicated areas are applicable to an appropriate general education requirement of the institution to which they are transferred. In these cases, the number of credits required to complete the general education requirement in each area is determined by the policies of the institution to which the courses are transferred.

NDSU courses commonly accepted in transfer as general education courses at other ND University System institutions are designated in parentheses after the course title in the Course Descriptions section of this publication. For example, the designation (ND: Hum) indicates general approval of that course for ND University System transfer in the humanities category. (The general education category requirements across ND University System institutions are similar, but not identical.) Students transferring from non-ND University System institutions will have their general education requirements evaluated on a course-by-course basis when they enter NDSU.

Evaluation of Transfer Credit

The Office of Registration and Records administers the NDSU policies governing the acceptance of credit from outside institutions. These requirements apply to returning students who have attended other institutions, as well as new transfer students. Before credits may be evaluated for specific NDSU course equivalency or application to departmental programs, transfer courses must be accepted for university credit according to the following guidelines:

1. College-level coursework from regionally accredited colleges or universities (or equivalent for international institutions) is eligible for acceptance in transfer.
2. Courses accepted in transfer will not replace any grades or credits earned at NDSU. If a course is completed at NDSU and an attempt is made to repeat that course elsewhere, the credit is considered duplication and is not eligible for transfer.
3. Credit for a remedial course is not accepted for transfer if the course is remedial by definition of the transferring institution or if it is equivalent to a remedial course at NDSU. It may, however, fulfill prerequisite requirements.
4. Technical or vocational coursework from regionally accredited institutions may be accepted as free elective credit only.
5. Credit will be evaluated not only as it appears on the transcript, but also on the basis by which the credit was initially awarded by the sending institution. Credit by examination, credit awarded via placement, or life experience is not accepted for transfer.
6. The Office of Registration and Records determines the applicability of transfer credit toward NDSU general education requirements according to institutional and North Dakota University System guidelines, where applicable.
7. College-level credits that do not have course equivalents at NDSU will be accepted as free electives and may count only toward total credits. The academic department may determine whether these transfer electives may satisfy specific curricular requirements through a course substitution process. (See also General Education Administrative Policies.)
8. NDSU requires that a minimum of 37 credits toward a baccalaureate degree be earned at the junior or senior (300- and 400-level) level. Therefore, while a freshman- or sophomore-level (100- or 200-level) course transferred from another institution may satisfy a specific upper-level program requirement at NDSU, that course will not be counted toward the 37-credit upper-division degree requirement.
9. Transferable courses with "D" grades or above will be accepted by the university; however, colleges and departments may have higher standards to determine course applicability toward their respective majors and programs.

10. The name of transfer institutions and total credits accepted by NDSU will be indicated on the official NDSU transcript. Individual transfer courses are not detailed on the academic record, but will be provided in a Transfer Equivalency Worksheet after admission to the university.

11. Total transfer credits are converted to semester credits, if applicable.

12. Transfer grades are not recorded nor computed in the institutional cumulative GPA. They are used only for purposes of admission to the University and to certain programs, as well as for determining eligibility to graduate with honor.

Common Course Numbers

Institutions in the North Dakota University System have established common course numbers (CCN) for many courses to facilitate transfer within the system. Under the CCN agreement, transfer students who have successfully completed CCN courses will not be required to retake them at NDSU unless their degree program requires a higher grade. However, CCN courses will not fulfill residence requirements nor will 100- and 200-level courses fulfill upper-division requirements for graduation.

Credit by Examination

Students may demonstrate evidence of college-level achievement through the use of nationally standardized tests. Competency to write these examinations may have been gained through intensive preparation in high school, extensive reading in a particular field, or other types of formal or informal preparation. A student may not repeat by proficiency testing a course that has been previously taken or failed at NDSU or another accredited institution. Score reports must be sent directly to NDSU from the awarding agency/board. School reports and student-issued grade reports are not considered official for purposes of awarding credit by examination.

Advanced Placement Examination (AP)

Students from high schools that participate in the Advanced Placement Program may earn credit through examinations provided by the College Entrance Examination Board (CEEB). The examinations are administered at the conclusion of a college-level course taught in participating high schools. AP Score Reports are sent to the colleges or universities designated on your exam answer sheet. If you did not designate NDSU on your answer sheet you may contact AP Services (see below) to have your scores sent to NDSU. The code for NDSU is 6474.

In accordance with North Dakota University System policy, a minimum score of three is required to receive credit for the following Advanced Placement (AP) examinations. If NDSU does not have an equivalent course, free elective credit may be awarded. Credit earned through AP is not residence credit and may not be used to satisfy residence-credit requirements for graduation.

College Level Examination Program (CLEP)

CLEP is a national testing program sponsored by the College Entrance Examination Board (CEEB).

According to North Dakota University System policy, a minimum score of 50 is required to receive credit for CLEP subject examinations. If NDSU does not have an equivalent course, free elective credit may be awarded.

The following CLEP policies apply at NDSU:

1. The Subject Examination should be taken prior to enrollment in the equivalent or more advanced college-level course.
2. Scores from a Subject Examination may not be used to establish credit for a course previously taken and failed or for a course in which the student is currently enrolled.
3. Six months must elapse before an examination may be repeated.
4. Credit earned through CLEP is not residence credit and may not be used to satisfy residence-credit requirements for graduation.

CLEP Registration and Fees:

NDSU is a national testing center for students wishing to take CLEP examinations. CLEP Examinations are computerized and administered as needed. To register for a CLEP Examination, contact the NDSU Counseling Center, 212 Ceres, 231-7671. The current fee for each of the Subject Examinations is $92 ($97 after July 1).

Military personnel should call (877) 471-9860 (toll free) or (651) 603-3012 to order a military transcript.

*Please contact the NDSU Office Registration and Records at 701-231-7981 for more information on credit awarded for this test.*

---

**DSST Examinations**

NDSU recognizes the DSST (Dantes) examination, which was originally designed for the military as a way to provide individuals an opportunity to obtain college level credit for what they have learned in nontraditional ways. Now available for civilian use, the DSST Test Control Officer (TCO) administers the exams on more than 560 military installations and official DSST test centers. The main users of the exams include adult education programs, U.S. Department of Defense, and two- and four-year colleges and universities.
In accordance with North Dakota University System policy, students must receive a minimum score on the examinations to qualify for possible awarding of credit and advanced placement, which is determined by the appropriate academic department on campus. If NDSU does not have an equivalent course, free elective credit may be awarded. Credit earned through DSST may not be used to satisfy residence-credit requirements for graduation.

International Baccalaureate (IB)

NDSU recognizes the International Baccalaureate program, offered at many high schools in the United States and abroad, which allows students to take examinations for credit. The examinations are offered at the standard (SL) and higher (HL) levels.

In accordance with North Dakota University System policy, students must receive a predetermined minimum score on higher-level (HL) examinations to qualify for possible awarding of credit and advanced placement, which is determined by the appropriate academic department on campus. Credit earned through IB may not be used to satisfy residence-credit requirements for graduation.

**Course Challenge**

A student who is currently registered may seek credit by challenging a course. A course challenge usually consists of a special comprehensive examination; however, additional types of performance may be required for some courses. A course challenge is only permitted for courses in which the student has no previous record (prior registrations allowable if course was dropped prior to the No Record Drop deadline in a given term). Further, credits earned by course challenge will not satisfy requirements toward a graduate degree.

**Procedures for pursuing a course challenge include the following:**

1. Obtain a **Petition for Course Challenge** form, available online.
2. Obtain approval from the academic advisor, the instructor of the course, and the chair of the department offering the course. Clarify expectations of the challenge, e.g., examination only or examination plus other performance. Based on the nature of the course and content area, some courses may not be approved for challenge by the department.
3. Pay the course challenge fee at the **Bison Connection** after receiving approval for the challenge (50% of the regular credit tuition charge; not subject to tuition cap).
4. Arrange a mutually convenient date and time for the challenge with the instructor or department.
5. Upon receipt of the signed Petition for Course Challenge form from the department, courses and credits successfully challenged are listed on the student's academic transcript with a passing grade. Unsuccessful challenges are not recorded.

**Academic Degree and Credit Information**

To receive a baccalaureate degree from NDSU, students must complete all of the requirements listed in this section as well as those specified for the particular degree program by a college within the university. Consult the appropriate section of this bulletin for sample curricula or contact the academic department for further information on degree requirements. Degree candidates must satisfactorily complete one of the degree curricula offered at NDSU. Because curricula are subject to change annually, students are responsible for determining curricular expectations according to the following guidelines:

1. Intended degrees, as well as second majors and minors, must be declared to become official by providing notice to the **Office of Registration and Records, 110 Ceres Hall**. Students may follow any published curricula declared with the university from the semester/year of entrance at NDSU or from the year of admission to a limited-enrollment program, whichever applies, to the year of graduation provided enrollment at NDSU has not been discontinued for more than one year.
2. Students who change their majors, minors, or type of degree are subject to meeting the requirements in effect during the academic year in which the new curriculum was declared. Students may follow any published curricula from the year the new curriculum was declared to the year of graduation provided enrollment at NDSU has not been discontinued for more than one year.
3. Students who advance in limited-enrollment programs will have their academic program/plan status changed accordingly by the appropriate academic department.
4. Any student who discontinues enrollment at NDSU for more than one year is subject to meeting the curricular requirements in effect at the time of re-entry.

Each program of study presented by a candidate for the baccalaureate degree is audited for meeting the degree requirements by the Office of Registration and Records. Degree candidates are certified by the Office of Registration and Records according to total credits earned, institutional grade-point average, and other university requirements.

**Baccalaureate Degrees**

A degree is the title that the university confers on a graduate who has completed university requirements for graduation. NDSU confers the following degrees at the undergraduate level:
• Bachelor of Accountancy (B.Acc.)
• Bachelor of Arts (B.A.)
• Bachelor of Fine Arts (B.F.A.)
• Bachelor of Landscape Architecture (B.L.A.)
• Bachelor of Music (B.Mus.)
• Bachelor of Science (B.S.)
• Bachelor of Science in Agricultural and Biosystems Engineering (B.S.A.B.En.)
• Bachelor of Science in Architecture (B.S.Arch. pending)
• Bachelor of Science in Civil Engineering (B.S.C.E.)
• Bachelor of Science in Computer Engineering (B.S.Cpr.E.)
• Bachelor of Science in Construction Engineering (B.S.Con.E.)
• Bachelor of Science in Construction Management (B.S.Cons.M.)
• Bachelor of Science in Electrical Engineering (B.S.E.E.)
• Bachelor of Science in Industrial Engineering and Management (B.S.I.E.Mgt.)
• Bachelor of Science in Manufacturing Engineering (B.S.Mfg.E.)
• Bachelor of Science in Mechanical Engineering (B.S.M.E.)
• Bachelor of Science in Nursing (B.S.N.)
• Bachelor of University Studies (B.U.S.)

In addition, NDSU awards graduate degrees at the following levels:

• Doctor of Education (Ed.D.)
• Education Specialist (Ed.S.)
• Master of Accountancy (M.Acc.)
• Master of Architecture (M.Arch.)
• Master of Arts (M.A.)
• Master of Athletic Training (M.Atr.)
• Master of Business Administration (M.B.A.)
• Master of Education (M.Ed.)
• Master of Engineering (M.Engr.)
• Master of Music (M.M.)
• Master of Managerial Logistics (M.M.L.)
• Master of Natural Resources Management (M.N.R.M.)
• Master of Public Health (M.P.H. pending)
• Master of Science (M.S.)
• Master of Software Engineering (M.S.E.)
• Master of Transportation & Urban Systems (M.T.U.S.)
• Doctor of Musical Arts (D.M.A.)
• Doctor of Nursing Practice (D.N.P.)
• Doctor of Pharmacy (Pharm.D.)
• Doctor of Philosophy (Ph.D.)

**Second Degree**

A second baccalaureate degree may be earned at NDSU with all of the following provisions:

1. All curriculum requirements are satisfactorily completed.
2. A 30-credit minimum is earned in residence beyond all of the credits and degree requirements for the first baccalaureate degree. All requirements for both degrees must be met, including the separate residency requirements at NDSU for each (36 for the first; 30 for the second). Any repeated courses do not count toward the 30 credits.
3. Each degree must be different. However, students may complete requirements for more than one major within a given degree, if available (see second/multiple majors).

**Majors and Minors**

Majors and minors are integral parts of baccalaureate degree curricula, particularly of those curricula that are largely elective.
**Major:** A major is a planned grouping of related courses that totals a minimum of 32 credits. Specific curriculum requirements for majors may be acquired from the appropriate departmental office or from Registration and Records.

**Minor:** A minor is a similar grouping of courses that totals a minimum of 16 credits. A minimum of eight credits must be earned in residence at NDSU. Students are responsible for following the requirements in place at the time a minor is officially declared with the university.

**Second or Multiple Majors:** A second (or multiple) major may be earned by completing the requirements of both (or all) majors offered under the same baccalaureate degree. At least 15 unique credits must exist between the majors. When requirements for multiple majors are met concurrently, all majors are displayed on the diploma.

Multiple majors or minors may be completed and recorded on the student's academic record after the degree for the first major has been awarded. When majors under different degrees are involved, the requirements for a second degree apply (See Second Degree).

**Certificates**

A certificate program is a specialized course of study requiring at least 16 credit hours at the undergraduate level or eight credit hours at the graduate level. Certificates may be earned while in pursuit of a degree or as standalone programs of study. Prospective students interested in certificate programs, but not seeking a degree, must be accepted to the university. Contact the Office of Admission or the Graduate School for further information. Curricular requirements and verification forms are available in academic departments offering certificates. Completed forms must be signed by the appropriate department chair (and Graduate School, if applicable) and submitted to Registration and Records in order for the certificate to be posted to a student's academic record and official documentation issued.

**Exceptions to Academic Program Requirements**

Academic policies and requirements are designed to ensure that programs at NDSU are consistently of high quality. All university requirements prescribed by the University Senate must be met. Students may request substitutions or waivers for college or departmental requirements when extenuating circumstances prevail.

Students should initiate such requests with the Office of Registration and Records. Reasons for the request along with supporting evidence must be provided. In cases where deviation from the requirements might affect a student's eligibility to enroll in a particular course, the student should begin the process early during the previous term to ensure timely processing.

**Graduation Requirements**

In fulfilling graduation requirements, two sets of requirements must be met: university-wide requirements, which include the general education and college- or department-level requirements, which include requirements for completing majors and minors. College- and department-level requirements for majors and minors are listed in the college sections of this bulletin under the appropriate college listing, and in curriculum guides available in Registration and Records and academic departments. University graduation requirements are as follows:

1. **Academic major:** Satisfactory completion of all requirements of the curriculum in which one is enrolled. Earn a minimum total of 122 credits in approved coursework. Requirements for some academic majors exceed this minimum.
2. **General education requirements:** Satisfactory completion of the general education requirements as specified.
3. **Scholastic standing:** A minimum institutional grade-point average of 2.00 based on work taken at NDSU for which grades have been assigned is required for graduation. When a course is taken and repeated at NDSU, only the last grade and credits earned will be used in computing the cumulative grade-point average; however, all attempts appear on the transcript. Some academic programs require more specific grade-point requirements.
4. **Upper-level credit requirements:** At least 37 of the credits presented for graduation must be in courses taken at the 300 and 400 level.
5. **Residence requirements:** Resident credits include credits registered and paid for at NDSU while attending courses offered on campus, in Tri-College, or via distance education. The last 30 credits must be earned in residence.
6. **Transfer Students:** A transfer student must earn a minimum of 60 semester credits from a four-year institution. Of these, at least 36 must be NDSU resident credits as defined above. Within these 36 resident credits, minimum requirements include 15
semester credits in courses numbered 300 or above (37 upper-level credits must still be earned in total) and 15 semester credits in the major field of study.

7. **Financial obligations**: Satisfy all financial obligations owed to the university.

8. **Application for degree**: All candidates for a baccalaureate or Pharmacy Doctorate degree must indicate their intent to graduate when registering for their last semester. The application forms are available in the Office of Registration and Records, or online at www.ndsu.edu/bisonconnection. Failure to apply by the published graduation application deadline of the planned semester of graduation may delay the awarding of the degree until the following semester. If a student fails to complete the required courses by the intended graduation term, the student must reapply for graduation in a following term.

**Degree Audits**

A degree audit is an official review of graduation requirements to determine a student's graduation eligibility. Students who have completed a minimum of 75 credits are notified and asked to complete the degree audit request. Degree audits are not automatically completed as student educational and degree goals vary (multiple degree, majors, minors, etc.). An official degree audit is completed by the Office of Registration and Records two semesters prior to the student's reported graduation on the audit request.

**Graduation with Honor**

Graduation with honor applies only to the baccalaureate and Pharm. D. degrees. Graduate courses are not included in the computation. Candidates who entered NDSU as freshmen and who have earned a minimum institutional grade-point average of 3.50 will graduate with honor. Candidates with transfer credits must meet the minimum institutional grade-point average of 3.50 for all credits earned at NDSU, as well as a cumulative grade-point average of 3.50 for all credits earned including those from transfer work. All grades and all attempts of repeated courses are included in grade-point average calculations for graduating with honor. Students who meet these academic criteria will graduate according to one of the following honor levels:

- **Cum Laude** -- equal to or greater than 3.50 and less than 3.70
- **Magna Cum Laude** -- equal to or greater than 3.70 and less than 3.90
- **Summa Cum Laude** -- equal to or greater than 3.90

**Degree Posting**

Earned degrees are posted to academic records approximately three weeks following the close of the semester in which degree requirements were successfully completed, provided students declared their intent to graduate in that same term with the Office of Registration and Records.

**Diplomas**

Diplomas are mailed approximately six weeks following the close of the academic term in which graduation requirements have been completed. Neither diplomas nor official transcripts will be released for students who have outstanding debts owed to the university. Students are responsible for submitting any name and address corrections for diploma processing. A diploma replacement service is provided by the Office of Registration and Records for those who have lost or damaged their diploma. The cost is $25.

**Commencement**

Commencement exercises are held at the close of fall and spring semesters.

Students who complete graduation requirements during the summer are eligible to participate in the May commencement exercises. To participate in the May commencement exercises, students must be registered in the remaining graduation requirements for the summer session of the same year. Individual colleges may set more stringent requirements.

A student may participate in commencement only once for a particular degree. The date of degree conferral will be printed on the diploma according to the academic calendar of the university.

Reservations for commencement must be made by the date specified by the Office of Registration and Records. Orders for caps, gowns, and hoods are made by the date specified by the NDSU Bookstore. Commencement information is available at www.ndsu.edu/commencement.
Academic Calendar

Academic Year

NDSU operates on a semester system consisting of two 16-week fall and spring semesters, including final examination weeks. A 12-week summer session is offered, and includes standard 4-week and 8-week courses. Variable-length, short-term courses also are offered each semester, however, the total contact (class) hours are the same as the regular semesters.

Mid-Term Grades

Upon request, all instructors shall inform students directly of their approximate mid-term grades before the end of the eighth week of the semester.

Dead Week

Only one exam or quiz per course may be given during the last two weeks of the semester (prorated accordingly for variable length courses), which includes finals week. Exceptions include summer classes, self-paced/correspondence courses, make-up exams, courses in which laboratory is incorporated with a lecture, one-credit courses, and quizzes that account for less than 5% of the students' overall grade. If a professor chooses to give an exam during the last week of classes, he/she is expected to make some instructional use of the final examination time.

Final Examinations

Final examinations in one-credit or variable length courses are usually given during the last regular class period. Final examinations for all other courses are scheduled by the Office of Registration and Records and may not be rescheduled during the final examination period. According to State Board of Higher Education policy, the examination period is instructional time and, if a final examination is not given, some instructional use of this period is expected. Final examinations for summer school and distance and continuing education classes are arranged by the instructors.

No student shall be obligated to take more than three final examinations scheduled for the same calendar day. In the event that a student has four or more final examinations on the same calendar day, the student shall notify the instructor(s) from the highest numbered course(s) no later than two weeks before the last day of class to schedule a make-up examination to be administered at a mutually acceptable time.

Academic Planning and Registration

Students are advised to prepare long-range plans according to curricular guidelines for the degree program selected. Attention to such details as semester credit loads and course sequences are recommended for optimum experiences.

Academic Advising

The academic advising program at NDSU is designed to facilitate the student's intellectual and personal growth, to assist students in using university resources, and to guide students in making informed choices regarding academic and career plans. Following admission to NDSU, each student is assigned an advisor from the college or department in which the student is majoring. If a major has not been declared, an assignment is made with an advisor in the College of University Studies. An advisor assists a student in selecting courses to ensure a well-balanced education and helps interpret university and college policies and requirements. However, students are fully responsible for their academic decisions including selecting courses, meeting course requisites, corequisites/prerequisites, and adhering to policies, procedures, and deadlines. An advising period, known as Advising Week, typically begins one week prior to registration each semester. Students should see their advisor prior to registration. Students with advisor holds are required to meet with their advisors to have the hold lifted. Advisor assignments and holds may be viewed on Campus Connection.

The Office of Registration and Records serves as the centralized support center for academic advising on campus. Each of the colleges on campus has a designated staff member in Registration and Records who serves as a liaison to support and facilitate academic advising activities.
Because of the diverse student population at NDSU, other advisory services are provided to meet special needs. Refer to Student Resources for additional services.

**Classification of Students**

Undergraduate degree-seeking students are classified according to the total number of credits earned. Classification in a declared program or plan of study may vary from the classification used by the university in determining academic standing, financial aid award levels, etc.

<table>
<thead>
<tr>
<th>Classification</th>
<th>Completed Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>Freshman</td>
<td>0 - 26</td>

</tr>
</tbody>
</table>

Credit limitations may be placed on students who have not been fully admitted to a degree program at NDSU:

**Undergraduate non-degree student:** One who is not seeking a degree or has not completed the formal application process for admission. A maximum of 15 credits may be completed while under special status.

**Conditional graduate standing:** One who holds a baccalaureate degree and shows potential for successful graduate study, but does not meet all requirements for admission or has not satisfactorily completed prerequisite coursework. A maximum of 12 credits may be completed while under conditional status. Students may, in consultation with their major advisor, request a change to full graduate standing after demonstration of specified capability in graduate studies.

**Graduate non-degree standing:** One who holds a baccalaureate degree from an institution of recognized standing may enroll as a non-degree student. This category is for individuals who desire to pursue study beyond the baccalaureate degree for personal growth and improvement of skills, but not in order to work toward an advanced degree objective. No more than 10 credits taken under non-degree status with a grade of B or higher may be transferred to any official program of study at NDSU. Students who decide to pursue full graduate admission are expected to complete the full application process.

**Note:** Non-degree and special students may not represent the university in any extracurricular activities nor join any student organization to which co-curricular eligibility rules apply, and are not eligible for financial aid.

**Eligibility for Co-Curricular Activities**

Unless granted special permission by the Vice President for Student Affairs, students must fulfill the following to be eligible to participate in any public program or public contest: satisfy entrance requirements, be classified, be registered for and successfully carrying at least 12 college credits during the current semester, and have earned at least 12 college credits in residence during the semester of last previous attendance.

**Registration**

Registration is required of all who attend classes. Dates and deadlines for advising and registration are made available in the NDSU Academic Dates and Deadlines calendar posted online on the Bison Connection web site. Students should see their advisor before they register (see Academic Advising).

**Schedule of Classes:** The most current and complete listing of classes is made available on Campus Connection prior to Advising Week. A course listing also is available on the Bison Connection web site.

**Online Registration:** Enrolled students may register online via Campus Connection, NDSU's student information system. Registration instructions are posted online on the Bison Connection web site.
On-site Registration: On-site registration is provided for new students and for those who are unable to or who choose not to register online.

For registration purposes, students are grouped into the following three general categories:

- **Currently enrolled students:** Currently enrolled students are assigned registration appointment times according to total credits earned. Registration appointments may be viewed on Campus Connection. Registration for summer session may be completed during the previous spring at the same time as registration for fall semester.

- **Returning students:** Returning students are those who have previously attended NDSU, but who have not been in attendance for at least one full regular semester (fall or spring). Returning students are assigned registration appointment times according to total credits earned after the Reactivation/Petition for Readmission is received and processed in the Office of Registration and Records. Registration appointment times may be viewed on Campus Connection.

- **New students:** Detailed information regarding orientation and registration options is sent to all new students from the Office of Orientation and Student Success. Admitted transfer students may register on Campus Connection along with NDSU students, or may attend a transfer orientation and registration program. Registration appointment times are based on the total number of credits accepted in transfer to NDSU.

**Dual Career/Level Registration**

1. **Graduate students who wish to enroll in undergraduate coursework must follow the procedure below that most closely matches their academic intent:**
   - If undergraduate coursework is a prerequisite or condition of admission to a graduate program of study, obtain approval from the Graduate School. This coursework will be charged at the undergraduate rate and will be recorded on an undergraduate record.
   - If undergraduate coursework is to be applied to an undergraduate program in which the student plans to enroll concurrent with a graduate program of study, submit either an Undergraduate Application for Admission (if never enrolled as an undergraduate at NDSU) or a Reactivation Form (if previously enrolled as an undergraduate at NDSU). This coursework will appear on an undergraduate record and be charged at the undergraduate rate.
   - If undergraduate coursework is to be applied to a graduate program of study (select programs only), obtain approval from the Graduate School. This coursework will appear on a graduate record and be charged at the graduate rate.

2. **Undergraduate students who wish to enroll in graduate coursework must follow the procedure below that most closely matches their academic intent:**
   - If graduate coursework is to be applied to a graduate program of study, student must be admitted to the Graduate School. This coursework will appear on a graduate record and be charged at the graduate rate.
   - If graduate coursework is to be applied to an undergraduate program of study (such as in substitution for a degree requirement), departmental permission is required. This coursework will appear on an undergraduate record and will be charged at the undergraduate rate.

Forms and instructions for ensuring that undergraduate and graduate coursework are applied to the appropriate academic career records are available at [www.ndsu.edu/bisonconnection](http://www.ndsu.edu/bisonconnection).

**Changes in Registration**

Registration deadlines for standard-length fall and spring semester courses are posted online. Deadlines for variable length and summer session courses are adjusted proportionately.

**Adding Courses/Sections**

Students may add courses to their schedules via Campus Connection until the published deadline to add online. After this deadline, an authorized "Class Permit" for each course to be added must be acquired from the department offering the course and submitted to the Office of Registration and Records or Bison Connection.
Dropping Courses/Sections

No-record drops: Students may drop a course from their schedule without it appearing on their academic record until the published No Record Drop deadline.

Record (W) drops: Students may continue to drop courses after the no-record drop period until the published Drop deadline. However, such drops will be recorded on student transcripts with "W". These indicators do not affect grade-point averages, but are counted in attempted credits for financial aid satisfactory academic progress.

Auditing Courses

An auditor may attend classes only as a listener, without participation in regular class exercises, and may be admitted to classes only with a class permit and official registration as an auditor. No credit is received for audited courses, and "AU" appears on the transcript. A student cannot fail an audit; however, an instructor may assign a "WAU" (withdrawn) for non-attendance.

A student may drop a regularly registered course and add it as an audit course by submitting a Class Permit by the published deadline. Once the audit registration is processed, the decision cannot be reversed. An audit fee is one-half of the regular tuition rate, and may be included in the tuition cap.

Instructor's Drop Policy

Instructors or departments have the option to administratively drop students who have not attended the first week (and in some cases, the first meeting) of a lecture or laboratory, or do not meet all course requisites. However, students are ultimately responsible for all course registration activity and should drop courses that they do not intend to complete. Failure to drop courses by posted deadlines may result in failing grades and debt owed the university, which might otherwise have been avoided. Administrative course drop requests by departments are submitted to and processed by the Office of Registration and Records.

Cancellation of Registration

Students who register and then decide not to attend NDSU before the semester start date must cancel their registration by submitting a Cancellation Form. Forms are available at Bison Connection. Cancellations are not accepted by telephone, and it is not possible to cancel registration or to drop an only or last course online.

Withdrawal to Zero Credits

Students who have registered and then wish to drop all courses after the semester start date must officially withdraw from the university. Failure to initiate the withdrawal process may result in "F" grades and financial obligations that otherwise might be avoided. Refer to the section on Financial Information for prorated refund deadlines for withdrawals. Procedures to withdraw from all courses include the following:

1. Read and complete the Withdrawing to Zero Credits form.
2. Contact the Counseling Center or Disability Services if assistance is needed in addressing academic, personal, financial, or other concerns.
3. Withdrawal forms are to be submitted to Bison Connection in the Memorial Union.
4. Students are responsible for any unpaid bills at the time of withdrawal.
5. Withdrawal forms must be submitted by the published deadline of the semester. Withdrawals after this date will not be processed without evidence of a compelling reason or circumstances beyond the student's control. Courses already completed at the time of withdrawal from a term will be withdrawn as well.
6. Students should not attempt to drop all of their courses, their last course or their only course online. Unlike refunds for individual course drops, withdrawal refunds are prorated and are based on complete withdrawals and withdrawal dates.

Class Attendance

Attendance in classes is expected. Only the course instructor can excuse a student from course responsibilities. (The term "course" includes class, laboratory, field trips, group exercises, or other activities.) If class attendance is a component of the course grade, the course instructor must clearly communicate this to the class in the syllabus.
The course instructor must inform students on the first day of class and in writing in the syllabus (1) of their policy regarding class absence and (2) policy, if any, for making up missed assignments. It is recognized that sometimes an assignment is impossible to make-up. Although the course instructor should exercise a fair and consistent standard for resolving questions of missed assignments, the type, extent, manner, and time frame of the make-up assignments shall be at the discretion of the instructor.

Students are responsible for informing course instructors of absences. If absences are known (e.g., university sanctioned activity), course instructors shall be informed with written notification as far in advance as possible (preferably a two-week notice). Where advance notification is not possible (e.g., illness, family emergency, etc.), students should contact their course instructor as soon as possible about the absence. When a student misses class for any reason, the student is expected to make arrangements with the course instructor to follow the course instructor's policy in making up any missed assignments, if permitted (NDSU Policy, Section 333).

---

**Student Credit Load**

The standard credit load for undergraduate and professional students is 15-18 hours per semester during the regular academic year. A minimum of 12 credits per semester is required to be considered a full-time undergraduate or professional student (9 credits in the summer). Students are limited to 20 credits per semester (15 credits in the summer). Undergraduate or professional students who find it necessary to exceed the credit limit must have an NDSU minimum institutional grade-point average of 3.0 to be eligible to petition for an overload. Petition forms are available at [www.ndsu.edu/bisonconnection/forms](http://www.ndsu.edu/bisonconnection/forms).

Graduate students full time status is 9 credits (5 credits in the summer). Graduate students must obtain approval from the [Graduate School](http://www.ndsu.edu/bisonconnection/forms) to exceed this maximum.

---

**Collaborative Student Registration**

A collaborative student is one who chooses to enroll at more than one North Dakota University System (NDUS) institution for a particular term. The institution from which the student is earning a degree is considered the "home institution." The institution(s) that supplies courses for a degree is considered the "provider institution(s)." The following guidelines pertain to courses taken collaboratively:

1. A student must be enrolled in at least one degree credit course at NDSU before enrolling in a collaborative course. Excluded from this requirement are courses taken during the summer semester as well as students using the faculty/staff tuition waiver.
2. The collaborative process allows NDSU to combine credit from more than one NDUS institution for the purpose of financial aid (for courses added through the seventh business day from the start of the term).
3. The student pays provider campus tuition/fees for collaborative course(s). This additional amount is included in the student's accounts receivable balance at NDSU.
4. Collaborative courses are not subject to the NDSU tuition cap.
5. The student cannot exceed a total of 20 credits between NDSU and the provider institution(s) without special permission from the Registrar at both (all) campuses.
6. The student must follow NDSU's academic dates and deadlines for adding/dropping collaborative courses.
7. Drop/adds must be administered through the [collaborative contact](http://www.ndsu.edu/bisonconnection/forms) at NDSU, 110 Ceres Hall.
8. Courses will be posted as transfer credit once NDSU receives an official transcript from the provider institution. Note: grades earned in collaborative courses may be used in determining financial aid satisfactory progress.
9. Completion of the [Collaborative Student Contract and Registration Form](http://www.ndsu.edu/bisonconnection/forms) does not guarantee registration into the requested course(s). However, if the request(s) cannot be processed, you will be notified at the e-mail address or phone number you provide.
**Tri-College University**

Tri-College University (TCU) is a consortium of the three major Fargo-Moorhead institutions of higher education: NDSU, Concordia College, and Minnesota State University Moorhead. Students at the three schools may benefit from what each school offers individually and cooperatively through the consortium.

Through the Tri-College course exchange, students enrolled at one campus may take courses at the other two at no extra cost and without going through separate admission procedures. Tri-College expands discipline offerings and course availability for students beyond their home campus. Tuition is paid only to the home-base campus. Courses not eligible for Tri-College registration are those offered through NDSU's Division of Distance and Continuing Education, summer self-support, off-campus or weekend courses offered through MSUM's Continuing Education program, most workshops, most graduate courses, independent study courses at Concordia College, private music instruction at Concordia, and international travel programs.

Students enrolling in classes that require special fees (lab fees, lessons, supplies, etc.) beyond the home-campus fees assessed at the time of registration will be responsible for remittance of payment to the billing department or institution.

- **New Course Exchange Policy effective Fall 2011**

**Course limits:** Concordia students - and MSUM or NDSU students wanting to take a course at Concordia - may take only one course per term under the student course exchange, and then, only if they are full-time students and only if that course is not available on their home campus at any time during the academic year. Concordia does not participate in the TCU course exchange during the summer. NDSU students wishing to enroll in MSUM coursework are expected to maintain enrollment (at least one course) at NDSU each semester. Concordia and MSUM business courses taken via Tri-College may not be applied to professional programs (majors and minors) in the College of Business at NDSU.

**Credits and Grades:** Credits earned through TCU course exchange will appear on a student's transcript and be applied toward graduation requirements and grade point averages as though they were taken at their home-campus.

Course substitutions: Students need to obtain advanced approval to substitute TCU courses for required courses in a major or minor.

**Drop/add deadlines:** Students follow their home-campus deadlines to drop or add a course, or to enroll as pass/fail, instead of at the TCU partner school where the course is offered or hosted.

**Registration and payment procedures:** Students register for TCU exchange courses at their home campus and pay their home campus tuition and fees. (NDSU students register in person in the Office of Registration and Records, 110 Ceres Hall.)

**Tri-College Minors**

The Tri-College partners recognize minors earned through the TCU course exchange. Students receive recognition on their graduation transcripts for minors completed on one of the other TCU campuses. This policy applies only to minors earned in programs not available on a student's home-campus.

**Majors**

Majors may be earned only at the school from which a student earns a degree. Most students enroll initially at the school from which they intend to graduate. However, the TCU course exchange agreement between MSUM and NDSU allows a student to begin their studies at one of the schools prior to transferring to the other school to complete their degree. Select programs have specially-designed articulation agreements intended to provide a seamless transfer process for TCU students. Tri-college students typically are restricted to pre-professional coursework in a professional program of study. Students should work with the chair of the department in which they intend to major to make sure their program includes all requirements for the major and for graduation. Students may apply for tuition reciprocity prior to transferring from their home state. In addition, a Tri-College graduate program exists in Educational Leadership.

**Library Services**

Students, faculty, and staff of the TCU institutions may use all of the libraries in the consortia. Circulating materials from TCU libraries are available free of charge for direct checkout or through inter-library loan via daily shuttle service.
A regional computer-based catalog shows availability of materials at the TCU libraries as well as more than 100 other libraries. In addition, a cooperative video collection maintained at MSUM makes videos available for onsite viewing and checkout. For details, contact a TCU library.

**Bus and Parking Services**

A Tri-College bus schedule provides inter-campus transportation to Concordia, MSUM, and NDSU every half hour. The bus is operated weekdays by the City of Fargo during the NDSU/MSUM academic year; it is not available during the summer. Bus schedules are available at the TCU office and at several locations on each campus.

A separate parking permit is not issued for Tri-College University parking. If vehicles have a current home-campus permit, they may be parked in the following lots on other campuses.

- **Concordia**: TCU students, faculty, and staff can park in Parking Lot MH/C. Parking restrictions are strictly enforced.
- **MSUM**: TCU students can park in Lots ED, P and K. TCU faculty and staff may park in Lots ED, P, K, and F.
- **NDSU**: TCU students can park in T or R Lot. TCU faculty and staff permits are valid for T-1 Lot.

All drivers are subject to traffic regulations of the respective institutions. Lot restrictions are eased after 5 p.m., but there is no overnight parking.

---

**Summer Session**

The 12-week summer session is designed to provide coursework within various time intervals. The standard four-week session begins in May; the standard eight-week session begins in June. There also are variations within these sessions, including a full 12-week term, to provide for maximum flexibility to summer students.

Each college determines its summer offerings, based upon previous experience, programmatic needs, and special requests. Special effort is made to offer courses approved for fulfilling general education requirements. The summer session course offerings are available online or from the Office of Registration and Records, 110 Ceres. For information on summer school, please call 231-8492 or 231-6133.

**Fees and Housing**

Fees are listed at www.ndsu.edu/bisonconnection/accounts. Information concerning summer housing may be secured by contacting the Department of Residence Life, Dept. 5310, P.O. Box 6050, Fargo, ND 58108, or 231-7557 (toll-free 1-800-572-8840).

**Undergraduate Admission Requirements**

The course offerings of the summer school are open to all qualified students. Students may enroll as degree candidates by meeting general university requirements as described elsewhere in this bulletin and submitting an application for admission to the Office of Admission. Students attending another institution but wishing to enroll for summer school at the university may apply for special status by submitting a Special Student Application for Admission, a $35 nonrefundable application fee, and an official transcript from their home institution (if coursework was attempted within one year prior to application).

**Credit for Courses**

While the time interval of the individual sessions is different than that of the normal semester, each course carries full credit because classes meet the same number of hours as in the standard semester.

**Graduate Work**

A range of opportunities is available for graduate work during the summer session as evidenced by the traditionally high enrollment of graduate students. A considerable number of graduate courses is offered, but generally the summer serves as an important term for students to work on their research requirements, especially if field work is involved. Work on disquisitions and individual study arrangements frequently are facilitated during summers. Courses scheduled to begin at different times and for varying periods provide a high level of flexibility. Thus, those who may have only a portion of a given summer available are likely to find courses that meet their scheduling limitations. In addition, workshops, internships, and other special programs are offered. Teachers generally find the summer school designed to offer attractive selections as components of a degree program, as well as courses directed toward
improvement of professional skills. Persons interested in graduate programs are urged to contact the Graduate School for further information.

---

**Project 65**

People aged 65 or over may audit one course per semester free of tuition and related fees, with the exception of a one-time $35 application fee.

Project 65 students are encouraged to purchase the textbooks for their courses. The transcript of a student auditing a course will show a grade of "Audit" for the course, which will not count as credit toward a degree. By definition, an auditor may attend class only as a listener. Students wishing to earn credit toward a degree must pay all tuition and fees and complete all assignments and tests.

Students should identify themselves as participants in the Project 65 program at the time of registration. For more information, contact the Office of Registration and Records, 110 Ceres (231-7981).

---

**Student Records**

**Grades and Honor Points**

The quality of student work is indicated by a letter grade. In computing scholastic averages, each letter grade is assigned a specific number of honor points for each credit earned. Student work is reported in terms of grade-point average for the term and institutional grade-point average for the composite of work at NDSU. Calculations are based on the following:

**Grade Descriptions**

<table>
<thead>
<tr>
<th>Honor Points Per Credit</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Passing grades</strong></td>
</tr>
<tr>
<td>A Excellent</td>
</tr>
<tr>
<td>B Good</td>
</tr>
<tr>
<td>C Average</td>
</tr>
<tr>
<td>D Passing</td>
</tr>
<tr>
<td>P Pass (D or better) undergraduate</td>
</tr>
<tr>
<td>S Satisfactory (C or better) graduate</td>
</tr>
<tr>
<td>W Withdrew</td>
</tr>
<tr>
<td>AU Audit</td>
</tr>
<tr>
<td><strong>Nonpassing Grades</strong></td>
</tr>
<tr>
<td>F Failure</td>
</tr>
<tr>
<td>I Incomplete</td>
</tr>
<tr>
<td>U Unsatisfactory</td>
</tr>
</tbody>
</table>

* Not calculated in grade-point average.

**Grade-Point Average Calculation**

Institutional cumulative grade-point average is calculated by dividing the total number of honor points earned at NDSU by the total number of credit hours in which honor points were recorded, including grades of "F". NDSU GPA calculations do not include developmental coursework that does not count toward the graduation requirements nor does it include coursework/grades accepted in transfer. Refer also to Pass/Fail Grading and Repeated Courses.

**Pass-Fail Grading**

Pass-fail grading is available in any given course; however, the pass/fail option may not be used for courses taken to meet general education requirements, unless the course is only offered pass/fail. Students are advised to check degree-program restrictions.
regarding acceptance of pass/fail credits. Request forms may be acquired online at www.ndsu.edu/bisonconnection. Forms must be signed by the student's advisor. Pass/fail policies include the following:

1. Students are limited to a total of 16 credits under the pass/fail grading option. Courses that are offered only for pass/fail grading for all students who enroll are not included in the 16-credit limitation.

2. Approval for the pass/fail option must be filed in the Office of Registration and Records by the published pass/fail deadline of the semester. Variable length and summer courses have prorated deadlines according to actual course length.

3. Once a pass/fail request has been approved and filed, it may not be changed back to a regular grade.

4. A grade of "P" is without honor points and is not included in the grade-point computation; however, a grade of "F" is included in the grade-point computation.

5. If a course is taken for a regular grade, it cannot be repeated on a pass/fail basis.

**Grades of Incomplete**

Under extraordinary circumstances and at the discretion of the instructor, a student may be assigned a grade of Incomplete (I). The following policies apply to Incomplete grades:

1. The grade of Incomplete is assigned to indicate that satisfactory work has been completed up to within five weeks of the semester end, and that circumstances beyond the student's control prevented completion of the work. The time period is proportional for variable length courses and summer session.

2. The grade of Incomplete is not to be given in any instance where the student has a deficiency of more than five weeks (or equivalent) of work including final exam week.

3. Grades of Incomplete are initiated by student request. The student must contact the instructor, request an Incomplete grade, and, upon instructor approval, make arrangements to complete the work.

4. The grade of Incomplete (I) is an administrative grade that may only be entered by the Office of Registration and Records, except in courses designated as practicum, internship, individual study, field experience, or study abroad.

5. An Incomplete Grade Reporting Form detailing the work to be completed, expected completion date, and grading standard is to be signed and dated by both the instructor and the student. The form is to be submitted to the Office of Registration and Records by the grade submission deadline for the semester in which the course was taken. It is advisable that the instructor, student and advisor retain copies of this form for their records.

6. Grades of Incomplete, including those for most course types identified in #4, must be removed no later than the end of the seventh week of the next full semester (fall or spring). The time period is proportional for variable length courses and summer session.

7. Grades of Incomplete are removed when the student has completed all course requirements and the instructor of the course files a Grade Reporting Form with the Office of Registration and Records.

8. All grades of Incomplete that are not removed within the specified time are automatically changed to "F" grades by the Office of Registration and Records.

9. Instructors may specify completion deadlines for remaining work on the Incomplete Grade Reporting Form earlier than the standard deadlines.

10. Requests for extensions beyond the seventh week of the next full semester require approval by both the instructor and the chair of the department offering the course. The extended deadline must be indicated on the Incomplete Grade Reporting Form and may not exceed two Incomplete conversion/deadline cycles. If a grade is not submitted by the specified deadline, the Incomplete grade will convert to a grade of "F".

11. Grades of Incomplete, which convert to grades of "F", earned in the last semester of attendance by a student who leaves the university for two or more years may be changed to Withdrawn (W) upon re-enrollment. Requests for this privilege must be filed with the Office of Registration and Records during the first term of re-entry.

12. An Incomplete grade may be converted to a letter grade (or P/F, S/U) according to the above guidelines, but may not be expunged from the record.

13. Students may not register in courses in which they currently hold grades of Incomplete, except for courses that are repeatable for credit.

14. Students are not allowed to graduate with Incomplete grades on their academic records. Upon graduation, unconverted Incomplete grades will convert to grades of "F". If a course in which an Incomplete grade was assigned is required for
graduation, the instructor may extend the deadline according to the above procedures and timelines, and graduation will be postponed.

15. Students who receive grades of Incomplete or converted grades of F may appeal disputed grades in accordance with NDSU Policy, Section 337: Grade Appeals Board.

Course Failures

The grade of "F" may not be removed by special examination or transfer credit. When a grade of "F" has been received in any given course, credit for that course may be earned only by re-enrolling in it at NDSU, or via Tri-College, and completing it satisfactorily. As with all repeated courses, the original grade will remain on the academic record, but only the latest attempt will be computed in grade-point average calculations (see Repeated Courses).

Grade Changes and Grade Appeals

With the exception of Incomplete grades, a course grade is considered final unless an appropriate appeal is filed by the student. For the student who has reason to believe the grade issued is incorrect, the student must initiate a request for a change of a grade with the instructor within fifteen (15) instructional days of the first day of the semester immediately following the semester in which the grade was awarded. For Spring Semester courses, the request may be made within fifteen (15) instructional days of the start of Fall Semester, if the student is not enrolled for a Summer term.

A grade appeal is deemed formally initiated when the student presents the Grade Appeal Form to the instructor. If there is an unsatisfactory decision, the student must consult the department head, and the dean or a designated college committee, proceeding from one level to the next only after an unsatisfactory decision of the conflict at that level. In the event that the instructor is also the department head or dean, he or she need only be consulted in the capacity of instructor. In the event of an unsatisfactory decision within the college, the student may submit the formal written appeal to the Grade Appeals Board Chair. Such an appeal shall be made within fifteen (15) instructional days after conclusion of the college proceedings as stated above. The full Grade Appeals policy (section 337), which includes hearing procedures, is available at www.ndsu.edu/policy/337.htm. Grade changes only may be considered for students who have not yet earned a degree for which the course in question was applied.

Repeated Courses

If students wish to take advantage of the repeated course opportunity to improve a grade, then that course must be repeated at NDSU, with one exception only. NDSU students may register for a Tri-College course to repeat a course previously taken at NDSU. If a course is completed at NDSU and an attempt is made to repeat that course elsewhere, the credit is considered duplicate and is not eligible for transfer. When a course is repeated at NDSU, all attempts remain on the academic record but only the credits, grades, and related honor points for the most recent attempt will be used in calculating the cumulative grade-point average and counted toward credits for graduation. However, all credits attempted and grades received will be used in computing graduation with honor. Students forfeit the previous grade no matter what grade is earned when the course is repeated.

All repeated courses are noted on the transcript to indicate the course was repeated in a following term and excluded from cumulative totals. In courses that are repeatable for credit, students must notify the Office of Registration and Records if they re-enroll for purposes of grade improvement.

Courses taken for regular A-F grades may not be repeated for pass-fail grades.

The course-repeat option to improve one's academic record is available to students who have not graduated.

Academic Forgiveness

A former NDSU student who has not completed a baccalaureate degree and has not been in attendance at NDSU for six (6) or more years, but who is presently enrolled at NDSU, may request to exclude from grade-point-average calculations all grades earned in selected full terms (quarters or semesters) completed at NDSU prior to the six-year interval.

The courses and grades for the terms selected will remain on the student's academic record, but credits, honor points, and grades will be excluded from grade-point average calculations. Excluded courses cannot be used to satisfy any academic requirements. A student may exercise this option only once by submitting a written request to the Office of Registration and Records.

Transcripts

Transcript may be requested online through Campus Connection (current students) or through www.getmytranscript.com (former students). Online ordering provides 24/7 access and additional tracking information. According to federal law, telephone requests and
requests from others on behalf of the student cannot be honored. There is a charge for an official transcript. See [Official Transcript Requests](#) for detailed transcript fee information. A request for a transcript of credits by a student who is in debt to the university will not be honored until the indebtedness has been paid. The transcript only includes detailed work completed at NDSU. Requests for transcripts of work completed elsewhere must be made directly with the respective institution. Current students may obtain [unofficial transcripts](#), free of charge, on Campus Connection.

**Correction of Transcript Errors**

Students may access their grades online at the end of each term approximately one week after the last day of final examinations. If a student becomes aware of an error in recording on the transcript, the student should first contact the instructor to verify the grade. If the error appears to be in term or cumulative total calculations, students should contact the [Office of Registration and Records](#). See also the section on [Grade Appeals](#).

---

## Scholastic Standards

Academic progress is measured by grades and credits earned. Students receive acknowledgment for high academic achievement and are given early warning when they become academically deficient.

### Academic Honesty

The primary responsibility of the students, faculty, and administration is to create an atmosphere where the honesty of individuals will not be questioned.

Faculty members are responsible for providing guidelines concerning cheating and plagiarism at the beginning of each course, and should use precautionary measures and security in cases where cheating is likely to occur.

Students are responsible for submitting their own work. Students who cooperate on oral or written examinations or work without authorization share the responsibility for violation of academic principles, and are subject to disciplinary action even when one of the students is not enrolled in the course where the violation occurred. Students have the right to be informed when they are suspected of violating academic principles and have the right to a fair opportunity to refute them.

Faculty have the prerogative of determining the penalty regarding prohibited academic conduct in their classes. Faculty members may, among other sanctions, fail the student for the particular assignment, test, or course involved. Penalties may be varied with the gravity of the offense and the circumstances of the particular case. In this situation, the student may not drop the course in question without the permission of the instructor. Faculty members will provide a written statement of the action to the department chair, dean, and [Provost and Vice President for Academic Affairs](#). In the case of the graduate students, the graduate dean also will be notified.

For complete information regarding disciplinary sanctions, appeal procedures, and hearing guidelines, refer to [www.ndsu.edu/policy/335.htm](#).

### Dean's List

To be eligible for inclusion on the [Dean's List](#) for any given semester, a student must have earned a minimum grade-point average of 3.50 during that term while completing at least 12 semester hours (nine hours during the summer) in graded coursework using grades that carry honor points. The student may not have any grades of Incomplete for the semester. The Dean's List is only maintained for undergraduate students and professional (Pharm.D.) students.

### Academic Standing

To be eligible to register continuously without conditions, a student must maintain good academic standing. The following scholastic standards, relative to completed credits and institutional grade-point average, determine a student's academic standing:

<table>
<thead>
<tr>
<th>Minimum GPA</th>
<th>Completed Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>1.75 (freshman)</td>
<td>0 - 26</td>
</tr>
<tr>
<td>1.90 (sophomore)</td>
<td>27 - 59</td>
</tr>
<tr>
<td>2.00 (junior &amp; senior)</td>
<td>60 or more</td>
</tr>
</tbody>
</table>
Records of all students are examined at the end of each grading period. Students failing to meet the scholastic standards are subject to review by the University Committee on Academic Standards. Academic standing relates to the following:

**Grading Period**

NDSU has three grading periods (terms) per academic year: fall semester, spring semester, and summer session.

**Grade-Point Average (GPA)**

Semester or term GPA refers to the grade-point average for any given grading period. Cumulative or institutional GPA refers to the composite grade-point average for all grading periods completed at NDSU.

**Academic Warning**

An academic warning is to alert a student that the semester GPA for the most recent term was below the minimum required for good standing for the student's classification. An academic warning does not appear on the official academic transcript. An academic warning is issued for the following:

1. A freshman whose institutional GPA is less than 1.75 upon the completion of the first term of residence at NDSU.
2. A student who transferred in good standing whose institutional GPA is deficient upon completion of the first term of residence at NDSU.
3. A student who has been in residence two or more terms and has an acceptable institutional GPA, but whose semester GPA is deficient.

**Academic Probation**

An academic probation is a formal warning that a student's institutional GPA is below minimum standards for the student's classification. Students placed on academic probation may enroll for no more than 16 credits for the following semester or 12 credits for the following summer session without permission of the college dean. An academic probation does not appear on the student's official academic transcript (fall 2005 and later). An advisor hold will be placed on the student's record, and may only be removed after the student has met with his/her advisor.

Academic probation is issued for the following:

1. A student who entered the grading period in good standing and has been in residence two or more terms, but whose institutional GPA is deficient for the student's classification.
2. A student who entered the grading period on academic warning and whose institutional GPA is deficient for the student's classification.

**Continued Probation**

Continued probation is a formal extension of the initial academic probation status and is issued when the institutional GPA is still below minimum, but adequate progress is made by attaining the minimum GPA for the term for student classification. Students placed on continued academic probation may enroll for no more than 16 credits for the following semester or 12 credits for the following summer session without permission of the college dean. Continued probation does not appear on the student's official academic transcript (fall 2005 and later). An advisor hold will be placed on the student's record, and may only be removed after the student has met with his/her advisor.

Continued probation may be issued for the following:

- A student who entered the grading period on academic probation and whose institutional GPA is still deficient for the student's classification, but the semester GPA is at or above the minimum. A continuance may be granted to a maximum of three (3) consecutive probationary terms.

**Academic Suspension**

Academic suspension is issued when the academically deficient student does not demonstrate an improvement in his or her institutional GPA. Registration for the following full semester or for summer courses that do not begin prior to the start of the standard eight week session will be canceled. A student may not be considered for readmission for two grading periods following an academic
suspension (includes summer). An academic suspension appears on the student's official academic transcript. Academic suspension may be issued after two or more terms in residence for the following:

1. A student who entered the grading period on either probation or continued probation whose semester GPA and institutional GPA are both deficient for the student's classification.
2. A student who entered the grading period for a third consecutive probationary term and whose institutional GPA is still deficient for the student's classification.

Suspension Appeals

A student who has been suspended may appeal the suspension if there were extraordinary circumstances beyond their control. An Appeal for Exception to Academic Suspension form is available online and must be submitted to the Office of Registration and Records no later than one week prior to the semester start date (or the first day of the standard 8-week summer courses) following the imposition of suspension. Supporting documentation is required.

Suspended Students

NDSU honors suspensions of other institutions. Further, students suspended from NDSU or any other institution may not transfer coursework into NDSU that was completed during the suspension period unless prior approval, through an appeal process, has been granted. Transfer and returning students who fail to report all previous college work are subject to dismissal or loss of credit or both. Courses previously completed at NDSU may only be repeated at NDSU, with the exception of Tri-College courses (see Repeated Courses section for more details).

Readmission

To be considered for readmission, suspended students must sit out for at least two grading periods (includes summer) and file a Reactivation/Petition for Readmission form to the Office of Registration and Records at least 30 days prior to the beginning of the semester in which readmission is sought. If the petition is approved by the Committee on Academic Standards, the student may register, but will be readmitted on probation. Students who have been enrolled in courses at another institution since leaving NDSU must arrange for an official transcript to be sent to the Office of Registration and Records before readmission will be considered. However, courses/grades earned from another institution during the suspension period will not be considered for transfer unless prior approval is granted through an appeals process.
Academic programs in the College of Agriculture, Food Systems, and Natural Resources open doors to exciting and rewarding opportunities. Agriculture is the foundation upon which NDSU was established in the late 1800s. Today, the college builds on that tradition with teaching, research, and outreach that improve the lives of people throughout the region and the world.

Mission and Values

The college provides relevant and challenging academic programs that prepare students to capitalize on current and future opportunities. Programs are based on fundamental sciences and technologies applied to agricultural life and environmental disciplines as well as related social and economic fields.

NDSU agriculture is taking its place as one of the nation's leaders. Our commitment to excellence has inspired new courses of study and has built ongoing partnerships with agricultural industries and government agencies.

Demand for graduates with expertise in the college's many disciplines continues to grow rapidly. Career opportunities for men and women are expanding into new areas made possible by new technologies and a more comprehensive global perspective.

Food safety and security, biotechnology and genetics, sustainable production and land stewardship, bio-energy and bio-products, and human/animal health are emerging national priorities. Our faculty members are at the forefront of these and similar critical issues. Our students can engage their interests while gaining valuable hands-on learning experiences in the field, laboratories, and through interactions with business partners across the region.

Affiliated Programs

A major in Agricultural and Biosystems Engineering is offered by the College of Engineering and Architecture. The College of Human Development and Education offers a major in Agricultural Education. These majors rely on the expertise and resources from the College of Agriculture, Food Systems, and Natural Resources.

Agricultural Education

NDSU is designated by the State Board for Career and Technical Education as the recognized institution for preparing teachers of Agricultural Education. See the School of Education section in this Bulletin under the College of Human Development and Education for more information.

Interdisciplinary Studies

The college contributes strongly to interdisciplinary studies in natural resources management, food safety, logistics management, and several graduate programs. See Interdisciplinary Programs section of this Bulletin for more information.

Graduation Status

Degree programs are designed for completion in four years. Graduation status review is available to students after 75 credits are earned.
Graduate and Professional Schools

The college's academic programs are excellent preparation for continued formal education in graduate school programs and in professional schools such as law schools and medical schools. For more information on graduate school opportunities at NDSU see: www.ndsu.edu/gradschool.

Honor System

A student-elected honor system recognizes the ability of students to govern themselves. The honor system, in place since 1955, provides an enhanced learning environment. All students enrolled in agriculture courses are required to uphold the honor system.

Scholarships

Students in the college who have selected one of the college's majors are eligible for scholarships through their major department and the dean's office. Scholarships are awarded to students who have demonstrated excellence in their courses. About one-third of students in the college receive scholarships. Students are encouraged to contact their major department or the college Web site for scholarship opportunities.

Student Organizations

Nearly 30 agriculture-related clubs and organizations provide opportunities for students to develop leadership, teamwork, interpersonal and communication skills.

Field Experience, Internships, Cooperative Education

Students gain practical experience and credits by enrolling in a supervised field experience (internship) offered through individual departments. Another option, offered by the Career Center, provides undergraduate and graduate students with career-enhancing experiences and academic credits through the Cooperative Education program. The number of cooperative education credits allowed for graduation varies by program, but should not exceed six for any program in the college.

International Study

The college encourages students to gain international perspectives in their studies. Besides study abroad, students might consider adding the international studies major to their program in the college. Additional information is available from departmental offices or through the university's Office of International Programs.

General Agriculture

General Agriculture Major

The degree program in General Agriculture is designed to serve students who wish to pursue a college education in a broad area of agriculture or who want to tailor a program to meet their specific career objectives. Traditionally, students interested in careers focusing on agricultural production follow this program of study.

Students electing to graduate with a General Agriculture major must file a "plan of study" with the General Agriculture Coordinating Committee by the third week of the second semester of their junior year. This plan of study must include a "statement of goals" or why a tailored degree is desired and an outline of courses to be taken to meet their stated career goals. Identification of the capstone course and any internship that the student plans to take should also be included in the plan of study.
General Agriculture Minor

A minor in General Agriculture may be obtained by satisfactorily completing 24 credits with at least six credits in each of any four disciplines offered by the College of Agriculture, Food Systems, and Natural Resources. A minimum of eight credits must be taken at NDSU.

MINOR REQUIREMENTS

Department of Agribusiness and Applied Economics

www.ndsu.edu/agecon

The Department of Agribusiness and Applied Economics offers three majors: (1) Agribusiness, (2) Agricultural Economics, and (3) Economics, and two minors: (1) Agribusiness and (2) Economics. Each of these programs is based on the same fundamental economic concepts and theory, but each program offers students an opportunity to focus their studies on their individual interests.

Economic theory provides a systematic and logical framework for analyzing how a society solves the problem of scarcity in deciding what goods and services to produce, how to organize production, and for whom goods and services are to be produced. Knowledge of economics is necessary to understand and deal with topics such as economic growth, monetary systems, international trade, inflation, risk analysis and management, unemployment, government finance, and various forms of market regulation.

As global population grows and the world's economies become more interdependent, economic principles become increasingly important when analyzing economic relationships, resolving problems, and pursuing opportunities among nations and economies throughout the world.

In each major, students study communication, mathematics, science and computer skills. Introductory and intermediate courses in economics address (a) microeconomic theory, which is the study of relative prices, the consequences of different market forms, and consumer behavior, and (b) macroeconomic theory, which includes the study of the general level of prices, employment, and output.

Students whose studies are based on economic concepts are in high demand. Employers recognize the need to understand global trends in order to contribute to private and public economic decisions. Agribusiness, Agricultural Economics and Economics majors are employed in virtually every area of the economy. In banks and financial institutions, they forecast market activity, exchange rates, and interest rate movements. In industrial firms, they forecast sales, evaluate changes in cost conditions, analyze changes in international economic conditions, and provide data needed for critical decisions. Governments are among the largest employers of economists because agencies rely on the skills of these professionals to evaluate and review proposed projects and policies.

Virtually no other academic major offers the diversity in employment opportunities and flexibility among careers, as does the study of economic concepts and their application in problem solving and decision making. A background in economics provides students with a set of versatile skills that will not become obsolete with the introduction of new technology. Each program, as described in the following sections, includes opportunities for students to study additional disciplines.

Agribusiness Major

The Agribusiness major allows students to focus their understanding of economics on the agribusiness sector. Students interested in careers in agribusiness have several options. Beginning in their sophomore year, students take courses in management, marketing and finance, all concentrating on the unique aspects of food and bio-systems economics. Specialization in upper division courses permits students to further concentrate based on their particular interest:

- **Management:** This option provides students with a broad background, preparing them for general career alternatives in agribusiness.
- **Finance:** This option prepares students for careers in agribusiness finance, agricultural lending, financial institution management, accounting, insurance, and investment.
- **Marketing:** This option prepares students for careers in agricultural marketing, sales, or food product marketing.
In the Agribusiness program:

Students are exposed to a range of methods useful in agribusiness decision-making. Agribusiness graduates will master problem-solving skills to face challenges likely to be encountered in their professional careers.

Agribusiness students are required to participate in an internship during their studies. Employers continue to place high importance on work-related experience when they evaluate potential employees. Employers are assured that all NDSU Agribusiness graduates have gained this valuable work experience through the required internship.

Collaboration with the College of Business leads to the concurrent satisfaction of one of the minors offered by the College of Business. Students may select business courses for the minor that complement their agribusiness interests.

MAJOR REQUIREMENTS

Agricultural Economics Major

Agricultural Economics applies economic principles to the use of private and public resources to provide a safe and affordable food supply, to produce renewable energies, to maintain a sustainable agricultural and natural resources base, and to manage natural and environmental resources for current and future generations.

Students majoring in Agricultural Economics may focus on management, marketing or finance in agriculture, food, and other bio-based systems. This major requires a broad background in the agricultural sciences, with courses from other departments in the College of Agriculture, Food Systems and Natural Resources providing students the scientific basis for applying economic concepts in decision making. Students, with guidance from their academic advisor, have opportunity to select courses that best fit their career objectives and personal interests. The Agricultural Economics major is ideally suited for students with career interest in production agriculture, farm and natural resource policy analysis, industries providing service to agriculture, rural economic development, and risk management.

Core requirements in the Agricultural Economics major include introductory courses in agricultural management, marketing and finance. Students may choose to take all of the advanced courses in the department, yet flexibility allows building a program based on a student's individual career goals.

Economics Major

Besides being invaluable for understanding contemporary political, economic and social issues, students majoring in Economics are well-prepared for careers in business, law, education, public administration, and research. Economics courses cover a wide range of applications and theory in managerial economics, labor markets, economic development, market structure, natural resources and environmental economics, and globalization and trade. Areas of specialization may emphasize such fields as money and banking, international economics, industrial organization, environmental and resource economics, and public finance.

Undergraduate students majoring in Economics may choose either the Bachelor of Arts degree which requires two years of one foreign language, or the Bachelor of Science degree which requires students to complete a minor of study from another discipline.

Minors

The department offers minors in Agribusiness and Economics. A minimum of eight credits must be taken at NDSU.

Agribusiness Minor
The Agribusiness minor is a two-track minor (Agribusiness and Corporate Agribusiness) that exposes students to applications of fundamental business concepts in an agricultural or food systems setting.

The Agribusiness track is a 17 credit minor that primarily draws on courses in Agribusiness and Agricultural Economics and emphasizes Agribusiness applications throughout its curriculum. The Agribusiness track is open to all NDSU majors.

The Corporate Agribusiness track is a 21 credit minor that emphasizes principles and courses applicable to corporate business. The Corporate Agribusiness track is restricted to students whose major is in the College of Agriculture, Food Systems, and Natural Resources.

MINOR REQUIREMENTS

Economics Minor

The minor in Economics complements many other majors by helping the student develop an analytical approach to understanding human events from the perspective of this discipline.

MINOR REQUIREMENTS

Department of Agricultural and Biosystems Engineering

www.ndsu.edu/aben

Agricultural Systems Management Major

The Agricultural Systems Management (ASM) program combines an understanding of the agricultural, biological, and physical sciences with economics, managerial, and technical skills. This understanding of science, systems management, and applications engineering can be applied to a career in the production and processing of food, feed, fiber, and fuel, and the marketing, sales, and distribution of agricultural products and services. Students focus on the application of engineering designs, the study of technology used in agriculture, and the integration of business management concepts in the agricultural, food, and closely related industries. Students complete courses in machinery principles, off-road power systems, precision agriculture, commodity handling and processing, natural resources management, electrical and electronic systems, and information and decision support technology.

Taking courses in accounting, economics, marketing, management, business law, sales, and finance develops a strong business background. Personal career objectives may be pursued through specialization in areas such as agribusiness and production agriculture. Students are encouraged to minor in agribusiness, business administration, communications, or another agricultural discipline.

Agricultural Systems Management graduates are often employed in positions that provide the link between the researcher, designer, engineer, manufacturer, and the consumer. Employers include: 1) companies and agencies that provide inputs, products, and services for agricultural production; 2) companies or agencies in the business of handling, storing, processing, and distributing agricultural products/commodities and processed food or non-food products; and 3) companies and agencies that supply physical and business services to rural and urban communities. This degree is ideal for those interested in careers in technical sales or management of an agriculture-related business involved in production, processing, or manufacturing. Graduates of the program are frequently self-employed as owners/operators of commercial farms, ranches, and businesses. They are often also employed as crop consultants or production specialists. The flexibility of the program allows students the opportunity to tailor the curriculum to complement their career goals.

Students interested in the innovation, design, testing, manufacturing, and development aspects of products, processes, or systems for agricultural production, food, and value-added processing of commodities, or sustainable management of environmental resources should consider the Agricultural and Biosystems Engineering curriculum in the College of Engineering and Architecture.

Curriculum Options

- **Agribusiness or Business Administration (16):** Students select courses in agribusiness, business, and related areas to achieve career goals in agricultural and related business areas.

  A Dealer Management Specialization within the business option is available. This specialization is designed for students who
want careers as equipment dealership managers or with equipment manufacturers. Technology, agribusiness, and communication are emphasized. Requirements include a minor in agribusiness or business administration and two paid internships with equipment dealerships.

- **Production Agriculture (16):** Students select courses in agricultural sciences and supporting areas to achieve career goals in the technical and management aspects of production agriculture systems.

- **Agricultural/Industrial Equipment Option:** North Dakota State University and North Dakota State College of Science (NDSCS) collaboratively offer the Ag/Industrial Equipment option in the Agricultural Systems Management program. This collaboration gives students primary experience in physical science, engineering technology, and machinery systems with complementary hands-on training in mechanized systems laboratories at NDSCS. Students complete their education at NDSU in agricultural systems management and complement their program by selecting a business specialization or minor emphasizing courses in management, sales, marketing, finance, and personnel management. Completion of one or more cooperative education or internship placements in the equipment industry also is required.

Potential positions available for graduates in this option include: salesperson, service manager, parts and inventory control manager, sales manager, territory service manager, finance manager, general manager, regional marketing representative, manufacturer's representative, district sales manager, and warranty manager.

---

**MAJOR REQUIREMENTS**

**Agricultural Systems Management Minor**

A minor in Agricultural Systems Management is available to students from other majors by working with department faculty to select 16 credits in Agricultural Systems Management. A minimum of eight credits must be taken at NDSU.

**MINOR REQUIREMENTS**

---

**Department of Animal Sciences**

[www.ag.ndsu.edu/ansc](http://www.ag.ndsu.edu/ansc)

**Animal Science**

The Animal Science program offers students the ability to obtain an understanding of the "big picture" of animal agriculture including courses that emphasize animal anatomy and physiology, nutrition, livestock production systems, agricultural business and marketing, and factors influencing product quality in a friendly environment that encourages learning opportunities outside of the classroom. The Animal Science faculty and staff are dedicated to providing students with the background information, as well as up to date information regarding the latest techniques in animal production and business insight, animal handling and husbandry, and laboratory skills.

Besides taking the required courses necessary for the Animal Science major, students have the opportunity to complete coursework that helps meet their specific career goals. Internships are encouraged to obtain specific skills and develop contacts necessary for success after graduation. Students graduating with a major in Animal Science are accepted in professional schools including veterinary school, and graduate programs specializing in nutrition, physiology, meat science, biotechnology, and microbiology. Graduates from the Animal Science program are highly competitive for careers in agribusiness, management for livestock production systems, livestock media and public relations, technical positions in many aspects of animal agriculture, as well as leaders in livestock production on farms and ranches.

**Curriculum Options**

Two options, each designed to strengthen career preparation, are available:

- **Production/Business:** This option is for students interested in careers associated with the production, agribusiness, and management of animals and the products they produce.
• **Science/Pre-Vet:** This option is designed for students who are interested in specific careers that require advanced course work in the biological sciences to meet the requirements for veterinary school, graduate school programs, or advanced technical programs. It also is designed to prepare students for graduate study or to provide an animal-oriented degree while meeting the course requirements for veterinary schools.

Contact the department for information on additional options which may become available.

**Transfer credits:** Transfer courses with grade "C" or better only will be accepted for Animal Science courses in the major.

**Major:** All Animal Science majors must meet the following requirements.

**MAJOR REQUIREMENTS**

---

**Equine Studies Major**

The Equine Studies major is designed to prepare students for careers in the equine industry and related fields. Course work includes practical husbandry and equitation skills, scientific principles related to management of the equine, and study of the modern equine industry and business practices.

**MAJOR REQUIREMENTS**

---

**Equine Studies Minor**

Students from other majors may minor in Equine Studies by completing a minimum of 16 credits. A minimum of eight credits must be taken at NDSU.

**MINOR REQUIREMENTS**

---

**Veterinary Technology Major**

[www.ndsu.edu/vettech](http://www.ndsu.edu/vettech)

Veterinary Technology is an exciting and challenging major that offers a multitude of career opportunities in animal health care and related areas. The Veterinary Technology major leads to the B.S. degree. This major offers a well-rounded program of general and clinical studies. Graduates are prepared not only for traditional veterinary practice careers, but also for pursuit of emerging non-traditional careers through the choice of electives and minor areas of study.

The first pre-professional year of the Veterinary Technology program is open to all interested students and offers an opportunity to explore the veterinary technology field. Advancement into the professional program in the second year is limited to a maximum of 28 students who are selected on a competitive basis.

The Veterinary Technology program is accredited by the American Veterinary Medical Association.

**MAJOR REQUIREMENTS**

---

**Large Animal Veterinary Technology Minor**

The minor in Large Animal Veterinary Technology is reserved for Veterinary Technology majors only. Students may earn this minor by completing a minimum of 16 credits. A minimum of eight credits must be taken at NDSU.
Interdisciplinary Program in Biotechnology

Biotechnology is an interdisciplinary field based on a combination of biology and technology. It includes the application of science and technology to the design of new plants, animals, and microorganisms that have improved characteristics. For further information, refer to the Interdisciplinary Programs section of this Bulletin for more information.

School of Food Systems

www.ag.ndsu.edu/foodsystems

Cereal and Food Sciences

www.ag.ndsu.edu/cereal-science

Food Science Major

The Food Science major is offered through the School of Food Systems in the College of Agriculture, Food Systems, and Natural Resources. It is designed to prepare students for a career in the food industry, the "world's largest industry," which is responsible for feeding the world.

The program is structured to develop an understanding of the nature, properties, and characteristics of foods through foundation courses in biochemistry, chemistry, microbiology, physics, and other sciences. Food science courses are built on this foundation. Applications include the study of food safety, processing, preservation, sanitation, storage, and marketing of foods. The analysis and microbiological and biochemical characterization of food products also are studied. Additional elective courses in economics and business administration are available to students intending to enter a management career.

Note: Transfer credits in food science from other institutions must have grades of "C" or better to be accepted for the food science program at NDSU. The Institute of Food Technologists (IFT) approves the curriculum in the food science program. Students majoring in food science, therefore, are eligible to compete for the prestigious IFT scholarships.

The program also provides the opportunity to gain industrial experience during undergraduate study by means of industry internships. Upon completion of the program, graduates will be able to recognize, critically analyze, and solve problems realistically in both industrial and academic environments.

Great Plains Institute of Food Safety

www.ag.ndsu.edu/foodsafety

Food Safety (SAFE) Major

A number of undergraduate and graduate programs of study are offered through the Great Plains Institute for Food Safety. Food safety is an area of concern for many Americans, the current target of tremendous interest, effort, and spending worldwide, and an area in which shortages of expertise are manifest. For further information, refer to the Interdisciplinary Programs section of this Bulletin.

NDSU Undergraduate Bulletin 2010-2011

MAJOR REQUIREMENTS : MINOR REQUIREMENTS
School of Natural Resource Sciences

www.ndsu.edu/nrs

The increasing global population and greater demand made on our renewable resources, has created a need for prepared graduates in natural resource management and environmental science. The School of Natural Resource Sciences is designed to prepare students for challenging careers in examining and solving complex ecological issues locally and globally. Degrees can be obtained in the areas of Entomology, Natural Resources Management, Range Science, and Soil Science.

Entomology

www.ndsu.edu/entomology

Entomology, or the study of insects, provides a wide array of topics to study. The number of insect species outnumbers all other animal groups combined and affects humans, plants, animals, and the environment in a multitude of ways, some good, some bad. Many insect species attack our crops and our domestic animals, often vectoring diseases along with the physical damage they cause. Many species are beneficial in providing food (e.g., honey), pollination services, and many are biological control agents for noxious weeds and other insect pests. Areas of study within entomology range from the very basic (systematics and conservation ecology) to the very applied (insect pest management of regional crops). Professional career opportunities include positions within academia, private research companies, the government, and conservation organizations. The Entomology Department at NDSU does not offer a formal undergraduate degree, but several courses (General Entomology, Crop Entomology, Horticulture Entomology, and Introduction to Insect Ecology) are available to interested students. Graduate programs emphasize a core curriculum (Ecology, Morphology, Physiology, and Systematics), and agricultural courses (Biological Control, Host Plant Resistance, and Insect-Pest Management).

Natural Resources Management

www.ag.ndsu.nodak.edu/nrm

With increasing human pressure and a growing need to balance competing demands, our world needs new and better ways to manage society's impacts on the environment. Natural Resources Management (NRM) is dedicated to preparing students for challenging careers requiring the holistic ecological perspective and global sociological perspective necessary for examining and solving complex natural resource management problems. A major in Natural Resources Management is offered in collaboration with a number of academic departments and colleges on campus. For further information, refer to the Interdisciplinary Programs section.

MAJOR REQUIREMENTS : MINOR REQUIREMENTS

Range Science

www.ag.ndsu.edu/range

Range Science is a unique program that blends science and management for the purpose of sustaining rangelands. Rangelands are important for the diverse array of products and services they provide. Rangelands are important for ranching, wildlife, water, and recreation to name a few. Rangelands comprise over 40% of the earth's land and include grasslands, prairies, savannahs, shrublands, deserts, meadows, marshes, wetlands, alpine, arctic, and some types of forests. Rangelands are comprised mainly of native grasses, forbs, and shrubs which are extremely productive and rich in biodiversity.

Just as rangelands are diverse, so too are the careers available in rangeland management. Professional career options for rangeland managers are in private and public land management, scientists, educators, ranching, wildlife and fisheries, hydrology and economics. The majority of graduates in Range Science find employment with state and federal agencies as range conservationists with the USDA Forest Service, Natural Resources Conservation Service, Bureau of Land Management, U.S. Fish and Wildlife Service, Bureau of Indian Affairs, National Park Service, State Land Department, State Health Department, universities and others. Career tracks in agribusiness and non-profit organizations are also possible. Students in the Range Science program will take courses in Animal Science, biology, botany, chemistry, economics, natural resources management, plant sciences, soil science, statistics, zoology, as well as the requirements for general education.
Soil Science

www.soils.ndsu.nodak.edu

Soil Science is a field-oriented discipline that defines, investigates, and utilizes one of the most important of our natural resources. All terrestrial life depends upon the soil for food and clean water. Knowledge of soil science is critical to address environmental problems, such as wetland protection, habitat restoration, and waste disposal, and it is vital to ensure sustainability of agricultural and forest products. Soil expertise is also essential in the emerging fields of urban and sustainable agriculture. Soils are complex and constantly evolving natural systems, hence the curriculum accentuates physical, biological, and earth sciences. A soil science degree prepares a student with the training to enter careers in both traditional agriculture and the environmental sectors, including: environmental consulting, soil conservation and resource management, production agriculture, and state and federal regulatory agencies.

Department of Plant Sciences

www.ag.ndsu.nodak.edu/plantsci

Crop and Weed Sciences Major

Instruction in crop and weed sciences includes field and forage crop production and management, weed science, general and plant genetics, plant breeding, experimental design, and biotechnology. The study of botany and other plant sciences, entomology, plant pathology, and soil science is basic or related to crop and weed sciences. Students may obtain either a major or minor. The Crop and Weed Sciences major or minor is intended for general use in sales, research, and technical services (crop consultant) of agribusinesses involved in seed, chemical, and other plant production, protection, and management aspects; in natural resources conservation service; by those interested in production agriculture; or as a prerequisite for graduate study. For more details on M.S. and Ph.D. degrees, see the Graduate School Bulletin.

Curriculum Options

Students may select one of the following options within Crop and Weed Sciences:

- **Agronomy**: This option is for students most interested in production agriculture. This is the most popular option with students and provides the most flexibility of course selection. Completing the basic crop and weed sciences curriculum fulfills this option.

- **Biotechnology**: This option is intended for students who wish to work in the biotechnology industry or pursue graduate study in the crop biotechnology area. Students interested in biotechnology also may pursue the interdisciplinary Biotechnology major (see Interdisciplinary Programs section).

- **Science**: This option is intended for students who are interested in graduate studies and want more basic science courses as a foundation for graduate studies.

- **Weed Science**: This option is intended for students interested in crop consulting, weed science, or integrated pest management. Additional courses in pest management are required to provide exposure to common issues encountered in these careers and practice in diagnosis and resolution.

Special Opportunities

**Agronomy Club**: The Agronomy Club meets twice each month. Members join in campus and community activities, arrange speakers on agricultural topics, and participate in meetings and contests at the regional and national levels. The club also coordinates tours to local agribusinesses to gain a better perspective of career opportunities. Students with an interest in agriculture are encouraged to attend, regardless of chosen major.
Crop and Weed Sciences Minor

Students may minor in Crop and Weed Sciences by selecting a total of 18 credits of study in crop and weed sciences or closely related fields.

MINOR REQUIREMENTS

Agribusiness Minor

Students interested in a business career in crop and weed sciences should consider the Agribusiness minor offered through the Department of Agribusiness and Applied Economics.

MINOR REQUIREMENTS

Horticulture

Instruction and study in horticulture is focused on fruits, vegetables, and woody and herbaceous landscape plants, including propagation, production, culture, marketing, processing, and utilization. Horticulture encompasses the design and planting for landscapes, parks, highways, and public facilities, including interiorscapes, in rural, suburban, and urban areas. It includes skills for management of nursery, garden center, greenhouse, seed, fruit, vegetable, biotechnology, and specialty crop enterprises, as well as floral design and flower shops.

The Horticulture major is a four-year curriculum leading to the B.S. degree. Students also may minor in Horticulture. Prospective students should consult with horticulture faculty regarding programs and options so their educational needs may best be fulfilled. Master of Science and Ph.D. degree programs also are available. For more complete details, see the Graduate Bulletin online.

Curriculum Options

Horticulture majors may select one or more options of study. All of the requirements for the major and the supporting disciplines must be met to complete any horticulture option. Students may select from the following five options.

- **Horticulture Biotechnology**: This option is for students who plan to engage in laboratory research or further their education in the biotechnology of horticultural crops.
- **Horticulture Science**: This option is for students who plan to continue formal graduate school education leading to careers in research, teaching, and extension.
- **Landscape Design**: This option is for students interested in planning, designing, and installing landscape plantings for functional and aesthetic purposes (a 19-credit minor in landscape architecture is required).
- **Production Business**: This option is for students who wish to grow, market, and process horticultural crops, for example, nursery and/or greenhouse landscape, fruit, and vegetable crops.
- **Urban Forestry and Parks**: This option is for students who desire a career in the management of urban forests and park-like areas, including arboreta and botanic gardens. It also includes maintenance of residential landscapes.

Special Opportunities

**Pre-Forestry**: A student who desires to major in forestry may select a two-year pre-forestry curriculum. However, the forestry student must transfer to another institution to complete degree requirements.

**Horticulture and Forestry Club**: This club meets twice each month. Members take field trips to botanical gardens, arboreta, trade shows, parks and other horticultural sites. They also are actively involved in growing and marketing flowers and foliage plants, regional and national judging contests, flower shows, and horticulture science and education programs.
MAJOR REQUIREMENTS: MINOR REQUIREMENTS

Sports and Urban Turfgrass Management Major

The Sports and Urban Turfgrass Management program focuses on the science and technology for the management of quality turf in such areas as golf courses, sports facilities, parks, and home lawns. A graduate should be competent in grass physiology, soil science, proper irrigation practices, pest control, budgeting of resources, and personnel management. Graduates may work in the turf industry, which encompasses not only turf managers, but also the production of seed, sod or other turfgrass materials, manufacturing and marketing of products for turf management, business management, manpower development, consulting, and other services.

The Sports and Urban Turfgrass Management major is a four-year curriculum leading to a B.S. degree. Students may select from the following five options. Students have the opportunity to minor in other programs of interest.

Turf Club: The goals of the Turf Club are to provide students with opportunities to share information, connect with the turf industry, gain real world experience, and broaden their knowledge. The club organizes field trips, topic discussions, and presentations by guest speakers. Other activities include attending regional and national turf conferences, community service, and fundraising.

MAJOR REQUIREMENTS

Department of Veterinary and Microbiological Sciences
www.ndsu.edu/vetandmicro

This department offers instruction in microbiology, including courses in general microbiology, pathogenic microbiology, parasitology, virology, immunology, food microbiology, microbial physiology and bacterial genetics. The department also offers courses in epidemiology, animal disease, and food safety to enhance our students' understanding of applied microbiology and infectious disease.

Microbiology

Microbiology is a fundamental biological science which offers a variety of challenges and opportunities. Microbiologists have made some of the most important scientific discoveries in this century. Since 1910, approximately one-third of the Nobel Prizes in medicine and physiology have been awarded to microbiologists. The discipline covers a wide spectrum of specialized interest areas that illustrate how microbes affect human and animal health, our environment, food safety, food technology, and the biotechnology industry. In recent years, the field of microbiology has had a major impact upon virtually all other scientific disciplines. For this reason, even students who choose to major in other fields may benefit from a minor in microbiology.

Students majoring in microbiology are well prepared to enter graduate school, veterinary school, and medical school, or to establish careers in food or pharmaceutical industries, hospitals, public health agencies, universities, research laboratories, and other biomedical industries. A 2.50 cumulative grade point average and a minimum grade of "C" in core and elective microbiology courses are required to graduate with a Microbiology major.

MAJOR REQUIREMENTS: MINOR REQUIREMENTS

Pre-Veterinary Medicine

NDSU offers excellent programs that prepare students for application to a college of veterinary medicine. All veterinary schools stress the importance of high scholastic standing and judge applicants on academic preparation, knowledge of the veterinary profession, experience and character.

Because the number of students admitted to veterinary schools is limited, prospective students should check the specific requirements of the college of their choice well in advance to make certain that preparatory work is appropriate.
Pre-veterinary medicine is not a specific major, and students are encouraged to pursue a major in their area of interest while at NDSU. In addition, students preparing for application to a veterinary school should consult with a pre-veterinary medicine advisor. The department is a member of the Association of American Veterinary Medical Colleges (AAVMC), which administers the Veterinary Medical College Application Service (VMCAS). Communication with pre-veterinary students is facilitated when students are enrolled in the College of Agriculture, Food Systems, and Natural Resources. Visit the VMS, Pre-Veterinary Medicine Web site for further information.
The College of Arts, Humanities and Social Sciences embraces the teaching, research, creative activities and service objectives of NDSU’s land grant mission, and the needs of a diverse constituency. The college is committed to:

- Providing its students with the highest quality of preparation in an atmosphere that promotes intellectual rigor, critical inquiry, citizenship, and creative decision-making requisite for personal growth and professional success.
- Encouraging in its faculty exemplary scholarship of teaching, research, and service, leading to significant publications, creative work and performances.
- Invigorating the tradition of outreach through enriching performance, presentation, and cultural understanding. In its vision to realize human potential and achievements, the College of Arts, Humanities and Social Sciences is guided by the qualities of creativity, ethical integrity, and mutual respect.

**B.A. or B.S. Degree**

Students seeking a broad educational background may choose to complete requirements for either a Bachelor of Arts or Bachelor of Science degree. Majors available for either degree include the following:

- Agricultural Communication
- Anthropology
- Art
- Classical Languages
- Criminal Justice
- Emergency Management
- English
- French
- Health Communication
- History
- Humanities
- Journalism, Broadcasting and Mass Communication Technology
- Management Communication

**Interdisciplinary Programs**

The College of Arts, Humanities and Social Sciences participates in three interdisciplinary programs on campus. For further information on any of these programs, refer to the Interdisciplinary Programs section of this Bulletin.
Fraud Investigation Minor
Students in this interdisciplinary minor will study the causes of fraud, as well as the detection, investigation, and prevention of fraud.

Gerontology Minor
This program provides students with an integrated understanding of the process of aging, aging services, and the aged in America.

Women and Gender Studies Major and Minor
The goal of Women and Gender Studies is to examine the contributions of women to all aspects of society, to explore the intersections of race, class, sexual orientation, age, and physical ability with gender both globally and nationally, to investigate the heritage, challenges and concerns of women, and to provide a newer and broader understanding of women in all fields.

B.S. Degree with Special Professional Intent
Students planning a specific career with a baccalaureate background are encouraged to pursue the related curriculum leading to the Bachelor of Science degree. The Public Service Option of the Political Science major is available for the B.S. with special professional intent.

B.F.A. and B.Mus. Degrees
Bachelor's of Fine Arts in theatre arts and in visual arts and a Bachelors of Music are available and are outlined under the Division of Fine Arts.

Graduate Degrees
Master's degrees are offered in anthropology, emergency management, English, history, mass communication, music, political science, social science, sociology and speech communication. Doctoral degrees are offered in communication, criminal justice, emergency management, history, and music. For more complete details, see the Graduate Bulletin online.

Teacher Certification
Many of the majors available through the College of Arts, Humanities and Social Sciences lead to careers in teaching. Students who are interested in becoming professional educators should refer to the degree program offered through the School of Education. However, a Music Education option is offered under the B.Mus. degree in Music within the College of Arts, Humanities and Social Sciences. K-12 certification is available in Music Education. Teacher certification at the secondary level is available in the following areas: English, French, history, social science, and Spanish.

To meet requirements of the No Child Left Behind Act of 2001, students interested in teacher education are encouraged to declare a double major in their discipline and in education (i.e. History and History Education). Such double majors may typically be earned by successful completion of a few additional credits. Students should contact their advisors or the Office of Registration and Records for details. Students are encouraged to declare their primary and secondary majors with the Office of Registration and Records, 110 Ceres Hall.

Degree Requirements
All degree candidates must apply for graduation through the Office of Registration and Records according to university procedures and deadlines.

A minimum of 122 credits of which at least 37 must be at the 300-400 level is required for the B.A. or B.S. degree.

Bachelor of Arts degree requirements include proficiency of one foreign language at the second-year college level. Bachelor of Science degree requirements include completion of an approved minor.

Students with two or more years of a foreign language in high school may earn advanced placement credit according to the guidelines listed in the Modern Languages section.

Students in the college may take courses under the pass/fail option for free elective credits only, with a limit of 16 hours.
All majors must complete the 40 credit university-wide general education requirements.

An additional 12 credits are required by the College of Arts, Humanities and Social Sciences as follows:

<table>

*All courses except internships may be used to fulfill these requirements.*

**Field Experience Courses**

1. Field Experience/Internships (496) do not meet the requirements for general education.
2. Departments may adopt either pass/fail or letter grade options for Field Experience/Internships.
   - Where Field Experience/Internship credits are a requirement of a program, these credits may be graded pass/fail to satisfy requirements for a major.
   - Where Field Experience/Internship credits are not a requirement of a program, up to three credits may be graded pass/fail to satisfy requirements for a major.

**Cooperative Education**

Cooperative Education, a program of the Career Center, offers undergraduate and graduate students an opportunity to integrate classroom study with paid, career related work experience for academic credit. Work may be full- or part time. Credit is awarded directly by the Cooperative Education program. A Cooperative Education experience may substantially improve students' employment opportunities after graduation. See Career Center for further information.

**Right of Petition**

Students seeking deviation from any academic rules and regulations administered by the college may appeal in writing to the Committee on Student Progress. Pre-Professional Curricula Requirements for admission to most professional academic programs may be met at NDSU. The specific courses taken in a pre-professional program depend primarily upon the admission requirements of the program to which a student wishes to apply.

**Pre-Law**

Although a baccalaureate degree is a requirement for admission to law school, most law schools do not prescribe a specific undergraduate program. Emphasis is placed on the development of scholarly skills and insights rather than the mastery of a prescribed subject. Thus, the pre-law student may elect the Bachelor of Arts or Bachelor of Science degree, selecting a major or minor of special personal interest. For advisement purposes, new applicants to NDSU who indicate Pre-Law enter as Political Science Majors. (See Department of Criminal Justice and Political Science). To attain the necessary breadth of knowledge for successful practice, the student should elect the basic courses in several fields of learning. At the same time the student should avoid an elective program of only single courses in many fields, opting instead for some depth of study in each elected field.
The Department of Communication provides majors and minors in Agricultural Communication; Health Communication; Journalism, Broadcasting & Mass Communication Technologies; Management Communication; and Public Relations & Advertising at the undergraduate level.

Pre-Communication Preparation

Students interested in pursuing an undergraduate degree offered by the Department of Communication are enrolled as pre-professional students and must first complete all courses and requirements associated with the Pre-Communication preparation designation. Once all Pre-Communication preparation courses and requirements are met, the student completes and submits the Pre-Communication form, available on the department website, to the department's academic assistant. After verification, the student is accepted into the professional program and can continue pursuing a degree in the Department of Communication.

Agricultural Communication

B.A. or B.S. in Agricultural Communication (36 credit hours)

A major or minor in Agricultural Communication combines the resources and expertise of two units, communication and agriculture, to produce trained communicators who can explain science, technologies, and complex agricultural issues to diverse audiences. Applicants for the major must have been accepted by NDSU as degree seeking.

The curricular structure of the Agricultural Communication program is listed below for students entering the program. Students will complete an applied capstone course after completing all other required coursework.

MAJOR REQUIREMENTS : MINOR REQUIREMENTS

Health Communication

B.A. or B.S. in Health Communication (36 credit hours)

A major or minor in Health Communication is an applied degree aimed at providing both practitioners and future civic leaders with the knowledge they need to improve health services and public health. Applicants for the major must have been accepted by NDSU as degree seeking.

The curricular structure of the Health Communication program is listed below for students entering the program. Students will complete an applied capstone course after completing all other required coursework.

MAJOR REQUIREMENTS : MINOR REQUIREMENTS

Journalism, Broadcasting, and Mass Communication Technologies

B.A. or B.S. in Journalism, Broadcasting, and Mass Communication Technologies (36 credits)

A major or minor in Journalism, Broadcasting, and Mass Communication Technologies (JBMCT) is designed to help students know how to use public communication media. Applicants for the major must have been accepted by NDSU as degree seeking.

The curricular structure of the Journalism, Broadcasting, and Mass Communication Technologies program is listed below for students entering the program. The major consists of three tracks: Journalism, Broadcasting, and Web-based Communication. Each track has
separate requirements and students must choose one track. Students will complete an applied capstone course after completing all other required coursework.

MAJOR REQUIREMENTS : MINOR REQUIREMENTS

Management Communication

B.A. or B.S. in Management Communication (36 credit)

A major or minor in Management Communication is designed to train students to be effective managers and leaders in corporate environments. Applicants for the major must have been accepted by NDSU as degree seeking.

The curricular structure of the Management Communication program is listed below for students entering the program. Students will complete an applied capstone course after completing all other required coursework.

MAJOR REQUIREMENTS : MINOR REQUIREMENTS

New Media and Web Design

The major or minor in New Media and Web Design is an interdisciplinary program housed in the communication department. It combines theoretical study of new media with practical application to prepare students for careers in a rapidly growing and changing industry. Applicants must have been accepted by the university as degree-seeking students.

The curricular structure of the New Media and Web Design program is listed below for students entering the program. Students will complete an applied capstone course after completing all other required coursework.

MAJOR REQUIREMENTS : MINOR REQUIREMENTS

Public Relations and Advertising

B.A. or B.S. in Public Relations and Advertising (36 credits)

A major/minor in public relations and advertising is designed to prepare students to enter these professional fields. Applicants for the major must have been accepted by NDSU as degree seeking.

The curricular structure of the Public Relations and Advertising program is listed below for students entering the program. Students will select one of two tracks: a Public Relations track will orient students to the principles and practices of public relations as both a practice and field of study. The second track, Advertising, will introduce students to the principles and practices of advertising. Students will complete an applied capstone course after completing all other required coursework.

MAJOR REQUIREMENTS : MINOR REQUIREMENTS

Experiential On-Campus Opportunities

The department oversees several on-campus communication-related opportunities for students: KDSU 91.9 FM is an affiliate of North Dakota Public Radio with internships available for qualified students; Thunder Radio is NDSU’s student-run radio station; and the Spectrum is a student-run newspaper published twice weekly throughout the academic year where students may receive credit or salary. In addition, departmental academic organizations include Public Relations Student Society of America, Bison Information Network, Advertising Club, KNDS-96.9, Lambda Pi Eta, Lincoln Speech and Debate Society, and Pi Kappa Delta. For more information, contact the Department of Communication.
Criminal Justice Major

The criminal justice practitioner deals with the broad areas of law enforcement, courts, corrections, and social services. Professional positions may include federal law enforcement, municipal law enforcement, juvenile and adult probation, counseling and correctional work in institutions, victim advocacy programs, and halfway houses. Within these broad areas the practitioner enjoys exciting professional challenges and opportunities for serving society and helping people.

Examples of agencies that have employed NDSU graduates include: the FBI, Drug Enforcement Administration, local police departments, sheriff’s departments, Border Patrol, juvenile courts, Bureau of Criminal Investigation, U.S. Secret Service, probation and parole departments, juvenile and adult correctional instructions, halfway houses, and crime and delinquency prevention programs.

The Criminal Justice curriculum is an interdisciplinary program drawing on the social sciences, behavioral sciences, humanities, computer sciences, and accounting. A total of 58-59 credits is required for a major in criminal justice coursework. A basic background in the social sciences, behavioral sciences, and civics is helpful.

MAJOR REQUIREMENTS

Criminal Justice Minor

The minor in Criminal Justice provides an opportunity for students with majors in fields outside of the Criminal Justice program to gain valuable knowledge regarding criminological theory and the history, operation and effectiveness of various parts of the criminal and juvenile justice system.

MINOR REQUIREMENTS

Fraud Investigation Minor

The Department of Criminal Justice and Political Science, in collaboration with the Department of Accounting, Finance and Information Systems, offers a minor in Fraud Investigation. Students will study the causes of fraud, as well as the detection, investigation, and prevention of fraud. Student learn about the criminal justice system, including law making, criminality, and prosecution of fraud and other types of crime. This minor will prepare students for possible careers in crime investigation, litigation support, or forensic accounting. See the Interdisciplinary Programs section of this Bulletin, or contact the Department of Accounting, Finance and Information Systems or the Department of Criminal Justice and Political Science for further information and course requirements.

MINOR REQUIREMENTS

Criminal Justice Club and Internships

Students may expand their knowledge of criminal justice and career opportunities through the meetings with professionals and field trips sponsored by this club. The department also offers internships and cooperative education opportunities. For specifics, contact the Department of Criminal Justice and Political Science.
**Political Science Major**

Political science is the study of politics, government, and public policy. This includes the investigation of political institutions, international relations, law, and political values. The purpose of classes in political science is to provide students with knowledge to assist them in understanding how government and politics affect their everyday lives. A political science major offers the student career opportunities in public service, business, and education. Also, many students interested in attending law school select political science as a major. As part of its offerings the department offers a special program of pre-law advisement.

A total of 40 credits of major coursework is required for Political Science. All students are required to complete Introduction to Political Science (110) or American Government (115), Applied Research Methods (325), Political Ideologies (240), International Politics (220) or Comparative Politics (225), and Senior Seminar (489). In addition, four 400-level classes must be taken; one from each of these areas: law, American Government, comparative politics, and international relations. Nine credits of electives are also to be selected in consultation with an advisor.

**MAJOR REQUIREMENTS**

**Political Science Minor**

The minor in Political Science requires a minimum of 21 credits including Introduction to Political Science or American Government and International Politics or Comparative Politics. Three classes of the student's choice at the 400-level in law, behavior, international relations, or comparative politics are required. Six credits of electives also are to be selected in consultation with an advisor.

**MINOR REQUIREMENTS**

**Pre-Law Emphasis**

The department offers a special Pre-Law emphasis for those individuals who wish to pursue careers in law. It consists of a major in Political Science (40 hours) that includes a concentration of law related courses, as well as required classes in English and communication. Electives in business, communication, criminal justice and accounting are also part of the emphasis. For further information and specific course requirements contact any political science faculty.

**OPTION REQUIREMENTS**

**Public Service Option**

The Public Service option allows students to concentrate their coursework in two distinct areas of study: government administration and political management. The government administration area is designed for students seeking careers in the administration of public, private/public, or non-profit organizations. The political management area is designed for students seeking careers in connection to political parties, campaign consultants, interest groups, and the political media. Each area requires a 15 credit internship. For further information on the specific requirements, contact the department.

**OPTION REQUIREMENTS**

**Department of Emergency Management**

[www.ndsu.edu/emgt](http://www.ndsu.edu/emgt)

The Department of Emergency Management offers a major and minor in Emergency Management at the undergraduate level. Emergency Management is a growing profession and discipline of study addressing all phases of disaster and risk management. The mission of the major is to develop graduates with extensive theoretical and applied knowledge in emergency management and disaster...
research. The program is based on an all hazards approach which includes natural and technological disasters as well as other human made hazards.

Numerous career opportunities are available to those graduating with an Emergency Management major. Positions are available at all levels of government including city, country, state, federal and the military. A wide variety of local, national, and international voluntary organizations routinely hire graduates educated in emergency management for humanitarian relief efforts and related activities. Finally, there is increasing need in the private, business sector for emergency management and crisis management to address business and operational continuity. There has been an upward trend in the consequences of natural and technological disasters in the last 30 years. As a result, emphasis is being placed on the vulnerability and risk reduction to natural disasters such as the Haiti earthquake, Hurricane Katrina and human made disasters such as that on September 11, 2001.

**Department of English**

[www.ndsu.edu/english](http://www.ndsu.edu/english)

The English Department intends that its students will form strong communication skills, establish research methods, develop flexibility in facing complex situations, and increase their awareness of the humanities tradition. These ideals suit both the liberal arts major and the practical, pre-professional student. Success in the marketplace is tied to the ability to analyze, understand, and restate written material. Such success requires habits of investigation, a fluency with documents and speeches, and the self-assurance to handle unfamiliar materials. Thus, in its offerings, the department serves the traditions of language and literature, while it responds to the needs of today's students.

The department further reflects such responses in its participation in the [Humanities major](http://www.ndsu.edu/), the Scholars Program, and the [Women and Gender Studies minor](http://www.ndsu.edu/). Moreover, the department supports the Cooperative Education Program and welcomes efforts to create student internships.

The English Department offers a Bachelor of Arts degree in English and a Bachelor of Science degree in English. A Bachelor of Arts degree in English Education and a Bachelor of Science degree in English Education also are offered between the Department of English and the [School of Education](http://www.ndsu.edu/).

The B.A. and B.S. degrees in English require 42 credits in English courses beyond the first-year English composition sequence. The B.A. degree requires two years of a foreign language or the equivalent competency; whereas, the B.S. requires a minor outside English.

The B.A. and B.S. degrees in English Education require 36 credits in English courses beyond the first-year English composition sequence and 34 credits in Education courses. The B.A. requires an additional six credits in Arts, Humanities and Social Science (AHSS) courses and two years of a foreign language or the equivalent competency. A B.S. degree in English Education with an option in communication is available that leads to certification in both English and Speech. English teaching majors should contact the [School of Education](http://www.ndsu.edu/) or the English Education advisor for additional requirements.

Transfer credits with grades of "D" are not accepted for English major requirements.

**Department of History, Philosophy, and Religious Studies**

[www.ndsu.edu/history](http://www.ndsu.edu/history)

**History Major**

By engaging in the fascinating study of how people in the past understood their worlds, graduates from the Department of History, Philosophy, and Religious Studies will be prepared to comprehend and think critically about the present by understanding how it has been shaped by the past. In their studies they will learn how to evaluate the strengths and weaknesses of alternative explanations for
historical events, how to interpret primary and secondary materials to form valid conclusions, how to analyze components of historical
events, and how to synthesize and apply their knowledge in an original research project.

The Department of History, Philosophy, and Religious Studies offers both a B.A. and a B.S. degree in History. The B.A. degree
requires the completion of two years of a foreign language at the college level and is recommended for students desiring a rich level
arts education or planning for graduate school or law school. The B.S. degree does not have a foreign language requirement but,
instead, requires an appropriate minor. Students transferring to NDSU must complete at least 50 percent of their history credits at
North Dakota State University. A History Education program of study also is offered between the Department of History, Philosophy,
and Religious Studies and the School of Education.

History majors can prepare themselves for careers in secondary education by completing a double major with either a B.A. or B.S. in
History with a second major in History Education. Students selecting the B.A. option will need two years of a foreign language. The
department advises students to choose History as their primary major. History Education majors are required to complete a course in
North Dakota history and three credits of history other than European or United States. They must also complete one 200-level or
above course in anthropology, geography, political science, psychology, or sociology.

Lists of approved courses for the distribution and sequence requirements and courses recommended for History Education majors are
at the department web site.

MAJOR REQUIREMENTS

Public History Major

A B.A. or B.S. degree may be earned in Public History. The major requires 48 credits in history courses, including a nine-credit
internship. An additional 18 credits in supplementary vocational courses or an approved minor to prepare for a career in public history
are also required. The Public History program prepares students for employment in fields such as archives and museums, historical
editing, historic preservation, costume conservation, and archeology. The 18 credit supplementary vocational courses are divided into
three tracks: 1) museums, intended to prepare students for work as a curator, interpreter, or administrator in museums, 2) archives,
intended to prepare students for work with documents and/or photographs in a archival repository, and 3) historical preservation,
intended to prepare students to work with the National Historic Preservation legislation to identify historic buildings and sites
throughout the nation. For more details regarding the courses available for the 15 credit distribution courses or 18 credit vocational
supplement, refer to the Department of History, Philosophy, and Religious Studies' Web site.

MAJOR REQUIREMENTS

History Minor

Students who minor in History are required to complete 9 credits of 100-200 level courses and 9 credits of 300-400 level courses.

MINOR REQUIREMENTS

Humanities/Philosophy

Humanities is a theme-centered interdisciplinary program in the arts, history, literature, philosophy, and religion. Through
interdisciplinary study, students develop an awareness and understanding of the major events and ideas that have shaped the
civilization in which they live.

Philosophy-Humanities Major

People have always had questions about the world in which they live. Whether these questions are about truth, beauty, and goodness,
or about whether life has any meaning, people find questions to ask. Over the centuries, many minds have addressed these questions.
By means of dialogue, intuition, logic, and critical thought, philosophers have created pathways to wisdom and an understanding of
the human condition.
North Dakota State University, through a cooperative arrangement with Cardinal Muench Seminary, offers students a Philosophy curriculum that may be approached either as an interdisciplinary Philosophy minor or a Philosophy-Humanities major or minor.

The Philosophy-Humanities major consists of 30 semester credits. Of these, 21 credits must be taken from the required courses below. Nine elective credits, which can be independent studies, complete the major. The major can result in either a B.A. or B.S. degree. Each degree has additional university and College of Arts, Humanities and Social Sciences requirements that must be fulfilled. For example, a B.A. requires two years or the equivalent of a foreign language, while the B.S. requires a minor in another field. Please check the university and college pages addressing additional requirements that must be fulfilled.

MAJOR REQUIREMENTS

Philosophy-Humanities Minor
The Philosophy-Humanities minor consists of 21 semester credits: the major required courses listed below plus six elective credits from the elective philosophy courses, including independent studies.

MINOR REQUIREMENTS

Independent Study
Independent study may be pursued by students wanting to read a special philosophical topic (e.g. aesthetics) or read the work of a particular philosopher. To initiate independent study, the student must contact a member of the faculty listed above.

Religious Studies
From 1932 to 1977 the School of Religion was independent from the university but in close association with it. Currently, Religion Studies continues as a part of the College of Arts, Humanities and Social Sciences.

Religious Studies Minor
A minor in Religious Studies is available. The minor consists of 20 credits of which 12 credits may be at the 100-200 level and eight credits must be at the 300-400 level. For advice on the distribution of the remainder of the electives, consult with the department.

MINOR REQUIREMENTS

Social Science Major
A special interdisciplinary Social Science major is available. It includes courses from disciplines such as history, economics, political science, geography, psychology, sociology, or anthropology. Students should obtain the appropriate curriculum sheets from the School of Education, Office of Registration and Records, or the Arts, Humanities and Social Sciences Dean's Office.

Before taking advanced course work required for the Social Science major, the student should complete at least one year in each of the required disciplines. In addition, students should complete course work in economics and world history.

Students who wish to prepare for high school teaching should make this intention known to the School of Education before entering their junior year to ensure that state teacher certification requirements are met.

Students not planning to teach may major in Social Science leading to either the B.A. or B.S. degree. These students should declare their majors at the Office of Registration and Records and be assigned advisors with whom they will plan programs of study. The advisor and the Office of Registration and Records must approve the program of study in advance.

MAJOR REQUIREMENTS
Today's interconnected world generates the need to be able to communicate in more than one language. As networks of international cooperation and exchange grow in complexity, particularly among governments and businesses, those who possess foreign language competence become increasingly valuable. Moreover, it has been shown that learning a second language can improve one's overall writing and speaking ability.

The Department of Modern Languages offers major programs in French and Spanish, with courses in German, Dakota, and Arabic. Study Abroad and the experience of living in another culture are an integral part of majoring in languages at North Dakota State University. Through the Tri College University consortium, NDSU students may also study Chinese, Japanese, Norwegian, and Russian for full credit. Classical languages are available in cooperation with Cardinal Muench Seminary.

In addition, degree programs in French Education and Spanish Education are offered between the Department of Modern Languages and the School of Education.

Language Placement

Students must adhere to the placement requirements when enrolling in a language course for the first time at NDSU. If, after appropriate placement, the student's instructor recommends that because of exceptional circumstances the student should be placed at a lower level, full credit at the new level may be granted.

Credit for Advanced Language Placement

A student placed at an advanced level may receive NDSU credit for those courses waived, upon fulfillment of the following conditions:

1. The student has completed no previous college-level credit in that language;
2. The student enrolls consecutively in at least two courses within the same level, i.e., 201-202, (intermediate); 311-312, (advanced); and receives grades of "B" or better, (courses may not be taken pass/fail);
3. The student submits a petition form obtained from the Department of Modern Languages, signed by the instructor and the department chair.

Major and Minor Programs

Language majors and minors may be obtained in French and Spanish. German is available through the third-year level.

A French major consists of a minimum of 28 credits above the intermediate level and a Spanish major consists of a minimum of 28 credits above the Intermediate level. At least nine of these credits must be in advanced language; the remainder may be chosen from a variety of courses in linguistics, literature, and culture. A minimum of one year of a second foreign language at NDSU, or the equivalent, is required. French and Spanish majors must earn a minimum grade of a "B" for courses in the major, including credits received for study abroad. Junior and senior year course work will be determined in consultation with a faculty advisor according to the student's background and interests.

A minor necessitates completion of a minimum of 18 credits beyond the intermediate level. At least nine of these credits must be in advanced language (normally conversation/composition).
Classical Languages

A major in Classical Languages is offered. In addition to other university requirements, it includes a minimum of 30 credits in Latin and Greek (excluding 100-level Latin courses) including a minimum of eight credits in Greek. A minor in classical languages is 20 credits (excluding 100-level Latin courses) including a minimum of eight credits in Greek.

MAJOR REQUIREMENTS

Career Directions

Experience has shown that many students, with or without declared modern language majors or minors, find a second language background especially useful when combined with preparation in another professional field. Examples include public relations, journalism, TV and radio broadcasting, hotel management, publishing and editing, government service, banking, and management.

One of the more promising occupational fields for language students has been international business. Individuals with foreign language skills are finding increased opportunities with multinational corporations, especially in management and marketing. Many companies with international ties recruit candidates possessing linguistic training because they recognize its correlation with effective verbal and written communication. Regardless of their specific majors, students are encouraged to contact the department for information and advice on career application of foreign language skills.

Students wishing to prepare for high school teaching should make this intention known to the School of Education and to the Department of Modern Languages to make certain that the requirements for state certification are met. Competitiveness and flexibility in the job market tend to be greater if certification can be obtained in two or more different areas.

Department of Music

www.ndsu.edu/finearts/music

NDSU Music prepares students for careers in teaching, performance and liberal studies. It also provides creative opportunities for all talented student musicians regardless of major, and seeks to foster an appreciation of music throughout the greater NDSU community.

NDSU music is accredited by the National Association of Schools of Music. Programs of study lead to the Bachelor of Music in Music with options in Performance or Music Education; the Bachelor of Arts or Bachelor of Science in Music; the Master of Music with options in Performance, Conducting, or Music Education; and the Doctor of Musical Arts with options in Performance or Conducting.

Majors/Minors

Admission to music major or minor programs is arranged through an audition and interview; for information, please contact the Division of Fine Arts office. All undergraduate music majors take private lessons, participate in ensembles, and take a broad range of courses appropriate to their areas of emphasis.

The Bachelor of Music degree in Performance is for talented vocalists and instrumentalists who wish a career as a professional performer or conductor, and who will likely continue their studies in graduate school. The Bachelor of Music degree with certification in Music Education is for students who wish to teach K-12 music in North Dakota's public schools. Certification requirements for other states varies, but North Dakota licensure is congruent with that of many other states. These experiences in a broad spectrum of music education courses - elementary, instrumental, and voice/choral - results in NDSU's outstanding reputation for producing teachers with excellent and versatile credentials.
Music majors pursuing a Bachelor of Arts or Bachelor of Science degree (without public school teaching certification) are generally interested in a broad liberal arts education with a significant number of electives.

Music majors and minors supplement their coursework by attending recitals and concerts. Those in applied study perform for the jury examination at the end of each semester. Students enrolled in private applied study also participate in a related major ensemble; pianists sometimes play with chamber ensembles or accompany ensembles.

**Ensembles**

NDSU Music sponsors a large variety of ensembles including the NDSU Wind Symphony, Concert Choir, Madrigal Singers, two large Jazz Ensembles, Jazz Combos, the Gold Star Marching Band, Brass Ensemble, University Chorus, NDSU Statesmen, Cantemus, University Band, Bison Pep Bands, Opera Theatre, and chamber ensembles in typical instrumental and vocal combinations. NDSU students may also register for the University Symphony Orchestra through the Tri-College system. The Concert Choir, Wind Symphony, Jazz Ensemble, Madrigal Singers and several other groups have touring programs, some of which are national or international in scope. Participation in these ensembles is open to all students, some by audition and some as recreational ensembles.

**Music Curricula**

Requirements are grouped by degree. Please refer also to graduation requirements listed in the Academic Policies section of this publication. The information in this Bulletin may be superseded by information updated regularly and provided by the Division of Fine Arts.

---

**The Bachelor of Music (B.Mus.) option Performance**

The professional undergraduate degree in music, the B.Mus. is designed for students pursuing a career as a performing musician. Such students often continue advanced study in graduate school. All students audition for the appropriate area of performance with faculty members and demonstrate professional level skills or potential. In addition to college and university requirements, all students take courses in the core requirements section, and then select a specialized curriculum under instrumental, voice or piano. Bachelor of Music students are required to pass all four levels of piano proficiency examinations prior to completion of the degree. Piano credit requirements listed below may be waived in whole or in part for Vocal and Instrumental majors upon successful completion of the piano proficiency examinations.

**MAJOR REQUIREMENTS (B.Mus)**

---

**The Bachelor of Music (B.Mus.) Certification in Music Education**

All students must complete the School of Education requirements, complete the common music requirements, complete either the vocal or instrumental emphasis and pass a piano proficiency examination prior to student teaching. Piano credit requirements listed below may be waived in whole or in part for Vocal and Instrumental majors upon successful completion of the piano proficiency examinations. Specific general education requirements, School of Education requirements and other information may be obtained from the Division of Fine Arts office.

**MAJOR REQUIREMENTS (Instrumental) : MAJOR REQUIREMENTS (Vocal)**

---

**B.A. or B.S. with a Major in Music**

Majors interested in a general liberal arts degree should pursue the Bachelor of Arts (which requires a level-4 language proficiency) or the Bachelor of Science (which requires an outside approved minor).

**MAJOR REQUIREMENTS (B.A./B.S.)**
Music Minors

Three minors are offered - one for the general student, one specifically designed for the education major, and one for students interested in musical theatre.

MINOR REQUIREMENTS

Department of Sociology and Anthropology

www.ndsu.edu/socanth

The Department of Sociology and Anthropology offers courses and programs that focus on the study of human behavior in social settings. The department offers a major and minor in anthropology and sociology at the undergraduate level.

Anthropology

The Department of Sociology and Anthropology offers a major and minor in Anthropology. Anthropology is the study of humanity in all of its breadth and depth. It sets itself apart from other social sciences in its aspiration to understand all aspects of humankind. As a discipline, anthropology studies and celebrates human diversity. At the same time, it reminds us that despite our different cultures we are all members of the human family. We share a common nature and a common destiny.

In the anthropology program, students have the opportunity to explore the four branches of anthropology. At NDSU, the focal area has been North America and Oceania, although other areas of the world are in the curriculum. The Native American specialization reflects both the expertise of the anthropological faculty and the relevance of this focus to the northern Plains region. Additional emphasis within anthropology includes archaeology (the study of past cultures through the analysis of material remains), biological anthropology (the study of skeletal and mummified human remains for the analysis of diet, health and other aspects of lifestyle), and folklore (the study of expressive culture, particularly unrecorded traditions).

Anthropology consists of four subdisciplines: culture or social anthropology, physical or biological anthropology, archaeology, and linguistics. Thus, anthropologists study past and present cultures, historical and structural aspects of languages, and the biological aspects of past and present human populations.

MAJOR REQUIREMENTS : MINOR REQUIREMENTS

Sociology

Sociology is the study of social structure, social inequality, social change and social interaction that comprise societies.

The curriculum is structured to introduce majors to the sociology discipline and provide them with conceptual and practical tools to understand social behavior and societies. Areas of study include small groups, populations, inequality, diversity, gender, social change, families, community development, organizations, medical sociology, aging, and the environment.

The 38-credit requirement includes the following core: ANTH 111, SOC 110, 340, 341, 422, and 489. (Note: An introductory statistics course is a prerequisite for SOC 340.) In addition to the 17 core credits, majors must complete four gateway courses (SOC 115, 202, 214 and 233). The remaining 9 credits are electives in sociology.

MAJOR REQUIREMENTS : MINOR REQUIREMENTS
Community Development Minor

The Community Development minor is an applied, multidisciplinary program consisting of 18 credits that includes coursework and an experiential component. Requirements include SOC 404 or 405; a three-credit internship; and a minimum of three credits in each of the following areas: economics, business, and social science. Contact the department for the approved courses in each area.

MINOR REQUIREMENTS

General Information

The department offers a wide range of part-time and full-time internships. Placements may include fieldwork in business, community agencies, health care, and agencies throughout the region. Upon approval of the student's application to the department and the sponsoring agency, students are placed in an environment in which both the applied and intellectual aspects of the professional experience are emphasized. The department also works with cooperative education and service learning activities to support experiential education. Interested students should contact the department chair or Career Center.

Department of Theatre Arts

www.ndsu.edu/finearts/theatre

Programs of study in theatre arts lead to the Bachelor of Science, Bachelor of Arts, and Bachelor of Fine Arts degrees. The requirements for all degree tracks prepare students to be versatile life-long theatre artists through a rigorous, broad-based curriculum in theatre practice, theory, and history. Additional opportunities for specialized study are provided in the areas of acting, musical theatre, design/technology. Through the course work students are given the opportunity to prepare audition material and/or portfolios necessary to enter professional theatre regionally and nationally.

Little Country Theatre (LCT), the producing arm of Theatre Arts, has been an important part of campus life at NDSU since 1914 and is the oldest theatre in the state. LCT produces four plays each year - plays that challenge and enrich the mind, talent, and imagination. Productions are chosen in such a way to expose the students to a variety of styles and genres through a four-year rotation of play styles. Students gain practical experiences through LCT which reflect the best of professional practices and current technology. In addition to academic course work, every theatre major is required to participate in some way in at least one LCT production per semester. Participation in LCT is open to all NDSU students regardless of major.

The Department of Theatre Arts is accredited by the National Association of Theatre Schools (NAST). It is also an active participant in the Kennedy Center American College Theatre Festival (KCACTF). The department also hosts a student chapter of the United States Institute for Theatre Technology (USITT).

The Bachelor of Arts (B.A.) and the Bachelor of Science (B.S.) with a major in Theatre Arts are general baccalaureate degrees providing a liberal arts background with major emphasis in theatre. Two years of a foreign language are required for the B.A. degree, while an approved minor area is required for the B.S. degree. The Bachelor of Fine Arts (B.F.A.) with a major in Theatre Arts is a professionally-oriented program and can be entered only by faculty approval, usually at the end of the sophomore year. This degree program provides in-depth study of a theatre specialization and related fine arts fields.

A minor in Theatre Arts is available with a general studies emphasis or with an emphasis either in general theatrical design and technical theatre, scenic design and technology, costume design and technology, musical theatre, or in performance (acting and directing).

A student who wishes to teach theatre in high school should select a teaching major approved by the School of Education and supplement that major with a major or minor in Theatre Arts.

Courses for theatre arts majors and minors are grouped into tracks and emphasis areas.

MAJOR REQUIREMENTS (B.F.A. Design & Tech)
MAJOR REQUIREMENTS (B.F.A. Musical Theatre)
MAJOR REQUIREMENTS (B.F.A. Performance)
Department of Visual Arts

Art students develop creative technique as well as a life-long commitment to visual understanding and expression. Careers that may result from an art degree include commercial art/graphic design, animation, illustration, arts marketing, commercial photography, museum/gallery work, exhibition design, independent studio art, municipal art programs, art criticism, independent art instruction, art media research, arts organizations management, arts-funding agency work, or continued study in graduate school.

A comprehensive curriculum in visual arts is offered through a highly supportive studio program augmented by academic art courses. Emphasis is placed upon developing individual concept and content within a broad context of knowledge and skills. The faculty is composed of active studio artists and an art historian, all with extensive experience in both professional and academic settings. Well-equipped facilities are maintained for drawing, painting, printmaking, photography, digital media, sculpture and ceramics. Academic facilities both in the main library and in the James Falck Departmental Library house books, videos and publications.

All Art majors develop a strong foundation in design and drawing. Then, through experiences in diverse art media, they develop an area of concentration. Motivated and successful upper-class students are eligible to compete for scholarships and individual studio space. All art students are encouraged to supplement their education with outside art experiences such as summer internships and to participate in national and international art competitions and exhibitions.

Art Major

The Department of Visual Arts offers three undergraduate degrees: The Bachelor of Fine Arts, the Bachelor of Arts, and the Bachelor of Science. The B.F.A. is a professional degree featuring a studio art concentration, while the B.A. and B.S. are liberal arts degrees. The B.A. requires an intermediate competency in a foreign language while the B.S. requires an approved minor outside art. Both the B.A. and B.S. require studio components.

MAJOR REQUIREMENTS (B.F.A.) : MAJOR REQUIREMENTS (B.A./B.S.) : MINOR REQUIREMENTS
The College of Business is committed to providing students with a quality education in the functional areas of business, a systematic exposure to the global business issues they will face in their careers, and an introduction to applying the technologies that will be a part of their work life. In addition, students may choose elective courses that will help prepare them for careers in specific areas in which they have an interest.

Undergraduate majors offered are: Accounting, Business Administration, Finance, Management, Management Information Systems, and Marketing. Academic minors are offered in Accounting, Agribusiness (corporate track), Business Administration, Fraud Investigation, Logistics Management, and Management Information Systems. The College of Business is accredited by AACSB International - The Association to Advance Collegiate Schools of Business.

Admission Requirements

Students who wish to pursue a major in the College of Business at NDSU enroll as pre-professional students for their freshman and sophomore years. Pre-professional students apply for admission at least one semester prior to enrolling in the professional program. To be considered for admission, students must submit to the Dean's Office a completed application, application fee, and current NDSU transcript.

Admission to the professional program requires successful completion of all pre-professional requirements, junior standing, and a minimum 2.50 institutional cumulative grade-point average. Students must be admitted into the professional program prior to enrolling in the advanced 300-400-level accounting, business administration, finance, management, management information systems, and/or marketing courses offered by the College.

The College of Business has specific policies on transfer course evaluations. The transfer of business courses into the professional program is limited to credit earned at business programs accredited by AACSB International. Contact the College of Business Student Service Center for more information.

Degree Programs

The College of Business offers undergraduate programs leading to a Bachelor of Science degrees. The Master of Business Administration and Master of Accountancy degrees are described in the Graduate Bulletin online.

Degree Requirements

Students are required to complete the course requirements of one of the majors in the college. Requirements for graduation are those in existence at the time of admission to the professional program. In addition, all majors must maintain a 2.50 institutional cumulative grade-point average.

Students must be accepted into the professional program prior to the completion of the last 30 credits in required 300-400 level College of Business courses. The last 30 credits must be completed in residence.

Graduation from the College of Business with a major in Accounting requires a grade of "C" or better in all required accounting (ACCT) courses that receive a letter grade. The only exception to this policy are for accounting electives and the requirement for a grade of "B" or better in ACCT 200 and 201.

Graduation from the College of Business with a major in Management Information Systems requires a grade of "C" or better in all required MIS/CSCI courses that receive a letter grade.
Course Requirements

Students must have junior standing (60 credits) and a minimum cumulative grade point average of 2.5 to enroll in 300-400 level courses in the College of Business. Students are required to earn a minimum grade of “B” in Acct 200: Elements of Accounting I, and Acct 201: Elements of Accounting II, or the equivalent courses in transfer, to enroll in 300-400 level accounting courses.

Cooperative Education/Internships

Cooperative Education, a program of the Career Center, offers undergraduate and graduate students an opportunity to integrate classroom study with paid, career-related work experience for academic credit. Work may be full or part time. A cooperative education experience may substantially improve students' employment opportunities after graduation. A cooperative education experience is one way to satisfy the Practicum Requirements described below for Accounting and Management Information Systems majors.

General College Academic Policies

1. The College of Business may consider granting transfer credit for upper level business courses from colleges that are accredited by AACSB International. Business courses from programs that do not hold AACSB International accreditation cannot be used for a major or a minor in the College of Business; such courses may be eligible for use as a free elective. A maximum of nine approved transfer credits may be applied toward the major requirements of the professional program, subject to departmental approval.

2. Pre-approval from the department head or chair is required to enroll in upper-level business courses at another university. Transfer courses with grades of "D" are not accepted for ACCT 200, ACCT 201, and upper level major requirements.

3. Only juniors or seniors meeting the grade point requirement will be allowed to register for 300-400 level courses in the College of Business.

4. College of Business courses completed in previous semesters are considered valid for degree requirements if taken within the previous five years.

5. Students majoring in the College of Business cannot minor in business administration.

Department of Accounting, Finance, and Information Systems

www.ndsu.edu/business

Practicum Requirement

Accounting and Management Information Systems majors are required to complete a three-credit practicum experience while enrolled in the professional program. This requirement prepares the student for the accounting or management information systems world through practical experience in their primary area of study. Students must consult with their academic advisor and obtain approval prior to enrolling in the practicum.

Accounting Major

Accounting is a profession that deals with providing financial information used in making business decisions. Accounting involves a range of skills that includes collecting, measuring, interpreting, analyzing, and communicating financial activity. A major in Accounting focuses on the development of such skills along with an understanding of the legal, social, and ethical responsibilities involved in the accounting profession.

Financial accountants prepare financial statements used in investing and lending decisions. Auditors examine financial statements and attest to their status. Management accountants evaluate and communicate internal financial information used by managers to operate a business. Forensic accountants specialize in the investigation and detection of, and protection against, fraud and abuse. Accountants also provide tax advisory services to firms, clients, and governmental agencies. With their specialized knowledge concerning the internal operation of a business, many accountants provide management advisory services. Also, because of the specialized knowledge, many accountants advance into management positions.
Students majoring in Accounting are required to learn how to apply technology in business and must take courses in many other aspects of business to understand how an accountant's work relates to marketing, management, finance, and production.

This four-year program leads to a Bachelor of Science degree with a major in Accounting. Completion of this program qualifies students to take the examinations required to become a Certified Management Accountant (CMA), and Certified Internal Auditor (CIA), and Certified Fraud Examiner (CFE).

Students interested in sitting for the Certified Public Accounting (CPA) exam need an additional 28 credit hours beyond the 122 credit hours required for the Accounting major. Students are encouraged to satisfy the additional credit hours through the Master of Accountancy (MAcc) degree.

**MAJOR REQUIREMENTS**

---

### Accounting Minor

Students earning majors in other fields may select a minor in Accounting. A minor includes Elements of Accounting I and II (ACCT 200 and 201), Intermediate Accounting I (ACCT 311), Cost Management Systems (ACCT 320), plus six credits in approved accounting courses. In addition, students must earn a 2.50 cumulative grade-point average in the accounting courses to be awarded a minor. A minor approval form and fee are required. Completion of a minor in Accounting provides students with additional depth in accounting that many employers prefer.

**MINOR REQUIREMENTS**

---

### Finance Major

The Finance major provides an academic experience sufficient to prepare students for employment in financial services, which includes banking, investment banking, investment management, financial planning, insurance and financial management. It also benefits students interested in pursuing finance-related professional certifications such as the Certified Financial Planner (CFP) and Chartered Financial Analyst (CFA).

**MAJOR REQUIREMENTS**

---

### Fraud Investigation Minor

Students in this interdisciplinary minor will study the causes of fraud, as well as the detection, investigation, and prevention of fraud. See [Interdisciplinary Programs](#) section for further information.

**MINOR REQUIREMENTS**

---

### Management Information Systems Major

Management Information Systems concerns the collection, organization, analysis, and dissemination of information for the planning and control of business/organizational operations. The Management Information Systems (MIS) program is designed for students who wish to prepare for professional careers in information processing or information systems in business and government. The program is designed to develop technical skills and administrative insights required for design, development, implementation, maintenance, and management of organizational information systems.

The MIS program at NDSU is a collaborative effort by the faculty of two disciplines: Management Information Systems and Computer Science. The objective is to provide students with both theoretical knowledge and hands-on experience. In addition to the required courses in management information systems and computer science, majors must complete a practicum in the management information systems area. Students pursuing an MIS major typically earn a Computer Science minor.
The Bachelor of Science (B.S.) degree provides sufficient background and skills to support a successful career in technical computing (for example, programmer, systems analyst, or systems designer), systems or network administration, database administration, information technology management, sales, or technical sales support.

**MAJOR REQUIREMENTS**

### Management Information Systems Minor

The Management Information Systems minor is intended for students who are planning careers that involve more active roles as computer users and evaluators, designers, and/or builders of information systems. The minor will provide exposure to issues relevant to the management of information technologies and the means to achieve organizational goals.

Contact the Department of Accounting, Finance, and Information Systems for specific course and minimum grade point average requirements. A minor approval form and fee are required.

**MINOR REQUIREMENTS**

### Graduate Program

The Master of Accountancy (MAcc) is available. See the Graduate Bulletin for more information.

### Department of Management and Marketing

[www.ndsu.edu/business](http://www.ndsu.edu/business)

The Department of Management and Marketing offers majors in Business Administration, Management and Marketing. Students graduating with any of these majors find employment in a broad range of industries, as well as government and non-profit organizations.

### Business Administration Major

The Business Administration Major is designed to provide students with a broad background in all of the aspects of business. Business Administration might be an appropriate major for students who will work in smaller organizations or own their businesses which will require a broader understanding of business. Also, some organizations may seek generalists rather than specialists because they may be more adaptable in rapidly changing business environments. This major might also be appropriate for students intending to go on to graduate studies that would benefit from a broad understanding of business, e.g., law school.

**MAJOR REQUIREMENTS**

### Management Major

The Management Major is designed to provide students with the analytical and conceptual background necessary for effective management of businesses and other organizations. Students develop expertise in the major sub-areas of organizational behavior, production and operations management, human resources, and strategy. Students with management majors find employment in all types of profit and non-profit organizations. Students pursuing a Management Major may also choose the Human Resource Management Track.
**Human Resource Management Track**

The Human Resource Management Track provides students with the knowledge and skills necessary to effectively serve in a Human Resource Management position. Students obtain knowledge in the legal environment of employment, job analysis, recruitment and selection, performance appraisals, compensation, training and labor relations.

**MAJOR REQUIREMENTS**

**Marketing Major**

The Marketing Major is designed for students pursuing careers in one of the subfields of marketing, such as product management, retailing, marketing communication, sales and sales management, distribution, or marketing research. These positions may be as technical specialists or as general marketing managers.

**MAJOR REQUIREMENTS**

**Practicum/Internships**

Students majoring in Business Administration, Management, or Marketing are encouraged to complete a practicum experience while enrolled in the professional program. The practicum prepares students for challenges of the business world through practical experience in their primary area of study. Students must consult with their academic advisor and obtain approval prior to enrolling in the practicum. Credits will be applied as free electives in the major and do not satisfy any of the professional requirements listed on the curriculum guide.

**Business Administration Minor**

Majors outside the College of Business often select a minor in Business Administration. A minor in Business Administration requires a minimum of 24 credits. At least 12 credits in 300-400 level BUSN, FIN, MGMT, and MRKT courses must be completed at NDSU in the College of Business. Prior departmental approval is required for any 300-400 level course not completed at NDSU but used to satisfy the minor requirements.

Students must earn a 2.50 grade point average that is based on the courses used for the Business Administration minor. A minor approval form and an application fee are required. This minor is not available to students with majors in the College of Business.

**MINOR REQUIREMENTS**

**Agribusiness (Corporate Track) Minor**

The 21-credit Agribusiness minor with a corporate track is an alternate track to the Agribusiness minor in the Department of Agribusiness and Applied Economics. The minor supplements a student's technical training in agricultural sciences with an understanding of fundamental business concepts and applies business strategies to corporate agribusiness decision-making. The Agribusiness minor with a corporate track is restricted to students with a major in the College of Agriculture, Food Systems, and Natural Resources, excluding agricultural economics and agribusiness majors. See the Agriculture, Food Systems, and Natural Resources section for further information.

**MINOR REQUIREMENTS**
Logistics Management Minor
The College of Business participates in the interdisciplinary minor in Logistics Management. Companies and the public increasingly rely on an effective and efficient logistics system to remain competitive. See Interdisciplinary Programs section for further information.

MINOR REQUIREMENTS

Certificate Programs
Certificate programs in Finance, Human Resource Management, and Marketing provide an opportunity for individuals to enhance their knowledge base and become more productive in their professional careers. The programs focus on key concepts and tools that are consistent with current practice.

Prospective students are subject to the university's admission policies and procedures. Students need not be seeking a degree to pursue a certificate program of study. Contact the College of Business Student Service Center for program requirements and policies.

Graduate Program
The Master of Business Administration (MBA) is available. See the Graduate Bulletin for further information.
The vision for the College of Engineering and Architecture is to provide leadership in education and research in the fields of engineering and architecture and to achieve a national reputation in selected areas. The college also will enhance the economy, environment, and society of the region through the development, communication, and application of knowledge in engineering and architecture.

### Mission

The mission of the College of Engineering and Architecture is to provide outstanding education, research, and service to students, alumni, state residents, research partners, businesses, organizations, and government. Further, college faculty will provide leadership in economic development by transferring technology and by providing information and innovative design. College goals:

- Deliver quality undergraduate and graduate education by creating and utilizing effective instruction and by demonstrating commitment to each student's development.
- Encourage continuous learning among faculty, students, alumni, and the public.
- Develop distance education and continuing education for professionals seeking to upgrade skills.
- Provide laboratories and studios to facilitate quality education, research, and creativity.
- Foster research with an emphasis on engineering applications and creative design that most directly serves the region and influences the global community.
- Pursue niches of research opportunity and develop an industry/college learning center.
- Serve citizens, businesses, and industry in the region by providing professional expertise, outreach, and partnerships.

The departments include Agricultural and Biosystems Engineering, Architecture and Landscape Architecture, Civil Engineering, Construction Management and Engineering, Electrical and Computer Engineering, Industrial and Manufacturing Engineering, and Mechanical Engineering.

### Accreditation

The facilities and curricula of the college are reviewed periodically by the Accreditation Board for Engineering and Technology, the National Architectural Accrediting Board, the American Council for Construction Education, and the Landscape Architecture Accreditation Board. These organizations are recognized national accrediting agencies for the engineering, architecture, construction management, and landscape architecture curricula.

### Admission Requirements

Applicants for admission must satisfy the general admission requirements of the university and the special requirements of the college and department.

### Recommended Preparation

Engineering programs encourage high school preparation in addition to the minimum core curriculum requirements. Prospective majors in engineering should present four units of high school mathematics including two units of algebra, one unit of geometry, and one-half unit of trigonometry. Science courses should include one unit of physics and one unit of chemistry. Students whose high school credentials or entrance examinations show deficiencies in these subjects will be required to enroll in courses designed to remove such deficiencies and cannot expect to complete a program of study in the number of semesters indicated in the printed curricula.
Selective Admission

Several programs within the College of Engineering and Architecture have selective admission. Refer to the department program descriptions below for respective selective admission criteria. Applicants should obtain information regarding the method of application from the NDSU Office of Admission.

Degree Programs

Undergraduate programs of study lead to the Bachelor of Science degree in the specific fields of agricultural and biosystems engineering, civil engineering, computer engineering, construction engineering, construction management, electrical engineering, environmental design, industrial engineering and management, manufacturing engineering, and mechanical engineering. A five-year professional degree completes the programs in architecture and landscape architecture. Each of the curricula includes a number of options for specialized study.

The college has developed its programs of study to provide an educational experience in keeping with the professions of architecture, landscape architecture, construction management and engineering. The classrooms, studios, and laboratories are well equipped and every effort is made to keep them abreast of current technology. Graduates successfully apply for registration as professional engineers or architects after minimum periods of professional experience. Examinations of the North Dakota State Board of Registration for Engineers and Architects are given near campus each year. In addition, the Level I - Associate Constructor Certification Exam for American Institute of Constructors Certification Commission is offered each semester. All seniors are encouraged to take the examinations as soon as they are eligible.

All engineering departments have programs that lead to Master of Science and Doctor of Philosophy degrees. The Architecture department has a Master of Architecture degree. The graduate degrees are administered by The Graduate School and the College of Engineering and Architecture. A number of graduate assistantships are available to students undertaking graduate study. For more complete details, see the Graduate Bulletin online.

Degree Requirements

To earn a baccalaureate degree from any of the engineering programs or the Construction Management program, a student must complete at least 60 semester credits of professional-level course work in his/her program while in residence and enrolled in the college. Students transferring into the college from programs with professional accreditation are exempt from the residence requirement, but are subject to NDSU's residence policy. Other exemptions must be approved by the college.

Special Opportunities and Services

The college serves both students and the public. Special opportunities include the following:

- **General Program:** The General program of the College of Engineering and Architecture is designed to allow students, who have not chosen the branch of engineering they wish to study, to take basic courses for one year. Students are housed in Industrial Engineering until or unless they declare a different major. Students are encouraged to select an engineering curriculum as soon as possible, but no later than the end of their first year.

- **Interdisciplinary Program:** The multidisciplinary Natural Resources Management program is available through the College of Agriculture, Food Systems, and Natural Resources, the College of Engineering and Architecture, and the College of Science and Mathematics. Refer to the Interdisciplinary Programs section of this Bulletin for further information.

Student Societies and Organizations

All students are eligible to join one or more of these organizations which are actively supported for the benefit of students in the related curricula: American Indian Science and Engineering Society, American Institute of Architecture Students, American Society of Agricultural Engineers, American Society of Civil Engineers, American Society of Landscape Architects, American Society of Mechanical Engineers, American Water Works Association/Water Environmental Federation (AWWA/WEF) (one group), Associated General Contractors, Engineers Without Borders, Institute of Electrical and Electronic Engineers, Institute of Industrial Engineers, Institute of Transportation Engineers, Materials Research Society (MRS), National Association of Home Builders, National Society of Black Engineers (NSBE), Society for the Advancement of Material and Process Engineering (SAMPE), Society of Automotive Engineers, Society of Manufacturing Engineers, Society of Plastics Engineers, Inc. (SPE), Society of Women Engineers, and the Surface Mount Technology Association.
Air Force ROTC sponsors the Bernard S. Bennison Squadron of the Arnold Air Society (AAS). This is a non-profit student service organization dedicated to furthering the purpose, traditions and concepts of the United States Air Force. These objectives are primarily met through community service projects. The Student Engineering and Architecture Council plans and administers many extracurricular student activities and is composed of elected representatives from the student societies.

Several national professional honor societies have chapters on the campus for which students with high academic attainments are eligible in their junior or senior years. Eligible students are selected for Tau Beta Pi from all engineering curricula, Tau Sigma Delta from architecture, Alpha Epsilon from agricultural and biosystems engineering, Eta Kappa Nu from electrical engineering, Alpha Pi Mu from industrial engineering, Sigma Lambda Alpha from landscape architecture, Sigma Lambda Chi from construction management and engineering, and Pi Tau Sigma from mechanical engineering. Membership in these societies is a coveted honor and highly regarded in the engineering and architectural professions.

The Engineering and Architecture Experiment Station and Extension Service

Research and development projects are administered by college staff responsible for general policies, publications, and cooperative relations with private and governmental agencies.

Special research activities and projects of the college are coordinated through the Experiment Station. The professional services of faculty and the facilities of the college are available to both private and governmental agencies for research and development studies on engineering or architectural problems. Research projects of individual faculty members are sponsored and promoted by the station.

The Engineering Extension Service provides special educational project services to adult groups in conferences, workshops, short courses, and publications. The laboratory facilities of the college are available for specialized instruction under the supervision of faculty. Organizations planning educational programs or special projects for their members are invited to consult the service for assistance.

Cooperative Education

Cooperative Education, a program of the Career Center, offers undergraduate and graduate students an opportunity to integrate classroom study with paid, career-related work experience for academic credit. Work may be full or part time. A Cooperative Education experience may substantially improve students' employment opportunities after graduation.

Department of Aerospace Studies (Air Force ROTC)

The Air Force Reserve Officer's Training Corps (AFROTC) program is conducted by the Department of Aerospace Studies. The purpose of this program is to enable qualified undergraduate and graduate students to become commissioned officers in the United States Air Force.

AFROTC learning experiences will be of long-range value whether one pursues a military or civilian career. Upon graduation and completion of the AFROTC curriculum, each student is commissioned a second lieutenant in the United States Air Force.

The initial assignment options available to the Air Force second lieutenant include the following:

1. Enter the Air Force and complete the designated technical training course prerequisite to the student's specialty, i.e., flight training, research and development, management, or support functions.
2. Apply for a delay in entering active duty for the purpose of pursuing an advanced degree.
3. Enroll in one of several Air Force sponsored graduate study programs while serving with full pay as an Air Force officer.

The Aerospace Studies curriculum is divided into two courses of instruction: the General Military Course (GMC), which parallels the freshman and sophomore academic years, and the Professional Officer Course (POC), which parallels the junior and senior academic years. Students in the four-year program normally attend four weeks of field training at Maxwell AFB, AL during the summer between their sophomore and junior years. The student who chooses not to enroll in the GMC (first two years) may still earn a commission by enrolling in a special two-year program during the junior and senior years. Admission to this special program requires
the student to make application early in the sophomore year. Qualified students will then participate in a six-week field-training program at an Air Force base the summer prior to their junior or senior year.

AFROTC college scholarships are awarded to the best-qualified students and range in length from one to five years. These grants cover the cadet’s tuition, incidental lab fees and most textbooks. In addition, cadets receive a tiered monthly allowance. For example, cadets enrolled in the Professional Officer Corps (POC) receive $450 per month during their junior academic year and $500 per month during their senior academic year. Incentive scholarships also are available for students not already on scholarship.

For more information on Air Force ROTC admission requirements and career opportunities, please contact the Unit Admissions Officer at 701-231-8186.

MINOR REQUIREMENTS

Department of Agricultural and Biosystems Engineering
www.ndsu.edu/aben

Agricultural and Biosystems Engineering Major

The Agricultural and Biosystems Engineering (ABEN) program prepares men and women for careers requiring application of physical, biological, and engineering sciences to problems relating to the production, handling, and processing of biological materials for food, feed, fiber, and fuel, the preservation of natural resources and environmental quality, and the design and production of machine systems. A major in Agricultural and Biosystems Engineering can serve a broad range of career interests and can provide excellent career opportunities for men and women from diverse backgrounds. The program objectives of this major are to educate graduates who will become engineers who 1) have the ability to use their technical knowledge, design and problem solving skills throughout their careers, 2) have interpersonal and collaborative skills and the capacity for productive careers, and 3) can use their disciplinary knowledge and educational depth and breadth to deal with changing career opportunities in agricultural and closely related industries. These objectives support the departmental mission of developing and extending knowledge through engineering and technology that advances the productivity of agricultural production, the processing and utilization of agricultural commodities and related biological materials, and the sustainment of environmental resources management.

Agricultural and biosystems engineering integrates engineering topics, engineering design, and biological sciences in a single program with two concentrations: agricultural engineering and biosystems engineering. While there is considerable overlap between the agricultural engineering (AGEN) and the biosystems engineering (BSEN) concentrations, requirements for the BSEN concentration include a heavier emphasis on fundamental biological and chemical sciences. The AGEN concentration includes a heavier emphasis in the engineering sciences. A wide range of electives in related disciplines can be used to complement the disciplinary course work and to prepare for specific career interests. Although not required by the curriculum, students are encouraged to take advantage of Cooperative Education experiences (paid internships) where they gain hands-on experience in engineering.

Biosystems Engineering Concentration

Graduates in biosystems engineering integrate engineering, biology, and chemistry in a variety of applications. Graduates may work in careers with the following goals: develop innovative green products and industries; convert bio-based resources to food, fuel, and other renewable products; design new generations of devices or systems for biological systems; and control biological systems for natural resource protection, waste remediation, and ecosystem restoration. Graduates may work with industries to create new and improved processes through the innovative use of microorganisms, plant and animal cells, and enzymes or they may develop sensors, control systems and computer models to monitor and control biological processes occurring in industry or the environment. Graduates with a biosystems engineering concentration may also pursue a professional or graduate degree in engineering, medicine, veterinary medicine, management, or law.

MAJOR REQUIREMENTS

Agricultural Engineering Concentration

Career opportunities for graduates in agricultural engineering are many and diverse. Graduates may work for companies and agencies that design, develop, test, and manufacture power and machine systems; handle, store, process, and enhance or protect the quality of agricultural commodities and processed products; design environmental control and housing systems for plant and animal production; design equipment and systems for processing, manufacturing, distribution and quality protection of food products; manage air, land and water resources; design and manage crop irrigation systems; and develop electrical and electronic applications for agricultural
problems. Graduates with an agricultural engineering concentration may also pursue graduate degrees in engineering, business, or law. By selecting appropriate elective courses, students may emphasize areas such as agricultural systems, environmental systems, biomaterials and processing systems, or an emphasis area designed by the student in consultation with an advisor.

- **Agricultural Systems Emphasis:** Engineering for advancing productivity of food, feed, and fiber production; emphases may include power and machinery systems, machine design, manufacturing, structures and environment control, computer aided design, electrical and electronic systems, and instrumentation and measurements.

- **Biomaterials Emphasis:** Engineering for quality maintenance, new uses, or enhanced utilization of agricultural and related biological materials; emphases may include engineering properties of biological materials, biological materials processing, food process engineering, and waste management. Students prepare for engineering positions in the rapidly expanding industries that handle and process biomaterials for food and non-food products and that create new applications of sciences in biotechnical, bioresource, and bioenvironmental fields.

- **Environmental Systems Emphasis:** Engineering for responsible use and sustainable management of environmental resources; emphases may include hydrology, soil and water resource conservation, irrigation engineering, water and wastewater engineering, water quality management, and hydrology. This emphasis is focused on the preparation of students for careers in environmental engineering, natural resources management, irrigation engineering, watershed management, and waste management.

The faculty assist with career planning and job placement of graduates. Students interested in careers involving delivery, management, and technical support of systems for food, agricultural, or closely related industries rather than engineering or design should consider the Agricultural Systems Management major offered by the College of Agriculture, Food Systems, and Natural Resources.

**Technical Electives:** Students consult their advisor for approved courses according to their career interests and/or a selected emphasis area.

---

**MAJOR REQUIREMENTS**

---

**Department of Architecture and Landscape Architecture**

ala.ndsu.edu

**Architecture Major**

The architect must combine an understanding of society, artistic skill, and technological knowledge to shape places and spaces that enrich human life. Not only do the physical requirements need to be satisfied, but also there must be beauty to engage the human spirit. All of this requires a creative thought process that can balance and organize needs that are quite varied in nature. Clear, responsible, sensitive, and comprehensive thinking is demanded of the architect who is to integrate a wide range of factors into a design that is meaningful. For this reason an architect's education must range from the practical aspects of building construction to the study of environmental, social, and aesthetic issues.

Central to the study of architecture is the sequence of architectural studio courses. Students are assigned architectural problems, which may be hypothetical, realistic, or theoretical, and find their own solutions to them with frequent individual consultations with instructors. As the student progresses, the projects become larger and more complex or the solution becomes more detailed. In this way, knowledge and experience acquired in other classes are brought to bear on the principal responsibility of the architect and the architecture student, that of shaping separate considerations into a single design.

**Selective Admission**

Admission into the first-year Pre-Architecture Program is open to any student enrolled at NDSU. Transfer students are evaluated on the basis of courses taken and grades received. Upon completion of the first year, a selected number of students are admitted to the second year of the program on the basis of institutional GPA attained and performance in first-year architecture courses.

**The Program**

At the end of the third year of study, students may apply to the Master of Architecture degree program. The Bachelor of Science in Architecture is granted after the fourth year of study, and the professional Master of Architecture degree at the end of the fifth year of
study. The program is fully accredited by the National Architectural Accrediting Board, and the M.Arch. degree is recognized by the National Council of Architectural Registration Boards as a professional degree.

The total number of credits required for the professional degree is 168, and the bachelor degree requirement is 136.

In the United States, most state registration boards require a degree from an accredited professional degree program as a prerequisite for licensure. The National Architectural Accrediting Board (NAAB), which is the sole agency authorized to accredit U.S. professional degree programs in architecture, recognizes three types of degrees: the Bachelor of Architecture, the Master of Architecture, and the Doctor of Architecture. A program may be granted a 6-year, 3-year, or 2-year term of accreditation, depending on the extent of its conformance with established educational standards.

Master's degree programs may consist of a pre-professional undergraduate degree and a professional graduate degree that, when earned sequentially, constitute an accredited professional education. However, the pre-professional degree is not, by itself, recognized as an accredited degree.

Special Notice

Students who are admitted into the second year of the program will be required to purchase a laptop computer. Information on type of computer, software, purchase, and financing arrangements will be distributed to admitted students prior to purchase.

MAJOR REQUIREMENTS

Landscape Architecture

The Landscape Architecture program is one of approximately 63 accredited programs in the United States. The curriculum is reviewed periodically by the nationally organized Landscape Architecture Accreditation Board and has been fully accredited since 1991.

Landscape architects provide a wide variety of professional services for individual clients, organizations, corporations, and government agencies. They are involved at every phase of the development of a site, from the initial discussion of ideas with the client through the supervision of construction for the project.

Master planning of parks, zoos, golf courses, playgrounds, and recreation areas are familiar projects for landscape architects. They may also design multifunctional areas for urban renewal projects, college campuses, industrial parks, new communities, natural areas, reclaimed lands, and wetlands.

Besides designing sites, landscape architects often select building locations, prepare cost estimates, initiate long-range planning studies, determine utility corridors, and prepare environmental impact statements for future construction. Whether specializing within a large firm of landscape architects or working in a small professional office, the landscape architect is often collaborating with other professionals, such as engineers, city planners, and architects.

Most landscape architects spend some of their time at the drawing board or computer. They also spend many hours in the field, investigating and analyzing potential project sites, developing field notes for design layouts, completing visual surveys, and supervising construction. It is at the computer and drawing board that projects are actually organized and shaped into a creative and imaginative solution. The work and responsibility of each landscape architect depends principally on individual interests and abilities. Opportunities may range from professional practice on a small scale to administration of governmental programs.

Those who plan careers in landscape architecture should be able to work independently, have a capacity for solving technical problems, be artistically inclined, and be willing to learn computer use. They should be prepared to work in the competitive environment of the profession, where great value is placed on leadership and the ability to work effectively with others. The range of interests and knowledge required in the profession of landscape architecture is broad, therefore, the courses required of students include many fields of study options. A student may specialize by selecting one of the options provided: Land Reclamation/Natural Resources Management, Landscape Construction and Technology, Rural Community Development, or Design and Communication. Students may also tailor their own option area with their academic advisor.

Selective Admission

Admission into the first-year Pre-Landscape Architecture program is open to any student enrolled at NDSU. Transfer students are evaluated on the basis of courses taken and grades received. Upon completion of the first year, a selected number of students are
admitted to the second year of the program. The basis for selection is institutional GPA and performance in first-year landscape architecture courses.

Special Notice

Students in the second year of the program will be required to purchase a laptop computer. Information on type of computer, software, purchase, and financing arrangements will be distributed to students prior to purchase.

MAJOR REQUIREMENTS; MINOR REQUIREMENTS

Department of Civil Engineering

www.ndsu.edu/ce

The mission of the Department of Civil Engineering is to provide quality education to prepare nationally competitive undergraduate students for a successful career in civil engineering; to provide advanced skills and knowledge in state-of-the-art research and design in sub-areas of civil engineering for graduate students; and to provide service to the university, engineering profession, and the public.

The following program education objectives are developed with the goal of preparing students to enter a modern civil engineering workforce and to be successful in their career and profession. The educational objectives are consistent with the university, college and department missions as well. The objectives are:

1. To ensure that graduates will have a mastery of fundamental knowledge, problem solving skills, engineering experimental abilities, and design capabilities necessary for entering civil engineering career and/or graduate school.
2. To produce graduates that have the knowledge and skills necessary for identifying and assessing design alternatives and the related social, economic, environmental, and public safety impacts.
3. To produce graduates who have verbal and written communication skills necessary for successful professional practice.
4. To prepare graduates to function effectively on teams.
5. To prepare graduates to deal with ethical and professional issues, taking into account the broader societal implications of civil engineering.
6. To prepare graduates for professional licensure, leadership roles and life-long learning.

Civil engineering includes the planning, design, construction, maintenance, and operation of large and permanent engineering projects of our civilization. Civil engineers are in demand wherever there are people. The major subdivisions of civil engineering are structural, geotechnical, environmental, sanitary, water resources, and transportation engineering.

The civil engineer is responsible for such projects as bridges and large buildings, dams, and other river and harbor work, municipal water supply and sanitation facilities, streets, highways, and other transportation facilities. On many projects, civil engineers work in close cooperation with engineers and scientists from other fields. The Civil Engineering program at NDSU is accredited by the Engineering Accrediting Commission of the Accreditation Board for Engineering and Technology (ABET).

Civil Engineering Major

The Civil Engineering curriculum is designed to give students a thorough mathematical and scientific background in all of the subdivisions of the field. At the same time it provides students with an opportunity to place further emphasis on his/her chosen subdivision through technical electives.

Twelve credits of the curriculum are available for technical electives. Students are required to choose three technical electives from the five major areas, while at the same time satisfying the ABET design requirement. All Civil Engineering students must take a capstone design course, CE 489, which is designed to bring concepts learned in different courses to culminate in a major design experience.
Students interested in structural engineering may choose courses like finite element analysis, advanced reinforced concrete, advanced steel design, timber design, pre-stressed concrete, foundation engineering, and dynamics of structures.

Students interested in water resources, sanitary, or environmental engineering may choose courses like solid waste management, applied hydraulics and hydrology, ground water and seepage, water and wastewater laboratory practices, properties of open channels, hazardous waste management, water quality management, and sanitary engineering problems.

Students interested in transportation engineering may choose courses like transportation planning, airport planning and design, railway planning and design, geometric highway design, or traffic engineering and pavement design.

Students interested in geotechnical engineering may choose courses in foundation engineering, earth slopes, and geosynthetics.

The curriculum includes a core of social humanistic subjects to provide the student with a background essential to a proper understanding of the role of engineering in society.

Students in Civil Engineering are strongly encouraged to participate in the Cooperative Education program to enhance their classroom education with practical experience in engineering-related positions in industry.

Students transferring into Civil Engineering from other departments or institutions are encouraged to do so no later than the beginning of the junior year if they wish to complete the degree requirements within two academic years.

All Civil Engineering students at NDSU are required to have a minimum cumulative grade-point average of 2.0 and have received a grade of "C" or better in Math 165, 166, 128, 259, 266; ME 221, 222, 223; and all prerequisites in sequence for these courses, before enrolling in any civil engineering courses that utilize these courses as prerequisites.

Graduate programs leading to Master of Science and Doctor of Philosophy degrees are available in specialized fields. For more complete details, see the Graduate Bulletin online.

MAJOR REQUIREMENTS

Note: Department permission required for graduate level courses. Credit may be earned only at the undergraduate level. Department permission also is required for some undergraduate courses. There are specific prerequisites and grade requirements to be allowed to take certain courses.

Department of Construction Management and Engineering
www.ndsu.edu/cme

The mission of the Department of Construction Management and Engineering at North Dakota State University is to provide quality programs for preparing nationally competitive undergraduate and graduate students for a successful career in construction. The programs are designed to provide education, research, and outreach opportunities that serve both the needs of students and those of the construction industry. The educational objectives of the programs are to provide students with: (a) basic skills necessary to plan, organize, and control resources to manage the overall construction process, (b) technical knowledge, design, and problem solving skills for a career in construction, (c) knowledge and skills necessary to identify, define, and compare design alternatives, (d) necessary communication skills for successful practice of the construction profession, and (e) opportunities to learn the need for professionalism and life-long learning, and the need to understand the broader societal implications of construction projects.

The continued rapid growth of the construction industry demands new kinds of professionals, the construction engineer, and manager. These professional constructors will be required to integrate new and high-level technology into all aspects of the design and construction process. All the aspects that contribute to the finished construction project from the initial planning stage through the final project turnover require close and careful attention. An individual with management and technical ability to oversee an entire project is essential to the industry. To fill the need for qualified professionals, the following degrees are awarded: Bachelor of Science in Construction Management and Bachelor of Science in Construction Engineering. A 2.50 cumulative GPA is required for all internal and/or external transfers.
The construction programs are very practical in nature and designed to prepare the graduate for entry into the construction industry on a professional level. Construction graduates build homes, highways, bridges, power plants, dams, tunnels, skyscrapers, and many other facilities of benefit to society.

**Construction Engineering Major**

The Construction Engineering program is a blend of engineering, construction, and construction management courses. This program is designed for those who want to work in the construction industry and enjoy the status of a professional engineer. It is somewhat similar to the Construction Management program, but has more emphasis on engineering and technical courses. The Construction Engineering program is accredited by the Engineering and Accreditation Commission of ABET, 111 Market Place, Suite 1050, Baltimore, MD 21202-4012 - Tel: (410) 347-7700.

**Educational Objectives**

1. To prepare students for entry in successful careers in construction engineering emphasizing a fundamental understanding of the practice of construction engineering and management principles. Students will gain the ability to define, prioritize, and solve a broad set of engineering problems in construction, learn the importance of engineering judgment, and gain knowledge of contemporary and global issues. Students will also learn the creative process of engineering design, experimentation, data analysis, and the fundamentals of leadership.

2. To prepare students for the practice of construction engineering design and management with an emphasis on multiple solutions, sustainable construction, design alternatives, and impacts using the skills, techniques, and tools of modern engineering practice to achieve safety, quality, scheduling, economic, environmental, political, and social project objectives.

3. To facilitate an understanding of the societal and economic impacts of construction engineering practice and the professional and ethical responsibilities of a construction engineer.

4. To provide learning opportunities which prepare the construction engineering and management graduate to function in team-oriented, multi-disciplinary, open-ended engineering activities.

5. To provide a broad curriculum giving students a solid background in the basic sciences and mathematics; the ability to communicate effectively; and an understanding and appreciation for the humanities, social sciences, and management sciences; and the ability to engage in life-long learning through self-study, and/or continuing education.

**Construction Management Major**

Construction management is a combination of engineering technology, construction techniques, and management to meet the needs of the rapidly growing construction industry. The program is designed to prepare students for the art of achieving maximum profit by efficient use of people, machines, materials, and money to complete a construction project on time and to the satisfaction of the owner.

A meld of engineering, construction, management, and business gives the student a background and understanding of management's point of view in the construction industry. The Construction Management program is accredited by the American Council for Construction Education (ACEE).

Junior and senior Construction Management majors must maintain a minimum 2.50 institutional cumulative grade-point average to be eligible for enrollment in 300-400 level courses offered by the College of Business.

**Educational Objectives**

1. To provide students with the knowledge and skills required to identify, define, and solve problems involving construction methods, processes, and alternatives using appropriate management techniques and tools.

2. To provide students with the basic skills necessary to plan, organize and control project resources (labor, equipment, and materials) in order to manage the overall construction process.

3. To provide students with the required communication skills (oral and written) for successful practice of the construction profession.
4. To provide students with the necessary skills to function effectively on multi-disciplinary teams and to understand and appreciate the contributions of other disciplines within the construction process.

5. To provide students with professional opportunities and skills to pursue life-long learning and involvement in professional associations within the broader societal context of the construction profession.

6. To provide students with exposure to ethical, societal and, global issues related to decision making in the construction management profession.

MAJOR REQUIREMENTS

Department of Electrical and Computer Engineering
www.ece.ndsu.nodak.edu

The mission of the Department of Electrical and Computer Engineering is to provide quality educational opportunities for undergraduate and graduate students through teaching, research, and professional service, and to provide specialized support to the greater community.

Departmental objectives:

1. Prepare our students to become competent electrical and computer engineers.

2. Promote life-long learning practice through continuous curriculum review, research, design, and other scholarly activities.

3. Stimulate student and faculty professional development through publications, participation in professional meetings and societies, and research involvement.

4. Maintain and enhance a positive departmental environment conducive to teamwork, discovery, and professional development.

5. Promote public awareness, interest, and respect for science, engineering, and technology.

6. Provide specialized services to the region, industrial partners, and the professional community.

The intended student outcomes of this major are to provide students with: a) an ability to apply knowledge of mathematics, science, and engineering; b) an ability to design and conduct experiments, as well as to analyze and interpret data; c) an ability to design a system, component, or process to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability, and sustainability; d) an ability to function on multidisciplinary teams; e) an ability to identify, formulate, and solve engineering problems; f) an understanding of professional and ethical responsibility; g) an ability to communicate effectively; h) the broad education necessary to understand the impact of engineering solutions in a global, economic, environmental, and societal context; i) a recognition of the need for, and an ability to engage in life-long learning; j) a knowledge of contemporary issues; k) an ability to use the techniques, skills, and modern engineering tools necessary for engineering practice; and l) ability to grow in the knowledge of and make professional contributions to at least one specific area of ECE. Electrical and computer engineers create products and services for society out of materials that exist in nature by using principles of science and creativity. The profession is broad, encompassing products valued by society in many technical specialties from electric power and energy utilization to those for current and future information transmission. Career employment opportunities within the profession range over design, development, manufacturing, sales, management, teaching, and research for industry and government.

Selective Admission

Departmental admission requirements for freshmen are an ACT (or equivalent) math test score of 23, or a top 30 percent class standing with a math ACT of 20. Transfer students from U.S. institutions must have a 2.3 GPA; transfer students from international institutions must have a 3.0 GPA.

Further, the department policy is that transfer credits with grades of "D" in mathematics, science, or engineering courses are not accepted for the Electrical and Computer Engineering curricula.

An institutional GPA of 2.0 or above is required prior to registration in junior- and senior-level courses. Majors must have a grade of "C" or better in the following courses: all required mathematics courses through MATH 266; ECE 111, 173, 275, and EE 206.
The Programs

Major components of the undergraduate programs are basic science and mathematics, humanities and social sciences, communication, engineering science, engineering design and ethics, and both breadth and depth in electrical and computer engineering. Graduate studies leading to Master of Science and Doctor of Philosophy degrees are offered in the department. For more complete details, see the [Graduate Bulletin](#) online.

Computer Engineering Major

The Computer Engineering program provides a background in three broad areas: computer hardware, software, and hardware-software integration. Fundamental computer topics included in the program are microprocessors, embedded systems, computer architecture, digital systems, data communications and other related computing material. In addition, the program includes core engineering subjects that are common to all engineering disciplines and basic university studies in humanities and social science. The Computer Engineering program at NDSU is accredited by the Engineering Accrediting Commission of the Accreditation Board for Engineering & Technology (ABET).

MAJOR REQUIREMENTS

Electrical Engineering Major

The Electrical Engineering program at NDSU is accredited by the Engineering Accrediting Commission of the Accreditation Board for Engineering and Technology (ABET).

EE Specialization

The Electrical Engineering program is designed to reflect the broad nature of the field, and students may tailor their studies within broad parameters. Students are encouraged to develop an individual program of study in close consultation with their advisors. Examples are available to illustrate how specialization may be obtained in a number of different technical areas. Students may mix and match from the examples to suit their particular interests. Technical areas include the following:

- **Biomedical Engineering:** This area is firmly based in engineering and the life sciences. The integration of medicine and engineering serves to provide appropriate products, tools, and techniques for research diagnosis and treatment by health care professionals. Some important products are artificial hearts, medical imaging (MRI, ultrasound, CT scans), prosthetic devices, and computer aids for diagnosis. Biomedical engineers help identify the problems and needs that can be solved using engineering technology and systems methodology to provide high-quality health care at reasonable cost.

- **Communication and Signal Processing:** These are closely related fields within electrical engineering. Communication is the process of transferring information from one point in time and space to another point. Signal processing involves signal representation, as well as signal design and filtering. Students with this specialization find challenging opportunities worldwide to meet the need for more convenient, inexpensive, and reliable communication and signal processing.

- **Computer Engineering:** This area involves hardware and software for small and large computers and for all the products that have dedicated computers within the product, such as microwave ovens and automobiles.

- **Control Engineering:** This is the design and implementation of algorithms for controlling physical systems. Examples include active suspension for cars, auto pilots for aircraft, and robot motion control.

- **Electromagnetics:** This area includes electromagnetic compatibility, fiber optics, antennas, microwave devices, radar, sonar, satellite systems, power and communication transmission lines, grounding, shielding, and propagation.

- **Electronics and Microelectronics:** Examples are integrated circuits, VLSI, transistors, lasers, consumer electronics, defense electronics, power electronics, and electronic materials.

- **Optical Engineering:** The Optical Engineering option was developed jointly with the [Department of Physics](#). Many technical disciplines now use optics. Medicine uses laser surgery and optical diagnostics. Communications is expanding optical fiber communication. Image processing is using optical techniques. The Optical Engineering option prepares future
engineers in such areas as quantum theory; coherent/incoherent, polarized/non-polarized light; geometric, physical and Fourier optics; holography; and image processing and acquisition.

- **Power Systems:** This area includes the generation, transmission, distribution, and utilization of electric energy subject to safety, environmental, and economic concerns.

### MAJOR REQUIREMENTS

**Note:** For students interested in pursuing one of the areas of specialization, lists of recommendations for specific electives are available from the ECE Department.

---

**Department of Industrial and Manufacturing Engineering**

[www.ndsu.edu/ime](http://www.ndsu.edu/ime)

Two majors are offered within the Industrial and Manufacturing Engineering Department (IME): Industrial Engineering and Management (IE&M) and Manufacturing Engineering (MfgE). Both programs are professionally accredited through the Engineering Accreditation Commission of the Accreditation Board for Engineering and Technology.

Career positions for graduates of the two programs often have some similarity; so, many of the courses required for the two majors are the same. Industrial Engineering and Management encompasses manufacturing as well as service industries. Industrial engineers have the technical training to make improvements in a manufacturing setting as well as to evaluate and improve productivity and quality in service Industries. Manufacturing engineers apply scientific principles to the production of goods. They are key team members in production of a wide range of products, including automobiles, airplanes, tractors, electronics, toys, building products, foodstuff, and sports and recreational equipment. In all cases, manufacturing engineers design the processes to make products with the required functionality, to high quality standards, and available when and where customers prefer, at the best possible price.

Following the many different employment paths of our graduates, the two IME programs are differentiated by specific courses that address particular needs of the respective career tracks. IE&M students take additional courses in systems engineering and in the application of engineering skills in people management. MfgE students take additional courses in the analysis and design of manufacturing processes and of production systems.

In addition, both majors offer the student opportunities for specialization in the junior and senior years. IE&M students can apply their elective courses to extra study in production operations and management, healthcare management engineering, and reliability and quality management. MfgE students can elect additional specialization in electronics manufacturing and process engineering.

Both IE&M and MfgE students learn in an environment of professional realism. Many of the major courses fulfill their learning objectives through projects that are done with industrial companies. Students interact with practicing professionals to learn the real-world applications of the theories they master in the classrooms. There also are many laboratories where students gain hands-on understanding of machinery and engineering systems. Students in both IME majors are urged to take advantage of Cooperative Education and internship positions wherever possible. The knowledge gained through these experiences enhances career preparation and provides for expanded placement opportunity upon graduation. As part of improving the quality of the programs we offer, grades less than "C" will not be accepted for chemistry, physics, and mathematics courses in the degree curricula.

Learning in the IME Department is a partnership of student and faculty. The student's responsibility is to learn -- to master the concepts, theories and practices that lead to career success. The faculty responsibility is four-fold: to provide an atmosphere that is conducive to learning; to assure availability of the tools necessary for effective and efficient learning; to offer guidance on educational and professional matters; and to evaluate student achievement. The usual faculty role is one of mentor, encouraging students to grow in stature as soon-to-be engineers and as practicing professionals.

IME graduates are prepared for careers that design, develop and implement devices, processes and systems that manufacture, construct, operate and service products, equipment and facilities that are often conceived in other engineering disciplines. Career positions in IE&M and MfgE form the vital linkages between abstract concepts and the reality of products and facilities of real use to customers. Graduates are in demand for employment in a very wide range of industries from production of all types of goods to transportation and distribution to information management, to healthcare to consulting.

In all cases, career positions for IME graduates involve design of processes and procedures in advanced technology environments. These professions routinely apply sophisticated modern tools in information handling, distributed communications, computer-driven
controls, and a wide variety of technologically advanced equipment and apparatus. In addition, IME career professionals are skilled in the integration of people and technology within the business context of world-class enterprises. They make satisfying careers in organizations of all sizes and types, located in all parts of the world. Graduates generally have a wide choice in where they work and live, as well as the size and kind of company for which to work.

Post-graduate studies also are available in the IME department, leading to the Master of Science and Doctor of Philosophy degrees. For more complete details, see the Graduate Bulletin online.

---

**Industrial Engineering and Management Major**

Industrial Engineering and Management is a good choice for people with the aptitude and interest for careers that blend technology and people. First, this is an engineering program, with the traditional content of mathematics, sciences, engineering analysis and design. Graduates are traditionally very successful in nationally-normed professional engineering examinations. Beyond the basics, this program also challenges students to integrate resources with technology. In addition to scientific principles and technological systems, IE&M students study people systems, cost analysis, facilities and other elements of the business enterprise. The "engineering" and "management" pieces are blended and integrated.

Just as the profession requires a blend of scientific, technological and humanistic skills, student learning in IE&M is an integrated process. The discipline-specific courses place the student in position to experience many elements of real situations in industry and commerce. Moreover, the program has been nationally cited for integrating design across all levels, with freshmen and juniors or sophomores and seniors often working together.

Graduates of the IE&M program will be able to:

1. Apply statistical, operations research and simulation tools to solve problems relevant to modern production, commercial, social and/or governmental organizations, with principal emphasis on quality, productivity, continuous improvement, and enterprise integration.

2. Design processes and systems to effectively and economically employ and integrate technology and people in organizational environments in industrial, healthcare, logistics, service and/or governmental settings, with appropriate consideration for environmental factors, health and safety, manufacturability and ethical, economic, social and political issues.

3. Engage in effective learning in topics and areas relevant to professional advancement and to enhancing the quality of personal life.

4. Participate effectively in multidisciplinary teams in both leadership and followership roles.

5. Effectively communicate complex technological concepts, issues and professional details to a variety of audiences.

IE&M graduates are in high demand across a wide spectrum of industries. In recent years, the most active employers have represented transportation, warehousing and distribution, healthcare, information systems, software, facilities development and consulting industries, as well as many of the production sectors that have been the traditional concentration for industrial engineers. IE&M graduates are sought after for responsible positions in project and organizational management, financial modeling, technological training, logistics, and design of processes, procedures, facilities, and systems.

**Industrial Engineering and Management Areas of Emphasis**

Students majoring in Industrial Engineering and Management may prepare for specific career choices by careful use of the technical electives included in the IE&M major. It is suggested that students confer with their academic advisor for assistance in choosing the most appropriate optional courses. Particular areas of emphasis may be selected in the following special interests:

- Healthcare management engineering
- Production operations and management
- Process and production engineering
- Reliability and quality management
- Lean manufacturing
- Specialized manufacturing processes (electronics, aircraft, plastics and composites)
These topical areas are also available for post-graduate study, leading to the Master of Science in Industrial Engineering and Management and the Doctor of Philosophy in Industrial and Manufacturing Engineering degrees. For complete details, see the Graduate Bulletin online.

MAJOR REQUIREMENTS

Industrial Engineering and Management Minor

Students majoring in any engineering discipline may elect a minor in Industrial Engineering and Management. These optional studies offer engineering students the opportunity to add important career-enhancing skills to their technological competencies. The elected courses in an IE&M minor add skills for integrating technology and resources within the complex of people, technology, machinery and information that make up the successful modern business enterprise. Students completing this minor will achieve better understanding of organizational and management processes and will be better prepared to work in the multifunctional teams crucial to success in industry.

Minors at NDSU require a minimum of 16 credits. The foundation requirements for the IE&M minor are:

- IME 111, Introduction to IME
- IME 311, Work/Station Design

The remaining 10 credits may be selected from any IME 300- and 400-level courses for which prerequisites are in place. The only exception is Evaluation of Engineering Data (IME 460), which does not count toward this minor.

Interested students are encouraged to visit with relevant faculty in the IME Department for advice on course selection to best suit their career interests. Students must complete the graduation requirements for another engineering major before the designation of the IE&M minor will be placed on their transcripts.

Management Sequence for Non-Majors

The practices and procedures learned in the Industrial Engineering and Management major are universally applied in public and private organizations of all kinds. IE&M courses are available as electives for students majoring in computer science, mathematics, sciences, business administration, cereal science, agricultural economics, and facility management. Courses recommended for non-majors are: Work/Station Design (IME 311), Engineering Economy (IME 440), Management of People Systems (IME 455), Program & Project Management (IME 456), and Evaluation of Engineering Data (IME 460).

MINOR REQUIREMENTS

Manufacturing Engineering Major

Manufacturing Engineering is a good choice for people who have both aptitude and interest in production of goods for improved living standard for the general populace. This career field is all about the production of goods - from automobiles and tractors and airplanes … to electronic products, recreational products, sports equipment, books and toys … to foodstuffs. Manufacturing engineers are employed in every industry that produces goods of some kind.

Manufacturing engineers may focus on the interaction between work piece and tool as process scientists or process engineers. They may concentrate on integrating the many different processes and parts necessary to make up finished products - as production engineers. Or, as manufacturing systems engineers, they may take a very wide view of the manufacturing enterprise, including its supply chain, distribution channels, financial structure and resource management. In every particular focus, manufacturing engineers are the people who design the processes through which products are made with the required functionality, to high quality standards, in the quantities needed, available when and where customers prefer, and at the best possible price.

Every day, manufacturing engineers make decisions about technology, machinery, people, and money. The preparation for the excitement and challenge of modern manufacturing requires students to master the mathematics and applied science common to all engineering disciplines. They then will master the fundamentals of process engineering and production engineering so that they may apply these principles to production of any type of goods.
Graduates of the Manufacturing Engineering program will be able to:

1. Solve problems relevant to modern manufacturing industries, with principal emphasis on process engineering and production engineering, as well as selected aspects of process science and the manufacturing enterprise.

2. Design competitive manufacturing processes and production systems, integrating machinery, technology, people and money, with appropriate consideration for environmental factors, health and safety, sustainability and ethical, economic, social and political issues.

3. Engage in effective learning in topics and areas relevant to professional advancement and to enhancing the quality of personal life.

4. Participate effectively in multi-disciplinary teams in both leadership and followership roles.

5. Effectively communicate complex technological concepts, issues and professional details to a variety of audiences.

Manufacturing Engineering graduates are well positioned to select career employment in any manufacturing industry. Graduates are actively recruited by companies that produce agricultural and construction machinery and vehicles, complex industrial apparatus, recreational vehicles, airplanes, household goods, building products, and both industrial and consumer electronics. Manufacturing Engineering graduates generally begin their careers designing processes and production systems or directly managing some phase of manufacturing. Frequently, they progress to increased responsibilities, with broader scope and yet more opportunity.

Manufacturing Engineering Areas of Emphasis

Students majoring in Manufacturing Engineering may prepare for specific career choices by careful use of the two technical electives and the three Engineering Science requirements included in the Manufacturing Engineering major. It is suggested that students confer with their academic advisor for assistance in choosing the most appropriate optional courses. These topical areas also are available for post-graduate study, leading to Master of Science in Manufacturing Engineering and Doctor of Philosophy in Industrial and Manufacturing Engineering degrees. For more complete details, see the Graduate Bulletin online.

Manufacturing Sequences for Non-Majors

Most industrial enterprises engage in the production of some sort of goods in some way and to some degree. Students majoring in other disciplines can enhance their career value by expanding their knowledge of process engineering and production engineering. For students majoring in other engineering disciplines or in the agricultural or physical sciences, the technological foundations of manufacturing can be acquired through Manufacturing Processes I (IME 330), Process Engineering (IME 430) and Production Engineering (IME 431). Also, engineering majors from other disciplines may elect to acquire more depth in electronics manufacturing (IME 427) and plastics and composite manufacturing (IME 432, 435).

MAJOR REQUIREMENTS

Manufacturing Engineering Minor

Most industrial enterprises engage in the production of some sort of goods in some way and to some degree. Students majoring in other disciplines can enhance their career value by expanding their knowledge of the technologies, processes and systems of manufacturing. A minor in Manufacturing Engineering may be earned by any student in good standing and majoring in any engineering discipline or applicable agricultural or physical sciences. Students electing to pursue this minor will be expected to have achieved the necessary pre-requisite knowledge, consisting of basic calculus, statistics and physical sciences. Students completing a minor in Manufacturing Engineering will gain highly relevant understanding of the technologies, machine tools, fixturing and tooling, and production systems employed in the manufacture of a wide variety of goods used in modern society.

Interested students are encouraged to visit with relevant faculty in the IME Department for advice on course selection to best suit their career interests.

MINOR REQUIREMENTS
Mechanical engineering is a broad field primarily concerned with the principles of motion, energy, and force. Mechanical engineers are called upon to design machinery, mechanisms, and systems that function safely, reliably, and efficiently to serve needs of society. To accomplish this, mechanical engineers apply scientific principles to problems that involve the motion of heat, gases, fluids, and solid materials.

Mechanical engineers may be found in nearly all segments of society. They work in industry, consulting practices, government facilities, and universities. In industry, mechanical engineers work for equipment manufacturers, utilities, material processing plants, environmental firms, and companies that deal with aerospace, transportation, petroleum, biomedical products, and others. Mechanical engineers employed by the government and universities contribute to the betterment of society by conducting research to solve present and future problems. As technology becomes more prevalent in daily life, mechanical engineers are increasingly called upon to apply that technology to develop devices that improve the standard of living.

**Mechanical Engineering Major**

The Mechanical Engineering program at NDSU is accredited by the Engineering Accreditation Commission of the Accreditation Board for Engineering and Technology (ABET). The curriculum is designed to produce baccalaureate-level graduates who are well prepared to accept engineering positions in industry and government or to pursue advanced degree studies.

The mission of the Mechanical Engineering Department is to educate undergraduate and graduate students in the fundamentals of the discipline, prepare graduates to effectively function in society in the field of their choice, and to provide the learning skills to adapt to evolving personal and professional goals. To accomplish this mission, the educational objectives of the program are to produce graduates who:

1. Are well educated in the fundamentals of the discipline, and possess the ability and willingness to adapt to emerging technologies through continued professional development.
2. Will contribute in a competent manner to the engineering profession in the field of their choice.
3. Demonstrate a commitment to uphold ethical and professional standards in the practice of engineering.
4. Can effectively function in a team environment and interact with people of diverse backgrounds.
5. Understand the context in which their designs will be implemented and the corresponding impact of their activities on society.

A complete listing of the program outcomes associated with these objectives can be viewed on the department's web site.

Strong program emphasis is placed on engineering science, laboratory, and design. The use of modern computer tools and techniques in engineering practice also is incorporated throughout the curriculum. In addition, liberal arts education is included to prepare graduates for becoming concerned and productive members of society.

Students transferring into mechanical engineering from other departments or institutions are encouraged to do so no later than the beginning of the junior year if they wish to complete the degree requirements within two academic years.

Graduate programs leading to Master of Science and Doctor of Philosophy degrees in Mechanical Engineering are offered by the department. For more complete details, see the Graduate Bulletin online.

**Selective Admission**

The Department of Mechanical Engineering has a selective admission policy. To be admitted to the basic program (freshman and sophomore level), freshman applicants must either rank in the top one-third of their high school graduating class or have received a score of 26 or higher in the math portion of the ACT. Transfer students, whether from another university or from another department at NDSU, must have an institutional grade point average (GPA) of at least 2.8.
To enter the professional program (junior and senior level), students must complete the basic program with an institutional GPA of 2.8, and a core course GPA of 2.8, with no grade below "C" in any one of the core courses.

A minimum institutional GPA of 2.5 is required for graduation from Mechanical Engineering. No course grades less than "C" are acceptable to fulfill a program requirement.

Curriculum Options

All Mechanical Engineering majors have a common curriculum during the first two years. At the beginning of the third year, students may choose one of the following curriculum options to complete their program of study:

- **Standard**: Students who are interested in exploring a spectrum of technical electives may follow the Standard curriculum and choose a minimum of five technical elective courses. These courses cover a wide range of topics and students may tailor their choices to reflect their special interests in solid mechanics and design, thermal sciences, materials and nanotechnology, injection molding, biomechanical engineering, or other areas as added in the future. For a complete list of technical electives available in each area, students should consult with their advisor or the department.

**MAJOR REQUIREMENTS**

- **Coatings and Polymeric Materials**: The Coatings and Polymeric Materials option in Mechanical Engineering at NDSU is a unique program offered nowhere else in the United States. Upon completion of this option, students are eligible to receive a minor in Coatings and Polymeric Materials. This minor is for students wishing to prepare for a career as a mechanical engineer in the plastics and coatings industries, or for a career in a manufacturing industry as a mechanical engineer with expertise in the fields of plastics and coatings.

**MAJOR REQUIREMENTS : MINOR REQUIREMENTS**

Numerous career opportunities for mechanical engineers with this specialized training are available in the coatings industry, which manufactures paints and coatings to enhance and preserve such items as automobiles, ships, steel structures, machines, and household appliances. Many other opportunities are available in various manufacturing industries where more and more components previously fabricated from metals are now made from plastics and fiber-reinforced composite materials. Due to the unique nature of this program, the demand for graduates far exceeds the supply.

Aviation Program

A program of flight training is available, which prepares students for the FAA examinations for the Private Pilot's License. Three courses are offered under this program: ME 311 Introduction to Aviation, ME 312 Introduction to Flight, and ME 313 Commercial Instrument Ground School.

Any student enrolled at NDSU or one of the other two Tri-College institutions may enroll in this program. No other courses are required as prerequisites.

Cooperative Education

Students in Mechanical Engineering may participate in the Cooperative Education program at NDSU starting in their sophomore year. Students gain valuable industrial experience to complement their academic studies. Internships may last from one to three semesters.

Wages and benefits for Cooperative Education students are determined by the employer and are influenced by such factors as established wage scales, the co-op student's responsibilities, and the nature of the employer's business.

Department of Military Science (Army ROTC)

[www.ndsu.edu/armyrotc](http://www.ndsu.edu/armyrotc)

The Army Reserve Officers Training Corps (Army ROTC) program is conducted by the Department of Military Science. Army ROTC gives students the opportunity to become involved in a unique program that adds the leadership dimension to their college education. It also provides several financial assistance options. Students, regardless of their majors, are eligible to participate in this program. The primary objective of the program is to provide the knowledge and skills required for men and women to serve as commissioned
officers in the active Army, Army Reserve, or Army National Guard. NDSU’s Military Science Department is seeking students who have leadership potential, particularly those who are scholars, athletes, and leaders.

The Army ROTC program is a multi-year program of instruction in the military sciences taken in conjunction with an academic program curriculum. Advanced placement credit may be received for previous or current military service. The program requires a minimum of 22 credit hours and leads to a minor in Military Science. The program is divided into two parts: the basic course and the advanced course.

The basic course is normally taken during the freshman and sophomore years. Students participating in the basic course incur no military obligation or commitment. Instruction offered in the basic course includes: physical fitness class, military leadership and management, land navigation, U.S. military history, first aid, tactics, and drill and ceremonies. Military skills laboratories also are offered. These include adventure activities such as rappelling, rope bridging, tactics, military equipment use, drill and ceremony, survival techniques, and a leadership reaction course.

Students entering the advanced course must have a minimum of two years of academic work remaining in a curriculum leading to either a baccalaureate or graduate degree. Students may qualify for entry into the advanced course by one of the following: completing the basic course, completing basic training, attending the four-week ROTC Leaders Training Course (LTC), or having prior military service in any of the armed forces of the United States. Members of the Army National Guard or Army Reserve may qualify for direct entry into the advanced course and can maintain membership in their Guard/Reserve Unit by enrolling in the Simultaneous Membership Program (SMP) option.

Advanced course students receive instruction in advanced leadership and management and are afforded the opportunity to apply their acquired knowledge to practical situations. Military skills laboratories also are offered. In addition to the listed military science curriculum, advanced course students must complete an approved course in written communication skills, military history, and computer literacy.

Students also attend the five-week Leader Development and Assessment Course (LDAC) at Fort Lewis, WA (near Tacoma) between the first and second year of the advanced course. The Leader Development and Assessment Course is designed to develop and evaluate a student's judgment and decision-making abilities, build physical endurance and self-confidence, and allow a student to apply leadership skills. Leadership positions are rotated among the students so that each person experiences firsthand what it takes to apply leadership skills and develop an organization.

Four-, three-, and two-year Army ROTC scholarships are available, which provide for payment of tuition and fees. Students receive $600 per semester for books and equipment, and an allowance of $350 to $500 per month for each year the scholarship is in effect. Generally, four-year scholarships are awarded to high school students who wish to compete during their senior year for a scholarship, but college freshmen also have been awarded this highly desirable scholarship.

Students who do not qualify for the ROTC program or who do not wish to pursue an officers' commission may audit courses in the advanced ROTC program, if approved by the professor of military science. Auditing students' participation is limited to the classroom and they are not eligible for monetary allowances.

For detailed information on the Army ROTC program, contact the Department of Military Science, 1-800-798-7575 or 231-7575, Room 103 Benton/Bunker Fieldhouse or visit the department website at www.ndsuarmyrotc.com.

MINOR REQUIREMENTS
The College of Human Development and Education was established in July 1992. There are five units in the college. Four of these-Apparel, Design, and Hospitality Management; Human Development and Family Science; Education; and Health, Nutrition, and Exercise Sciences-offer programs at the bachelor's, master's, specialist and doctoral levels. The fifth-Center for 4-H Youth Development-offers Extension youth programming across the state. Students are prepared for careers in education, colleges and universities, business and industry, community services, hospitals and health care facilities, and public and private programs concerned with design, human welfare, fitness, and recreation.

Mission

The mission of the College of Human Development and Education is to provide nationally recognized educational programs and conduct research and other scholarly activities that focus on people as they interact in work, educational, and living environments.

Opportunities are provided to broaden the student's understanding and appreciation of the aesthetic, cultural, economic, physical, psychological, and social elements that influence individual and family well being. Programs are designed to help each student develop professional competencies, attain a liberal education, and relate the learnings from the basic disciplines to various applications.

Accreditation

The Center for Child Development is accredited by the National Association for the Education of Young Children. The Couple and Family Therapy program is accredited by the Commission on Accreditation for Marriage and Family Therapy Education. The Athletic Training program is certified by the Commission on Accreditation of Athletic Training Education. Education programs are accredited by the National Council for Accreditation of Teacher Education and approved by the North Dakota Education and Standards Practice Board.

The School Counseling and Community Counseling programs are accredited by the Council for the Accreditation of Counseling and Related Educational Programs. The Educational Leadership program is accredited by the Educational Leadership Constituency Council. The Dietetics program is accredited by the American Dietetic Association. The Interior Design program is accredited by the Council for Interior Design Accreditation.

The Exercise Science Program is endorsed by the American College of Sports Medicine and the Commission of Accreditation of Allied Health Education programs: Committee on Accreditation for Exercise Sciences. Family Financial Planning is approved by the Certified Financial Planner (CFP) Board of Standards. Hospitality and Tourism Management is accredited by the Accreditation Commission for Programs in Hospitality Administration.

Degree Programs

Undergraduate programs in the college lead to a Bachelor of Science or a Bachelor of Arts degree. Recommendation of candidates for teacher certification also rests within this college through the School of Education.

Graduate study leading to a Master of Science degree is offered in Human Development and Family Science, Counseling, Couple and Family Therapy, Merchandising, Educational Leadership, Advanced Athletic Training, Sport Pedagogy and Leadership, Exercise Science, Nutrition Science, and Teacher Education. A Master of Education degree may be earned through Health, Nutrition and Exercise Sciences and the School of Education. A Master of Athletic Training (MATrg) may be earned through Health, Nutrition and Exercise Science. Doctoral programs also are offered by the college in Human Development and in Education.

The College of HD&E offers six master's programs or options online. Online programs make earning an advanced degree an option for anyone accepted into the college of Graduate and Interdisciplinary Studies. The programs are: Merchandising, Family Financial Planning, Gerontology, Youth Development, Family and Consumer Science Education, and Dietetics. For more information view the Graduate School web site.
The Human Development (Ph.D.) program has an interdisciplinary approach, which allows students to focus on one of three tracks: Wellness, Counseling Education, or Applied Gerontology. The doctoral program in Education (Ph.D. or Ed.D.) has a cross-disciplinary emphasis, which allows students a choice between two tracks: Institutional Analysis and Occupational and Adult Education. For more complete details, see the Graduate Bulletin online.

Degree Requirements

Students enrolled in major programs in the college are required to follow curriculum guidelines, available in the Academic Advising Office of the college (270 EML) or department offices, for each of the program options and majors. Course requirements in each program fulfill university, college, and departmental requirements. Refer also to graduation requirements and related information listed earlier in the Academic Policies section.

All undergraduate degree candidates must apply for graduation through the Office of Registration and Records according to university procedures and deadlines.

Courses taken pass/fail will not be used to satisfy any requirements other than total credits. Departments may have additional restrictions. Approval must be obtained and processed during the first three weeks of the regular semester. Once processed, a course cannot be changed back to regular grading.

MATH 101 and 102 are developmental courses and will not count toward credits for graduation in any program.

General college requirements for undergraduate degrees extend beyond the minimum university general education requirements. An advisor should be consulted for specific courses. Students also are encouraged to follow their own interests in choosing electives that go beyond the minimum requirements.

Bachelor of Arts Degree

In addition to all of the preceding requirements listed for the Bachelor of Science degree, Bachelor of Arts degree requirements include the following:

- Six (6) additional credits of humanities and social behavioral sciences
- Two years of one modern foreign language at the college level or equivalent

Students with two units/years of a foreign language in high school should enter the second year college-level language course. Students with four or more units/years of a foreign language in high school or college will be considered to have completed the language requirement.

Curriculum Majors and Options

- Apparel and Textiles
  - Apparel Studies Option
  - Retail Merchandising Option
- Dietetics
  - Coordinated
  - Didactic
- Elementary Education/HDFS Dual
- Exercise Science
- Hospitality and Tourism Management
- Human Development and Family Science
  - Adult Development and Aging Option
  - Child Development Option
  - Family Science Option
- Interior Design
- Sport and Recreation Leadership Studies

Secondary Education:

- Agricultural Education
- Biological Sciences
- Chemistry
Comprehensive Science Education
Earth Science
English
  o Communications Option
Family and Consumer Sciences Education
French
Health Education
  o Community Health Option
  o School Health Option
History
Mathematics
Physical Education (K-12)
Physics
Social Science
Spanish

Elementary Education

An Elementary Education program is available through the cooperation of Valley City State University, the degree-granting institution for this program. This degree program must be completed concurrently with a HDFS major from NDSU or another major upon approval. Upon completion of the Dual Degree Program, the graduate will have earned a Bachelor of Science degree from the College of Human Development and Education with a major in Human Development and Family Science from NDSU and a Bachelor of Science degree in Elementary Education from Valley City State University. The dual program is designed to be completed in four years.

Minors

A minor is a similar grouping of courses in which the university requires a minimum of 16 credits. (At least eight credits of the minor must be taken at NDSU.) Departments may require more credits for their minors. For the minors to be awarded, students must declare a minor and complete a minor verification form. Information on specific minors may be obtained in the Academic Advising Office (270 EML). Minors offered in the college are: Individual and Family Wellness; Child Development and Family Science; Apparel and Textiles; Hospitality and Tourism Management; Health Education; Food Service; and Extension Education.

Undergraduate Certifications

- Coaching
- First Aid/CPR
- Food Sanitation
- Physical Best

Interdisciplinary Programs

The College of Human Development and Education participates in two interdisciplinary programs on campus:

Gerontology Minor

The Gerontology minor provides students with an integrated understanding of the process of aging, aging services, and the aged in America. For further information, refer to the Interdisciplinary Programs section of this Bulletin.

Women and Gender Studies Major and Minor

The goals of Women and Gender Studies is to examine the contributions of women to all aspects of society, to explore the intersections of race, class, sexual orientation, age, and physical ability with gender both globally and nationally, to investigate the heritage, challenges and concerns of women, and to provide a newer and broader understanding of women in all fields. For further information, refer to the Interdisciplinary Programs section of this Bulletin.

Special Opportunities

Special opportunities available to students in the college include the following:
Professional Organizations

Student chapters of professional organizations are available for membership in accordance with their respective bylaws.

- American Association of Family and Consumer Sciences (AAFCS)
- American Society of Interior Designers (ASID)
- Aspiring Teachers of Mathematics and Science (ATOMS)
- Association of Couple and Family Therapy Students
- Chi Sigma Lota
- Collegiate 4-H Club
- Collegiate FFA
- Elementary Education Club
- Eta Sigma Delta (honorary)
- Fashion, Apparel, and Business Organization (FABO)
- HDE Leadership Council
- Hospitality Student Association (HSA)
- Human Development and Family Science Club
- Leaders in Physical Health Education (LIPHE)
- Phi Upsilon Omicron (honorary)
- Sport and Recreation Leadership Association (SRLA)
- Student Dietetic Association (SDA)
- Student North Dakota Education Association (SNDEA)

Additional information is available in the Dean's Office of the college.

HDE Leadership Council

The HDE Leadership Council acts as a liaison organization between the student body, the faculty, and the Dean of the College of Human Development and Education. The council assists in the promotion of the college. Selected students supplement and complement the existing advisory system and assist in the HDE 189, Student Success course. Student selection is based on academics and a willingness to participate. Student members represent all units in the college. Applications for leadership council are reviewed each fall. Information is available in the Dean's Office of the college (255 EML).

Cooperative Education

Cooperative Education, a program of the Career Center, offers undergraduate and graduate students an opportunity to integrate classroom study with paid, career related work experience for academic credit. Work may be full or part time. See Career Center for further information. A Cooperative Education experience may substantially improve students' employment opportunities after graduation.

Department of Apparel, Design, and Hospitality Management

Students graduating with majors in Apparel and Textiles, Hospitality and Tourism Management, or Interior Design have a strong general education component and specialized career preparation. Interdisciplinary curricula in the Department of Apparel, Design, and Hospitality Management may build upon economics and business, art, behavioral sciences, or natural sciences. The department offers three majors: Apparel and Textiles, Hospitality and Tourism Management, and Interior Design. Two options are available within Apparel and Textiles: apparel studies and retail merchandising. The retail merchandising option offers two emphasis areas: interior retail merchandising and textile product retail merchandising. Minors are available in Apparel and Textiles and Hospitality and Tourism Management. For more information about any of the programs, contact the department. New students are advised to contact the department prior to beginning their college work.
Enrichment Opportunities

The department supplements classroom learning through structured field experiences to hospitality operations, fashion, and design centers. Study tours to cities such as Minneapolis, New York City, Chicago, and to several countries, such as England, France, India, and Korea are scheduled regularly.

Professional enrichment is possible through departmental affiliation with the Fashion Institute of Technology, New York City, or various Study Abroad programs. NDSU students who attend these institutions for a semester or a year gain valuable experience in a fashion, merchandising, hospitality and tourism management, or interior design environment. Students should prepare to do this experience during their junior and/or senior year. Additional information about these programs is furnished upon request.

Apparel and Textiles

Students are prepared for a variety of careers in the apparel, textile, and retail industry that range from product conception through distribution to the consumer. The Apparel and Textiles program focuses on both national and international aspects of the apparel, textile, and retail industries. This includes product development, manufacturing, quality control, wholesaling, retail merchandising, marketing, and product preservation.

Note: Apparel and Textiles transfer courses from other institutions must have grades of "C" or better to be accepted for the Apparel and Textiles program at NDSU.

Apparel Studies Option

Prepares students for careers in such fields as theatre costuming, costume curator, fashion journalism, product development, and other aspects of the fashion industry, depending on the student's interest. Students who choose this option must earn a minor from another department. For example, to pursue a career in fashion journalism, a minor in Journalism, Broadcasting, and Mass Communications Technology would be selected to strengthen their educational background.

MAJOR REQUIREMENTS

Retail Merchandising Option:

Prepares students for buying, promotion, and retail management or human resource management in retail stores. A minor in Business Administration and a field experience to reinforce classroom instruction are required with this option. Students have flexibility in creating a program focus by selecting one of the following emphasis areas:

- Interior Retail Merchandising Emphasis Area: Prepares students for career opportunities in retail and wholesale home and office furnishing businesses.
- Textile Product Retail Merchandising Emphasis Area: Prepares students for introductory management or buying positions in soft goods retailing.

Fashion Institute of Technology Affiliation

The department has an arrangement with the Fashion Institute of Technology (F.I.T.), New York City, where a qualified student may attend that institution for a semester or a full year as a visiting student. Summer School opportunities are also available. The approved credits earned at F.I.T. will transfer to NDSU and will count toward graduation requirements. Students participating in the one-year visiting student program earn an associate degree from F.I.T.

During the second year of study at NDSU, interested students should consult with their advisors to ensure full consideration of their application for the F.I.T. visiting student program. Application should be made at least one year in advance. Students who participate in this program spend their last year of study attending F.I.T.

MINOR REQUIREMENTS
Hospitality and Tourism Management

As one of the largest private sector employers, the hospitality and tourism industry employs millions of people. The demand for managers has grown and continues to grow as the demand for services grows. Along with the rising demand for hospitality services, is a growing emphasis on comfort, convenience, and personalized attention. All of which increase the need for effective and efficient professionals to manage hospitality operations and lead teams of people.

The hospitality and tourism industry continues to grow with hotels and restaurants remaining open 24 hours a day, seven days a week to meet the demands of our traveling society. According to the National Restaurant Association, the food service industry employs about 12.7 million workers. This means that almost one of every 10 working Americans is a restaurant employee. There are approximately 50,000 hotels in the United States with over 4.6 million rooms. The lodging industry employs 1.8 million people. The hospitality and tourism industry also includes careers in convention and meeting planning, as well as resorts, casinos, and entertainment venues.

Mission Statement

The mission of the Hospitality and Tourism Management (HTM) program is to develop leaders in the hospitality and tourism industry. To achieve this mission, it is our goal that students graduating from the HTM program at NDSU will demonstrate leadership skills by having the following: knowledge of the industry, management skills, problem solving abilities, and a sense of responsibility.

MAJOR REQUIREMENTS : MINOR REQUIREMENTS

Interior Design Major

A professional interior designer is one who is qualified by education, examination, and experience to identify, research and creatively solve problems relative to the function and quality of people's interior environments. The course of study in interior design leads to a first professional degree.

Students pursue courses in which creative and technical skills are applied within a structure to achieve the built interior environment. Design solutions are functional, enhance the quality of life of occupants, and are aesthetically attractive while adhering to code and regulatory information. Design solutions produced protect and enhance the health, safety and welfare of the public. Students learn how to approach design problems through a methodology that includes data gathering, product specification, identification of details, contractual documents and design business procedures.

The first two years of the program introduce the fundamentals of design, visual and technical communication techniques (including drafting, perspective drawing, model building and rendering) and theoretical and practical applications (including anthropometrics, ergonomics, interior design technology and color theory). Each student becomes aware that the interior design profession is exceedingly complex, and collaborating with design professionals and related disciplines in a team approach to problem solving is routine practice.

Upper-division course work is focused on a series of integrated studio experiences and support courses including history, interior materials, professional practice, computer aided design and interior systems. The studio experience culminates in a senior project. Studio experiences require that each student be exposed to a variety of projects at several different levels of complexity and different client project goals.

North Dakota State University interior design students are required to complete a field experience between the junior and senior year. Students accept a variety of positions throughout the United States. In the past few years students have completed field experiences in Scottsdale, Honolulu, Las Vegas, Minneapolis and Denver.

Enrollment in sophomore level interior design courses requires a 3.0 institutional cumulative grade-point average. Admission into the third-year studio is based upon demonstrated professional interest, a portfolio review completed during the spring semester of the student's sophomore year, a 3.0 institutional cumulative grade-point average, and a minimum grade of "C" in all major core requirements. Students must maintain the 3.0 minimum cumulative GPA requirement and earn a grade of "C" or better in all major core requirements throughout the remainder of the program. All students successfully completing sophomore review are required to purchase a laptop computer for upper division studio courses.

Transfer students entering the interior design program should contact the program coordinator to review previously completed interior design or related course work.
The interior design program at NDSU is accredited by the Council for Interior Design Accreditation.

**MAJOR REQUIREMENTS**

### Department of Health, Nutrition, and Exercise Science

[www.ndsu.edu/hnes](http://www.ndsu.edu/hnes)

This department offers all students an opportunity to develop skills and knowledge that are vital in developing a personal, lifetime wellness concept and to serve as teachers, leaders, and administrators of health, physical education, recreation, athletic training (see online graduate catalog), and dietetics. Majors are available in Dietetics, Health Education, Exercise Science, Physical Education, and Sport and Recreation Leadership. Minors offered are Coaching, Health Education, Physical Education, and Food Science.

---

**Athletic Training Major**

NDSU has suspended the Bachelor of Science in Athletic Training program and no longer admits new students to this degree program. Students who wish to attend NDSU for athletic training are advised to major in Exercise Science, Physical Education, or Health Education and apply to the Master of Athletic Training (MATrg) program. After completing a chosen bachelor's degree and the MATrg program, a student will be able to take the BOC exam, earn the ATC credential, and find employment as an athletic trainer.

---

**Dietetics Major**

There are two options within the Dietetics major: (a) Coordinated Program and (b) Didactic Program. Both programs include all didactic courses required for membership in The American Dietetic Association.

Students with a major in Dietetics are employed in many settings such as hospitals, clinics, community health programs, businesses, industries, school food services, and as consultants in homes for the elderly and other service institutions. Research and development opportunities are available in industry, government, and universities; in regulation of food quality through government agencies; and within companies as communication specialists.

*Note:* Transfer credits in dietetics or food and nutrition from other institutions must have grades of "C" or better to be accepted for the Dietetics program at NDSU.

**Coordinated Program in Dietetics (CPD) Option**

This option prepares professional dietetic practitioners for work in entry-level positions in hospitals, nursing homes, out-patient clinics, businesses, and community agencies.

Acceptance into CPD is competitive and enrollment is limited. Students who have completed the prerequisite courses apply for admission in February. The American Dietetic Association/Council on Education Accreditation/Approval for Dietetic Education accredits the CPD. Graduates are eligible to take the registration exam for dietitians upon completion of the program.

---

**Didactic Program in Dietetics (DPD) Option**

This option meets the requirements for entrance into an accredited dietetic internship and prepares graduates for internships in hospitals, as well as in health care related organizations. The American Dietetic Association/Council of Accreditation/Approval approves the DPD, a specialized body recognized by the United States.
Exercise Science Major

The Exercise Science (ES) major is accredited by the Commission on Accreditation of Allied Health Education Programs and endorsed by the American College of Sports Medicine. This curriculum covers the knowledge, skills, and abilities expected of an ACSM Health/Fitness Instructor®.

The ES major is designed to prepare students for entry-level positions in any of four health fitness settings: commercial, community, corporate, and clinical. Completion of the major will also act as a stepping stone to prepare the exceptional student for graduate education in exercise physiology/science, cardiac rehabilitation, physical therapy, sports nutrition, sports medicine, biomechanics, and other allied health professions.

The ES program includes everything from the study of physical activity and the associated acute and chronic physiological adaptations and responses to it, to health-fitness business management principles found in facilities worldwide. Majors are encouraged to select a minor in business, health, or other areas depending on their interests. Field experiences and a semester-long internship experience completed at the end of the ES major afford the student an opportunity to select an area of specialization in the field from sites available throughout the country.

Students are encouraged to pursue appropriate professional certification from the American College of Sports Medicine, The National Strength and Conditioning Association, or The American Council on Exercise.

Pre-Professional/Professional Emphasis

Students are admitted to the Pre-Professional emphasis in ES when declaring the major. The Pre-Professional emphasis encompasses the freshman year; transfer students are also placed in the Pre-Professional emphasis upon acceptance to the university. Entrance into the Professional Emphasis occurs for freshman during the second semester of attendance; for transfer students, application occurs during the first semester of attendance.

The following requirements must be met before beginning the professional course (sophomore, junior and senior level courses with prefix HNES) of study:

1. Successful completion of HNES 170 with a grade of "C" or better
2. Successful completion of BIOL 220/220L with a grade of "C" or better
3. Minimum NDSU GPA of 2.75 or higher

Application guidelines are provided during HNES 170 and during advising sessions with freshmen, as well as on the ES website.

Retention Standards

Students must meet all of the retention standards (per semester) in order to maintain their status in the ES professional phase.

1. Must receive a "C" or higher in all HNES ES curriculum courses.
2. Maintain an overall GPA of 2.75 on a 4.0 scale.

MAJOR REQUIREMENTS

Physical Education Major

The Physical Education Teacher Education (PETE) program provides opportunities for students to become critical thinkers, creative planners, and effective practitioners.

To be successful in the field, a physical education student must like to work with people, be adequately skilled in physical activities, have a commitment to fitness, and be interested in the physical, biological and social sciences.

The PETE program emphasizes teaching and provides students with skills and techniques necessary to begin a successful career in K-12 physical education. The program is aligned with the National Association for Sport and Physical Education's (NASPE) PETE Standards. The courses are strategically structured to be sequential in nature.
Students initially take courses through the Department of Health, Nutrition, and Exercise Sciences (HNES) and complete their degree requirements through the School of Education (SOE). Application and interviews to the SOE will occur during the student's junior year. Completion of the degree requirements for a physical education major in the SOE certifies a graduate to teach physical education from kindergarten through grade 12 (K-12).

The student majoring in physical education will be studying the art and science of human movement, which includes classes in elementary, middle, and high school activities; motor learning, physiology and psychology of human movement; the art of teaching and motivating students; and performance-based assessment.

Students will successfully complete all HNES 100-level core courses before advancing to the HNES 200-level core courses, etc. The courses provide a firm scientific foundation, while providing substantial experience in practice teaching. Students must earn a grade of "B" or better in all core physical education courses and must maintain a minimum 2.75 cumulative grade-point average to stay in full standing in the program.

A graduate leaves prepared to teach in a professional manner, while demonstrating exemplary ethical behavior and displaying current "best practices". Graduates are expected to be positive role models for K-12 students in the area of physical education, physical activity, and sports.

MAJOR REQUIREMENTS

Double Major

It is strongly recommended that physical education students double major in health education and pursue a coaching certificate.

School Health Education Major: For further information about school health education, please refer to the [Health Education curriculum guide](#) or contact the department advisor.

Coaching: Many individuals with a physical education major also coach. To earn the coaching certificate, students must successfully complete a 1-credit course (HNES 211). Upon successful completion of this coaching certificate students are considered a legal coach. This certificate is recognized by most K-12 districts.

---

Health Education Major

The Health Education major emphasizes comprehensive health education and is designed to prepare students for careers in the field of community health education and/or school health education through the development of dispositions, knowledge and skills.

Community Health Education Option

This non-teaching major is offered for students interested in pursuing community health, health promotion or work-site careers in the public sector.

MAJOR REQUIREMENTS

School Health Education Teaching Option

This professional teaching preparation program is designed primarily to meet the needs of those interested in a teaching career.

MAJOR REQUIREMENTS

Teaching - School of Education

Completing the degree requirements for a health education degree in the School of Education certifies a graduate to teach health education at the secondary level. Students may choose to enrich their background by selecting a major in physical education. It is recommended that students apply to the School of Education (SOE) in the spring semester of their third year in the program.

Double Major

It is strongly recommended that health education teaching majors double major in physical education.
Physical Education Major: For further information about the physical education teaching option, please refer to the Physical Education curriculum guide or contact the department advisor.

Health Education Minor

Students who have earned a Health Education minor as a complement to their major have majored in the following curricula: Human Development and Family Science, Dietetics, Exercise Science, Health Communications, Nursing, and Sport and Recreation Leadership.

Minor Requirements

Sport and Recreation Leadership Major

The Sport and Recreation Leadership major (SRL) is designed to prepare students for careers in sport and recreation organizations. The capstone course (HNES 429) is a 12 credit Internship most often completed during the summer prior to the senior year as an internship at an approved local, state, regional, national or international level sport and/or recreation organization. To enhance employment prospects, undergraduate candidates in the SRL major are encouraged to consider completion of a supporting minor, such as business or communication.

Students are also encouraged to participate in the Sport and Recreation Leadership Association. This student organization meets bi-weekly to organize and conduct professional and service events that students plan and benefit from.

Major Requirements

Department of Human Development and Family Science

The mission of the Department of Human Development and Family Science (HDFS) is to provide a comprehensive, integrated knowledge of families and individuals across the life span that will equip students for careers in the helping professions and to enter graduate programs. The curriculum emphasizes practical application, acknowledging individuals and families as developing and changing entities within a larger societal context.

Human Development and Family Science Major

At the undergraduate level, the department offers a curriculum leading to a Bachelor of Science or Bachelor of Arts degree through three options: child development, family science, and child development/elementary education. Human Development and Family Science majors are prepared to work in a variety of areas related to children and families. Employment opportunities include parent and family life educators, extension agents, child protection service professionals, financial counselors, nursing home activity directors, credit specialists, probation agents, directors of child care licensing, and hospital child life specialists.

Coursework provides students with an ecological approach to the study of human development and families with emphasis on the interactions of individuals, families, and the broader environmental context. Allowing students to select electives within the department to specialize in careers of interest provides flexibility.

Adult Development and Aging Option

The Adult Development & Aging Option prepares students for careers involving direct and support services for adults of various ages, as well as for the elderly.

Option Requirements
Child Development Option
This option prepares students for careers involving direct and support services for children and adolescents.

OPTION REQUIREMENTS

Family Science Option
This option allows students to take a concentration of courses in family science or family economics in preparation for careers in direct and support services for families.

OPTION REQUIREMENTS

Note: The field experience requirement gives students the opportunity to work in a professional placement during their undergraduate program. This requirement enables students to apply their coursework to a professional position as they prepare to move into important careers with children and families.

Note: Transfer credits in human development and family science from other institutions must have grades of "C" or better to be accepted for the Human Development and Family Science program at NDSU.

Child Development/Elementary Education Dual Degree Program
The Child Development/Elementary Education option is a collaborative effort between NDSU and Valley City State University. Through this curriculum, offered on the NDSU campus, students are concurrently enrolled in both universities, culminating in a bachelor's degree from NDSU in Human Development and Family Science (Child Development option) as well as a bachelor's degree from VCSU in Elementary Education. Students are certified to teach Elementary Education in public schools and may, with additional coursework and an additional student teaching experience, be certified to teach kindergarten as well. The HDFS degree complements and strengthens the Elementary Education curriculum and helps future teachers understand development and its diversity, making them more effective teachers and helping them work with children from a wide variety of backgrounds.

MAJOR REQUIREMENTS

Human Development and Family Science Minor
The Human Development and Family Science minor is especially appropriate for students majoring in the social or behavioral sciences and other students planning careers that involve work with people. Of the 18 credits required for the minor, at least nine credits must be upper division, and no more than three credits may be in field experience, practicum, or student teaching. Some HDFS courses also apply to interdisciplinary minors in Women's Studies and Gerontology.

Family Therapy Center: The Family Therapy Center is located on the NDSU campus. The center is an accredited training program administered through the Department of Human Development and Family Science at NDSU. NDSU faculty members who are clinical members and approved supervisors of the American Association for Marriage and Family Therapy supervise advanced clinical students.

Center for Child Development (CCD): The CCD is a laboratory school, accredited by the National Academy of Early Childhood Programs, which provides opportunities for NDSU students to observe, do research, and participate in a high quality program for young children and their families.

MINOR REQUIREMENTS
Students contemplating careers in education may be encouraged to learn there is a shortage of teachers in certain academic and geographical areas. This trend, together with the knowledge that preparation in teaching may also lead to successful careers in business, industry, and the public sector, may make education an excellent choice for versatile careers.

Programs in education at NDSU are administered by the School of Education. The School of Education programs are accredited at the undergraduate and graduate levels by the National Council for Accreditation of Teacher Education (NCATE) and are approved by the North Dakota Education Standards and Practices Board. NCATE accreditation assures that graduates of the program may be certified/licensed as teachers in other states, and also indicates that the programs offered through the School of Education are of high quality.

Through the School of Education, students are prepared to be teachers, counselors, and school administrators capable of working effectively with diverse populations. Through course work and field experiences, students come to an appreciation of and commitment to cultural diversity and to the elimination of inequitable instructional and institutional practices.

Note: Consult the School of Education regarding transfer credits.

Admission to the School of Education

Application forms and instructions for admission to the School of Education are available at the Teacher Education Office, 155 E. Morrow Lebedeff Hall. Students should check the School of Education web site or contact the School of Education office for updates in procedures and requirements.

Students should apply for admission to the School of Education immediately following the introductory professional education course (EDUC 321). Late application may delay completion of program and graduation requirements. All applications to the school will remain valid for five years from the date of approval or until completion of the baccalaureate degree, whichever comes first.

The Council for Teacher Education reviews and acts upon completed applications. The Council is the body within the School of Education with jurisdiction over such matters as admission, retention, student teaching, and certification/licensure. The Council informs the students of its action. For questions about admission policies, contact the Teacher Education Office.

Admission of Undergraduate Students

Undergraduate students may gain admission to the School of Education by meeting the following requirements:

1. Provide evidence of maintaining a minimum grade-point average of 2.75 in the student's total academic program. Transfer students shall complete a minimum of one semester's work and obtain a 2.75 institutional grade-point average at NDSU before their applications are processed.
2. Provide evidence of achieving passing scores on the Praxis I test of basic skills. (The student is responsible for registering for the test and paying the appropriate fee.)
3. Provide evidence of competence in English through any one of the following:
   - Minimum ACT English test standard score of 20
   - Minimum grade-point average of 2.50 in English 110 and 120 or equivalent
   - Minimum of a "B" grade in English 358 or equivalent writing course
4. Complete EDUC 321 with a grade of "C" or better.
5. Provide a letter of recommendation.
6. Provide portfolio reflections (started in EDUC 321) on TaskStream.
7. Complete 40 hours working with youth.
8. Submit completed curriculum guide.
9. Interview with Teacher Education faculty. Check with the Teacher Education Office for sign up information.

Students should submit a completed application for admission the semester following completion of EDUC 321. Up-to-date transcripts of all college-level work must accompany the application.

---

**Admission of Post-Baccalaureate Students**

Students with college degrees seeking teacher certification/licensure should contact the School of Education certification officer for more information. NDSU students who continue in school after graduation or who resume their education within one year following graduation will be considered on the same basis as undergraduates.

Students whose undergraduate academic average was below 2.75 shall increase their overall undergraduate grade-point average to 2.75 or achieve and maintain an average of 3.00 on post-baccalaureate course work while meeting the following conditions:

1. Obtain 24 approved credits in two contiguous semesters, or equivalent.
2. Take each course for a grade other than pass/fail.
3. Obtain approval of all courses from the Teacher Education program.

Post-baccalaureate students must submit an application showing evidence of meeting the requirements listed under "Admission of Undergraduate Students."

*Note:* These policies refer to admission to Teacher Education for purposes of certification/licensure and are not recommendations for admission to Graduate School.

---

**Student Teaching Policies**

Prior to student teaching, all student teachers must meet all School of Education requirements including completion and submission of the verification of requirements form (available from the Teacher Education Office). Because student teaching is a full-time experience, students shall not participate in extracurricular activities on campus or participate in employment that detracts from student teaching and shall not be registered for course work other than student teaching (EDUC 487, 488) and EDUC 485. A student teaching course fee is assessed.

---

**Program Exit Requirements**

1. Students must complete a portfolio developed throughout the professional education courses based on the Interstate New Teachers Assessment and Support Consortium (INTASC) standards.
2. Students must earn a minimum GPA of 2.75 in each of the following programs:
   - Total academic programs
   - Teaching specialties
   - Professional education courses consisting of a minimum of 27 credits
3. Students may complete an application for state certification/licensure and pay the appropriate fee to the state upon completion of the program. Application forms for some states are available from the certification officer.

---

**Special Notice**

Changes in national and state legislation, standards, or rules may result in revised course work requirements. Students should contact the School of Education to keep abreast of possible developments in curriculum areas.
NDSU Student Education Association

Students in Teacher Education are encouraged to join the NDSU Student North Dakota Education Association, which is affiliated with the Student North Dakota Education Association and the National Education Association Student Program. Members of this organization receive a number of benefits including workshops, publications, and liability insurance, and have the opportunities to be involved with many of the committees that govern the Teacher Education program at NDSU.

Persons interested in membership details should contact the School of Education or the SNDEA Student Program advisor.

Students also are encouraged to join the professional organization(s) relevant to their teaching specialties.

Graduation Requirements

Graduation requirements for all students desiring teacher certification/licensure, secondary or K-12, include three basic parts: general education requirements, professional education requirements, and teaching specialty requirements.

Additional credits are required for programs in Agricultural Education, English Education, Family and Consumer Sciences Education, Music Education, and Physical Education.

Teaching Specialty

(See the School of Education for requirements for the following):

- Agricultural Education
- Biological Sciences
- Chemistry
- Comprehensive Science
- Earth Science
- English
- Family & Consumer Sciences
- French
- Health (Community Health)
- Health (School Health)
- History
- Mathematics
- Music (Instrumental)
- Music (Vocal)
- Physical Education
- Physics
- Social Sciences
- Spanish

Human and Community Education

State approved programs for the preparation of vocational education teachers are grouped under Human and Community Education (H&CE). Curricula in two areas are offered: Agricultural Education and Family and Consumer Sciences Education.

Agricultural Education

NDSU is designated by the State Board for Career and Technical Education as the recognized institution for preparing teachers of agricultural education. Programs are offered to prepare students for teaching agricultural education on the secondary, post-secondary,
and adult levels. Graduates also secure employment in other agricultural occupations such as Cooperative Extension, government services, and agribusiness.

Upon completion of the program, students are eligible for certification to teach agricultural education in North Dakota and may be qualified for certification/licensure in a number of other states.

**Family and Consumer Sciences Education**

The Family and Consumer Sciences Education program at NDSU has been approved by the State Board for Career and Technical Education for the preparation of family and consumer sciences teachers. Thus, graduates are qualified to teach family and consumer sciences classes in vocational or non-vocational school programs at junior and senior high school levels. Graduates also are qualified to teach in adult education programs and to serve as extension home economists. Alternate career opportunities include positions with utility companies, health and human service agencies, and retail establishments. In addition to fulfilling teacher certification/licensure requirements for North Dakota, graduates may be qualified for certification/licensure in a number of other states.

**K-12 Certification/Licensure for Physical Education and Music Education Majors**

Certification/licensure for kindergarten through 12th grade programs (K-12) is available for students majoring in Physical Education or Music Education. Students must enroll in HDFS 230 or PSYC 250, Elementary Teaching Methods, and student teach at both the elementary and secondary levels, as well as meet the specific requirements for each major department.

**Elementary Education/HDFS Dual Degree Program**

Students may concurrently earn a degree in Elementary Education from Valley City State University and a degree in Human Development and Family Science from NDSU while located on the NDSU campus. It allows the student to earn two degrees from two universities in the time-frame it typically takes to earn one baccalaureate degree. See department for details.

**Extension Education Minor**

The Extension Education minor provides educational background and presentation skills for individuals who seek careers associated with the Cooperative Extension Service. This minor is offered through the Agricultural Education and the Family and Consumer Sciences Education programs.

**Title II Institutional Report**

To comply with the requirements of Section 207 of Title II of the Higher Education Act, NDSU has provided the following information to the North Dakota Education Standards and Practices Board.

**Section I. Pass rates**

- **PPST Reading:** NDSU Range 186-161, Median 181, N=87, National Range 182-173, Median 178
- **PPST Writing:** NDSU Range 185-167, Median 176, N=87, National Range 190-151, Median 175
- **PPST Mathematics:** NDSU Range 189-167, Median 182, N=87, National Range 190-150, Median 179

**Section II. Program information**

1. Number of students in the regular teacher preparation program:
   a. Total number of students enrolled during 2007-2008: **209**
2. Information about supervised student teaching:
b. Number of students in programs of supervised student teaching during academic year 2007-2008: 71

c. Number of supervising faculty who were:
   - Appointed full time in professional education: 16
   - Appointed part time in professional education and full time in the institution: 4
   - Appointed part time in professional education, not otherwise employed by the institution: 10
   - Total number of supervising faculty for the teacher preparation program during 2007-2008: 5

d. The student/faculty ratio was: 14

e. The average number of hours per week required of student participation in supervised student teaching in these programs was: 40 hours. The total number of weeks of supervised student teaching required is 16. The total number of hours required is 640 hours.

3. Information about state approval or accreditation of teacher preparation programs:
   f. Is your teacher preparation program currently approved or accredited by the state? Yes
   g. Is your teacher preparation program currently under a designation as "low-performing" by the state (as per section 208(a) of the HEA of 1998)? No

Section III. Contextual information

* The School of Education at NDSU is accredited by the National Council for Accreditation of Teacher Education (NCATE), 2010 Massachusetts Ave NW, Suite 5000, Washington, DC, 20036; (202) 466-7496. This accreditation covers the institution's initial and advanced teacher education, advanced educational leadership, and advanced school counseling programs.

The School Counseling program is accredited by the Council for the Accreditation of Counseling and Related Educational Programs (CACREP), 5999 Stevenson Avenue, Alexandria, VA, 22304; (703) 823-9800.

The initial and advanced Teacher Education, advanced Educational Leadership, and advanced School Counseling programs at NDSU are approved/accredited by the North Dakota Education Standards and Practices Board (ESPB), 2718 Gateway Ave., Suite 303, Bismarck, ND, 58503-0585; (701) 328-9641.

The Teacher Education, Educational Leadership, and School Counseling programs at NDSU utilize the "Reasoned Action Model" as the organizing conceptual framework. A copy can be reviewed in room 210, Family Life Center, NDSU campus, 231-7921.

All initial Teacher Education candidates are required to prepare and submit portfolios as part of the assessment process.

For more information, contact Chair, NDSU School of Education, Dept. 2625, P.O. Box 6050, Fargo, ND, 58108-6050, 231-7921.
The College of Pharmacy, Nursing, and Allied Sciences at North Dakota State University has provided an education for men and women in pharmacy and the pharmaceutical sciences since 1902. In the fall of 1990, a six-year entry-level Doctor of Pharmacy (Pharm.D.) program was implemented.

The college introduced an associate degree nursing program in 1969, which was discontinued in 1987. In 1986, the college initiated a four-year baccalaureate degree program in nursing.

Baccalaureate degree programs in the allied health fields of clinical laboratory science, respiratory care, and radiologic sciences joined the college in 2006.

**Degree Programs**

The College of Pharmacy, Nursing, and Allied Sciences offers undergraduate academic programs in pharmacy, nursing, clinical laboratory science, respiratory care and radiologic sciences. Admission requirements, curricula and degree titles differ for the programs.

The Pharmacy curriculum consists of a six-year professional program leading to the Pharm.D. degree. Graduates are qualified to apply for licensure as pharmacists. In addition, a post-baccalaureate Pharm.D. program is available through the college. Graduate programs leading to an M.S. and a Ph.D. in Pharmaceutical Sciences also are available.

The baccalaureate nursing program is a four year course of study leading to a Bachelor of Science in Nursing (BSN) degree. Graduates are eligible to apply for admission to take the national licensing examination (NCLEX) to become a registered nurse (RN). Graduate programs leading to a Master of Science in Nursing (MS) and a Doctor of Nursing Practice (DNP) also are available.

Degree plans for a Bachelor of Science major in Clinical Laboratory Science (CLS), Respiratory Care (RC) and Radiologic Sciences (RS) include academic course work on campus and an internship in an affiliated, accredited hospital-based clinical program. Required internships are 12 months in length for CLS, 15 months for RC, and 24 months for RS. Graduates are eligible to write national certifying examinations.

**Academic Preparation**

Certain preparation in addition to the minimum core curriculum requirements is advisable if a student is to enter easily and progress smoothly through a particular university curriculum.

All students must complete all required courses with a grade of "C" or above. All students must maintain a semester GPA of 2.0 or above for each semester in the College. A student who fails to meet this standard for two successive or three non-successive semesters shall be terminated from enrollment in the College of Pharmacy, Nursing and Allied Sciences.

The faculty of the college reserves the right to terminate the registration of any student at any time if, in the opinion of the faculty, the student demonstrates that he or she is unsuited for a professional health career and its inherent responsibilities and obligations. Circumstances that may lead to student termination will include, but not be limited to, academic misconduct, violation of campus, state or federal statutes or regulations.

**Admission**

Selection committees will evaluate applicants for admission to the college professional programs and internships. NDSU course work and transfer credits with grades of "D" are not accepted for program requirements. Please contact the department for specific admission requirements.
Pharmacy

Additional high school preparation for the pharmacy major is recommended. Prospective pharmacy majors should present strong preparation in mathematics, in the physical/biological sciences, and in communication skills.

Evaluations will be based on college records, state residency, Pharmacy College Admission Test (PCAT) scores, and other pertinent information. A personal visit, which includes an interview and test is a part of the evaluation process. A minimum cumulative GPA of 3.00 in college course work is required for evaluation for admission, with completion of all required prerequisite courses by the end of spring term prior to beginning the professional program. (All core pre-pharmacy course work, which is indicated by an asterisk, must be completed by the end of the fall term prior to the January 1 application.) Actual admission GPA is generally much higher than 3.0. Applications for admission to the professional program must be made by January 1 of the sophomore year in pre-pharmacy for fall semester admission. All applicants will receive notice of their status by April 15.

Applications for admission to the post-baccalaureate Pharm.D. program must be made by December 15. All applicants will receive notice of their status by June 15.

Nursing

Applications for admission to the baccalaureate program should be made by May 20 for the class beginning in the spring semester of the sophomore year. Applicants will receive notification of their status in July.

Clinical Laboratory Science

NDSU maintains affiliation agreements with seven schools of clinical laboratory science that provide the necessary 12-month internship. Criteria for admission to the internship are established by each school and generally include academic performance, references, prior work experience, and an interview. In addition, student applicants must also comply with criminal background and student conduct requirements. Admission to the internship is selective. Applications for the internship are due to the Department of Allied Sciences by September 30, however, application deadlines vary among affiliated programs.

Radiologic Sciences

Students who have completed a minimum of the pre-requisite course work on campus and meet the GPA requirements established by affiliated programs may be eligible to apply for the 24-month internship. Transfer students must complete a minimum of 20 resident credits at NDSU. Admission into the internship is competitive and based upon academic achievement, references, related experience, and an interview. Applications for the internship are due to the Department of Allied Sciences by December 1, however, application deadlines vary among affiliated programs. It is highly recommended that interested students meet with their RS advisor for internship admission information at least one year prior to anticipated internship application.

Respiratory Care

Students eligible for internship application will have completed the first two years of the RC curriculum by the start of an internship, completed all pre-requisite courses with a grade of "C" or better, and have a minimum cumulative and "core" course GPA of 2.50. Application deadline is March 1. Admission into the internship is selective and is based upon successful completion of all internship prerequisites (a minimum of 20 resident credits at NDSU for transfer students), GPA, references, interview, and career motivation.

Department of Allied Sciences

Clinical Laboratory Science Major

Clinical laboratory scientists, also known as medical technologists or medical laboratory scientists, use the latest biomedical instruments to perform laboratory tests to determine the presence of disease and aid in patient treatment, monitor quality, evaluate and communicate results, and research and develop new tests and methodologies.

A baccalaureate degree, major in clinical laboratory science, includes three years of academic coursework on campus and a 12 month internship in an accredited school of clinical laboratory science. Graduates are eligible to take a national certification exam offered by the American Society for Clinical Pathology Board of Certification.
College academic work includes college algebra, biological sciences, chemistry and statistics, along with general education electives. Courses in molecular biology techniques, virology, management and research methods also are recommended. The full-time internship consists of classroom and clinical "bench instruction" in clinical chemistry, hematology, immunohematology, microscopy/urinalysis, microbiology, serology, phlebotomy, education, management and research methods.

NDSU has affiliation agreements with seven schools of clinical laboratory science that provide the professional education or internship. Affiliated programs are accredited by the National Accrediting Agency for Clinical Laboratory Science. Criteria for admission to the year of internship are established by each school and generally include academic performance, references, prior work experience, and an interview. In addition, students must also comply with criminal background and student conduct requirements. Admission to the internship is selective. Internship application procedures, descriptions of professional courses, and registration information for the year of internship are available from the Department of Allied Sciences. Grades submitted by the clinical institution for each of the courses taken during the professional training are attached to the student's official university transcript, but are not included in calculation of grade-point average.

**MAJOR REQUIREMENTS**

**Radiologic Sciences Major**

Radiographers, also referred to as radiologic technologists, perform diagnostic imaging examinations to assist physicians to diagnose or rule out disease or injury.

The baccalaureate Radiologic Sciences (RS) program includes two or more years of rigorous academic course work on campus and a 24-month professional phase or internship in an affiliated school of radiologic technology that includes classroom and clinical education specific to radiology. A strong science and math aptitude is important for RS majors to possess since academic course work includes chemistry, physics, anatomy and physiology, microbiology, trigonometry, and computer science, in addition to general education requirements. Each student also completes a minimum of 12 credits of 300-400 level special elective courses on campus related to a specialty area of interest in radiologic sciences. A list of approved special elective courses is available from the RS advisor.

Students who have completed the prerequisite course work on campus and meet the GPA requirements may be eligible to apply for an internship. Transfer students must complete a minimum of 20 resident credits at NDSU prior to the start of an internship to be eligible to apply to affiliated programs. Admission into the internship is competitive and based upon academic achievement, references, related experience, and an interview.

The full-time internship provides 60 credits of classroom and clinical instruction in-patient care procedures, radiation physics and protection, principles of imaging, positioning, radiobiology, and pathology. Affiliated radiology programs are accredited by the Joint Review Committee for Education in Radiologic Technology. Upon completion of the internship, graduates are eligible to write the national certifying examination to become a registered radiologic technologist, RT(R).

Internship application procedures, descriptions of professional courses, and registration information for the internships are available from the Department of Allied Sciences.

**MAJOR REQUIREMENTS**

**Respiratory Care Major**

Respiratory Care (RC) is an allied health profession that involves the evaluation, treatment, and education of patients with cardiopulmonary disorders. Respiratory therapists (RTs) work closely with physicians, nurses, and other allied health members in critical care, emergency rooms, nursery and pediatrics, medical units, and home care. RTs perform diagnostic tests, administer a variety of treatments to promote pulmonary hygiene, manage mechanical ventilators and cardiovascular support, and direct pulmonary rehabilitation activities.

The baccalaureate degree Respiratory Care program includes two-three years of academic course work at NDSU and a 15-month professional phase or internship in the Respiratory Care Department at Sanford Medical Center, Fargo, N.D. The NDSU/Sanford Respiratory Care Program is accredited by the Committee on Accreditation for Respiratory Care.
Academic course work includes chemistry, physics, anatomy and physiology, microbiology, mathematics, psychology, and computer science. Each student also is required to complete a minimum of 12 credits of 300-400 level special elective courses on campus. Special elective courses should be closely related to the clinical area in which the student wishes to specialize. A list of approved special elective courses is available from the RC advisor. Common specialty areas include neonatal/pediatric general or intensive care, adult general or intensive care, diagnostics, pulmonary rehabilitation, home care, education, and management. Specialty training within RC occurs at the end of the internship year (RC 494).

The full-time internship consists of lecture, laboratory, and clinical education that prepare the student to enter the profession of respiratory care. Students are eligible to apply for one of the internships available each year at Sanford during the spring of the academic year they plan to complete all prerequisite courses on campus. Admission into the internship is selective and is based upon successful completion of all internship prerequisites with a minimum grade of "C" (a minimum of 20 resident credits at NDSU for transfer students), cumulative and "core" course grade point average (a minimum of 2.50 is required), references, personal interview, and career motivation. Upon completion of the internship, graduates are eligible to write the national certifying examinations to obtain the certified and registered credentials.

MAJOR REQUIREMENTS

Department of Nursing
www.ndsu.edu/nursing

Nursing Major

The Nursing program is a four-year course of study leading to a Bachelor of Science in Nursing (B.S.N.) degree. Upon successful completion of the program, the graduate is eligible to apply for licensure as a registered nurse (R.N.). The nursing program is approved by the North Dakota Board of Nursing and is nationally accredited by the Commission on Collegiate Nursing Education (CCNE).

Mission

The mission of the nursing department is to provide professional nursing education, to advance knowledge of the discipline, and to serve as a resource for the health care needs of society.

Core Values

The faculty, students, and graduates of the department of nursing believe in the inherent worth and dignity of individuals and the value of professional nursing as an integral part of the health of society. We believe the core values of autonomy, caring, integrity, justice, professionalism and respect guide the scholarship of education, service, practice and research.

The role of faculty is to encourage, facilitate, and provide opportunities which support self-directed learning and critical thinking, enhance personal growth and socialize students as members of the profession. The role of students is to develop the knowledge, skills and attitudes essential to professional nursing practice and graduate study in nursing. The role of the graduates is to promote the health of society, advance the discipline, and function as responsible citizens of the nation and the world.

Nursing is an art and science. It is a practice profession and an academic discipline. The domain of nursing is the human response to actual or potential variations in human functioning and life processes. Nursing involves interactions among the nurse, the person and the environment in the prevention of disease, the promotion and restoration of health, and the comfort of the dying.

Professional nursing practice is the creative application of therapeutic nursing interventions based on a synthesis of scientific knowledge, research, professional values and standards. Professional nurses work with individuals, families, communities and other aggregates to meet primary, secondary, and tertiary health care needs. Nurses practice independently, interdependently, and collaboratively in a variety of settings. Nurses balance career advancement, personal well-being, and fidelity to nursing's social contract.

Core values provide a framework that supports education for and practice of professional nursing as envisioned by the Department of Nursing.
Caring is the central concept of nursing. The competence, sensitivity and compassion that characterize professional caring, guide our behavior in faculty/student and nurse/client interactions. Respect is reflected by nurses' regard for human dignity and in our acceptance of the diversity of humankind. In our practice we demonstrate our respect for other disciplines through collegiality and collaboration.

Autonomy reflects a patient's right to make decisions about his/her health care and nurses' rights to make decisions about their professional practice. Integrity is manifested in our honesty with patients and the public, by adherence to standards of academic honesty, through our accountability for our actions, and through our provision of care based on practice standards.

The professional obligation to assure equal treatment and equal access to care is a facet of justice. Nurses have a professional responsibility to encourage legislation and policy development that advances nursing care and quality health care for all people. Nursing faculty has an obligation to ensure that students have the opportunity to participate in and contribute to an excellent learning environment. Professionalism encompasses a commitment to lifelong learning and professional development, participation in professional organizations and the political process, and adherence to professional values and regulations.

Curriculum

The curriculum is organized according to a conceptual model that flows from the mission and values of the nursing program. The "Essentials of Baccalaureate Education" (American Association of Colleges of Nursing, 1998) and "The Standards of Nursing Practice" (American Nurses Association, 2004) served as guidelines for development of the curriculum. The content of the program increases in scope and complexity as the student progresses through the major.

Graduate Outcomes

The graduate of the North Dakota State University baccalaureate nursing program will:

1. Practice nursing in accordance with American Nurses Association Standards of Practice and Standards of Professional Performance.
2. Apply in nursing practice an understanding of the basic relationships among disease transmission, health status, health policy, cultural influences and health care economics within the global community.
3. Apply quality improvement approaches in work as peers on multidisciplinary teams.
4. Use information technology and communicate effectively with clients, health care team members, policy makers and the public.

Application Procedures

1. The pre-nursing program (first two semesters) is open to all high school graduates who wish to pursue a nursing major. To enter the pre-nursing program, students must be admitted to the university. The nursing major begins the fall semester of the sophomore year.
2. For admission into the professional nursing program, an application must be submitted by May 20 to the Nursing Office, 136 Sudro Hall. Enrollment in the nursing major is limited. A minimum GPA of 3.0 (4.0 = A) is required in all post high school work.

Admission is competitive and based on all of the following: (a) cumulative GPA of at least 3.0, (b) selective GPA of at least 3.0 that incorporates selected prerequisite courses (see recommended curriculum), (c) completion of prerequisite courses with a passing grade, (d) eligibility for sophomore standing, (e) 2 references, (f) an interview or essay, (g) number of credits (up to 27) taken in the North Dakota University System, and (h) advisor recommendation.

Students applying for a nursing major must submit the following:

1. Application to the professional major
2. Official transcripts from all colleges attended, excluding NDSU
3. Two reference forms
4. Evidence of pre-nursing status at NDSU.

The documents must be on file in the Nursing Office by May 20. Application forms may be obtained at the Nursing Office, 136 Sudro Hall, and the Office of Admission, 124 Ceres Hall, North Dakota State University, Fargo ND 58105. You may also call the Office of Admission at 231-8643 or 1-800-488-NDSU(6378). Students will be notified of their admission status by June 30.
 Students enrolled at NDSU in the pre-nursing program should consult with their nursing faculty advisor prior to the application deadline.

For further information contact:

Department of Nursing
136 Sudro Hall
North Dakota State University
Fargo, ND 58105
Telephone (701)231-7395

Students must successfully complete all first and second year courses prior to entering the third year of the nursing curriculum.

Students must meet the university's general education requirements as well as the curriculum requirements in effect at the time of entrance into program. Students should consult their faculty advisor about electives that may enhance their program of study. Because of limitations on class size, the typical student admitted to the nursing program has a selective GPA higher than 3.0. Computer proficiency is expected.

MAJOR REQUIREMENTS

Disclaimer: The recommended curriculum is subject to change based on nursing program development/planning. Students must consult with their nursing advisor to keep updated with the current curriculum.

Department of Pharmacy Practice

www.ndsu.edu/pharmacy

Pharmacy Major

The Pharmacy program encompasses both the basic and clinical sciences and is designed to provide students with the knowledge, skills, and attitudes essential to the practice of pharmacy. Pharmacists work in concert with the patient and other health care providers to promote health and prevent diseases. This is achieved by assessing, monitoring, initiating and modifying patients' medication therapy to achieve optimal therapeutic outcomes.

The six-year curriculum in pharmacy is conducted on a 2-4 basis. Students in the first two years of the program are in pre-pharmacy, and students in the final four years are in the professional program. Students entering the program in the first two years must meet general admission standards of the university. Students are admitted to the final four years on a competitive basis, and must meet specific admission requirements of the college. The program leads to a Doctor of Pharmacy degree (Pharm.D.). For admission requirements to the professional program, contact the dean's office of the college. Students attending other institutions must maintain frequent contact with the college to determine appropriate course work. The pre-pharmacy course work may be completed at other institutions if course work has been submitted for formal NDSU review and determined to be equivalent to NDSU requirements.

The current entry-level Pharm.D. curriculum is designed to produce graduates with the professional competencies necessary to enter pharmacy practice in any setting to ensure optimal medication therapy outcomes and patient safety, and to satisfy the educational requirements for licensure as a pharmacist. The Pharm.D. degree prepares the student to accept positions in community, hospital, managed care, clinical, and industrial pharmacy. Other potential opportunities include administrative positions in pharmaceutical companies and associations. Teaching and research positions in universities and the pharmaceutical industry are excellent opportunities for those with advanced training in pharmacy.

The college is a member of the American Association of Colleges of Pharmacy, and is accredited by the Accreditation Council for Pharmacy Education (ACPE).

MAJOR REQUIREMENTS
Opportunities in the college reflect the belief that an understanding of the methods and findings of science is best achieved through first-hand experience in the process of conducting, analyzing, and reporting research. Students are encouraged to participate in this process by working closely with faculty and other students in laboratory and field research, thus gaining direct knowledge of the power, limits, and problems in scientific inquiry. These opportunities for direct experience with the tools of the scientist are liberally available to the interested and motivated student.

Degree Programs

The College of Science and Mathematics provides undergraduate programs leading to a Bachelor of Science or Bachelor of Arts degree. Graduate programs at the master's and doctoral levels also are offered. For more complete details, see the Graduate Bulletin online.

Degree Requirements

All majors are required to complete departmental and general education requirements. Available majors include the following:

- Behavioral Statistics
- Biochemistry and Molecular Biology
- Biological Sciences
- Biotechnology
- Botany
- Chemistry
- Computer Science
- Geology
- Mathematics
- Natural Resources Management
- Physics
- Psychology
- Statistics
- Zoology

Minors are available in most departments.

Courses to fulfill the major requirements in the college may not be taken pass/fail. Only elective courses outside the major may be taken pass/fail.

Course work transferring from another institution with a grade of "D" will count toward total number of credits, but not toward specific major requirements. Math 101 and 102 are developmental courses and do not count toward credits for graduation in any program.

General Education

College general education requirements for the two undergraduate degrees extend beyond the minimum university general education requirements. The college requires an additional six credits in humanities and/or social sciences for the Bachelor of Science degree and an additional 12 credits for the Bachelor of Arts degree. This requirement may be fulfilled by any course having the following prefix: ADHM, ANTH, ARCH, ART, CJ, CLAS, COMM, ECON, ENGL, FREN, GEOG, GERM, HDFS, HIST, HUM, LA, LANG, MUSC, PHIL, POLS, PSYC, RELS, SOC, SPAN, THEA, WS, or any course from the approved list of general education courses in humanities and social sciences (general education categories A and B). These credits must come from outside the department of the student's major. An advisor should be consulted for specific courses. Students also are encouraged to follow their own interests in choosing electives that go beyond the minimum requirements. Basic requirements for each degree include the following:
Bachelor of Arts Degree

B.A. degree requirements are the same as the B.S. degree with an additional six credits of humanities or social and behavioral sciences and the addition of two years of a modern foreign language. This means completion of the second year of college-level language or the equivalent. For example, students with two or three years of a foreign language in high school should enter second year college-level language. Students with four or more years of a foreign language in high school will be considered to have completed this requirement.

All degree candidates must apply for graduation through the Office of Registration and Records according to university procedures and deadlines.

Specializations

Specializations are provided for career preparation in a range of areas.

Pre-Professional Programs

Pre-professional curricula are offered by a number of departments for students interested in preparing for careers in medicine, dentistry, mortuary science, chiropractic, optometry, osteopathy, and other health related fields. Most pre-professional programs are flexible and can be developed around many different majors. Departments that have expressed a special interest in advising pre-professional majors include biological sciences, chemistry and molecular biology, physics and psychology.

In addition to the preceding, a number of departments have developed other specializations to meet today's rapidly changing job markets. These may be found in the individual department sections as follows:

- **Biological Sciences:** environmental science, biotechnology, biological sciences education, comprehensive science education, wildlife and fisheries biology, and cell biology/physiology
- **Chemistry:** biochemistry, biotechnology, chemistry education, pre-professional chemistry, coatings and polymeric materials
- **Geosciences:** geochemistry
- **Psychology:** natural science track, social sciences track, options in behavioral neuroscience, industrial-organizational, human services, and experimental

Teacher Certification

Several of the majors available through the College of Science and Mathematics lead to careers in teaching.

Students may complete the requirements for a major in the college, then apply for admission to the School of Education in the College of Human Development and Education to undertake the additional requirements necessary to qualify for teacher certification. Alternatively, students may initially select a science and mathematics education curriculum offered through the School of Education.

Programs leading to teacher certification are available in the following areas: biological sciences, chemistry, comprehensive science, earth science, mathematics, and physics.

Students interested in teacher education are encouraged to declare a double major in their discipline and in education (i.e., chemistry education and chemistry). Such double majors may typically be earned by successful completion of a few additional credits. Students should contact their advisors for details, and are encouraged to declare their primary and secondary majors with the Office of Registration and Records, 110 Ceres.

Pre-Medicine and Pre-Dentistry

The suggested program will meet the requirements of most medical and dental schools. In general, these requirements include organic chemistry, physics, and the equivalent of a year of general biology. Some college-level mathematics, such as MATH 146-147, is strongly recommended. The Bachelor of Arts degree program is recommended. Contact the Department of Biological Sciences for additional information (231-7087).
Interdisciplinary Programs

The College of Science and Mathematics participates in the following undergraduate interdisciplinary programs. For further information, refer to the Interdisciplinary Programs section of the Bulletin.

Biotechnology Major

Biotechnology is an interdisciplinary field based on a combination of biology and technology. It includes the application of science and technology to the design of new plants, animals, and microorganisms that have improved characteristics.

Natural Resources Management Major

This interdisciplinary program is available through the College of Science and Mathematics' Biological Sciences and Geosciences departments and the College of Agriculture, Food Systems and Natural Resources' School of Natural Resources.

Cooperative Education

Cooperative Education, a program of the Career Center, offers undergraduate and graduate students an opportunity to integrate classroom study with paid, career-related work experience for academic credit. Work may be full or part time. A Cooperative Education experience may substantially improve students' employment opportunities after graduation. Students may obtain one or two semesters of professional work experience related to their studies; however, no more than a total of three credits may be applied to the minimum of 122 credits required for the degree. Each department has specific requirements for earning these credits. The student must have approval from the department chair prior to beginning the Cooperative Education program. See Career Center for more information.

Department of Biological Sciences

www.ndsu.edu/biology

Biological Sciences

The Department of Biological Sciences offers broad undergraduate preparation in the basic concepts and principles of the life sciences with major emphasis on both plant and animal forms. Various curricular options are available for specific career interests. It is important for students to consult frequently with their advisors regarding the proper options and courses related to their special interests. In addition, students should correspond early with professional or graduate schools to make sure they satisfy specific requirements.

Curricula for secondary school biological sciences education, comprehensive science education, environmental studies, traditional course sequences, and pre-professional programs are available in the department. Graduate work in biology is offered at the Master of Science level. Students interested in majoring in a specific biological science (animal science, botany, entomology, horticulture, microbiology, plant pathology, or zoology) should consult the appropriate discipline.

MAJOR REQUIREMENTS : MINOR REQUIREMENTS

Environmental Science Option

For students interested in careers that address solving environmental problems, there is the Biological Sciences major with an Environmental option. This rigorous option incorporates balanced studies in the natural sciences (biology, chemistry, physics, and earth sciences) with social sciences (economics, political science, and sociology). It also involves technology, business, law, ethics, and human relations and behavior. Students interested in this option should visit with an advisor to obtain the specific requirements.

OPTION REQUIREMENTS
Biological Sciences Education and Comprehensive Science Education Majors

To meet requirements of the "No Child Left Behind" Act of 2001, students interested in Biological Sciences Education or Comprehensive Science Education are encouraged to declare a double major in the discipline and in education (i.e., Biological Sciences Education and Biological Sciences). Such double majors may typically be earned by successful completion of a few additional credits. Students should contact their advisors or the Office of Registration and Records for details, and are encouraged to declare their primary and secondary majors with the Office of Registration and Records, Ceres 110.

Students who intend to teach biology in the secondary schools should make their intentions known to the School of Education and consult with a biology education advisor in the Department of Biological Sciences early in their programs to make certain that they have a well-designed program and take the professional education courses required for state teacher certification.

The Comprehensive Science Education major is designed to prepare the secondary general science teacher. This major is an especially good preparation for students who may find themselves teaching several different science courses. Information about curriculum and other requirements is available from the School of Education and the education advisor in the Department of Biological Sciences. Biology majors cannot pursue a minor in Biology.

MAJOR REQUIREMENTS (Biological Sciences) : MAJOR REQUIREMENTS (Comprehensive Science)

Botany

Departmental instruction is offered in the major area of botany for students in all colleges of the university, but botany courses and instructional procedures are specially designed for undergraduate and graduate students in the College of Science and Mathematics and the College of Agriculture, Food Systems, and Natural Resources. Completion of an undergraduate major prepares the students for graduate work or for professional employment. Graduate work in botany is offered at both the M.S. and Ph.D. levels. A minor in Botany is also available. Botany majors cannot pursue a minor in Biology or Botany.

MAJOR REQUIREMENTS : MINOR REQUIREMENTS

Zooology

For Zoology, a grade-point average of 2.0 is required for courses taken to fulfill the 42 credits in the major. A maximum of two credits of Individual Study (494) and/or Field Experience (496) and a maximum of two credits in Seminar (491) may apply to the 42 credits required for the major. All credits taken may apply toward those required for graduation. Graduate work in zoology is offered at both the M.S. and Ph.D. levels. Zoology majors cannot pursue a minor in Biology or Zoology.

Option 1: General Zoology
This option includes more elective choices than the other options and is designed for students who wish to pursue an area not represented in the other two options.

Option 2: Physiology, Cell Biology, or Health Sciences
This option is designed for students who are interested in physiology or cell and molecular biology or who plan to enter professional schools (e.g., medical, osteopathic, dental, optometry, chiropractic) or graduate programs in physiology and cell biology. The emphasis is on additional course work in cell biology, physiology, chemistry, and physics.

Option 3: Fisheries, Wildlife, Ecology, and Behavior
This option is designed for students who are interested in fisheries management, ecology, conservation, natural resource management, or behavior. Courses that focus on invertebrates, fish, amphibians, reptiles, birds, mammals, ecology, management, animal behavior, and population dynamics are added to the "core" courses. In addition, a course in physiology and a course in morphology are required. These studies prepare the student for research or management positions with federal, state, or other agencies such as the U.S. Fish and Wildlife Service, State Game and Fish Departments, State Conservation Departments, U.S. and State Forest Services, U.S. Bureau of Land Management, Natural Resources Conservation Service, and the Environmental Protection Agency, as well as national and state parks.
A wildlife or fisheries biologist participates in a wide range of activities including natural history, systematics, aquatic and terrestrial ecology, population dynamics, management techniques, pollution biology, and public relations. Some positions require advanced training at the master's (M.S.) or doctoral (Ph.D.) level. In addition to the curriculum suggested, at least one summer or semester of field experience is recommended. Credits for field experience may be gained either at a biological field station or through employment approved by the advisor.

MAJOR REQUIREMENTS : MINOR REQUIREMENTS

Department of Chemistry and Biochemistry

www.ndsu.edu/chemistry

Chemistry, widely regarded as a central science, involves the study of matter and the transformation of matter at a molecular level. A very wide range of consumer products, including plastics, personal care products, pharmaceuticals, etc. owe their development at least partially to modern chemistry. Chemists work in industry, educational institutions, and government laboratories, developing new materials, new pharmaceutical, improved chemical analysis methods, etc.

Biochemistry and molecular biology involve the interdisciplinary study of the chemical and physical properties of living systems and the chemical changes that take place in living organisms. Careers in biochemistry and molecular biology require preparation in chemistry and biology, as well as biochemistry and molecular biology. This is a rapidly advancing field, with many recent developments in the unraveling of the genetic code, forensic science, bioinformatics, etc. This field plays a central role in advances in human health.

The department offers both B.S. and B.A. degrees in Chemistry, with several degree options, and in Biochemistry and Molecular Biology. Students beginning study in these programs must have a strong background in chemical science.

Graduate study is available in Chemistry (M.S. and PhD. degrees), and Biochemistry (M.S. and PhD. degrees). Students beginning study in these programs must have a strong background in chemical science. For the Biochemistry graduate programs, prior training in the life sciences is desirable, but not essential. For more details, see the department web site or the online Graduate Bulletin.

Biochemistry and Molecular Biology Major

The Biochemistry and Molecular Biology major is designed to give students a detailed understanding of the chemistry of living matter. Careers exist in medical, pharmaceutical, food processing, and agricultural laboratories. Graduates also will have excellent preparation for graduate school or schools of medicine, dentistry, veterinary science, and business.

MAJOR REQUIREMENTS

Biochemistry Minor

A minor in Biochemistry also is available. Contact the department for details.

MINOR REQUIREMENTS

Chemistry

The ACS certified Chemistry major is the basic chemistry degree designed for students seeking careers in the chemical industry, or careers in law, government, journalism, business, etc., that would benefit from a strong background in the physical sciences and mathematics. Many B.S. graduates go on to M.S. or Ph.D. studies. Other degree options include a biochemistry option (also ACS certified), a polymers option (also ACS certified), a pre-professional option, and a chemistry education option.
Students may apply for scholarships available from the Department of Chemistry and Molecular Biology and the Department of Coatings and Polymeric Materials. See the College/Departmental Scholarships page on the Bison Connection web site.

**Pre-Professional Chemistry Option**

This option is designed for students interested in medical, dental, optometry, or veterinary professional school, but who wish to have an alternative career path to careers in industry, law, government, journalism, business, etc., that would benefit from a strong background in the physical sciences and mathematics. This option also provides excellent preparation for graduate study in biochemistry, biotechnology, and molecular biology.

**Polymers Option (ACS Certified)**

This program is for students who wish to prepare for a career as a chemist in coatings and polymers industries, or for graduate school in polymer chemistry. This is the only program in the U.S. that combines an ACS-certified B.S. degree in Chemistry with a coatings and polymeric materials curriculum. Students have numerous opportunities to participate in the summer research and cooperative programs sponsored by the industry. Scholarship support from the Department of Coatings and Polymeric Materials is available to students who elect this option.

**Pre-Chemistry Education Option**

This option is designed for the student interested in a disciplinary major in chemistry, but who is also considering becoming a chemistry and physics teacher. The curriculum includes physics coursework beyond the usual chemistry major to enable the graduate to teach physics in most states. For teacher certification, students must apply to the School of Education to enroll in the additional requirements, which include EDUC 389, 451, 481, 486, and 487, taken post-baccalaureate. ACS certification may be earned by taking CHEM 471, 429, and 432/432L, as additional courses and choosing BIOC 460 instead of CHEM 260.

Scholarships starting in the sophomore year are available for students in the Chemical Education option.

**Department of Coatings and Polymeric Materials**

[http://www.ndsu.edu/cpm](http://www.ndsu.edu/cpm)

The Department of Coatings and Polymeric Materials is internationally known for the excellence of its educational and research programs. Close ties with industry and government agencies are maintained to assure that teaching and research programs remain in step with the rapidly changing science and technology of the area.

Knowledge of polymers is a desirable foundation for a career as a professional chemist in industry. More than 80 percent of industrial chemists work with polymers, and many physicists and engineers also work with polymer-related materials.

Within the broad area of polymers, the department puts special emphasis on coatings. Coatings are so often encountered in everyday life that they may be taken for granted. Paint on walls, coatings on automobiles or aircraft, liners for the interior of beverage cans, coatings to protect bridges from corrosion, coatings on magnetic tapes and computer chips, and body implants are only a few selected examples.

Closely related fields are adhesives, printing inks, plastics, cosmetics, food, and biotechnology. Only five other universities in the U.S. offer programs in coatings and employment opportunities far exceed the number of graduates.

To encourage students to study in the field, companies and organizations fund undergraduate scholarships of up to $2,500 a year. Entering freshmen and transfer students apply for these scholarships through the Office of Admission. Undergraduates already enrolled at NDSU apply to the department chair.

While a minor is available, the Department of Coatings and Polymeric Materials does not offer an undergraduate major. Undergraduates interested in polymers and coatings are encouraged to major in Chemistry or Mechanical Engineering (ME). Coatings and Polymeric Materials offers graduate level programs leading to the M.S. and Ph.D. degrees in Coatings and Polymeric Materials, or a Ph.D. in Materials Science and Nanotechnology.
The Coatings and Polymeric Materials minor provides excellent preparation for professional employment at the B.S. level and for graduate school. Students are strongly advised to plan their programs so that the entire coatings course (CPM 474, 475) and laboratory sequence (CPM 484, 485 for Chemistry majors) (CPM 484 for ME majors) can be taken during the same academic year. Chemistry majors with the CPM minor also are required to take polymer synthesis (CPM 473) prior to graduation.

MINOR REQUIREMENTS

---

Department of Computer Science

www.cs.ndsu.nodak.edu

Computer Science Major

The Department of Computer Science at NDSU offers degrees or certification in the following undergraduate and graduate areas:
Bachelor of Arts: Computer Science; Bachelor of Science: Computer Science or double major in Computer Science and Mathematics; Master of Science: Computer Science or Software Engineering; Ph.D.: Computer Science or Software Engineering; Graduate Certificate: Digital Enterprise (e-commerce) or Software Engineering.

A minor in computer science is also offered. Advisors will provide students with personal attention in formulating programs with personal attention tailored to the interests and abilities of the individual student. For students with no computer experience, introductory courses are offered in the standard curriculum for majors. It is possible for advanced undergraduate students to take graduate courses while completing the undergraduate program.

Graduates in computer science might choose a job in technology development, business, agriculture, industry, education, research, or government. Their work might be in any of these areas: systems analysis, security, information assurance, bioinformatics, Web development, networking, information system development, data base management, software systems, computer operating systems, systems for process control, automation systems, simulation models, design and development of new computer systems, or management.

Graduates of the computer science program have recently accepted employment in major national businesses and industries. Many have chosen positions in North Dakota and adjoining states. With the wide use of computers and the Internet there is a growing need for computer specialists within North Dakota. Graduates are typically offered attractive starting salaries. Placement rates are high, and job prospects are projected to grow dramatically in upcoming years.

To be prepared to enter the Computer Science program, a student should have the usual college preparatory courses including at least three years of mathematics. Courses that develop the ability to think logically, to organize, and to analyze are especially important and require a background in mathematics (e.g., algebra, geometry, trigonometry).

Students who have taken college-level courses or who have computer experience can have their work evaluated for possible departmental advanced placement.

The computer science undergraduate programs, based on recommendations of the Association for Computing Machinery, consist of a core of courses required for majors and a large selection of service courses and advanced courses. In the core, students are offered an opportunity to study concepts, applications, and implementation techniques that provide a broad and practical base for both further study and a career in computing. Through a variety of service courses, every student in the university is provided an opportunity to develop computer literacy or competency. Through advanced undergraduate and graduate courses, students are offered an opportunity for in-depth study of such topics as artificial intelligence, programming languages, system simulation, computer networks, security, information assurance, office automation, bioinformatics, software development, combinatorial optimization, systems programming, data mining, and data base management systems. Students are encouraged to choose elective courses from related areas including business, economics, engineering, mathematics, operations research, and statistics.

After completing part of their studies, students will find many opportunities to work part time as a research assistant to a scientist on campus, or as an intern with a local business, applying what they have learned in the classroom. Cooperative education opportunities starting in the junior year are available.

MAJOR REQUIREMENTS (B.A.) : MAJOR REQUIREMENTS (B.S.)
Computer Science Minor

A minor in Computer Science requires at least 18 semester hours of select computer science courses. A grade of "C" or better is required in all courses applied toward the computer science minor.

MINOR REQUIREMENTS

Department of Geosciences

www.ndsu.edu/geosci

Geology and Geography are the sciences of the Earth, its environments, peoples, and cultures.

Geology Major

Geology is one of the most exciting and rewarding areas of study. Understanding Earth's environment is accomplished through an interdisciplinary curriculum where knowledge of physics, chemistry, mathematics, biology, engineering and soil science come together to offer a better understanding of our Earth.

Opportunities for a career in geology have never been better. Areas of environmental science, petroleum, mining, water and land resources, volcanology, paleontology, and glacial geology offer rewarding careers with a completed bachelor's degree. Many students continue study at the graduate level.

Curriculum requirements include a departmental core of 47 credits, including year-long sequences in calculus, chemistry, and physics, as well as skills courses in technical writing and computer science.

A typical first year for all geology majors includes physical geology, the Earth through time, and year-long sequences in English, mathematics, and chemistry.

MAJOR REQUIREMENTS

Note: Majors planning on graduate studies should be aware that a summer field camp course may be required for graduate admission. This course is recommended to be taken during the summer following the junior or senior year. Information on field camp courses and a small departmental scholarship to support these studies may be obtained from an advisor.

Geology Minor

A minor in geology consists of at least 18 credits of geology courses selected in consultation with a minor advisor. Selected geography and soil science courses may be substituted for geology courses.

Teaching Option: Curriculum emphasis is on the teaching of Earth science. Students preparing for teaching Earth science in the secondary schools must follow the School of Education curriculum.

Students interested in Earth Science Education are encouraged to declare a double major in their discipline and in education (i.e., Earth Science and Geology). Such double majors may typically be earned by successful completion of a few additional credits. Students should contact their advisors or the Office of Registration and Records for details, and are encouraged to declare their primary and secondary majors with the Office of Registration and Records, 110 Ceres.

MINOR REQUIREMENTS
Geography Minor

Emphases in the geography program are: (a) gaining an understanding of the geographic perspective, and (b) acquiring skills in the use of spatial analysis tools (such as geographic information systems (GIS), computer mapping, and other computer applications).

Geography offers a minor that may be taken in conjunction with a variety of majors such as social science and secondary education. Minor requirements are 18 credits selected in consultation with the geography advisor. Students preparing for teaching geography in the secondary schools should follow the School of Education curriculum.

MINOR REQUIREMENTS

Department of Mathematics

www.ndsu.edu/math

Mathematics

Mathematics is the language of science and technology. Its explosive development in the 20th century and its history as the oldest and most highly developed discipline make it one of the most exciting and rewarding areas of study.

The use of mathematics and the need for mathematical competence has increased tremendously. Mathematical training is in high demand in such fields as actuarial science, business, economics and commerce, engineering, and statistics, as well as the basic sciences. These disciplines, in turn, feed back new directions to the mathematical community. Trends indicate that students should plan their programs to reflect the increased emphasis on interdisciplinary competency.

Students are able to study theoretical and applied mathematics to prepare for careers or for further schooling while studying with faculty members who have a wide range of interests and expertise. Students may earn academic credit by applying what they have learned in the classroom as they gain on-the-job experience through the Cooperative Education program. Opportunities also exist for students to work as paper graders and assistants to professors.

The department offers a broad and balanced curriculum of courses. A student may major or minor in Mathematics or Mathematics Education.

Students interested in Mathematics Education should consult with their major advisor and the School of Education for professional education requirements. To meet requirements of the "No Child Left Behind" Act 2001, students interested in Mathematics Education are encouraged to declare a double major in their discipline and in education (i.e., mathematics education and mathematics). Such double majors may typically be earned by successful completion of a few additional credits. Students should contact their advisors or the Office of Registration and Records for details, and are encouraged to declare their primary and secondary majors with the Office of Registration and Records, Ceres 110.

Special double majors are available with computer science, physics, and statistics. These double majors take advantage of the close relationship between mathematics and other disciplines, and allow students pursuing a major in one of these fields to expand their mathematical background.

While the choice of major need not be made during the freshman year, an early decision allows more flexibility in tailoring programs to individual interests. The department also has a graduate program offering both an M.S. and a Ph.D. in Mathematics.

MAJOR REQUIREMENTS : MINOR REQUIREMENTS

Pre-Actuarial Science Option

Actuarial science is the study of the evaluation and measurement of risk. The Actuary Science option is a pre-professional program designed to provide the background needed to enter the field. Entrance into the profession is regulated under a system of examinations run by actuarial professional societies. The curriculum of the option is designed to prepare the student to pass several of these examinations. The nature of the actuarial profession requires its practitioners to have a broad knowledge of finance, law, mathematics, management, and statistics. This option leads to a double major in mathematics and statistics with either a minor in economics or additional courses in business. Students selecting this option are requested to visit with the actuarial advisor in the Department of Mathematics early and often to confirm their progress and to inform themselves of changes in the examination curriculum.
Physics Major

Students who complete a major in Physics are prepared for careers in industrial and governmental research and development; for graduate study in physics, astronomy, engineering, medicine, oceanography, materials science; and for environmental science. In-depth preparation also is provided for teaching in secondary schools.

To meet requirements of the "No Child Left Behind" Act 2001, students interested in Physics Education are encouraged to declare a double major in their discipline and in education (i.e., physics education and physics). Such double majors may typically be earned by successful completion of a few additional credits. Students should contact their advisor or the Office of Registration and Records for details and are encouraged to declare their primary and secondary majors with the Office of Registration and Records, Ceres 110.

A grade-point average of 2.00 or higher is required in all physics courses. Courses do not count toward the major if the grade is less than a "C".

MAJOR REQUIREMENTS

Computational Physics Option

Computational physics is a rapidly growing sub-discipline of physics, concerned with computational aspects of physical problems, including computer simulation and numerical techniques for the solution of mathematical equations arising in all areas of physics. As computing power grows, computer modeling is becoming an increasingly important research and development tool. Correspondingly, there is a rising demand for scientists with multidisciplinary training that combines fundamental knowledge of physics with practical skills in computation. The computational physics option recognizes the unique qualifications of students who complete computation-related courses in addition to fulfilling the requirements for the physics majors. Graduates of the option will be qualified to work in industry or to pursue graduate studies in physics, computer science, engineering, or other technical fields.

Optical Science and Engineering Option

This program is for students who wish to prepare for a career as a physicist in photonics or for graduate school in optics or photonics. Today, light is at the core of technologies ranging from computing and communication to surgical techniques. There are more than 5,000 optics-related companies in the United States alone, but even more important, photonics provides the technical foundation for many more. Optical science and engineering has exploded to encompass nearly all fields of science and technology with a consequent shortage of individuals trained in the field. This option provides the necessary interdisciplinary background in physics and electrical engineering through a structured sequence of courses. This is the only program of this type in the region.

Mathematics and Physics Double Major

This program is for students who want additional theoretical background and preparation for graduate or technical careers in the sciences.

MAJOR REQUIREMENTS
Physics Minor
A Physics minor consists of 19 credits. At least 8 credits must be taken at NDSU.

MINOR REQUIREMENTS

Department of Psychology
www.psych.ndsu.nodak.edu

Psychology is concerned with behavior, both of human beings and other living organisms. In studying behavior, psychologists rely heavily upon the methods of science. Some areas of psychology are most closely related to the natural and biological sciences while other areas within psychology are more closely related to the social sciences, especially sociology, anthropology, and communication. Both an undergraduate major and an undergraduate minor in psychology are available. Psychology majors may select the degree program that best suits their needs and interests from the B.A. and B.S. tracks outlined in this section.

All majors must complete 30 credits in psychology as listed in the outline for the B.S. degree. Additional courses in psychology may be selected, in consultation with the advisor, from any of those listed under the department's offerings. Courses in the major field may not be taken on a pass/fail basis (except PSYC 494 and 496, which may be graded on a pass/fail basis by the instructor).

The psychology major also requires a supporting track in one of the following areas:

1. **Natural Science Track:** 14 additional credits in math, computer science, statistics, and/or science
2. **Social Science Track:** 14 additional credits in social science (other than psychology)
3. A minor in an approved area of study

Career Orientation Overlays
An undergraduate education in psychology leads to a number of career choices following graduation. To assist students in preparing for post-graduate work and careers in psychology or related fields, the department has prepared several Career Orientation OverLays (COOLs).

COOLs establish curriculum guidelines and suggestions for students who may be interested in a variety of careers, including medicine and neurosciences, business and industry, graduate school in psychology, or mental health and applied psychology. COOLs, when used in conjunction with the counsel of an advisor, are intended to help a student select the best courses within and outside of psychology (e.g., biology for medicine or business for industrial psychology) to suit particular interests and career goals.

Advising Centers
Information for students is available on the department web site and at the department in Minard Hall. Topics include requirements for majors and minors, COOLS, graduate school, and career information.

Psychology Major
A total of 122 credits is required for a major in psychology leading toward a Bachelor of Science or Bachelor of Arts degree.

MAJOR REQUIREMENTS

Psychology Minor
A minor in Psychology offers students electing majors in other disciplines the opportunity to complement their studies with a coherent set of psychology courses. Different courses are compatible with interests and career goals of students in major areas such as business,
child development and family science, and computer science. Students planning a Psychology minor should consult with a faculty advisor from the Department of Psychology.

Students selecting a minor in Psychology must complete 18 credits in psychology (excluding PSYC 494 or 496). These 18 semester credits may not be taken pass/fail and must include at least one 3-credit 300- or 400-level course. A minimum of eight credits must be taken at NDSU.

MINOR REQUIREMENTS

Neuroscience Minor

A 17 credit minor in Neuroscience is also available. Courses used for the major cannot be counted in the minor. See the Department of Psychology for details.

MINOR REQUIREMENTS

Department of Statistics

www.ndsu.edu/statistics

Statistics involve the analysis of numerical data. This ranges from the calculation of simple statistics to the mathematical theory behind very sophisticated statistical procedures. Professionals in areas such as agriculture, pharmacy, business, human development, and the social sciences use statistical tools.

Statistics Major

The Department of Statistics offers a major leading to a B.S., M.S., or Ph.D. degree, as well as minors in Statistics for both undergraduate and graduate students. The program is flexible enough to be individually planned around prior experience and in accord with professional goals. The program emphasis is on applied statistics, consulting, and computational methods.

MAJOR REQUIREMENTS

Mathematics and Statistics Double Major

Pre-Actuarial Science Option

Actuarial Science is the study of the evaluation and measurement of risk. The Actuary Science option is a pre-professional program designed to provide the background needed to enter the field. Entrance into the profession is regulated under a system of examinations run by actuarial professional societies. The curriculum for this option is designed to prepare the student to pass several of these examinations.

The nature of the actuarial profession requires its practitioners to have a broad knowledge of finance, law, mathematics, management, and statistics. This option leads to a double major in Mathematics and Statistics with either a minor in Economics or additional courses in business. Students selecting this option are requested to visit with the actuarial advisors in both the Departments of Mathematics and Statistics early and often to confirm their progress and to inform themselves of changes in the examination curriculum.

OPTION REQUIREMENTS
Behavioral Statistics Major

This degree is a joint effort between the Department of Statistics and the Department of Psychology. It is recommended that a student wishing to obtain a degree in Behavioral Statistics consult with an advisor in both departments. This major prepares students for careers involving collecting and analyzing data on human behavior, for example, in Medicare, insurance, market research, or health, educational and social services. Graduates of this program are expected to have good quantitative reasoning skills and to have strong people skills. *Note:* this curriculum also fulfills requirements for the B.S. in Psychology.

**MAJOR REQUIREMENTS**

*Note:* Students must meet the university's general education requirements as well as the curriculum requirements in effect at the time of entrance into a program.

---

Statistics Minors

Two different minors in Statistics are offered. A Department of Statistics (Waldron 201) advisor for minors must approve the program.

**MINOR REQUIREMENTS**
Programs in the College of University Studies are designed for students with general needs or unique goals. These programs involve general studies for deciding students or the Bachelor of University Studies degree (a tailored degree program) for students with distinctive educational goals.

General Studies
The general studies program is designed to serve new students who wish to enter college but are unsure about their plans for the future. Special attention is given to selecting the best advisors, giving students a chance to explore a variety of fields, and acquainting them with people who are familiar with post-graduation opportunities.

Students in general studies may elect any pattern of courses for which they have satisfactory preparation. They may carry as little as one course (usually three hours of class a week), a full load of four or five courses, or on rare occasions, as many as six or seven courses.

Transfer to other colleges on campus from this program or into this program is possible at any time. Most students elect to pursue a major in one of the other academic colleges at North Dakota State University no later than their third semester.

Bachelor of University Studies Degree
Students with no fewer than 15 semester credits remaining and wishing to tailor their own degree may do so by proposing a plan of study. Upon approval, this plan of study leads to a Bachelor of University Studies (B.U.S.) degree.

Students seeking the Bachelor of University Studies degree usually begin by visiting the Associate Dean's office and talking with an advisor about their long-range hopes and aspirations. Together, they select an advisor whose professional skills and interests most closely coincide with those of the student. The advisor will work with the student in preparing a statement of goals, a summary of previous education and experience, and a plan of study for the degree. After both have signed the proposal, it is forwarded to the Academic Policies/Program Review committee of the College of University Studies for approval. If the program is approved by the committee, it becomes a set of requirements for graduation. Each program must meet the general education requirements and the graduation requirements of the university. The Bachelor of University Studies degree does not allow a designated major or an academic minor, but students are encouraged to create an area(s) of emphasis.

Experiential Learning Credit
Students may gain credit for university-level experiential learning depending on how their experience relates to their educational objectives and the pattern of formal education they plan to pursue. Students requesting credit for university-level experience must prepare summaries of their learning, including time periods, job descriptions, responsibilities, on-the-job training, verification of employment, and any other pertinent information according to published guidelines. Credit may be requested for any type of experience provided the experience leads to university-level learning and is related to educational goals. Ultimately, students must be prepared to demonstrate increased knowledge, problem-solving ability, ability to understand people, or some other significant personal growth as the result of their experience.

Cooperative Education and Internships
Cooperative Education, a program of the Career Center, offers students an opportunity to integrate classroom study with paid, career related work experience for academic credit. Work may be full or part time. A Cooperative Education experience may substantially improve students' employment opportunities after graduation. See Career Center web site for further information.
Degree Plan Proposal

The degree plan must be submitted to the Academic Policies/Program Review committee through the Office of the Associate Dean of the College of University Studies by guideline due dates (October 1 for spring or summer graduation; February 1 for fall graduation). No fewer than 15 credits must be proposed (remain to be taken after approval) and included in the proposal. Students who submit proposals after the due date will not be considered for graduation the following semester. Students are encouraged to submit their proposals during the junior year with approximately 30 credits proposed.

A program must include the following: at least one semester (15 credits) of study to be completed after approval; a total of no fewer than 122 credits (including credit for military experience, previous college work, work experience, etc.); 37 credits of junior- and senior-level courses (300-400 level); a cumulative grade-point average of 2.00 based on all work completed at NDSU; 60 credits from a four-year institution; and the residency requirement (36 credits must be completed at NDSU). Ordinarily, the last 30 credits must be resident credits. In addition, each program must fulfill the General Education requirements including the Capstone Experience, Cultural Diversity, and Global Perspectives categories and have as a minimum the following:

<table>
<thead>
<tr>

</table>

Approval of a student's proposal means that everybody involved believes that the approved plan is the best educational program available to that student and that it is a baccalaureate-level program.

It is the policy of the College of University Studies that students seeking a B.U.S. degree will, following approval of the B.U.S. proposal, be expected to make continual progress toward completion of their degree. Discontinuing enrollment for a period of two continuous academic years or more indicates lack of progress. The approved proposals of students who lack progress will no longer be considered valid for graduation with a B.U.S. degree. If these students choose to continue to seek a B.U.S. degree, it will be necessary to submit a new proposal for consideration by the committee.

In addition to the College of University Studies' continual progress policy, NDSU requires that any student who discontinues enrollment for more than one year is subject to completing the General Education requirements in effect at the time of re-entry. B.U.S. proposals are subject to the NDSU baccalaureate degree requirements.

MAJOR REQUIREMENTS

For further information, contact:
Carolyn A. Schnell, Associate Dean
College of University Studies
112 Morrill Hall
NDSU Dept. 2800, P.O. Box 6050
North Dakota State University
Fargo, ND 58108-6050

www.ndsu.edu/univ_studies
INTERDISCIPLINARY PROGRAMS

Interdisciplinary study involves an integration of more than one discipline and perspective on a topic. North Dakota State University offers several interdisciplinary programs at both the undergraduate and graduate levels. The undergraduate programs listed in this section are offered through collaborative partnerships of departments in more than one academic college. Programs offered by multiple departments within the same academic college are listed in their respective college sections.

Biotechnology
www.ag.ndsu.nodak.edu/plantsci

Biotechnology is an interdisciplinary field based on a combination of biology and technology. It includes the application of science and technology to the design of new plants, animals, and microorganisms that have improved characteristics. The methodologies include the use of recombinant DNA for gene cloning and gene transfers between organisms, culture of plant and animal cells and tissues, fusion of animal cells or plant protoplasts, and the regeneration of whole plants from single cells.

Biotechnology also is concerned with the large-scale fermentation processes that utilize some of these novel organisms for the production of pharmaceuticals, diagnostic tests for diseases, feed additives, enzymes, and hormones.

Biotechnology offers seemingly unlimited opportunities to combine genes from related or unrelated species to produce useful organisms with desirable properties that were not previously found in nature. The development of crop plants that are resistant to herbicides or insects, the production of human growth hormone and insulin by genetically engineered bacteria, and the development of unique vaccines are all examples of successful biotechnology.

The Biotechnology program is offered in either the College of Agriculture, Food Systems, and Natural Resources or the College of Science and Mathematics and leads to the Bachelor of Science degree. The curriculum is designed to provide students with knowledge and experience in both basic and applied sciences. Students have an opportunity to work with scientists in various areas including, animal science, biology, botany, chemistry, horticulture, microbiology, plant pathology, plant science, and zoology. Faculty in each of the cooperating life-science departments has been identified to serve as advisors for students who select the biotechnology major. Graduates of this program have excellent opportunities for employment in the biotechnology industry or for graduate education.

Students majoring in biotechnology are required to perform a research project in the laboratory of a faculty member/scientist, and to prepare a senior thesis describing their research project. A 2.50 institutional grade-point average is required to remain in the program.

MAJOR REQUIREMENTS

Note: Students must meet the university's general education requirements as well as the curriculum requirements in effect at the time of entrance into a program.

Biotechnology Minor

A minor in biotechnology requires satisfactory completion of 22 credits in the following courses. A minimum of eight credits must be taken at NDSU.

MINOR REQUIREMENTS

Fraud Investigation

The Department of Accounting, Finance, and Information Systems, in collaboration with the Department of Criminal Justice and Political Science, offers a minor in Fraud Investigation. Students will study the causes of fraud, as well as the detection, investigation, and prevention of fraud. Students learn about the criminal justice system including law making, criminality, and prosecution of fraud and other types of crime. This minor will prepare students for possible careers in crime investigation, litigation support, or forensic accounting.
Contact the Department of Accounting, Finance, and Information Systems or the Department of Criminal Justice and Political Science for specific course and minimum grade-point average requirements.

MINOR REQUIREMENTS

Gerontology

A minor in Gerontology is sponsored through the College of Human Development and Education and the College of Arts, Humanities and Social Sciences. It makes use of the Tri-College University resources to provide students with an integrated understanding of the process of aging, aging services, and the aged in America. There are six basic areas of study. Students should follow the directions provided for each of the areas.

MINOR REQUIREMENTS

Great Plains Institute of Food Safety

www.ndsu.edu/foodsafety

An interdisciplinary team of faculty with expertise in food safety from various departments within NDSU's Colleges of: Agriculture, Food Systems, and Natural Resources; Arts, Humanities and Social Sciences; Human Development and Education; Engineering and Architecture, and Science and Mathematics has formed the Great Plains Institute of Food Safety and developed a unique educational experience for NDSU students. The comprehensive food safety curriculum leads to B.S., M.S., and Ph.D. degrees in Food Safety, an Undergraduate Minor in Food Safety and a Graduate Certificate in Food Protection (see web site for complete curriculum requirements). All these programs are unified around the single issue of food safety, an area of concern for many Americans, the current target of tremendous interest, effort, and spending worldwide, and an area in which shortages of expertise are manifest. Students in food safety are heavily recruited for employment in the food safety fields.

The curriculum is based on contemporary educational theory and employs experiential learning techniques to foster development of students' critical-thinking abilities, collaborative and problem-solving skills, and awareness of employment opportunities. Courses are fully integrated so that students have the opportunity to troubleshoot food-safety issues from "farm-to-fork." The program promises to meet students' present and future educational needs.

MAJOR REQUIREMENTS

Food Safety Minor

Students may minor in Food Safety by completing a total of 16 credits. A minimum of eight credits must be taken at NDSU.

MINOR REQUIREMENTS

International Studies

The International Studies major is a secondary major that is offered concurrently with a student's primary program of study. This program provides students with the opportunity to internationalize their major by combining special requirements to obtain the international studies major with their academic field of study. Students complete 27 credits of course work including an integrative senior project, demonstrate proficiency in a foreign language, and participate in an experience abroad to complete a second major in International Studies.

Courses. In addition to the courses required for the primary major, students seeking the International Studies major are required to take courses that have an international focus. These include a 12-credit core and nine credits of electives that will be chosen with the help of the student's advisor. An integrative senior project that ties international study to the primary degree also is required.

Languages. Knowledge of a foreign language is an important part of the program. At NDSU students may study Arabic, French, German, and Spanish. Additional language study is available through the Tri-College University in languages such as Norwegian, Russian, Japanese, and Chinese. Foreign language proficiency equivalent to completion of two years of college language study is
required. This requirement may be met either through appropriate course work or through a testing procedure in the Department of Modern Languages.

Experience abroad. An important part of the International Studies major is participation in a study, work, or research experience abroad for at least 10 weeks in duration. Assistance with finding an overseas study program is available in the Office of International Programs.

Selective admission. To be eligible to participate in the International Studies major, students must have sophomore standing with a minimum grade-point average of 2.5. Eligible students also must have initiated advanced level course work in their academic major and completed the first year or equivalent of their foreign language study. Additional information about the International Studies major and curriculum requirements are available through the Department of a student's academic major, the college International Studies advisor, the Department of Modern Languages, and the Office of International Programs.

MAJOR REQUIREMENTS

Logistics Management

Working in conjunction, the College of Business, the Upper Great Plains Transportation Institute, and the Department of Agribusiness and Applied Economics offer a minor in Logistics Management. Companies directly involved with transportation as well as companies in the retail and wholesale sectors increasingly rely on an effective and efficient logistics system to remain competitive. In addition, the public sector also utilizes individuals with logistics and supply chain management skills.

MINOR REQUIREMENTS

Natural Resources Management

With increasing human pressure and a growing need to balance competing demands, our world needs new and better ways to manage society's impacts on the environment. The Natural Resources Management program prepares students for challenging careers requiring the holistic ecological perspective and global social perspective necessary for examining and solving complex natural resources management problems. Our goal is the highest and best societal uses of natural resources while maintaining the integrity of life-sustaining ecological systems. Career opportunities abound in federal, state and local government, the private sector, non-profit conservation and environmental organizations, as well as higher education and research.

An interdisciplinary major in NRM leads to a Bachelor of Science (BS) degree. Students benefit from faculty engagement from four colleges in the coordination of the program, classroom teaching and advising. Students may earn a B.S. degree from any one of the participating colleges: College of Agriculture, Food Systems, and Natural Resources; College of Engineering and Architecture; and College of Science and Mathematics.

During the first four semesters of the NRM program, students complete a broad foundation of core courses in the social, biological, and physical sciences. The second half of the program offers students the opportunity to focus on a specific area of interest (emphasis). NRM offers six emphasis areas, each allowing students the flexibility to select courses for specialized career preparation.

- **Biotic Resources Science**: deals with basic scientific principles that govern the interrelationship between biotic (e.g., plants, animals) and abiotic factors (e.g., climate, soils) in major ecosystems and the use of these principles for environmentally sound management of both natural and agro-ecosystems.
- **Environmental Communication**: is designed for environmentally oriented students preparing for careers in communication fields such as journalism, public relations, broadcast media and the internet.
- **Natural Resources Economics**: prepares students for management, administrative, regulatory, and policy positions that require a broad understanding of natural resources management and allocation.
- **Physical/Earth Resources Science**: leads to an understanding of the physical and chemical aspects of ecosystems. Topics of study include hydrology, water management and quality, waste management, soil properties, energy resources and land-use management.
• **Pollution Control**: focuses on the principles and practices of managing natural resources for pollution control. Topics include the technical aspects of pollution as they relate to water, air/solids, earth/soils, and the impact of environmental pollution on biotic factors. Students interested in this emphasis are strongly urged to complete College Algebra before entering the NRM program.

• **Social Sciences**: concentrates on human factors (social, political, anthropological) in environmental management and environmental disaster management, while recognizing constraints and opportunities presented by physical and biological factors.

### MAJOR REQUIREMENTS

#### Natural Resources Management Minor

Students may minor in NRM by completing a minimum of 18 credits. Six of those credits are required courses and an additional three credits from each of the following interdisciplinary categories is also required: Biotic Resources Science, Physical/Earth Science, and the Social Sciences Sections I and II. A minimum of eight credits must be taken at NDSU. A minor approval form is available from the NRM Student Services Office.

### MINOR REQUIREMENTS

#### Women and Gender Studies

[www.ndsu.edu/wgs](http://www.ndsu.edu/wgs)

The goals of Women and Gender Studies include: Examining the contributions of women to all aspects of society; exploring the intersections of race, class, sexual orientation, age, and physical ability with gender both globally and nationally; investigating the heritage, challenges and concerns of women; and providing a newer and broader understanding of women in all fields.

A Women and Gender Studies program provides the benefits of a liberal arts education with an emphasis on critical thinking, writing, and organizational skills, making oral presentations, and expands the traditional acknowledgement that a liberal education produces well-rounded individuals. There also are multiple practical applications of a Women and Gender Studies major. With more women in the workplace, businesses must be able to address issues such as sexual harassment, flex-time, and equal opportunity not only with sensitivity but from a knowledge base.

#### Women and Gender Studies Major

The major consists of 36 credits, including a 15 credit core, nine hours of general Women's Studies elective classes, and 12 hours of topic-intensive work. (Women and Liberal Arts, Women and Families, Women and Health, Women and Work, and Women and Public Policy). Many of the courses in the topic-intensive electives are at Concordia College and MSUM.

### MAJOR REQUIREMENTS

#### Women and Gender Studies Minor

The Women and Gender Studies minor is an interdisciplinary program appropriate as a complement to various majors. This minor is particularly useful in acquiring perspectives that complement traditional studies for developing leadership roles or for pursuing careers that involve women's concerns.
COURSE DESCRIPTIONS: 2010-2011

Courses approved at the time of publication are listed in this bulletin. Not all courses are offered every term. Refer to the online schedule of courses each term and Campus Connection for listed offerings.

Definitions

Course descriptions frequently include additional information about enrollment. Students are responsible for complying with restrictions or expectations related to course enrollment listed herein or in any supplementary information.

Course credits: Credits are stated in semester units as defined in the Academic Policies section in this bulletin.

Course prerequisites (Prereq): Prerequisites indicate the academic background, academic level, or other requirements considered necessary for enrollment in the course. Most prerequisites are specific courses, however, equivalent preparation is usually acceptable.

Course corequisites (Coreq): Corequisites indicate courses to be taken concurrently with the course described. Instructor or department permission may override a prerequisite or corequisite.

Cross-listed courses: A cross-listed course means the same course is offered by two or more departments or under another course prefix. Cross-listed courses are noted and the full description appears under the department responsible for the course. Credit may only be earned for the course under one of the prefixes.

Dual-listed courses: Dual-listed courses with 400- or 500- and 600-level course numbers permit undergraduate and graduate students in the same class. The same amount of credit for the course is earned by all students, but additional work is required of students enrolled under the graduate level number. Credit may only be earned for the course at one of the levels.

Designators

- (CCN) - This abbreviation indicates the course has a common number, title, and description throughout ND University System institutions. Common courses offered at NDSU are listed in the Appendix.
- (ND: ___) - This designator has various abbreviations following the colon to indicate the general education category for which the course has been approved by the ND University System for transfer to other System institutions. General Education Requirement Transfer Agreement (GERTA) designators are the following: (ND:COMPSC) computer science, (ND:ENGL) English composition, (ND:FA) fine arts activities, (ND:HIST) history, (ND:HUM) humanities, (ND:LABSC) laboratory science, (ND:MATH) mathematics, (ND:SCI) science and technology, (ND:COMM) speech, and (ND:SS) social science. For more GERTA information, refer to the Academic Policies section in this bulletin.

Note: NDSU general education requirements and approved courses are available in Academic Policies in this bulletin, and online at www.ndsu.edu/registrar/gened.

Format of Course Listings

All university course offerings, listed alphabetically by areas of study, are described on the following pages. Course information and course availability is subject to change. The heading, which precedes the brief description of each course, includes the current course number; former course number, if any, in brackets; course title; a CCN indicator, if any; and the number of semester credit hours, fixed or variable. Enrollment information, such as prerequisites and corequisites follows. The frequency the course is offered may appear at the end of the description. F = Fall, S = Spring, SS = Summer Session. Terms presented in a fraction indicate course is offered alternate years. F/2 = every other Fall semester.
Course Numbers

Course numbers indicate the student classification for which the course is primarily intended. Some course numbers end with a letter suffix: L - laboratory course; R - recitation (undergraduate) or research continuation (graduate); S - graduate project. The number system is as follows:

- 100 series courses - open to freshmen
- 200 series courses - primarily for sophomores
- 300 series courses - primarily for juniors
- 400 series courses - primarily for seniors
- 500-599 series courses - post-baccalaureate professional courses
- 600 numbered courses - Continuing Education post-baccalaureate courses, not applicable toward graduate degrees
- 601-699 series courses - graduate courses taught concurrently in the same classroom with advanced undergraduates at the 400 or 500 level
- 700-799 series courses - open to graduate students

¹ Any 100-level course offered for non-degree credit is noted in the course description.

Notes: A bracketed course number or prefix [ ] indicates that the number or prefix of the same course has changed since the last publication of the bulletin. Double credit cannot be earned by repeating a course unless the course description indicates otherwise.

Graduate standing is required for 600-700 level courses unless prior approval to use the course for an undergraduate program of study is granted by the department/instructor.

Uniform Course Numbers

The following courses may be offered by departments but are described here because of their uniform numbers and descriptions.

( Prefix) 291, 391, 491 (CCN); 590, 690, 790
Seminar, 1-5
A group of students engaged, under a professor or professors, in research or criticism and in presentation of reports pertaining thereto.

( Prefix) 292, 392, 492
Study Abroad, 1-15
Pre-arranged study at accredited foreign institutions or in approved study abroad programs. Prereq: Sophomore standing and prior approval by major department. Graded "P" or "F".

( Prefix) 194, 294, 394, 494 (CCN)
Individual Study, 1-5
Individual student work on research or criticism under the supervision of a professor.

( Prefix) 196, 296, 396, 496 (CCN); 595, 695, 795
Field Experience, 1-15
Field-oriented supervised learning activities outside the college classroom that include a preplanned assessment of the experience, registration during the term the experience is conducted, and post evaluation with the instructor. Departmental approval.

( Prefix) 297, 397, 497 (CCN)
Cooperative Education, 1-4
Practical application of classroom learning through employment in supervised career-related positions. Students are granted full-time student status by the University regardless of the actual credit hours. Requires departmental approval and Co-op Program application.

( Prefix) 199, 299, 399, 499 (CCN); 596, 696, 796
Special Topics, 1-5
A group study of the known and established literature of a field, or other evidence, for purposes of scholarly development.

( Prefix) 379
Study Tour Abroad, 1-6
NDSU faculty directed, part-term experience or field study in a foreign country. Conducted in English for residence credit. Prereq: Prior approval by the Office of International Programs and major department. May be repeated. Graded "P" or "F".
(Prefix) 592, 692
Case Studies, 1-3
Critical review, analysis, and evaluation of selected topics by individual presentations and group discussions. Case study topics are indicated by title on the student's transcript. Graded "S" or "U".

(Prefix) 593, 793
Individual Study/Tutorial, 1-5
Directed study allowing an individual student under faculty supervision to undertake selected, independent work in topics of special interest or a limited experience in research. Requires departmental approval.

(Prefix) 594, 794
Practicum/Internship, 1-8
Course designed to provide practical participation under professional supervision in selected situations to gain experience in the application of concepts, principles, and theories related to the student's area of specialization. Requires approved program and consent of instructor. Graded "S" or "U".

(Prefix) 791
Temporary/Trial Topics, 1-5
University-wide course focused on group study involving critical examination and discussion of subject matter selected for proposal as a temporary or trial course.

(Prefix) 792
Specialized Studies for K-12 Teachers, 1-5
Study of contemporary issues relevant to the K-12 education environment. Graded "S" or "U" and non-didactic by default. Letter grading may be requested. Contact the Graduate School to request didactic credit.

(Prefix) 797
Master's Paper, 1-3
Literature review, research, and preparation for paper required for the comprehensive study option. Graded "S" or "U".

(Prefix) 797s
Comprehensive Project, 1-6
An in-depth research study/project in a graduate student's field of study. *Prereq:* Graduate standing.

(Prefix) 798
Master's Thesis, 1-10
Original investigation under the supervision of a major adviser and a supervisory committee. Graded "S" or "U".

(Prefix) 798s
Specialist Field Study, 1-6

(Prefix) 799
Doctoral Dissertation, 1-15
Original investigation under the supervision of a major adviser and an advisory committee. Graded "S" or "U".
# ACCOUNTING (ACCT)

Bowlin, Head; Andersen, Clifton, Dietz, Dowdell, Glatt, Herda, Hong, Klamm, Snyder

## COURSES

(All courses 300 level and above require a minimum of junior standing.)

### 102 Fundamentals of Accounting (CCN)  
3  
Introduces financial statements and other accounting information to make personal and business decisions. Not available to majors and accounting minors in the College of Business Administration.

### 200 Elements of Accounting I (CCN)  
3  
Study of the basic concepts of accounting applied to businesses and the use of accounting information as a basis for decision-making. The focus is on financial accounting. Prereq: Sophomore standing. Coreq: CSCI 116.

### 201 Elements of Accounting II (CCN)  
3  
Study of the basic concepts of accounting applied to businesses and the use of accounting information as a basis for decision-making. The focus is on managerial accounting. Prereq: ACCT 200.

*Minimum grade of "B" is required in Act 200, Act 201, or the equivalent courses in transfer, to enroll in 300-400 level accounting courses.*

### 311, 312 Intermediate Accounting I, II  
4 each  
Intensive study of accounting theories, corporate accounting problems, financial statements and disclosures, problems in income determination, and other evolving issues in accounting. Prereq: ACCT 201, 311 respectively.

### 318 Taxation in Management Decisions  
3  
Study of the fundamental concepts of tax implications that result from common business transactions. Prereq: ACCT 102 or 201. Cross-listed with BUSN.

### 320 Cost Management Systems  
3  
Study of cost management methods used to assign costs, and plan and evaluate business activities. Prereq: ACCT 201.

### 321 Government and Not-for-Profit Accounting  
3  
Study of accounting standards and procedures applicable to government and not-for-profit institutions. Prereq: ACCT 201. Recommended: ACCT 311.

### 342 Fundamentals of Financial Planning  
3  
Introduction to the concepts of personal financial planning: investing, budgeting, insurance, taxes, retirement and estate planning. Prereq: ACCT 201.

### 410/610 Fraud Examination  
3  
Study of the pervasiveness and causes of fraud in society; examination of methods of fraud detection and prevention, and on the investigation of financial statement fraud. Prereq: ACCT 201.

### 411/611 Advanced Fraud Examination  
3  
Advanced application of fraud examination principles that encompass the investigation and prevention of fraudulent financial transactions. Coursework is focused on the analysis of fraudulent financial statements and fieldwork involving actual organizations. Prereq: ACCT 410.

### 413 Accounting Internship  
3  
Supervised professional experience in a non-paid position. May be repeated.

### 415/615 Advanced Accounting  
3  
Study of advanced topics including consolidated statements, international operations, and derivative financial instruments. Prereq: ACCT 312.

### 418/618 Tax Accounting I  
3  
Study of the theory and principles related to the determination of taxable income and computation of federal income taxes for individuals. Students will prepare manual and computerized tax returns. Prereq: ACCT 201.

### 419/619 Tax Accounting II  
3  
Study of the theory and principles related to the determination of taxable income and computation of federal income taxes for partnerships, corporations, trusts and estates, and other specialized tax issues. Prereq: ACCT 418/618.

### 420/620 Accounting Information Systems  
3  
Study of conceptual and practical aspects of accounting information systems with a focus on business processes. Practical application includes use of software in a lab setting. Prereq: MIS 370. For 420: ACCT 311. For 620: ACCT 312.

### 421/621 Auditing I  
3  
Study of audit principles and practices including evidence gathering, internal controls, sampling and testing, report writing, ethics and legal liabilities. Prereq: ACCT 311.

### 422/622 Auditing II  
3  
Advanced application of audit principles in organizational situations through case studies and the investigation of current issues in auditing. Prereq: ACCT 421/621.

### 430 Tax Practice and Research  
3  

### 440/640 Management Control Systems  
3  
Study of the role of cost management analysts in the design, implementation, and use of management control systems. Prereq: ACCT 320.

### 720 Strategic Cost Management  
3  
Study of management’s use of cost management methods to plan and evaluate business activities.

### 735 Applied Professional Research  
3  
This course will emphasize substantive accounting questions and issues that arise in practice. Professional research methods will be used to solve cases addressing these questions. Teamwork, communication skills, and analytical skills required of contemporary accounting practitioners will be developed. Prereq: ACCT 311, 312 and 320.
750 Accounting Theory 3
This course will examine the conceptual underpinnings of accounting, the development of those concepts, and accounting issues as related to contemporary financial reporting. Prereq: ACCT 311, 312 and 320.

755 Financial Statement Analysis 3
This course is the study of conceptual and practical aspects of the financial information in corporate annual reports.
The course focuses on the interpretation and critical evaluation of financial information, rather than the mechanics of preparing financial reports. Prereq: ACCT 311, 312 and 320.

**110 Air Force ROTC Fitness**  
Physical Training classes are designed to make students aware of the benefits of being physically fit and participating in lifetime fitness programs. May be repeated.  
F, S

**111 The Air Force Today I**  
Introduces students to the United State Air Force and provides an overview of the basic character, missions, and organization of the Air Force. F

**112 The Air Force Today II**  
Continuation of AS 111; provides an overview of the basic characteristics, missions and organization of the Air Force. S

**210 Leadership Laboratory**  
Introduction to Air Force customs and courtesies, drill and ceremonies, and military structure. May be repeated. F, S

**211 Evolution of USAF Air and Space Power I**  
Introduction to Air Force heritage and leaders, Air Force concepts, ethics and values, leadership, and the application of both oral and written communication skills. Course content covers air power history from 1783-1960. F

**212 Evolution of USAF Air and Space Power II**  
Continuation of AS 211, includes an introduction to Air Force heritage and leaders, Air Force concepts, ethics and values, leadership, and the application of both oral and written communication skills. Prepares cadets for Field Training. Course content covers air power history from 1960 to the intermediate future. S

**321 Air Force Leadership/Management I**  
Introduction to leadership and management within the USAF, in both theory and practical application emphasizing communication skills (in both oral and written Air Force formats) and interpersonal skills. F

**322 Air Force Leadership/Management II**  
Study of leadership from the military perspective emphasizing situational leadership and contemporary issues including change management and professional ethics. Case studies are used to illustrate leadership concepts. Officer professional development topics are discussed. S

**410 Leadership Laboratory**  
Development of leadership skills in a practical, supervised laboratory. Students must instruct, supervise, and lead junior cadets participating in AS 210, and perform high-level management functions with the cadet corps organization. May be repeated. F, S

**441 Preparation for Active Duty I**  
A study of the national security process, regional studies, advanced leadership ethics and Air Force doctrine. Topics include the military as a profession, officership, military justice, civilian control of the military, and current issues. Application of communication skills is included. F

**442 Preparation for Active Duty II**  
A continuation of AS 441. Topics include the military as a profession, officership, military justice, civilian control of the military, and current issues. Continued application of communication skills and preparation for a new officer's first active duty assignment. S
AGRICULTURAL AND BIOSYSTEMS ENGINEERING (ABEN)

Backer, Chair; Bon, Bora, Jia, Lin, Panigrahi, Pryor, Solseng, Steele, Wiesenborn

COURSES

110 Introduction to Agricultural and Biosystems Engineering 2
Introduction to the agricultural and biosystems engineering profession with emphasis on engineering problem solving. 2 lectures. F

189 Skills for Academic Success 1
See University Interdisciplinary Studies for description.

255 Computer-Aided Analysis and Design 3
Application and use of software for engineering design, analysis, and graphical communication. 2 one-hour-and-15-minute laboratories. F

263 Biological Materials Processing 3
Processing equipment design and physical properties of biological materials that influence their harvesting, handling, processing, storage, marketing, and quality evaluation. 2 lectures, 1 three-hour laboratory. Prereq: ABEN 255. S

358 Electric Energy Application in Agriculture 3
Electrical distribution/services. Electrical control units, solid state and digital electronics, electromagnetic sensors, and sensing techniques with applications to food, agricultural, and biological systems. 2 lectures, 1 three-hour laboratory. Prereq: PHYS 252. F

377 Numerical Modeling in Agricultural and Biosystems Engineering 3
Numerical modeling using finite element and other techniques. Engineering applications include modeling of stress/strain, heat, and mass transfer in physical, natural resource, and biological systems such as grain and food products. 3 lectures. Prereq: MATH 266, ME 223. S

383 Structural Design for Biosystems 3
Study of framing systems, building materials, and load requirements. Analysis and design of structures for biosystems. 3 lectures. Prereq: ME 223. F

444/644 Transport Processes 3
Energy and mass transport principles applied to biological and environmental systems. Prereq: MATH 266 and CE 309 or ME 352. S

450/650 Bioprocess Engineering 3
Application of biological, biochemical, and engineering fundamentals for industrial bioprocessing. Topics include bioprocessing kinetics (enzymes, cell growth, substrate utilization, and product formation); bioenergetics; bioreactor selection and scale-up; and product recovery. Prereq: ABEN 263 and MATH 166.

452/652 Bioenvironmental Systems Design 3
Study of psychrometrics, heat and mass transfer, and physiological requirements for livestock and bioproducts. Design of environmental modifications, livestock wastes and control systems. 3 lectures. Prereq: CE 309, ME 350. F

456/656 Biobased Energy 3
Topics to be addressed include: benefits and limitations of biobased energy development; resource potential; biomass production, harvest, storage, and transportation issues; and conversion technologies (e.g. combustion, pyrolysis, gasification, starch and cellulosic ethanol production; biodiesel production; and anaerobic digestion). Prereq: Junior standing in science or engineering.

458/658 Food Process Engineering 3
Analysis and design of food processing equipment and plants. Emphasis is on application of fluid flow, thermodynamics, and heat and mass transfer principles. 3 lectures. Prereq: Junior standing. F

464/664 Resource Conservation and Irrigation Engineering 4
Engineering principles and design of systems for soil and water resource management and environmental protection. 3 lectures, 1 three-hour laboratory. Prereq: CE 309. S

473/673 Agricultural Power 3
Theory, analysis, and testing of internal combustion engines, traction, power trains, hydraulic systems, vehicle dynamics, stability, and ergonomics in tractor design. Electrical power units including motors. Alternative energy systems. 2 lectures, 1 three-hour laboratory. Prereq: ME 350. F

478/678 Machinery Analysis and Design 3
Principles of design, development, and testing of agricultural machines and machine systems. Applications of computer aided design and FMEA. 3 lectures. Prereq: ME 223. S

479/679 Fluid Power Systems Design 3
See Mechanical Engineering for description.

482/682 Instrumentation and Measurements 3
Application of instrumentation and sensor concepts to measurement and control of environmental, biological, and mechanical parameters. Includes sensor principles, signal conditioning, data collection, and data analysis methods. 2 lectures, 1 three-hour laboratory. Prereq: ME 223, PHYS 252. S

484/684 Drainage and Wetland Engineering 3
Drainage and wetland engineering principles, design, and water quality for agricultural and natural resources applications. Topics include soil, water, and plant relationships, water movement in soils, water quality (nitrogen and salinity), surface drainage, subsurface drainage and its modeling, and wetlands. Prereq: ABEN 464 or CE 309 or ASM/NRM 264 or MATH 266 or SOIL 210 or SOIL 433.

486 Design Project I 2
Capstone learning experience involving principles of design, project management, and evaluation. Student teams define a capstone project in their area of interest. 1 lecture/laboratory. Prereq: Senior standing. F

487 Design Project II 2
Continuation and completion of the capstone learning experience begun in ABEN 486. Communication in oral, written, and graphic forms is emphasized. 2 lectures/laboratories. Prereq: ABEN 486. S

747 Numerical Modeling of Environmental and Biological Systems 3
Numerical methods of systems analysis will be taught through real-world case studies. Topics covered include simplification and mathematical description of real systems; the finite-difference methods for solving differential equations; and parameter estimation sensitivity analysis, and uncertainty analysis methods.
758 Applied Computer Imaging and Sensing for Biosystems 3
Sensors and non-destructive sensing principles (e.g., computer vision, spectroscopy, imaging, fiber optic sensing) for bioproduction and processing applications. Data/signal acquisition, signal conditioning/analysis techniques, signal interpretation, and pattern recognition using statistical, neural networks, and fuzzy logic techniques.

763 Theory of Drying Biological Products 3
Theory used to describe the drying processes of biological products. 3 lectures. F

765 Small Watershed Hydrology and Modeling 3

773 Advanced Agricultural Power and Machinery 3
Theory and design of agricultural power units and field machines. 3 lectures. Prereq: ABEN 473/673. F

783 Advanced Structures and Environmental Systems 3
Detailed analysis of building components and advanced design problems relating to agricultural and environmental systems. 3 lectures. Prereq: ABEN 383. S
**AGRICULTURAL ECONOMICS (AGEC)**

### COURSES

**220 World Agricultural Development (CCN)**

Introduction to theories, policies, and practices to increase food production and agricultural development in developing countries. 2 lectures. Prereq: ECON 201. (ND SS)

**242 Intro to Agricultural Management (CCN)**

Economic and managerial concepts related to farm or agribusiness production process, development of cost data, enterprise analysis, organization and management of production inputs. 3 lectures, 1 laboratory.

**244 Agricultural Marketing (CCN)**

Study of the agricultural marketing system to include cash marketing, commodity futures trading, branded products merchandising and the interrelationship of the government and international trade. 3 lectures.

**246 Introduction to Agricultural Finance I (CCN)**

Introduction to agricultural finance; provides background in farm and agribusiness credit use and evaluation. Discussion of specific financial conditions on farms and in agribusiness. 3 lectures, 1 laboratory.

**339 Quantitative Methods and Decision Making**

Application of basic probability concepts to decision analysis, introduction to linear programming models, and decision-tree analysis. 3 lectures. Prereq: ECON 201 and MATH 146.

**342 Farm and Agribusiness Management II**

Application of production economics principles to farm and agribusiness operations. Economic input-output principles and profit maximization. 3 lectures. Prereq: AGEC 242.

**344 Agriculture Price Analysis**

Introduction to price analysis in agricultural markets. 3 lectures. Prereq: AGEC 244.

**346 Applied Risk Analysis**

Development of tools to analyze business and financial risk problems unique to farms and agribusinesses. 3 lectures. Prereq: STAT 330.

**347 Principles of Real Estate**

Principles and techniques of real estate appraisals, practical application of appraisal principles, and techniques to real property evaluation. 3 lectures. Prereq: ECON 201. Cross-listed with BUSN.

**350 AgriSales**

The principles of salesmanship applied to the agricultural business. Topics include attitudes and value systems, basic behavioral patterns, relationship of sales to marketing, selling strategies, preparing for sales calls, making sales presentations, and closing sales. 3 lectures.

**360 International Agribusiness Experience**

Provides students an applied context for analyzing international agribusiness. Students participate in a self- or pre-arranged experience and research an agribusiness topic in depth prior to and while studying in a foreign country.

**374 Cooperatives**

Theory, practice, and evaluation of cooperatives including principles, management, marketing, finance, taxes, legal issues, and adjusting to change. 2 lectures. Prereq: ECON 201. Cross-listed with BUSN.

**375 Applied Agricultural Law (CCN)**

Study of laws affecting agriculture and agribusiness including property ownership, financial relations, and environmental regulation. 3 lectures.

**378 Introduction to Transportation and Logistics**

Presents the role and importance of transportation, with detailed discussion of the various modes and their specific characteristics. Covers basic logistics concepts in addition to transportation, including inventory, warehousing, and location decisions. Prereq: ECON 201.

**420 Integrated Farm and Ranch Management**

Intended for persons who will advise or manage farm and ranch operations. Application of all phases of management (including marketing, finance) to crop and livestock production practice. 2 lectures, 1 laboratory. Prereq: AGEC 242, 244, or 246.

**444/644 Crops Marketing**

Capstone course for commodity marketing option. Advanced work on topics related to marketing of crops. 2 lectures. Prereq: AGEC 344. Coreq: AGEC 339.

**445 Agribusiness Industrial Strategy**

The course integrates industrial organization topics with specific applications to agribusiness strategy problems. Focus is on industry analysis and issues in competition, strategy, and rivalry from an agribusiness perspective. Prereq: AGEC 344. Coreq: AGEC 339.

**446/646 Agribusiness Finance**

Application of financial theory to investment and liability management problems of agribusiness and farm firms. Characteristics, operations, and management of agricultural financial institutions. 3 lectures. Prereq: AGEC 339, 546.

**450 National AgriMarketing Association (NAMA) I**

Learn the components of an agribusiness marketing plan and apply this knowledge in the development of a marketing plan for a selected product. 1 lecture.

**451 National AgriMarketing Assoc (NAMA) II**

Review the components of an agribusiness marketing plan. Work in teams to prepare written and oral marketing plans for the National NAMA student chapter competition in April. 2 lectures.

**452/652 Food Laws and Regulations**

See Food Safety for description.

**472 Advanced Logistical Analysis**

Presents major analytical tools and methods used in analyzing logistical strategies. Course emphasis is on application of analytical tools used in quantifying logistical problems by manufacturing, trading, and shipping firms. Prereq: AGEC 378 and AGEC 339 or MGMT 360.

</table>
AGRICULTURAL SYSTEMS MANAGEMENT (ASM)
Backer, Chair; Bon, Bora, Jia, Lin, Pryor, Solseng, Steele, Wiesenborn

COURSES

115 Fundamentals of Agricultural Systems Management (CCN) 3
Overview of agricultural systems management; engines, machinery, structures, electricity, processing, and conservation. 3 lectures. Coreq: MATH 103, 104, or 107.

125 Fabrication and Construction Technology (CCN) 3
Introduction to materials, methods, and tools used in fabrication, installation, and maintenance of agricultural production and processing facilities. 2 lectures, 1 three-hour laboratory.

225 Computer Applications in Agricultural Systems Management (CCN) 3
Application and use of software for problem solving, reporting, and graphical communication. 2 one-hour and 15 minute laboratories. Prereq: CSCI 114 or 116, MATH 105, 107, or 146.

264 Natural Resource Management Systems (CCN) 3
General principles of management of natural resource systems including hydrology, soil erosion, irrigation, drainage, and water quality. 2 lectures, 1 three-hour laboratory. Prereq: MATH 103, 104, or 107. Cross-listed with NRM.

323 Post-Harvest Technology 3
Principles and management of crop and feed storage, handling, drying, processing, and crop/feed systems siting, planning, and development. 3 lectures. Prereq: MATH 103, 104, or 107.

354 Electricity and Electronic Applications (CCN) 3
Fundamentals and applications of electricity, power distribution, controls, motors, and solid-state electronics. For non-engineering majors. 2 lectures, 1 three-hour laboratory. Prereq: Junior standing, MATH 103, 104, or 107.

368 Structures and Environment Systems 3
Study of environmental needs of animals and bioproducts, control of building environments, construction materials, framing systems, and functional planning for biosystem structures. 3 lectures. Prereq: MATH 103, 104, or 107.

373 Tractors and Power Units (CCN) 3
Theory and principles of operation, use, maintenance, repair, and selection of tractors and power systems. Includes engines, transmissions, fuel, lubrication, hydraulics, traction, and electrical systems. 3 lectures. Prereq: MATH 103, 104, or 107.

374 Power Units Laboratory (CCN) 1
Laboratory to complement concepts introduced in ASM 373. Topics include engine systems, operation, adjustment, maintenance, repair, measurement, and testing. 1 three-hour laboratory. Prereq: MATH 103, 104, or 107.

378 Machinery Principles and Management (CCN) 3
Principles of agricultural machinery manufacture, sales, operation, and management. Topics include selection, replacement, operation, application, and maintenance. 2 lectures, 1 three-hour laboratory. Prereq: MATH 103, 104, or 107.

379 Hydraulic Power Principles and Applications 3
Study of fluid power principles, components, schematics, and systems. Emphasis is on proper use, maintenance, and applications of hydraulic power equipment. Prereq: PHYS 211, Junior standing.

454/654 Principles and Application of Precision Agriculture 3
Principles and application of precision agriculture including yield monitoring systems, variable rate technology, GIS, GPS, sensors, auto guidance, data acquisition and management, mapping and equipment management. 2 lectures, 1 three-hour laboratory. Prereq: MATH 103, 104, or 107.

468 Golf Course Irrigation I 2
See Plant Sciences for description.

469 Golf Course Irrigation II 1
See Plant Sciences for description.

475/675 Management of Agricultural Systems 2
Capstone learning experience involving team solution to problems in agricultural systems management. Oral and written communications are emphasized. 2 lectures. Prereq: Senior standing.

### ANIMAL SCIENCE (ANSC) [ARSC]

Lardy, Head; Bauer, Eric Berg, Erika Berg, P. Berg, Berryhill, Buchanan, Caron, Colville, Danielson, Eck, Grazul-Bilska, Hammer, Maddock, Maddock-Carlin, Newman, Park, Redmer, Reynolds, Schroeder, Stoltenow, Swanson, Vonnahme, Wagner, Williams

#### COURSES

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Title</th>
<th>Credits</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>114</td>
<td>Introduction to Animal Sciences (CCN)</td>
<td>3</td>
<td>General principles of the livestock industry and relationships to mankind. 2 lectures, 1 two-hour laboratory.</td>
</tr>
<tr>
<td>123</td>
<td>Feeds and Feeding (CCN)</td>
<td>3</td>
<td>Principles of feeding livestock including digestive systems, nutrient requirements, nutrient characteristics, and sources utilized in the formulation of balanced rations. 2 lectures, 1 two-hour laboratory.</td>
</tr>
<tr>
<td>210</td>
<td>Introduction to Therapeutic Horsemanship</td>
<td>3</td>
<td>This course will introduce students to perspectives of disabilities, how equine assisted activities may affect individuals with specific disabilities, how to select appropriate horses and adaptive equipment, and will include discussion on the history and current discipline of therapeutic horsemanship and related fields.</td>
</tr>
<tr>
<td>220</td>
<td>Livestock Production (CCN)</td>
<td>3</td>
<td>General production and management of major meat and dairy animal species. Topics include production systems, feeding, facilities, health, economics, and marketing. 2 lectures, 1 two-hour laboratory.</td>
</tr>
<tr>
<td>222</td>
<td>Meat Animal Evaluation (CCN)</td>
<td>2</td>
<td>Relationship between live animal composition and meat product values. Introduction to basic muscle biology and effects of livestock practices on meat quality. 2 two-hour laboratories.</td>
</tr>
<tr>
<td>260</td>
<td>Introduction to Equine Studies (CCN)</td>
<td>2</td>
<td>Introduction to basic aspects of equine studies and general principles surrounding the horse industry. 2 one-hour lectures.</td>
</tr>
<tr>
<td>260L</td>
<td>Equine Care and Management Practicum (CCN)</td>
<td>1</td>
<td>A laboratory course designed to supplement lecture material covered in ANSC 260. Students will learn management and husbandry skills relevant to modern horse care practices. 1 two-hour laboratory.</td>
</tr>
<tr>
<td>261</td>
<td>Basic Equitation and Horsemanship</td>
<td>1</td>
<td>Basic grooming, saddling, bridling, mounting, ground work, correct riding position and proper coordination of the riding aids will be addressed. Horse behavior will also be discussed throughout the course. 1 two-hour laboratory. Lab fee required. Enrollment priority will be given to Equine Studies Major/Minor/Certificate students.</td>
</tr>
<tr>
<td>263</td>
<td>Introduction to Animal Biotechnology</td>
<td>3</td>
<td>Basic aspects of animal biotechnology, biotechnology in health, biotechnology in reproduction, biotechniques. 3 lectures. Prereq: BIOL 126 or 150.</td>
</tr>
<tr>
<td>310</td>
<td>Principles of Therapeutic Horsemanship Instruction</td>
<td>3</td>
<td>This course is focused on theoretical knowledge and application of therapeutic horsemanship instruction through experiential learning and teaching techniques of peers, and includes evaluation and training techniques for therapy horses, lesson plan development, and critical reviews of the literature. Prereq: ANSC 210, 261.</td>
</tr>
<tr>
<td>320</td>
<td>Dairy Cattle Selection</td>
<td>1-2</td>
<td>Visual appraisal, selection, and evaluation of dairy cattle. Type classification of dairy cattle. 2 three-hour laboratories. May be repeated.</td>
</tr>
<tr>
<td>323</td>
<td>Fundamentals of Nutrition</td>
<td>3</td>
<td>Fundamentals of nutrition emphasizing digestion, metabolism, function, requirements, and sources of specific nutrients. 3 lectures. Prereq: ANSC 123, BIOC 260.</td>
</tr>
<tr>
<td>330</td>
<td>Meat Selection, Grading, and Judging</td>
<td>1-2</td>
<td>Evaluation and grading of carcasses and wholesale cuts of beef, pork, and lamb. Written explanation of decisions and comparisons. 2 three-hour laboratories. May be repeated. Prereq: ANSC 222.</td>
</tr>
<tr>
<td>331</td>
<td>Livestock Selection (CCN)</td>
<td>1-2</td>
<td>Visual and performance evaluation of breeding and slaughter classes of the major meat producing livestock. 2-3 three-hour laboratories. May be repeated. Prereq: ANSC 222.</td>
</tr>
<tr>
<td>340</td>
<td>Meat Science and Technology</td>
<td>3</td>
<td>Introduction to meat science. Chemical, physical, and structural properties of meat and meat products. Identification, nutritive analysis, preservation, cooking, and packaging technology. 2 lectures, 1 two-hour laboratory. Prereq: CHEM 260.</td>
</tr>
<tr>
<td>344</td>

<td>Intermediate Horsemanship</td>
<td>1</td>
<td>A continuation of ANSC 261. Further emphasis will be places on development of the balanced seat and coordinated aids necessary to complete more advanced maneuvers. 1 two-hour laboratory. Lab fee required. Enrollment priority will be given to Equine Studies Major/Minor/Certificate students. Prereq: ANSC 261.</td>
</tr>
<tr>
<td>362</td>
<td>Colts in Training</td>
<td>2</td>
<td>Principles and application of techniques required to train a young horse to ride. Three two-hour laboratories. Enrollment priority will be given to equine studies major/minor students. Lab fee required. Recommended prereq: ANSC 261, 361.</td>
</tr>
</tbody>
</table>
364 Equine Anatomy and Physiology 3
This course focuses on a practical understanding of equine anatomy and physiology as they relate to management, conditioning, and reproduction. Prereq: VETS 135.

365 Equine Evaluation 2
Detailed study of horse conformation, selection criteria, and judging standards for equine competitions. Emphasis will be placed on critical thinking, decision making, and oral presentation skills. 2 three-hour laboratories. May be repeated. Prereq: ANSC 210, 310.

375 Methods of Horsemanship Instruction 2
In this experiential learning course, students will study methods of instruction, lesson plan development, and demonstrate integration of their knowledge through practical teaching situations, both mounted and unmounted. Prereq: ANSC 361. F (even years)

410 Therapeutic Horsemanship Teaching Practicum 1
In this practical teaching course, students will team teach for 6 to 12 weeks with a North American Riding for the Handicapped Association (NARHA) certified instructor at a local therapeutic program, assisting with lesson plan and program plan development, mounting and dismounting of riders, as well as instruction and evaluation of riders. Prereq: ANSC 210, 310.

435/635 Nutrition Laboratory Techniques 3
Theory and basic laboratory techniques associated with nutritional research and current information regarding advanced techniques and developments. 2 lectures, laboratory by arrangement. Prereq: CHEM 260. F (even years)

461 Advanced Horsemanship and Equitation 1
This course is designed to further the skills obtained in ANSC 361. Riders will be exposed to advanced technical and theoretical knowledge of Western and Hunt seat equitation and horsemanship. More intensive study and development of the skills required for advanced maneuvers will be covered. 1 two-hour laboratory. Lab fee required. Enrollment priority will be given to Equine Studies Major/Minor/Certificate students. Prereq: ANSC 361.

463/663 Physiology of Reproduction 3
Comparative anatomy, physiology, and endocrinology of reproduction in mammals. Cross-listed with ZOO.

463L/663L Physiology of Reproduction Laboratory 1
Anatomy, physiology and demonstration and utilization of techniques in large animal reproductive management. Cross-listed with ZOO. Prereq: ANSC 463.

464 Reproductive Management Procedures 2
Demonstration and utilization of the new technology in large animal reproductive management including embryo and semen collection, pregnancy diagnosis, and estrous control. 1 lecture, 1 three-hour laboratory. Prereq: ANSC 463. F

466 Principles of Feed Production 2
This course is a comprehensive introduction to feed production technology; the science of feeds, feeding, feed additives and feed optimization; and management and legal aspects in providing quality livestock, poultry, aquatic and companion animal feeds. Prereq: ANSC 123.

470 Applied Nutrition 4
Application of nutrition principles in feed management systems for livestock with emphasis on energy and protein (ruminants) and energy and amino acids (non-ruminants). 4 lectures. Prereq: ANSC 323.

480 Equine Industry and Production Systems 3
A capstone course that incorporates genetics, nutrition, exercise physiology, reproduction, health care, and industry practices into management of the equine enterprise. 2 lectures, 1 two-hour laboratory. Prereq: ANSC 360, 364. F

482 Sheep Industry and Production Systems 2
Capstone course to include the management, systems, selection, record keeping, merchandising, and production testing of sheep. 3 lectures, 1 two-hour laboratory. Prereq: ANSC 220, 357, 463, 470 and RNG 336. Half semester.

484 Swine Industry and Production Systems 2
Capstone course includes breeding systems, disease control, applied economics, housing, marketing, and nutrition in a systems approach. 3 lectures, 1 two-hour laboratory. Prereq: ANSC 220, 357, 463, 470. Half semester.

486 Beef Industry and Production Systems 2
Capstone course includes the management, systems, selection, record keeping, merchandising, and production testing of beef. 3 lectures, 1 two-hour laboratory. Prereq: ANSC 220, 357, 463, 470 and RNG 336. Half semester.

488 Dairy Industry and Production Systems 2
Capstone course includes the management, selection, record keeping, merchandising, and production testing of dairy and dairy products. 2 lectures, 1 two-hour laboratory. Prereq: ANSC 220, 357, 463, 470. Half semester.

721 Biology of Lactation 2
Mammary gland development and mechanisms controlling lactation. 2 lectures. Prereq: BIOC 460.

728 Advanced Reproductive Biology 3
Discussion of reproductive physiology research with emphasis on current topics in cellular and molecular biology. 3 lectures. Prereq: ANSC 463, BIOC 460. S (odd years)

730 Growth Biology 3
Regulation of growth at the cell/tissue, organ system, and whole animal levels. 3 lectures. Prereq: ANSC 463, BIOC 460. Cross-listed with BIOL. S (even years)

736 Experimental Nutrition Methods 1
Design, conductance, analysis, and reporting of experiments taken in conjunction with ANSC 773, 774, 775, or 776. Prereq: ANSC 470, BIOC 460.

740 Data Analyses and Designs of Experiments 3
Experimental design principles, introductory statistical theory, and commonly used data analyses of animal and range science data are taught and practiced with practical applications using the computer. 3 lectures. Prereq: STAT 725.

755 Advanced Meat Science 3
An in-depth investigation of the physical and biochemical characteristics of muscle and meat. Students will gain an understanding of advanced meat science topics, and improve their ability to design, conduct, interpret and report meat science research. Prereq: ANSC 340, BIOC 460. (even years)
773 Energy Metabolism 3
Methods of measuring energy values and the metabolic processes involved in the production of useful biological energy from organic compounds. 3 lectures. Prereq: ANSC 470, BIOC 701. F (odd years)

774 Nitrogen Metabolism 3
Detailed overview of nitrogenous compounds including metabolism and function. Considerable emphasis on current research from the literature. 3 lectures. Prereq: ANSC 470, BIOC 701. S (even years)

775 Vitamins and Minerals 3
Metabolism of vitamins and minerals and their application in animal nutrition and the feed industry. 3 lectures. Prereq: ANSC 470, BIOC 701. F (even years)

776 Digestive Physiology 3
Investigation of digestive and absorptive events occurring within farm animals. Emphasis on enzyme action, nutrient transport, gut motility, gastro-intestinal endocrinology, and current research. 3 lectures. Prereq: ANSC 470, BIOC 701. F (odd years)
ANTHROPOLOGY (ANTH)

Klenow, Chair: Clark, Gill-Robinson, Kitch, Kloberdanz, Riley, Sather-Wagstaff

COURSES

111 Introduction to Anthropology (CCN) 3
Introductory overview of the major divisions of anthropology: cultural and physical anthropology, archaeology, and linguistics. (ND:SS)

204 Archaeology and Prehistory 3
Introduction to archaeological methods, followed by a survey of world prehistory.

205 Human Origins 3
Examination of the evolution of humans through the investigation of fundamental principles of evolution, human variation, comparative primate behavior, and the fossil record.

206 Peoples of the World 3
General survey of cultural anthropology and cultures of various regions of the world.

208 Folklore and Culture 3
Examination of folk traditions (oral, customary, and material) within their cultural context.

209 Introduction to Linguistics 3
See English for description.

432/632 Human Osteology 3
The analysis of human bones. Areas of study include skeletal anatomy, human biological individualization and interpretation of archaeological and paleontological skeletal material. Prereq: ANTH 111, 204, 205.

433/633 Apes and Human Evolution 3
A laboratory-oriented survey of living primates describing and comparing the diverse behavioral and morphological adaptations of great apes in a human evolutionary context. Prereq: ANTH 111, 204, 205.

441/641 Death and Dying 3
Cross-listed with Sociology. See Sociology for course description.

444/644 Peoples of the Pacific Islands 3
General survey of cultures, past and present, in Melanesia, Polynesia, and Micronesia.

446/646 Current Problems in Paleoanthropology 3
This course is a critical inquiry and survey of biological anthropology. It allows students to construct our ancestors’ past using evidence from paleoanthropology, archeology, geology, ecology, zoology, and comparative primate morphology. Prereq: ANTH 111, 204, 205.

450/650 Qualitative Methods in Cultural Anthropology 3
Focuses on qualitative research methods utilized in cultural anthropology and other social sciences. Instruction and application of ethnographic, discourse-centered, visual anthropology, interview/focus group, extended case study, and other qualitative survey methods and forms of analysis. Covers the ethics of human participant research with training and Institutional Review Board applications. Prereq: ANTH 111 and junior or senior standing.

452/652 North American Indians 3
General survey of native North American Indian cultures. Focuses on cultural systems as anthropologists have reconstructed them for the pre-contact period.

453/653 Magic and Religion 3
Comparative religion, religious concepts, practices, and practitioners. In-depth study of selected religious systems with a focus on shamanic religions. Prereq: ANTH 111. Cross-listed with RELS.

458/658 Indians of the Plains 3
Ethnographic/ethno-historical survey of major Indian tribes in the Great American Plains region from ancient times to the present.

461/661 Germans from Russia 3
Study of the cultural and historical background of an important ethnic group in the Great American Plains region – German-speaking people from Russia.

462/662 Cultural Ecology 3
Analysis of the systematic relationship between human populations and their ecological surroundings. Prereq: Any ANTH course.

464/664 Disaster and Culture 3
Examines human-made and natural disasters through cross-cultural and historical perspectives. Addresses cultural variation across and within relevant communities including those of disaster victims, emergency management systems, and a broad public. Prereq: Junior or Senior standing. Cross-listed with EMGT.

465/665 Web-based Media in Anthropology 3
This course focuses on the use of modern computer imaging techniques within an anthropology research context. Topics to be covered include: visual anthropology, cultural preservation, data protection, ethics, web 3-D, digital video, web-design and Internet dissemination.

480/680 Development of Anthropological Theory 3
Focus on major theoretical orientations in anthropology. Emphasis on the ways in which anthropological theories are used to generate explanations for multicultural phenomena. Prereq: ANTH 111.

489 Senior Capstone in Anthropology 1
Synthesis of social research methods, anthropological theory, and sub-discipline content material. Emphasis on integrative skills needed to interrelate the basic concepts of the discipline. Prereq: Senior standing.

705 Forensic Anthropology 3
Theory and methods in the recovery, identification, and evaluation of human skeletal remains for criminal investigation purposes.

**APPAREL, DESIGN AND HOSPITALITY MANAGEMENT (ADHM) [ADFH]**

Bastow-Shoop, Head; Braaten, Hirani, Jha, Lee, Manikowske, Phillips, Ragan, Ray-Degges, Richardson, Sunderlin, Wilkening, Wolfe

**Introduction to basic apparel assembly methods and use of a sewing machine.**

**Overview of the hospitality industry; its history, components, career opportunities, development, and future trends with application to food service, lodging, and travel.**

**Application of management principles and techniques to the tourism and resort industry with emphasis on tourism components, recreational activities, and impact of the travel and tourism industry.**

**Study of the elements and principles of design. Coreq: Interior Design major or minor, ADHM 151. F, S**

**Study and application of elements and principles of design; two- and three-dimensional applications. Prereq: Interior Design major. Coreq: ADHM 150. F, S**

**Principles of apparel construction and analysis. Construction of a fitting sloper and two fashion garments. Prereq: ADHM 101. F**

**Survey of the interior design profession and the relationship to allied professionals and organizations. Coreq: Interior Design major, ADHM 150, 151. F**

**Fundamentals of building construction, materials, and methods for residential construction. Technical and graphic communication for interior design documentation, with an emphasis placed on lettering, sketching and drafting. Prereq: ADHM 150, 151. F**

**Fundamentals of building construction, materials, and methods for commercial construction. Technical and graphic communication for interior design documentation, with an emphasis placed on lettering, sketching and drafting. Prereq: ADHM 150, 151, 161 and Interior Design majors and minors only. S**

**Introductory course tracing the development of fashion and its industry that includes consumer demand and fashion trends and change; the development, production, and marketing of goods from concept to consumer and their interrelationships. F**

**Analysis of aesthetics and its application to apparel and textile products, environment, and oneself. Prereq or Coreq: ADHM 150. S**

**Basic financial hospitality accounting concepts and practices. Interpretation of accounting and financial control systems in management decision making; uniform system of accounts, departmentalized costing procedures; ratio analysis; budgeting, financial statement analysis, and interpretation. Prereq: ACCT 102, ADHM 140, 141. F, S**

**Application of design theory and process to analyze residential environments. Emphasis on programming, schematics, design development, and construction documentation. Prereq: Minimum of 3.00 cumulative GPA, ADHM 160, 161 with a grade of C or higher in all prereq courses. Coreq: ADHM 250, 261, 263, 264. F**

**Application of design theory and process to analyze office environments. Emphasis on programming, schematics, design development, human factors, and construction documentation of business environments. Prereq: Minimum of 3.00 cumulative GPA, ADHM 250, 251, 261, 264 with a grade of C or higher in all prereq courses. Coreq: ADHM 254. S**

**Application of design theory and process to analyze small commercial environments. Emphasis on programming, schematics, design development, and construction documentation. Prereq: ADHM 250, 251, 261, 264 with a grade of C or higher in all prereq courses. Coreq: ADHM 253. S**

**Principles and methods of drawing and sketching, including perspective, with an emphasis on a variety of rendering techniques and media. Prereq: Cumulative 3.00 GPA, ADHM 162 with a grade of C or higher in all prereq courses. Coreq: ADHM 250, 251, 264 and Interior Design majors only. F**

**Introduction of basic principles of lighting design and interior systems in residential applications. Prereq: 160, 161. Coreq: ADHM 250, 251, 261, 263. F**

**Principles, procedures, and sources of information essential for marketing and promoting retail merchandise sales. Experience in planning, executing, and evaluating promotion plans. Prereq: ADHM 150. S**

**Examination of issues and management strategies necessary to produce a competitively priced product. Understanding the role of technology in design, production, and marketing/sales of products. Prereq: ADHM 171, 181. S**
280 Introduction to Facility Management 3
Introduction to the fundamental concepts involved in the planning, design, delivery, occupancy, management, financing and disposal of commercial facilities. F

300 Design Resource Management 1-3
Management of resources used by interior designers, including references, product information, and material samples. May be completed/repeated up to 3 credits. Prereq: ADHM 250, 251. F, S

310 History of Fashion 3
Historic view of the evolution of fashion in the Western world through time as it relates to political/sociological/economic change. F

315 History of Interiors I 3
Survey of historical interiors and furnishings beginning with antiquity through the 1800’s. F

316 History of Interiors II 3
Survey of historical and contemporary interiors and furnishings beginning with the 1800’s to the present day. S

351 Interior Design Studio IV: Advanced Residential 3
Application of design components to an advanced residential project with emphasis on special populations and design focus. Prereq: Interior Design major. Prereq: ADHM 254 with a grade of C or higher in all prereq courses. Coreq: ADHM 362, 363, F

353 Interior Design Studio V: Large Scale Contract Design 3
Application of design components to a large scale commercial project with emphasis on systems furniture, interior codes, and building systems. Prereq: ADHM 351, 362, 363, 365, 366, 367 with a grade of C or higher in all prereq courses. Coreq: ADHM 368, 460. S

355 Flat Pattern Design and Draping 3
Developing original patterns through flat pattern design and draping for individual and commercial applications. Prereq: ADHM 155. S

356 Pattern Drafting and Grading 3
Individual and commercial apparel patterns are created with the pattern drafting method. Grading, a system of making a range of sizes for a master pattern, is examined. Prereq: ADHM 155. S

360 Front Office Management 3
Front office procedures; reservations, selling strategies, handling guest inquiries, and night audit functions. Computer application is highlighted. Prereq: ADHM 140, 141. S

362 Codes for Interiors 3
Health and safety issues in interior design. Includes codes, regulations, and universal design. Coreq: ADHM 351, 363, 365, 366, 367 with a grade of C or higher in all courses. F

363 Commercial Lighting Design and Building Systems 3
Integration of theory, techniques, and the art of lighting design with emphasis on commercial applications. Analysis of commercial building systems. Prereq: Interior Design major. Coreq: ADHM 351, 365, 366, 367. F

365 CADD for Interiors 3
Computer-aided design and drafting, emphasizing applications in interior design. Includes drawing creation, editing, layers, blocks, and attributes. Introduction to 3-D. May be repeated. Prereq: ADHM 253. F, S, Su

366 Textiles 3

367 Textiles Laboratory 1

368 Interior Materials and Maintenance 3
Examine the characteristics, applications, installation procedures, estimating, specifications, and maintenance of materials used in commercial interior spaces. Prereq: ADHM 253, 366, or 367. S

370 Sewn-Product Manufacturing and Analysis 3
Analysis of the sewn-product manufacturing processes, governmental regulations, sourcing, and technology applications. Focus on evaluating products’ quality, performance, and cost. Prereq: ADHM 366 or 367. S

372 Global Retailing 3
Theoretical approach to management practices and marketing policies for retail soft goods in a complex and changing world market. Prereq: 2.5 cumulative GPA, junior standing and MRKT 320, 362, or ADHM 171. Cross-listed with BUSN. F

381 Hospitality Marketing and Sales 3
Basic marketing theory and contemporary practice as adapted to the hospitality industry. Emphasis on consumer behavior, market opportunities, marketing research and strategies, and marketing plans. Prereq: ADHM 140, 141, MRKT 320. S

384 Beverage Operations 3
Identification and evaluation of beverages served in hospitality establishments with a focus on making quality decisions. Beverages presented will include alcohol (spirits, wines, liqueurs, and beer), coffee, tea, soft drinks, and mineral waters. Prereq: ADHM 140, 141. F

385 Global Fashion Economics 3
Study of factors affecting production, distribution, and consumption of products in domestic and foreign textile and apparel industries. Prereq: Junior standing, ECON 105, 201, or 202. F

401 Convention and Meeting Planning 3
The roles and responsibilities of professional meeting planners are examined. Planning or hosting a convention or meeting for a corporation, association, or special group. Emphasis on audio/visual equipment, room layout, and special requests. Prereq: ADHM 140 or 141 and junior standing. S

402 Professional Catering Management 3
Study and application of advanced operational managerial principles of food service management for on- or off-premise catering and special events. Prereq: HNES 141, 261, 261L. F
403 Resort and Spa Operations 3
Analysis of the resort concept; history, master planning, environmental impact, facility design, and operational management. Emergence of spa operations and treatments as part of resort amenities. Prereq: ADHM 140 or 141. F

404 Restaurant Operations Management 3
Creative experiences with regional and international foods appropriate for fine dining. Application of management principles in food preparation and service. Emphasis on ethnic foods, cultural foods, and other implications for fine dining management. Prereq: HNES 141, 261, 261L. S

405 Casino Operations 3
Methods, procedures, and ethical principles utilized in managing a casino operation. Gaming regulations and taxes, mathematics of casino games, casino management, and marketing are addressed. Prereq: Junior standing. F

410 Dress in World Cultures 3
Analysis of world dress as related to cultural, technological, aesthetic, and social patterns. Concepts illustrated through comparative studies of selected world cultures. F, S

411 Food and World Cultures 3
An integrated approach to the study of foods and cultures. Food influences on demography, habitat, social traditions and settings, social status, religious beliefs, gender, and environmental considerations. History, concepts, and principles of cultures and cuisines. F, S

425/625 Experiential Retailing 3
Explore experiential retailing of products, services and experiences that encompass utilitarian and hedonic consumption. Apply strategies for planning, developing, and presenting products or services to create a total consumer experience. Prereq: ADHM 140 or ADHM 171 or BUSN 350 or BUSN 360.

435/635 Cost Controls in Hospitality and Food Service Systems 3
Provides fundamental knowledge of hospitality managerial accounting, cost controls, and financial management. Includes financial statement analysis, cost concepts, cost-volume-profit analysis, calculating and controlling food and beverage costs, pricing, and capital budgeting. Prereq: ADHM 241.

450 Research and Project Development in Interior Design 3
Research, development, and presentation of a programming proposal for a large scale commercial or residential interior. Prereq: ADHM 353, 368, 460 with a grade of C or higher in all prerequisite courses. F

452 Comprehensive Interior Design Project 6
Capstone design studio. Student define problem. Synthesis and implementation of previous course work. S

455 Advanced Apparel Assembly 3
Application of principles and concepts of advanced apparel assembly to finished products. Prototype development and advanced dressmaking techniques applied to clothing for men, women, and children. Prereq: ADHM 155.

460 Career Development and Professional Practice 3
Overview of professional standards and promotional activities as related to the interior design profession. Coreq: ADHM 353, 368. S

465/665 Aging and the Environment 3
Analysis of the built environment and how it impacts the aging population. Prereq: Graduate student standing in HD&E or senior standing in Interior Design program.

467 Hospitality Law 3
Legal considerations of hospitality property management and exploration of important legislation. Legal rights, liabilities and responsibilities of the operator in conjunction with management policies. Prereq: Senior standing. F

470/670 Retail Financial Management and Control 4
Study of retail planning, buying, control, and analysis as it relates to decision making using computer simulation packages. Prereq: ADHM 171, CSCI 114 or 116, MATH 104 or 107, MRKT 320 or 362. S

479 Hospitality Industry Management Strategies 3
Capstone course for HTM majors. Includes opportunities to analyze hospitality issues, make strategic business decisions, and solve practical problems through case studies and simulations. Prereq: ADHM 241, Senior standing. S

481 Apparel and Textiles Capstone Experience 3
Critically analyze and propose research-based solutions to problems related to apparel and textiles including production, distribution, and retailing of goods and services. Prereq: Junior standing. S

485 Global Consumer Analysis 3
This course focuses on consumer behavior theories and concepts as applied to global apparel/textiles and hospitality industries. With a base in social science and marketing research, this course provides a comprehensive analysis of today’s consumer in apparel/textiles and hospitality industries. Prereq: ADHM 140 or 171; PSYC 111.

486 Dress and Human Behavior 3
Influence of dress and appearance on human behavior throughout the life cycle. F

489 Study Tour 1-3
Faculty-directed tour to key fashion, design, tourism destinations, or business centers in the U.S. and abroad. Visits to off-campus destinations provide students contact with practicing professionals as they are exposed to the fast pace of a changing global industry. May be repeated. Prereq: ADHM 140 or 160, 171.

710 Consumer Behavior in Merchandising 3
Evaluation of psychological, sociological, and cultural theories of consumer behavior through the examination of factors influencing the consumer decision-making process.

720 Professional Advancement 3
Analysis of leadership and how it affects organizational culture and change through past and current experiences. Various leadership styles examined and a personal leadership philosophy developed for professional advancement in merchandising.

730 Product Design, Development, and Evaluation 3
Advanced study of issues and management strategies necessary to design and produce a competitively priced product. Examination of the role of globalization and rapidly changing technology on the development of a successful product.
736 **Entrepreneurship in Dietetics** 3
The economics of entrepreneurship, business plan development, and steps in starting your own business related to hospitality or dietetics, including consultation.

740 **Promotional Strategies in Merchandising** 3
Examination of integrated marketing communications (i.e., promotional strategies and techniques) while fostering cultural and global awareness, social responsibility and ethical decision making in the field of promotion.

750 **Retail Theory and Current Practice** 3
Theoretical and applied analysis of merchandising strategies; assessment of internal and external environmental forces impacting strategic decisions by retail firms; synthesis of past and present trends in order to forecast probable future patterns. Prereq: MRKT 362.

760 **History and Contemporary Issues in Trade** 3
The examination of fiber, textile, and apparel industries in a global context. Historical development of global and U.S. textile and apparel industries and how the economic, political, and social systems affect production and trade. Prereq: ADHM 710, 720, 730, 740, 750.

770 **International Retail Expansion** 3
Comprehensive understanding of theory, practices, and trends on international merchandise management. An analysis of global retail system and the way goods are distributed to consumers in various countries. Prereq: ADHM 710, 720, 730, 740, 750.

775 **Research Methods in Merchandising** 3
An overview of the research process used in social science, including an overview and analysis of research methodologies. Also includes a review of current merchandising literature with implications for future research. Prereq: Graduate level statistics course, ADHM 710, 720, 730, 740, 750.

780 **Financial Merchandising Implications** 3
The advanced study of financial trends in the merchandising industries; implications related to varied organizational structures. Foci will be on the financial implications of recent advances in the field. Prereq: ADHM 710, 720, 730, 740, 750.

785 **Strategic Merchandising Planning** 3
Examination of the executive planning process utilized to develop successful corporate strategies; emphasis on the importance of a market orientation for building customer value and sustaining a competitive advantage. Prereq: ADHM 710, 720, 730, 740, 750.

COURSES

101 First-Year Arabic I 4
Basic structures and vocabulary of modern standard Arabic. Practice in the fundamentals of listening, speaking, reading, and writing; introduction to the cultural context of the Arabic-speaking world. No previous knowledge of Arabic required. Not open to native speakers of Arabic.

102 First-Year Arabic II 4
Basic structures and vocabulary of modern standard Arabic. Practice in the fundamentals of listening, speaking, reading, and writing; introduction to the cultural context of the Arabic-speaking world. Continuation of ARB 101. Not open to native speakers of Arabic.

201 Second-Year Arabic I 3
Extended practice with grammatical structures and practical vocabulary to develop proficiency in listening and speaking; additional emphasis on development of skills in reading and writing; cultural topics. Prereq: ARB 102 or equivalent.

202 Second-Year Arabic II 3
Extended practice with grammatical structures and practical vocabulary to develop proficiency in listening and speaking; additional emphasis on development of skills in reading and writing; cultural topics. Prereq: ARB 201 or equivalent.
ARCHITECTURE (ARCH)

Gleye, Chair; Aly Ahmed, Barnhouse, Booker, Christenson, Crutchfield, Faulkner, Lindquist, Mahalingam, Martens, Ramsay, Schwaen, Urness, Wischer

COURSES

231 Architectural Drawing 3
Instruction in traditional (non-digital) representation of architectural designs: elevations, plans, sections, perspectives. Practice with presentation techniques. Prereq: Admission into second year of architecture or landscape architecture program.

232 Design Technology 3
Introductory exploration of digital design media and environmental technology in architecture and landscape architecture. Prereq: ARCH or LA 271.

271 Architectural Design I 6
Studio course focused on beginning exercises in basic design, incorporating abstract two-dimensional design, functional response to environmental determinants, the articulation of form, spatial organization, and aesthetic judgment. Prereq: Admission into second year of program.

272 Architectural Design II 6
Studio course focused on continuing exercises in basic design, incorporating abstract two-dimensional design, functional response to environmental determinants, the articulation of form, spatial organization, and aesthetic judgment. Prereq: ARCH 271.

311 History of Architecture I 3
History of architecture from ancient times through the Renaissance with attention placed on the design connections across cultures and across the globe. Lecture course.

322 History of Architecture II 3
History of architecture from the Baroque to the present placing within a global perspective. Lecture course.

326 Design Theory 3
Study of the theoretical, methodological, and ethical elements of architectural design. Prereq: Admission into second year of program.

344 Architectural Structures I 3
Overview of the principles of statics and mechanics of materials and structural concepts relative to building members and frames. Prereq: ARCH 371, MATH 146, PHYS 120.

351 Materials and Construction 4
Study of building materials from source through manufacture, focusing on their contribution to design and the study of the assembly processes of construction. Lecture course. Prereq: ARCH 272.

371 Architectural Design III 6
Studio course providing intermediate level exercises in architectural design; responding to contextual, cultural, environmental, climatic, technological, and aesthetic determinants. Prereq: ARCH 272.

372 Architectural Design IV 6
Studio course continuing intermediate level exercises in architectural design: responding to contextual, cultural, environmental, climatic, technological, and aesthetic determinants. Prereq: ARCH 371.

443 Architectural Structures II 3
Overview of the principles of statics and mechanics of materials and structural concepts relative to building members and frames. Prereq: ARCH 344.

450 [354] Architectural Detailing 3

453 Environmental Control Systems: Passive Principles 3
Study of architectural design related to thermal comfort, climate, passive solar systems, daylighting, acoustics, and other environmental concerns. Prereq: ARCH 372.

454 Environmental Control Systems: Active Systems 3
Study of the basic fundamentals of illumination and basic power generation, distribution and service; heating, ventilation, and air-conditioning systems; plumbing systems; and acoustics as they relate to building design. Prereq: ARCH 453, 471.

461 Urban Design 3
Study of urban form and urban theory, development, and processes in a historic and contemporary context. Prereq: ARCH 371 or LA 371.

471, 472 Architectural Design V, VI 6 each
Studio courses involving the complex organization of architectural spaces and forms in an urban context. Prereq: ARCH 372, 471 respectively. ARCH 471 is the Capstone course.

474 International Design Studio 6
Comprehensive design studio experience in advanced architectural studies to be conducted in culturally diverse, international locations. Prereq: ARCH 471.

663 Programming and Thesis Preparation 3
Discussion and application of a comprehensive design process for production of the design thesis. Emphasis on preparing a design program. Prereq: ARCH 472.

681 Professional Practice 3
Study of contemporary architectural practice covering professional development, firm organization, and project management within the context of the ethical, legal, and regulatory environment. Prereq: ARCH 472. Cross-listed with LA 581.

721 Non-Western Architectural Traditions 3
Advanced course on the investigation of design methods and building traditions of non-Western cultures and diverse geographic regions. May be repeated.

<td></td>
</tr>
<tr>
<td>350</td>
<td>Ceramics III</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>Advanced study and studio practice with individual and group critique. Focus on current issues in ceramics and innovative use of form, process, and materials. Emphasis on individual concept and content. Prereq: ART 250.</td>
<td></td>
</tr>
</tbody>
</table>
360 Sculpture III

370 Printmaking III
Advanced study, studio practice, the human figure, and critique. Exploration of mixed-media. Emphasis on individual concept and content. Prereq: ART 270.

380 Photography III
Advanced study, studio practice, and critique. Professional practice, promotion, and presentation. Emphasis on individual concept and content. Prereq: ART 280.

385 Digital Media III

389 Art Theory and Criticism
This course covers the development and application of art theory and criticism from the advent of photography to the present. The course presents theory and criticism as fluid methods of understanding art. The course covers standard theories as well as their critical applications. Prereq: ART 210, 211.

420 Painting IV
Advanced study, studio practice and critique in painting. Exploration and development of an individual concept. May be repeated. Prereq: ART 320.

430 Drawing IV

435 Advanced Figure Drawing
Advanced study, studio practice and critique in figure drawing. Continued exploration of the human form and development of an individual concept. May be repeated. Prereq: ART 335.

450 Ceramics IV
Advanced study, studio practice and critique in ceramics. A focus on current issues in ceramics with innovative use of form, process and materials centered in a personal use of content and formal issues. May be repeated. Prereq: ART 350.

451 History of American Art
Study of American art from pre-Columbian through contemporary (including Native American), emphasizing its highly individual nature and its effect on world art. Prereq: ART 210, 211.

452 Contemporary Art
Study of the development of contemporary art examining its cultural and intellectual basis; includes analysis of current art imagery and readings in art theory and criticism.

453 Topics in Art History
As an upper-division course in a specialized topic in Art History, the subject matter of the course varies by semester, allowing the curriculum to be more responsive and flexible in the subjects it addresses. May be repeated. Prereq: ART 210 or 211.

460 Sculpture IV
Advanced study, studio practice and critique in sculpture. A focus on current issues in sculpture with innovative use of form, process and materials centered in a personal use of content and formal issues. May be repeated. Prereq: ART 360.

470 Printmaking IV

480 Photography IV
Advanced study, studio practice and critique in photography. Students will expand knowledge of processes while extending their personal exploration. May be repeated. Prereq: ART 380.

485 Digital Media IV

489 Baccalaureate Project
Capstone research and creative experience within a specific area of interest with emphasis on refinement of aesthetic applications of techniques and media. May be repeated.
ATHLETICS (ATHL)

COURSES

111 Activity I 1
Basic techniques and practice of fitness activities.

116 Weight Training 1
Basic techniques and practice of weight training.

223 Intercollegiate Sports Participation 1
Participation on an intercollegiate sports team. May be repeated.

323 Intercollegiate Sports Participation 1
Participation on an intercollegiate sports team. May be repeated.
**BIOCHEMISTRY (BIOC)**
Dorsam, Haring, Killilea, Offerdahl, Srivastava

**COURSES**

**CHEM 260 Elements of Biochemistry (CCN) 4**
Protein structure, function conformation, and dynamics; enzymes, DNA-RNA: structure and flow of genetic information; biological membranes; metabolism. 4 lectures. Prereq: CHEM 117 or 122, 140 or 240. Also listed under CHEM.

**460/660 Foundations of Biochemistry and Molecular Biology I 3**
Rigorous treatment of biomolecules, generation and use of metabolic energy, biosynthesis, metabolic regulation; storage, transmission, and expression of genetic information. 3 lectures. Prereq: BIOL 150 and CHEM 240 or 342.

**460L Foundations of Biochemistry I Laboratory 1**
Laboratory to accompany BIOC 460. Introduction to techniques and instrumentation in biochemistry. Co-Req: BIOC 460.

**461/661 Foundations of Biochemistry and Molecular Biology II 4**
Interrelations between metabolic pathways and controls, with emphasis on mammalian systems; biochemistry of specialized tissues, fluids, and hormones; regulation of gene expression in eukaryotes; genetic defects in metabolism. 4 lectures. Prereq: BIOC 460.

**465/665 Principles of Physical Chemistry and Biophysics 4**
Conceptual approach to physical chemistry and biophysics; molecular structure, energy, equilibria, and kinetics. Application of fundamental concepts and related instrumental techniques to the life sciences. 4 lectures. Prereq: MATH 147 or MATH 166, PHYS 212. Coreq: BIOC 460.

**473/673 Methods of Biochemical Research 3**
Advanced separation, characterization, and enzymological techniques for research in the biological sciences are emphasized. 1 lecture, 2 three-hour laboratories. Prereq: BIOC 461. Coreq for 673: BIOC 701.

**474/674 Methods of Recombinant DNA Technology 3**

**475/675 Computer Applications in Biochemistry and Molecular Biology 3**
This course will cover basic and advanced biochemical calculations and the use of computer programs to make these calculations. Programs for the presentation of data and seminars will also be presented. Prereq: BIOC 460.

**483/683 Cellular Signal Transduction Processes and Metabolic Regulation 3**
Advanced topics in regulation of metabolic processes including signal transduction, reversible and irreversible covalent modification, hormonal effects, protein turnover, and related phenomena. 2 lectures. Recommended for 683: BIOC 702.

**487 Molecular Biology of Gene Expression 3**
This is an advanced undergraduate course designed to analyze current information regarding biochemistry and molecular biology of gene expression and regulation in prokaryotes, eukaryotes and archaea, with primary emphasis on eukaryotic systems.

**701, 702 Comprehensive Biochemistry I, II 4 each**
Comprehensive treatment of the chemistry and biochemistry of proteins, nucleic acids, carbohydrates, lipids, vitamins, hormones, and the specific metabolism of these substances. 4 lectures. Recommended: CHEM 342, BIOC 701 respectively.

**716 Protein and Enzyme Biochemistry 3**
Advanced topics in protein properties and structure, and the influence of these factors on enzyme kinetics and mechanism. 3 lectures. Prereq: BIOC 702.

**717 Carbohydrate/Lipid Biochemistry 3**
Advanced topics in the structure, reactions, biosynthesis, and properties of carbohydrate and lipid materials of plant and animal origin. 3 lectures. Prereq: BIOC 702.

**719 Molecular Biology of Gene Expression and Regulation 3**
Advanced topics in molecular biology and regulation in prokaryotes, eukaryotes, and archaea; early events in developmental gene expression. 3 lectures. Prereq: BIOC 702.

**720 Scientific Integrity 1**
A survey of contemporary issues relating to responsible conduct in research including academic integrity, mentoring, scientific record keeping, and genetic technology. Class sessions will involve student discussion of case studies that emphasizes a particular scientific ethical dilemma.

**721 Genomics Techniques 2**
See Plant Sciences for description.

### COURSE DESCRIPTIONS

- **Biology (BIOL)**: Biological Sciences: Bleier, Department Head; Anderson, Asplin, Barker, Biga, Butler, Clambey, Clark, Esslinger, Greenlee, Kenyon, Montplaisir, Otte, Reed, Reindl, Schroer, Sheridan, Stockwell, Travers

#### 111, 111L Concepts of Biology, Lab (CCN)
Introduction to a wide range of biological topics, from the organism, ecology, and evolution to the cell, molecular biology, and genetics. (ND:LABSC)

#### 124, 124L Environmental Science, Lab (CCN)
Ecological principles related to human cultures, resource use, and environmental alterations. (ND:LABSC)

#### 126, 126L Human Biology, Lab (CCN)
Consideration of selected problems in human biology. Cross-listed with ZOO. (ND:SCI)

#### 150, 150L General Biology I, Lab (CCN)
Introduction to cellular and molecular biology, genetics, and evolution. (ND:LABSC)

#### 151, 151L General Biology II, Lab (CCN)
An introduction to the biology of living organisms and their interactions with each other and their environments. Examples primarily involve plants and animals, but include other groups of organisms as well.

#### 220, 220L Human Anatomy and Physiology I, Lab (CCN)
An in-depth introduction to structure and function of human organ systems - cells, tissues, the integumentary system, the skeletal system, joints, muscle and muscular system, nervous tissue and nervous system, and the special senses. F (ND:LABSC)

#### 221, 221L Human Anatomy and Physiology II, Lab (CCN)
A continuation of BIOL 220, 220L; the endocrine, cardiovascular, lymphatic, immune, respiratory, digestive, urinary, and reproductive systems and development. S

#### 310L Methods in Cell and Molecular Biology
This course exposes students to the most recent experimental methods used to study common organisms used in biological research. Techniques used include gel electrophoresis, chloroplast transformation, genetic analysis, gene sequencing, and basic molecular genetics. Prereq: BIOL 150, 150L.

#### 315, 315L Genetics, Lab (CCN)
See Plant Sciences for description.

#### 364 General Ecology
Ecological principles associated with organism environment interactions, populations, communities, and ecosystems. Quantitative approach with examples (animal, plant, microbial) included. Prereq: BIOL 150 or 151. Cross-listed with ZOO.

#### 440/640 Biotechnology and Ethics
Study of ethical issues associated with the development of emerging technologies and their application in solving biological problems. Prereq: BIOL 150 or Junior standing.
784 Biological Research Principles 3
Discussion, analysis of published research papers, lectures on selected topics, and student research proposal. Prereq: STAT 725 or 330 and 331.

785 Photobiology 3
Topics are related to student interests and can include photosynthesis, animal visual systems, light regulated metabolism, pigmentation, photoreceptors, biosensors, photomorphogenesis, and photoperiodic responses. Emphasis will be on recent papers in photobiology. Prereq: BIOC 460.
314 Plant Systematics 3
Plant identification, nomenclature and classification are aspects of plant systematics. Modern plant systematics uses molecular approaches in addition to visual traits such as morphology to order plants in accordance with our current understanding of evolution and the 'Tree of Life'. Prereq: BIOL 151, 151L.

315, 315L Genetics, Lab 3,1
See Plant Sciences for description.

372 Structure and Diversity of Plants and Fungi 4
Comparative survey of diversity in plants (Kingdom Plantae) and fungi (Kingdom Fungi), with emphasis on reproductive and vegetative morphology. Major groups and specific examples discussed in lecture will be given detailed study in the laboratory. Prereq: BIOL 150 or 151.

380 Plant Physiology 3
Broad coverage of plant growth and metabolism including water relations, mineral nutrition, photosynthesis, carbon fixation, metabolic processes, stress responses, developmental biology, and growth regulation. Prereq: BIOL 150.

380L Plant Physiology Lab 1
Optional laboratory course accompanying BOT 380. Molecular, biochemical, and physiological techniques will be used to address contemporary problems in plant physiology. Coreq or Prereq: BOT 380

431/631 Intermediate Genetics 3
See Plant Sciences for description.

450/650 Range Plants 3
See Range Science for description.

452/652 Plant Structure 3
Study of the development and structure of cells, tissues, and organs of vascular plants. 2 lectures, 1 laboratory.

460/660 Plant Ecology 3
Ecological structure, processes, and patterns observed with plant communities and populations as influenced by environmental conditions. Illustrations provided with local fieldwork. Prereq: BIOL 151, 151L. Cross-listed with RNG.

471/671 Phycology 3
Identification, systematics, evolution, ecology, life histories, physiology, cytology, and culture of algae. Prereq: BIOL 151, 151L.

472/672 Lichenology 3
Biology, ecology, and systematics of lichen fungi. Prereq: BIOL 151, 151L.

716 Agrostology 3
See Range Science for description.
BUSINESS ADMINISTRATION (BUSN)

MacIntosh, Chair; Bahrami, Bitzan, Brown, Froelich, Ganesh-Pillai, Jones, Knoepfle, Krishnakumar, Krush, Lehmberg, Li, Peterson, Rymph, Stevens, Szmerekovsky, Tangpong, Traub

COURSES

(All courses 300 level and above require a minimum of junior standing and a 2.50 cumulative GPA.) See also Finance (FIN), Management (MGMT) and Marketing (MRKT)

189 Skills for Academic Success
See University Interdisciplinary Studies for description.

318 Taxation in Management Decisions
See Accounting for description.

340 [310] International Business
Study of international business: ways in which it differs from domestic operations; benefits of operating globally; and political, cultural, and economic problems faced by managers of firms engaged in international activities.

341 Business Environment of the European Union
This course introduces students to the business environment of the European Union (EU). Policies, procedures, and institutions impacting the business environment in the EU are examined. Businesses, institutions, and sites pertinent to doing business in the EU are visited. This course is taught exclusively in Europe as part of the semester in Europe. Prereq: acceptance into the NDSU College of Business program in Europe.

347 Principles of Real Estate
See Agricultural Economics for description.

374 Cooperatives
See Agricultural Economics for description.

383 Organizational Communication I
See Communication for description.

413 Business Internship
Supervised professional experience with an appropriate public or private business. Students must meet standards established by the employer and the College of Business Administration.

415 Small Business Institute
Practical application of classroom learning in a supervised consulting project with a local business. Teams analyze actual business problems, and develop recommendations for the client.

430/630 Legal and Social Environment of Business
Study of legal and regulatory environment in which business firms operate, as well as the social environment. Includes business ethics and social responsibility issues.

431 Business Law I – Contracts, Property and Torts
A study of the foundations of business law and commercial transactions: the law of contracts, personal property, real estate, insurance, wills and estates, and torts.

432/632 Business Law II – Business Organizations and Commercial Transactions
A study of advanced topics in business organizations and commercial transactions: the law of sales, commercial paper, agency, business organizations, secured transactions, bankruptcy, securities regulation, and accountants’ liability. Prereq: BUSN 431 or 430/630.

440/640 [435/635] International Business Law
Study of public and private international law as it relates to international business: international contracts and sales; international business organizations; and international trade, tariffs, and agreements. Prereq: BUSN 430.

433/633 [436/636] Law of Electronic Commerce
This course will examine the domestic and international legal and regulatory environment of electronic commerce, including the law relating to commercial transactions in cyberspace and liability for those engaged in business on the Internet.

486 Senior Thesis
Directed development of a paper showing the application, synthesis, and integration of business concepts.

487 [451] Managerial Economics
Use of decision science techniques such as statistical and numerical analysis and optimization to study profit, demand and supply, cost and production, market structure, pricing practices, and the impact of government regulations on management decisions. Prereq: MGMT 320, ECON 201, 202, MATH 146.

489 Strategic Management
Integration and application of management, marketing, and finance principles in written and oral case analysis of organizations. Consideration of global, ethical, and current social issues. Capstone for Accounting, Business Administration, and Management Information Systems majors. Prereq: FIN 320, MGMT 320, MRKT 320, BUSN 430, Senior standing.

730 Legal Aspects of Business
This course will study law related to business in the areas of agency, accountant legal liability, business organizations, contracts, debtor-creditor relationships, government regulations of business transactions, real property, sales, and the Uniform Commercial Code.

780 Business Conditions Analysis
Preparation of students to analyze domestic and global economic factors that impact the U.S. and world economy. Prereq: MRKT 760.

789 Business Policy and Strategy
Process and tools of strategy formulation and implementation in a variety of organizational environments. Prereq: FIN 740, MGMT 750, 751, MRKT 760.
## COURSES

### 200 Introduction to Food Systems  3
The fundamentals of food science and food safety will be introduced with emphasis on how food components and processing affect quality and safety of foods.

### 210 Introduction to Food Science and Technology  2
Overview of food components, food quality, nutrition, processing, packaging, safety, sanitation laws, sensory evaluation, distribution, and utilization.

### 370 Food Processing I  3
This course is designed to provide students with an introduction to food processing methods. The course will provide hands-on experience with a focus on basic food processing methods. Recommended Prereq: CFS 210.

### 430/630 Food Unit Operations  2
Thermodynamics, materials and energy balance, fluid flow, heat transfer, heat exchange, all related to food processing. Prereq: MATH 147, PHYS 211, 211L.

### 450/650 Cereal Technology  3
Discussion of cereal grains, their properties, evaluation, and utilization.

### 452/652 Food Laws and Regulations  3
See Food Safety for description.

### 453/653 Food Microbiology  3
See Microbiology for description.

### 454/654 Bioprocessing  3
See Microbiology for description.

### 460/660 Food Chemistry  3
Study of food components including water, carbohydrates, lipids, proteins, vitamins, minerals, and enzymes. Prereq: CFS 210, CHEM 341, 341L.

### 461/661 Food Chemistry Laboratory  1
Laboratory isolation, observation of characteristics, and quantitation of food components. Coreq: CFS 460/660.

### 464/664 Food Analysis  3
Principles, applications, and practice of methods for quantitative determination of food components. 2 lectures, 1 three-hour laboratory. Recommended Prereq: BIOC 460, CFS 460/660.

### 470/670 Food Processing II  3
This course is designed to provide students with an in-depth academic and practical exposure to food processing methods and the food industry. Concepts in quality control systems and sanitation will be discussed. Recommended Prereq: CFS 370.

### 471/671 Food Processing Laboratory  1
Field trips, experiments on freezing, freeze-drying, spray drying, canning, beverage production, water activity measurements, shelf life, and quality control. Recommended Coreq: CFS 470/670.

### 474/674 Sensory Science of Foods  2
The science used in the evaluation of flavor, color, and texture of foods. Experiential approaches will be used to evaluate sensory characteristics of foods. Recommended Prereq: CFS 460/660, STAT 330.

### 480/680 Food Product Development  3
This course is designed to provide students the opportunity to incorporate the basic principles of food science in the theoretical development of food products. (Food Science Capstone). Prereq: CFS 453, 460, 464, 470.

### 725 Food Policy  3
See Food Safety for description.

### 752 Advanced Food Microbiology  3
See Food Safety for description.

### 758 Fundamentals of Flour Testing and Baking  3
Flour testing, industrial, and experimental bread baking. Production methods, ingredients, and baking reactions. Lectures and laboratories. Prereq: CFS 450/650.

### 759 Milling  3
Experimental and industrial feed and flour milling. Production, equipment, and factors involved in the milling process. Lectures and laboratories. Prereq: CFS 450/650.

### 760 Pasta Processing  3
Durum wheat quality, pasta production, and pasta quality evaluation. Lectures and laboratories. Prereq: CFS 450/650.

### 761 Malting and Brewing  3
Barley and malt quality; malting and brewing. Lectures and laboratories. Prereq: CFS 450/650.

### 764 Cereal Carbohydrates  2
Carbohydrates (monosaccharides, oligosaccharides, and polysaccharides) of cereals with emphasis on barley, wheat, and flour and their importance in industrial products.

### 765 Advanced Cereal and Food Chemistry I  4
Physiochemical, structural, functional, and analysis of cereal and food carbohydrates and enzymes. Biochemical aspects of these components will also be presented.

### 766 Advanced Cereal and Food Chemistry II  4
Physiochemical, structural, and functional properties of cereal and food proteins and lipids in food systems.
CHEMISTRY (CHEM)

Hershberger, Chair; Burghaus, Cook, Jacobson, Jayaraman, Liu, Offerdahl, Oswald, Page, Radke, Rasmussen, Rodgers, Sibi, Sun, Zhao

COURSES

117, 117L Chemical Concepts and Applications, Lab (CCN)  3,1
Introduction to general and organic chemistry, with applications drawn from the health, environmental, and materials sciences. Prereq or Coreq: MATH 103 or 107. (ND:LABSC)

121, 121L General Chemistry I, Lab (CCN)  3,1
Matter, measurement, atoms, ions, molecules, reactions, chemical calculations, thermochemistry, bonding, molecular geometry, periodicity, and gases. Prereq or Coreq: MATH 103 or 107. (ND:LABSC)

122, 122L General Chemistry II, Lab (CCN)  3,1
Intermolecular forces, liquids, solids, equilibria, acids and bases, solution chemistry, precipitation, thermodynamics, and electrochemistry. Prereq for 122: CHEM 121. Prereq for CHEM 122L: CHEM 121L. (ND:LABSC)

140 Organic Chemical Concepts and Applications (CCN)  1
Introduction to organic chemistry for pre-nursing and other students who need to meet the prerequisite for CHEM 260.

150, 160 Principles of Chemistry I, Lab  3,1
Chemistry for students with good high school preparation in mathematics and science. Electronic structure, stoichiometry, molecular geometry, ionic and covalent bonding, energetics of chemical reactions, gases, transition metal chemistry.

151, 161 Principles of Chemistry II, Lab  3,1

240 Survey of Organic Chemistry (CCN)  3
Structure and bonding, nomenclature; hydrocarbons: alkanes, alkenes, alkynes, aromatics; substituted hydrocarbons: alkyl halides, stereochemistry, alcohols, phenols, ethers, amines; carbonyls: aldehydes, ketones; carboxylic acids, esters, amides. Prereq: CHEM 121.

260 Elements of Biochemistry (CCN)  4
See Biochemistry for description.

341, 341L Organic Chemistry I, Lab (CCN)  3,1
First semester of a two-semester course in organic chemistry for students in sciences and pre-professional curricula. Prereq: CHEM 122 or 151, 122L.

342, 342L Organic Chemistry II, Lab (CCN)  3,1

353 Majors' Organic Chemistry Laboratory I  1

354 Majors' Organic Chemistry Laboratory II  2

364, 365 Physical Chemistry I, II  4 each
Mathematical and physical basis of chemical phenomena. Quantum chemistry and chemical kinetics. Thermodynamics and statistical mechanics. Prereq: CHEM 122 or 151, MATH 265, PHYS 252. Coreq: MATH 266.

380 Chemistry Junior Seminar  1
Includes discussion of chemistry topics, technical writing instruction and assignments; participation in senior seminar discussions.

425/625 Inorganic Chemistry I  3
Electronic structure, ionic and covalent structure and bonding, point groups and symmetry, coordination chemistry, acid-base and redox chemistry. Prereq: CHEM 364.

426/626 Crystallography/Crystal Chemistry  2

427/627 X-Ray Diffraction  2

428/628 Geochemistry  3
See Geology for description.

429 Inorganic Chemistry Laboratory  2
Methods of synthesis and characterization of inorganic and organometallic compounds. Capstone laboratory experience for ACS certified chemistry majors. Coreq: CHEM 425.

431, 431L Analytical Chemistry I, Lab  3,2
Chemical equilibrium and its analytical applications; introduction to chromatography and potentiometry. Prereq: CHEM 122, 122L or 151, 161.

432/632, 432L/632L Analytical Chemistry II, Lab  3,1
Theory and application of modern instrumental techniques, including spectroscopy and electrochemistry. Prereq: CHEM 431, 431L.

435/635 Chemical History  2
Survey of the history of the chemical sciences from the stone-age through the early 1900s. Prereq: CHEM 431.

471 Physical Chemistry Laboratory  2
Measurement of thermodynamic and spectroscopic properties of chemical substances, analysis of data. Prereq: CHEM 364.

472/672 Surface Chemistry  2
The object of the course is to enhance the knowledge of experimental and computational techniques in a sub area of physical chemistry.
476/676 Introduction to Computational Quantum Chemistry
This is a mathematically non-rigorous introduction to procedures and capabilities of basic computational quantum chemistry. Prereq: CHEM 364, 365.

720 Introduction to Chemical Research
This course will serve as an introduction to research in the molecular sciences, with the goal to prepare graduate students for a successful graduate research experience and for a future research career in the molecular sciences.

724 Chemical Applications of Group Theory
See department for description.

725 Inorganic Chemistry II
Molecular orbital and valence bond theories, inorganic reactions and mechanisms. Prereq: CHEM 425 or 625.

726 Photochemistry and Photophysics
Fundamental principles in photochemistry and photophysics, rules for electronic transitions, energy transfer, electron transfer, photochemical reactions of organic chromophores (carboxyls, alkenes, enones, aromatics), singlet oxygen, photochemistry in organized and constrained media, organic solid state photochemistry, instrumental methods in photophysics, application of photochemistry. Prereq: CHEM 625, 724.

727 Organometallic Chemistry

728 Physical Methods in Inorganic Chemistry
Physical methodology especially appropriate to the characterization of inorganic and organometallic compounds. Includes electronic, vibrational absorption, electronic spin resonance, Mössbauer spectroscopy and nuclear magnetic resonance methods. Prereq: CHEM 725.

729 X-Ray Structure Determination
Use of single crystal X-ray diffraction data to determine molecular and crystal structures. Half semester.

730 Separations
Theory of equilibrium chemistry in aqueous and nonaqueous systems: principles of chromatographic and other separation techniques. Prereq: CHEM 432/632.

732 Electrochemistry
Theory and application of modern electrochemical methods, including potentiometry, voltammetry, electrochemical impedance spectroscopy, kinetics and mechanisms of electrode processes, corrosion, simulation techniques, and instrumentation. Prereq: CHEM 432/632.

734 Instrumentation Electronics
Design and operation of digital and analog circuits used in chemical instrumentation, computer interfacing. Includes laboratory. Prereq: CHEM 432/632.

736 Mass Spectrometry

741 Physical Organic Chemistry I
Principles governing the reactivity of organic compounds and methods for determining reaction mechanisms.

742 Physical Organic Chemistry II

743 Reactive Intermediates

744 Organic Spectroscopy
Structure elucidation by spectrometric methods, including infrared, mass spectrometry, UV, and nuclear magnetic resonance. Interpretation of 2-D NMR spectra. Half semester.

745 Organic Synthesis
Functional group synthesis, synthetic design, stereochemical control. Prereq: CHEM 741.

746 Advanced NMR Spectroscopy
Theory of pulsed FT-NMR, instrumentation, pulse sequences (with emphasis on multipulse experiments), two-dimensional NMR and applications. Prereq: CHEM 744. Half semester.

747 Heterocycles
Synthesis of heterocycles, aromaticity, organometallic chemistry, nucleosides, natural products. Prereq: CHEM 745.

748 Total Synthesis of Natural Products
Retrosynthetic analysis, total synthesis, terpenes, alkaloids will be studied. Prereq: CHEM 745.

754 Organic Spectroscopy Laboratory I
Laboratory to accompany 744, with emphasis on NMR techniques. Coreq: CHEM 744. Half semester.

759 Intermediate Physical Chemistry
Fundamental principles of physical chemistry including quantum chemistry, spectroscopy, molecular thermodynamics, and kinetics.

760 Statistical Thermodynamics
Macroscopic and microscopic models for the study of equilibrium properties of pure phases and solutions. Prereq: CHEM 365.

761 Optical Spectroscopy

763 Kinetics

764 Dynamics
Chemical physics of energy transfer and reactive collisions. Prereq: CHEM 763. Half semester.

**111 Introduction to Civil Engineering**
Introduction to duty and role of the professional engineer, phases of engineering design activities, computer applications with word processing and spreadsheets. 2 one-hour lectures. S

**204 Surveying**
Measurements and errors; topographical and construction surveys; vertical and horizontal control methods; field exercises and computation techniques for surveying data; computation of earthwork volumes. 2 one-hour lectures, 2 three-hour laboratories. Prereq: MATH 105 or 107. F, SS

**212 Civil Engineering Graphic Communications**
Integrating manual drafting and computer-aided drafting and design in one course with emphasis on civil engineering practices. This required course will be taught at sophomore level to get students properly prepared for civil engineering courses. Prereq: CE 111. F, S

**303 Civil Engineering Materials**
Physical and chemical properties of different types of bituminous materials and Portland cement concrete; industry standards and tests for evaluating raw materials and mix designs. 2 one-hour lectures, 1 three-hour laboratory. Prereq: CE 316. S

**309 Fluid Mechanics**
Statics, kinematics, and dynamics of fluid flow; momentum and energy concepts; flow through pipes; uniform flow in open channels; pumps and measurement of flow. 3 one-hour lectures. Prereq: ME 222. F, S

**310 Fluid Mechanics Laboratory**
Visualization and verification of the concepts of fluid flow, pumps, turbines, and flow meters. 1 two-hour laboratory. Prereq: CE 309. F, S

**316 Soil Mechanics**
Principles of soil mechanics including three-phase composition, classification, effective stress, consolidation, shear strength, compaction, and site investigation. 2 lectures, 1 two-hour laboratory. Prereq: ME 222, ME 223. Coreq or prereq: MATH 266. F

**343 Structural Engineering and Analysis**
Structural loading and analysis of statically determinate and indeterminate structures. Covers the elastic analysis and deformations of trusses, beams, and frames using force methods, displacement methods, matrix methods, and moment distribution. Prereq: ME 223. S

**370 Introduction to Environmental Engineering**
Introduction to various municipal and industrial pollutants being introduced into water, air, and land systems and their effects on the environment. Application of chemical, physical, and biological principles to the management of these pollutants. 3 one-hour lectures. Prereq: CE 309, CHEM 122. S

**371 Environmental Engineering Laboratory**
Water, wastewater, and solid waste analyses regarding their theory, objectives, and practices. Exposure to practical applications of the scientific and design theories presented in CE 370. 1 three-hour laboratory. Prereq or Coreq: CE 370. S

**403/603 Civil Engineering II: Steel, Wood and Polymers**
Composition, properties, structure, and behavior of steel, wood, and polymeric materials; elastic, plastic, and viscous behavior under various environmental and loading conditions. Prereq: CE 303. S

**404 Reinforced Concrete**
Principles of design and analysis of reinforced concrete members, flexural and shear design of rectangular and tee beams, serviceability criteria, short and slender columns. 2 one-hour lectures, 1 two-hour session. Prereq: CE 343. F

**405/605 Advanced Reinforced Concrete**
Development and anchorage of reinforcement, details of reinforcement in flexural members, continuous beams and one-way slabs, slender columns, two-way slabs. 1 one-hour lecture, 1 two-hour session. Prereq: CE 404. F

**408 Water Resources and Supply**
Hydrologic concepts, development of water supply sources, principles involved in the collection and transportation of water/wastewater/storm runoff, and distribution of water for municipal use. Prereq: CE 309. S

**410/610 Water and Wastewater Engineering**
Principles involved in treatment, disposal, reuse, and recycling of municipal water supplies and wastewaters. Laboratory introduces tests to evaluate treatment requirements and effectiveness. 3 one-hour lectures, 1 three-hour laboratory. Prereq: CE 370. F

**411/611 Design of Pre-stressed Concrete**
Theory and design of pre-stressed concrete structures, pre- and post-tensioning, loss of pre-stress, proportioning of flexural members, deflections. 2 one-hour lectures. Prereq: CE 404. S

**417/617 Slope Stability and Retaining Walls**
Performance and design of retaining walls, sheet pile walls, braced walls, and reinforced earth. Also evaluation and mitigation of unstable earth slopes. 2 one-hour lectures. Prereq: CE 316. S

**418 Transportation Engineering**
Location, analysis, modeling, and design of multi-modal facilities including highways, railways, airports, terminals, harbors, ports, canals, waterways and pipelines, and conveyor systems. 3 one-hour lectures, 1 two-hour session. Prereq: CE 204, ME 221, MATH 259. S

**419/619 Pavement Design**
Design of flexible and rigid pavements including sub-grade, base courses, surface courses; evaluation criteria including soil, climate, traffic, material, drainage; initial and maintenance cost considerations; construction practices. 2 one-hour lectures, 1 two-hour session. Coreq: CE 303. S

**421/621 Open Channel Flow**
Geometric and hydraulic properties of open channels, continuity, momentum and energy principles, design of channels, gradually varied flow, critical flow and culvert design. 3 one-hour lectures. Prereq: CE 309. S
425/625 Bridge Evaluation and Rehabilitation  
Topics include bridge evaluation methodologies, review of bridge codes, behavior of constructed bridges, sources of bridge deterioration, rehabilitation design with advanced composite materials, structural health monitoring. Prereq: CE 343 and CE 404.

430/630 Timber and Form Design  
Analysis and design of wood structures and concrete formwork. 2 one-hour lectures, 1 three-hour session. Prereq: ME 223. S

441/641 Finite Element Analysis  
Weak and strong solutions to governing differential equations in bars, boundary conditions, Galerkin approximation, nodal basis functions, shape functions. Beam and two-dimensional problems with triangular and quadrilateral elements. Prereq: MATH 266. F, S

442/642 Matrix Analysis of Structures  
Review of matrix algebra, flexibility and stiffness methods, direct stiffness method, introduction to finite element analysis. 2 lectures. Prereq: CE 343. F, S

444 Structural Steel Design  
Design of metal structures including mechanical behavior of metals; behavior and proportioning of tension and compression members; beams, beam columns, and connections; selection of metal structural systems. 2 one-hour lectures, 1 two-hour session. Prereq: CE 343. F

445/645 Advanced Steel Design  
Analysis and design of metal structures including connections, selection of structural systems. 1 one-hour lecture, 1 two-hour session. Prereq: CE 444. S

446/646 Basic Dynamics of Structures  
Analysis of single degree of freedom structural systems to harmonic and general dynamic loading, free vibration of multiple degree of freedom systems, modal superposition, earthquake engineering. 3 one-hour lectures. Prereq: CE 343. S

451/651 Advanced Surveying  
Property description and legal land surveys. Astronomical observations to establish position and direction. State plane coordinates. 2 one-hour lectures. Prereq: CE 204. F

454/654 Geometric Highway Design  
Location and design of highways and streets; design controls, elements of design; cross-section design; design of intersections, interchanges, safety appurtenances, and 3R projects. 2 one-hour lectures, 1 two-hour session. Prereq: CE 418. F

455/655 Airport Planning and Design  
System planning and demand forecasting; siting and configuration of airports; aircraft characteristics; air traffic controls; standards for geometric design, pavement design, drainage, and safety. 2 one-hour lectures. Prereq: CE 418. F

456/656 Railroad Planning and Design  
Rail planning and location analysis, track/rail structure, track layout and control system, locomotives and train resistance, track safety standards and geometrics, terminal design. 2 one-hour lectures. Prereq: CE 418. F

457 Pavement Management Systems  
Pavement design, maintenance, and rehabilitation strategies; planning, budgeting, and programming for pavement management at network and project levels; development, design, and maintenance of pavement management systems. 2 one-hour lectures. Prereq: CE 303. F

458/658 Bituminous Materials and Mixtures  
This course presents fundamental knowledge of asphalt material properties, performance requirements, specifications and related test characteristics. Prereq: CE 303. F

461/661 Foundation Engineering  
Performance and selection of the following foundations: shallow, mat, combined pile, and drilled piers. 2 one-hour lectures. Prereq: CE 316. F

462/662 Designing with Geosynthetics  
Theories, principles, and engineering design using geosynthetic materials for a variety of civil engineering applications. Applications to geotechnical, environmental, transportation, and water resources fields are emphasized. Includes construction issues. Prereq: CE 316. S

463/663 Geotechnical Earthquake Engineering  
Wave propagation in soils, dynamic properties of soils, cyclic stress-strain behavior of soils, ground response analysis, liquefaction, soil-structure interaction, seismic design of foundations, retaining walls, and seismic slope stability analysis. Prereq: CE 316. S

472/672 Solid Waste Management  
Basic study of solid waste materials, current collection methods, available disposal techniques, recycling and resource conservation, and economics of solid waste collection and disposal. 3 one-hour lectures. Prereq: CE 370. F

473/673 Air Pollution  
Fundamentals of air pollution and its control technology. Types and sources of air pollutants, meteorology, effects on plants, animals, people, and property. Design of control equipment. 3 one-hour lectures, 1 three-hour laboratory. Prereq: CE 370. S

476/676 Watershed Modeling  
Concepts of watershed, watershed hydrology, application of GIS tools, DEM-based watershed delineation, watershed hydrologic modeling, state-of-the-art watershed modeling software, and hands-on applications. Prereq: CE 408. S

477/677 Applied Hydrology  
Scope of hydrology, hydrological cycle and components, runoff volume and peak flow estimation, hydrograph analysis, probabilistic concepts in water resources, regional frequency analysis, application of risk concepts to hydrological design, flow estimation for ungaged watersheds. 2.75-minute lectures. Prereq: CE 408. F

478/678 Water Quality Management  
Physical, chemical, biological, hydrological characteristics, and hydrodynamic elements of receiving waters. Characterizations, measurement, and modeling methods of river/streams, lakes/reservoirs, and groundwater systems. 2 one-hour lectures. Prereq: CE 370. F, S

479/679 Advanced Water and Wastewater Treatment  
Selected problems in the investigation and design of sewage systems, water distribution systems, wastewater treatment plants, and water purification plants. 2 one-hour lectures. Prereq: CE 370. 410. S
483 Contracts and Specifications  3
Formation, interpretation, and termination of engineering contracts. Engineering specifications and drawings. Other legal matters of concern to engineers. 2 one-hour lectures. Prereq: Senior standing. S

486/686 Nanotechnology and Nanomaterials  3
This course covers principles of nanotechnology, nanomaterials and develops a framework for their understanding. The basic tools of nanotechnology: nanoscale characterization, physics and materials design will be discussed in the context of current technological advances. Prereq: Senior standing in Engineering or Sciences. Cross-listed with ME.

489 Senior Design  2
An open-ended capstone design project encompassing a number of the disciplines within civil engineering. 2 one-hour lectures. Prereq: Senior standing. S F

701 Theory of Elasticity  2
A theoretical study of linear elasticity, Saint Venant’s problems, plain stress, plain strain, strain energy, and torsion. 2 one-hour lectures.

702 Plates and Shells  2
Theoretical and applied study of the classical theories of plates and shells as they pertain to engineering problems including small displacement of rectangular and circular plates and thin shells. 2 one-hour lectures.

706 Plastic Design in Structural Steel  2
Inelastic bending of beams and frames, application of upper and lower bound theorems, calculation of deflection, effect of axial and shear forces on flexural strength, connections, structural safety, and rules of plastic design. 2 one-hour lectures.

709 Dynamics of Structures and Foundations  2
Advanced topics in structural dynamics, frequency domain response, generalized coordinates, nonlinear structural response, dynamic analysis of framed structures, structures with distributed properties, seismic design considerations. 2 one-hour lectures. Prereq: CE 446.

714 Theory of Elastic Stability  2
Bending of beams under simultaneous action of axial and lateral loads, buckling of compressed bars in both the elastic and plastic ranges, design formulas, lateral buckling of beams. 2 one-hour lectures.

720 Continuum Mechanics  3
Tensor analysis in affine and metric spaces, kinematics of motion, general principles of continuum mechanics, thermodynamics of deformation, and postulates on constitutive laws. 3 one-hour lectures. Cross-listed with ME.

725 Biomaterials-Materials in Biomedical Engineering  3
This course covers the fundamentals of synthesis, properties, and biocompatibility of metallic, ceramic, polymeric and composite materials that are designed for replacement of biological materials such as hard and soft tissues.

757 Pavement Evaluation and Rehabilitation  3
Advanced knowledge of pavement performance; pavement evaluation; implementation of pavement management at network and project level; maintenance and rehabilitation strategies; life-cycle-cost analysis.

762 Advanced Foundation Engineering  2
Advanced topics in performance and design of foundations. Current topics include a two-dimensional finite element analysis of the foundation and its supporting soil. 2 one-hour lectures. Prereq: CE 461/661.

768 Advanced Water and Wastewater Laboratory  3
Studies on selected processes, efficiency and evaluation of water and wastewater treatment. Selected methods of water and wastewater analyses. 2 one-hour lectures, 1 three-hour laboratory. Prereq: CE 371.

770 Hazardous Waste Site Remediation  3
Overview of hazardous waste issues, classification, legislation, process fundamentals, fate and transport of contaminants, management, and treatment/remediation methods. 3 one-hour lectures. Prereq: CE 370 S

771 Economics of Transportation Systems  3
See Agricultural Economics for description.

772 Rural Logistics and Distribution Management  3
See Agricultural Economics for description.

775 Industrial Waste Management  3
Regulations and standards on industrial pollution control, industrial waste characteristics, industrial waste management strategies, and waste treatment methods. Prereq: CE 610.

776 Groundwater and Seepage  3
Groundwater as a resource, relation to hydrologic cycle, well hydraulics, seepage, ground water quality and contamination, ground water flow models. 3 one-hour lectures. Prereq: CE 408. S

778 Transportation Administration  3
Public organization behavior and administration, fund accounting, public budgeting, financial management, and strategic management of transportation agencies. Includes transportation case studies.

780 Transportation Planning  3
Types of transportation planning: history of urban and statewide transportation planning; development and trends in travel demand forecasting; trip generation, trip distribution, mode choice, traffic assignment; transportation plans for modal, and multi-modal alternatives; policy formulation and analysis. 1 three-hour lecture. Prereq: CE 418. S

781 Traffic Engineering  3
Traffic characteristics, studies, and control devices; operations analysis and design; aspects of signing, signalization, markings, and lighting; accident analysis; traffic laws and ordinances; work zone safety practices; arterial and freeway management. 1 three-hour lecture, plus two-hour laboratory work. Prereq: CE 418. S

782 Public Infrastructure Management and Construction  3
Management and construction of public infrastructure including streets, highways, and sidewalks; public transportation; street lighting and traffic control systems; potable water; wastewater and drainage; parks, recreation facilities, solid waste handling and disposal, and others. Prereq: CE 619, 656.
CLASSICAL LANGUAGES (CLAS)
Andreini, Nichipor

COURSES

101, 102 First-Year Latin I, II (CCN) 4 each
Introduction to forms, syntax, and vocabulary of classical Latin. 101: (ND:HUM)

151, 152 First-Year Greek I, II (CCN) 4 each
Introduction to forms, syntax, and vocabulary of Attic Greek along with selected readings. 151: (ND:HUM)

180 Scientific Terminology: Greek and Latin (CCN) 2
Brief survey of prefixes, suffixes, and roots from Greek and Latin, which form the technical vocabulary for science and medicine.

201, 202 Second-Year Latin I, II (CCN) 3 each
Designed to form a transition from introductory material to the Latin authors. Prereq: CLAS 102, 201 respectively.

251 Second-Year Greek I (CCN) 3
Introduction to Koine Greek as found in the New Testament. Prereq: CLAS 152.

252 Second-Year Greek II (CNN) 3
Readings from selected classical Attic Greek authors. Prereq: CLAS 251.

289 (CCN), 290 Biblical Hebrew I, II 3 each
Fundamentals of Hebrew script, grammar, and syntax. Includes selected readings from Biblical prose.

350 Glory of Greece 3
History of the ancient Greeks, their literature, politics, customs, art, and architecture.

360 Grandeur of Rome 3
History of ancient Rome, its literature, politics, customs, art, and architecture.

361 Cicero 3
Study of the life and times of Cicero through selections from his letters, speeches, and philosophical essays. Prereq: CLAS 202.

362 Virgil 3

363 Advanced Latin Prose 3

364 Advanced Latin Poetry 3

370 Classical Mythology 3
Study of the gods and heroes of the Greeks and Romans as found in classical and modern literature, sculpture, and painting.

451 Advanced Greek Prose 3
Readings from Classical Greek philosophers, historians, and orators in the original. Prereq: CLAS 252.

452 Greek Tragedy 3
Appreciation of Greek drama through reading selections from Aeschylus, Sophocles, and Euripides in the original. Prereq: CLAS 252.
CLINICAL LABORATORY SCIENCE (CLS)

P. Olson

COURSES

111 Introduction to Clinical Laboratory Science 1
Introduction to clinical laboratory science. Lectures, discussions, and field trips focus on professional traits and communication, ethical behavior of the health care provider, major curriculum requirements, and scope of practice.

435 Hematology 2
An introduction to the origin, maturation, and function of the formed elements of human blood. Identification of normal cells will be emphasized. Prereq: MICR 202L or 350L.
COATINGS AND POLYMERIC MATERIALS (CPM)

Croll, Chair; Bierwagen, Gelling, Voranov, Webster; Adjunct Faculty: Chisholm, Gelshard, Hill, Provider, Roesler, Skerry

COURSES

451/651 Laboratory, Chemical, Radiation, and Biological Safety
1
Hazards and safe practices in chemical, radiation and biological laboratories, applicable to all studies at NDSU. Recognized by the University as completion (for credit) of safety training to work in a research laboratory.

472/672 Environment and Chemical Industries
2
Environmental issues as they pertain to the chemical industry. Topics to include environmental regulations, the issues with disposal and waste, and designing environmentally compliant processes. Prereq: CHEM 121.

473/673 Polymer Synthesis
3
Chemical synthesis of all types of polymers, including the understanding and tailoring of materials formed by these very high molecular weight molecules. Polymers have unique properties due to their conformation and high molecular mass, and are used in a wide variety of applications from paints to structural, engineering materials. Prereq: CHEM 342.

474/674 Coatings I
3
Synthesis of resins used in coatings systems, structure-property relationships for polymer binder systems, crosslinking and film formation concepts, solvents and other materials in coatings. Prereq: CHEM 342.

475/675 Coatings II
3
Materials science of polymeric coatings, including their components, formulation, design, testing and application. Specialized topics include corrosion, color, appearance and adhesion. Prereq: CPM 474/674.

484/684 Coatings I Laboratory
2

485/685 Coatings II Laboratory
2
Formulation and application testing of coatings versus property requirements; color measurement and matching. Laboratory counterpart to CPM 475/675. 1 six-hour laboratory. Hours flexible. Prereq: CPM 484/684. Coreq: CPM 475/675.

486/686 Corrosion and Materials
3
Corrosion science and engineering: basic electrochemistry of corrosion, measurement of corrosion, choice of materials in engineering design to mitigate corrosion, corrosion control by coatings, evaluation of corrosion protection, and areas of special corrosion problems. Prereq: CHEM 121 or 150. Cross-listed with CHEM.

487/687 Corrosion and Materials Laboratory
1
The laboratory will allow the students to become acquainted with experimental techniques for the study of corrosion processes and the failure of materials. Additionally, the methods for protection of materials will be practiced. Co-req: CPM 486/686.

771 Modern Methods of Polymer Characterization
3
Understanding the physical properties of polymers and methods for their characterization. Focusing on the significance and interplay of physical parameters and the underlying physics of the characterization methods. Prereq: CHEM 365.

773 Organic Chemistry of Coatings
3
Synthesis of polymers used in coating systems, polymers having tailored and defined architectures; crosslinking reactions used in coatings. Prereq: CPM 741.

775 Color and Appearance
3

777 Physical Chemistry of Polymers
4
Examines the interrelationships among polymer structure, morphology, physical state and properties. Key aspects include molecular weight, and its distribution, and the organization of the atoms along the polymer chain. Prereq: CPM 673.

782 Physical Chemistry of Coatings
3

**242 Advanced News Photography (CCN)**

3

Exploration or photography in all phases of news. Introduction to techniques of photojournalism, including composition, lighting, and computerized editing of news photos. Prereq: COMM 200.

**260 Principles of Internet Web-Based Design**

3

This course aims to orient students to Web concepts, design, presentation, and evaluation. Prereq: CSCI 114 or 116.

**261 Introduction to Web Development**

3

Introduces the tools used by Web Development professionals, including HTML, Web editors, imaging software, Javascript, and Acrobat PDF format. Prereq: CSCI 114 or 116.

**271 Listening and Nonverbal Communication (CCN)**

3

Theory and practice of effective listening; nonverbal aspects of human communication.

**301 Rhetorical Traditions**

3

Historical/descriptive examination of rhetorical theory from the classical through modern periods.

**308 Business and Professional Speaking**

3

Oral and written communication skills for professional and business settings. Includes resume, cover letter and memo writing; interpersonal and group applications; and interviewing and professional presentations emphasis. Prereq: COMM 110.

**310 Advanced Media Writing**

3

Construction of professional quality messages for print, public relations, and broadcast. Prereq: B or better in COMM 200.

**312 Oral Performance Studies**

3

Study and practice of the principles involved in oral performance. Includes the development of vocal qualities and articulation, as well as the analysis of literary texts representing a variety of genres and formats of interpretation. Prereq: COMM 110.

**313 Editorial Processes**

3

Principles of print media copy-editing, headline composition, publication design, photo editing, and computer editing. Prereq: COMM 200.

**315 Small Group Communication**

3

Focus on group processes, methods of problem solving, parliamentary procedures, and relational components of group interaction.

**316 Conflict Communication**

3

Exploration of conflict interaction in business and public sectors; application of negotiation strategies, decision-making, problem-solving, and bargaining. Prereq: completion of pre-communication degree requirements.
318 Argumentation and Advocacy  
Theory and process of argumentation with practical experience in preparation and delivery of formal and informal arguments. Prereq: COMM 110.

320 Communication Analysis  
Overview and application of basic methods used in communication analysis. Mass Communication and Speech Communication majors must earn a grade of B or better.

321 Introduction to Communication Theory  
Major theoretical approaches to the study of communication from social scientific and humanistic traditions.

325 Applied Research Methods  
See Political Science for description.

340, 341 Social Research Methods, Laboratory  
See Sociology for description.

345 Principles of Broadcast Production  
Creation, critique, and analysis of audio production and single camera video productions with special emphasis on radio and television news. Prereq: COMM 310.

362 Principles of Design for Print  
Applications of various design principles and pagination techniques to cognitive problem solving involved in developing material for publication.

363 Advanced Web Design  
Students build advanced competence in developing and maintaining websites using advanced web design programming. Prereq: COMM 260, 261.

375 Principles and Practices of Advertising and Public Relations  
Advertising and public relations are studied theoretically as professional fields; theory, principles, and practices are used in creating strategic communication campaigns. Prereq: COMM 200, completion of pre-Communication major degree requirements.

376 Advertising Creative Strategies  
Introduces students to creative ideas in advertising and their translation into words and images. Emphasis is on strategic approaches to creative decision-making across all media. Prereq: COMM 375.

377 Advertising Media Planning  
This course introduces students to the basic concepts of media planning and buying in advertising. Emphasis is placed on strategic approaches to the media placement process across all forms of media. Prereq: COMM 375.

380 Health Communication I  
This course is designed to introduce students to the field of health communication. Students will learn about models of health communication, doctor-patient communication, designing and implementing health campaigns, and organizational communication in health organizations.

381 Patient-Provider Communication  
This course is designed to provide verbal and nonverbal strategies to improve patient-provider interaction during the medical visit and subsequent sessions involving the diagnosis and treatment of health-related conditions. Prereq: B or better in COMM 112, 114, 212.

383 Organizational Communication I  
Exploration of the theory of management communication practices in organizations. Emphasis on the formal structure and interpersonal aspects of supervisor-subordinate relations. Prereq: Junior standing. Cross-listed with BUSN.

386 Organizational Interviewing  
This course goes beyond just practicing interviewing skills to learn the theories and research that back the methods taught. Management Communication majors will learn about conducting job interviews and performance reviews. For Public Relations majors, probing, survey, and persuasive interviews will be particularly useful. Prereq: COMM 383.

402/602 Contemporary Rhetoric  
Examination of the use of public address in the contemporary culture to identify styles of usage and ethical practices employed by communicators. Prereq: Junior standing.

412/612 Gender and Communication  
Exploration of philosophical and theoretical issues surrounding gender construction, communication, and culture. Focus on ways in which communication in families, schools, media, and other institutions create and sustain gender roles.

421/621 History of Journalism  
The history and development of journalism as shaped by the political and social environment. Prereq: COMM 310.

425 Specialty Writing  
Methods and practice of writing features and opinion for print publications. Prereq: COMM 310.

431 Communication Ethics  
Study of ethical theories and their role in conceptions of mass media responsibility. Capstone course.

433/633 Legal Communication  
Verbal and nonverbal factors in the legal interview, negotiation and conflict resolution, jury selection, opening statements, witness examination, closing arguments, and jury deliberation. Designed for students interested in applied communication theory or pre-law.

434/634 Communication Law  
Exploration of speech and press protections of the First Amendment; includes libel, privacy, electronic media regulation, and speech regulation.

435/635 Popular Culture and Mass Media  
Analysis of popular culture messages (television, cinema, music, and radio) presented by the media as an expression of social values.
436/636 Issues in Mass Communication
Studies of mass communication topics in interaction with social, cultural, political, and economic realities. Media impact on national life and thought. May be repeated. Prereq: Junior standing.

442 Digital Media and Society
Explores the impact of technological developments on media and mediated culture.

443/643 Mass Media and Public Opinion
Overview of theories and methodologies used in the study of the role of mass media in attitude formation, attitude change, and public opinion. Prereq: Junior standing.

445 Advanced Broadcast Production
Development of skills in the creation, critique, and analysis of television productions in the studio and in the field. Prereq: COMM 345.

446 Television Studio Production
This course introduces students to studio and control practices as well as producing and anchoring newscasts and talk shows. Students will learn basic production skills including all areas of studio production by working in Bison Information Network’s TV studio. Prereq: COMM 345.

450/650 Issues in Communication
Development of skills in the creation, critique, and analysis of television productions in the studio and in the field. Prereq: COMM 345. May be repeated.

451/651 Directing Forensics
Theory and practical strategies for coaching individual speaking events and debate at the high school or collegiate levels. Prereq: Junior standing.

462 Web Database Programming
Introduces students to Web database concepts, design, normalization processes, and implementation. Prereq: COMM 260, 261.

465 Convergence Media
Exposure to advanced reporting and writing methods, multimedia journalism, and blog technology for converged media. Prereq: COMM 260, 261, 363.

472/672 Public Relations Campaigns
Social science research as applied to public relations, case study analysis, construction, and implementation of public relations campaigns. Prereq: COMM 370.

473 Case Study in Public Relations
Advanced study of applied public relations theory through intense case study analysis and research focused on organizations. Case studies from the Public Relations Society of America are used. Prereq: COMM 472.

474 Communication Campaigns
This course builds on the experience of other social science courses, and provides a foundation for purposive uses of communication to achieve pre-determined informational, attitudinal, and/or behavioral objectives.

476 Advertising Campaign Practicum
This course challenges students to apply the knowledge they have gained in previous advertising classes. Specifically, students will design an advertising campaign including market research, creative execution, media planning, and account management. Prereq: COMM 376, 377.

477 Research for Strategic Communication
Students in advertising and public relations must respond to changing contexts as they design and conduct campaigns. This course provides tailored strategies needed by our students as they move into the professional advertising and public relations environments. Prereq: COMM 375.

480 Health Communication II
Designed to introduce students to advanced theory and research in health communication. Course topics include interpersonal health communication, intervention design, and global perspectives on health communication. Prereq: COMM 380.

482 Organizational Communication II
Examination of the structure and function of interpersonal communication networks in formal organizations, methods of network analysis. Prereq: COMM 383.

484 Organizational Advocacy and Issue Management
Exploration of communication theories and campaigns to assess the impact of historical and contemporary advocacy in both for-profit and non-profit sectors. Prereq: COMM 383.

485 Crisis Communication in Public Relations
Crisis communication practices in organizations of all types with emphasis on planning, emergency communication, image restoration, and organizational learning. Prereq: COMM 110. Cross-listed with SAFE.

486 Principles of Risk Communication
Examination of key concepts of risk communication theory, including their practical application to crisis or emergency situations. Prereq: Completion of pre-Communication major degree requirements.

487 Organizational Power and Leadership
This course emphasizes communicative dimensions of organizational leadership. Theory will be discussed as a foundation for leadership practices. Prereq: COMM 383.

488 Social Influence and Organizational Change
Exploration of research and theory of social influence and change in organizations. Focus on interpersonal, group, and organizational influence processes and systems view of organizational change efforts. Prereq: COMM 383.

489 Communication Capstone
This course is designed to integrate and assess the student’s knowledge of the major through the development of a project.

700 Research Methods in Communication
Introduction to research planning and design, methods of research, and presentation of research results. Masters and Doctoral students have different sections.
702 Introduction to College Teaching in the Humanities and Social Sciences 3
Techniques for effective teaching and assessing learning at the college level. Includes special issues and responsibilities related to college-level teaching.

703 [701] Advanced Research Methods in Communication II 3
Advanced research methods in communication; focus on action-oriented approaches to research. Prereq: COMM 701, COMM PhD students only.

704 Qualitative Research Methods in Communication 3
Introduction to theory and practice of qualitative research in communication. Prereq: COMM 700.

705 Advanced Communication Theory 3
Provides doctoral students with a structured forum for discussion of communication theory and research. Prereq: COMM 711.

706 Advanced Interpersonal Communication 3
Interpersonal communication theory and research methods are developed from the perspectives of uncertainty reduction, conflict management, relationship reciprocity, constructivism, compliance gaining, discourse dominance, and relational dynamics.

708 Advanced Qualitative Methods in Communication Research 3
In-depth application of one of the methods used in qualitative communication research. Prereq: SOC 700.

710 Advanced Quantitative Methods in Communication Research 3
Application of quantitative methods to communication research, with an emphasis on testing theoretically driven hypotheses, operationalizing variables, designing valid and reliable measures, implementing a research design, analyzing data, and reporting findings. Prereq: SOC 701, STAT 725.

714 Marriage and Family Communication 3
Focuses on the dynamics of marriage and family communication. Theoretical frameworks include: symbolic interactionism; social constructionism; relational dialectics; social penetration; developmental theory; and relational culture. Prereq: COMM 700.

715 Theories of Small Group Communication 3
Survey of theoretical constructs of communication in the small group setting. Examination of current methods of research.

721 Intercultural Communication 3
Advanced theories of verbal and nonverbal behavior, attitudes, and communication styles that affect interaction between cultural groups.

725 Communication and Change 3
Investigation of the diffusion process and related variables affecting an innovation’s rate of adoption.

731 Communication Ethics Seminar 3
Study of ethical theories and their relationship to the mass media.

750 Advanced Issues in Communications 3
Advanced theory and philosophy of research issues in the field of communication. May be repeated.

752 Theory of Argument 3
Philosophy and theory of argumentation; including exploration of analytical methods employed in argumentation.

755 Rhetoric of Environmental Science 3
This course focuses on the communication (rhetoric) of science and how disciplinary conventions and ideological commitments shape the language of environmental science in understanding “external realities.”

761 Survey of Rhetorical Theory 3
Historical-descriptive examination of rhetorical theory from the classical through modern periods.

767 Rhetorical Criticism 3
Survey of critical methods of inquiry that may be applied to oral discourse and frameworks for critically evaluating communication processes and products.

780 Health Communication 3
Advanced theories and principles of communication in the health professions.

782 Theories of Persuasion 3
Survey of the theories related to persuasion, attitudes, and values of societal groups, and the assessment of attitudes and values held by the public.

783 Advanced Organizational Communication I 3
Exploration of the theory of management communication practices in organizations. Emphasis on the formal structure of and interpersonal aspects of supervisor-subordinate relations.

784 Advanced Organizational Communication II 3
Study of the structure and function of communication interaction in formal organizations and survey of methods of analysis including the communication audit. Also includes models of introducing innovations.

785 Advanced Crisis Communication in Public Relations 3
Long- and short-term issues for managing communication related to organizational crises are discussed in the stages of pre-crisis, crisis and post-crisis. Cross-listed with SAFE.

786 Risk Communication 3
Explores the relationship between communication strategies and risk perception, assessment, and management. Cross-listed with SAFE.

<td>Analyze theories, principles, strategies and practices of community change and development from a multidisciplinary perspective in order to construct a personal framework for the practice of community economic development. Prereq: CED 709.</td>
<td></td>
</tr>
<tr>
<td>713</td>
<td>Community Development II: Organizing for Community Change</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>An examination of the role of civil society in community planning efforts, the connection between social relationships and economic activity, the structure and implications of power, conflict management, inclusiveness, and equitable change. Prereq: CED 709.</td>
<td></td>
</tr>
<tr>
<td>715</td>
<td>Community Analysis: Introduction to Methods</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>An introduction to the research methods relevant to community development, strategies for reporting and applying findings in community action, and issues of research ethics and inclusiveness. Prereq: CED 709.</td>
<td></td>
</tr>
<tr>
<td>717</td>
<td>Community and Regional Economic Policy and Analysis</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>Explores theories of economic growth, community economic and industrial base, sources of economic growth or decline, and strategies for local and regional economic development. Prereq: CED 709.</td>
<td></td>
</tr>
<tr>
<td>719</td>
<td>Community Natural Resource Management</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>Theoretical frameworks, methodological investigation, and applied practices of natural resource development as a component of community economic development. Prereq: CED 709.</td>
<td></td>
</tr>
<tr>
<td>721</td>
<td>Introduction to Native Community Development</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>Examines community development in the context of diverse tribal structures and cultures, and provides a holistic analysis of the unique histories and jurisdictional considerations of Native communities. Prereq: CED 709.</td>
<td></td>
</tr>
<tr>
<td>723</td>
<td>Building Native Community/Economic Capacity</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>Non-Western approaches to helping Native communities build their economic capacity through participatory, culture-centered, and strength-based approaches to development. Prereq: CED 709.</td>
<td></td>
</tr>
<tr>
<td>725</td>
<td>Wellness in Native Communities</td>
<td>1</td>
</tr>
<tr>
<td></td>
<td>Highlights health care issues challenging Native communities and identifies strategies and practices to address those challenges. Prereq: CED 709.</td>
<td></td>
</tr>
<tr>
<td>726</td>
<td>Youth Development in Native Communities</td>
<td>1</td>
</tr>
<tr>
<td></td>
<td>Contemporary issues facing Native youth, including demographics, early parenting, juvenile justice, education, health, employment, and youth-elder connections. Prereq: CED 709.</td>
<td></td>
</tr>
<tr>
<td>727</td>
<td>Indian Country Agriculture and Natural Resources</td>
<td>1</td>
</tr>
<tr>
<td></td>
<td>Explores the impact of structural inequality, globalization, and sovereignty on planning, sustainability, and development of agriculture and natural resources on Native American reservations. Prereq: CE 709.</td>
<td></td>
</tr>
<tr>
<td>728</td>
<td>Role of Tribal Colleges in Economic Development</td>
<td>1</td>
</tr>
<tr>
<td></td>
<td>Examines the tribal college model of economic development using a social capital analytical framework. Prereq: CED 709.</td>
<td></td>
</tr>
<tr>
<td>731</td>
<td>Ecological Economics</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>Examines the synthesis of ecology and economic utility through the inherent interdependence, jointness, and potential complementarity between the ecology and economy of a place. Prereq: CED 709.</td>
<td></td>
</tr>
<tr>
<td>733</td>
<td>Sustainable Communities</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>Links the management of natural capital in communities and society to their implications for community sustainability in terms of economic vitality, social well-being, and ecosystem health. Prereq: CED 709.</td>
<td></td>
</tr>
<tr>
<td>735</td>
<td>Policy and Politics of Coastal Areas</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>This course explores public policy and programs pertaining to America's coastlines as it pertains to community economic development. Prereq: CED 709.</td>
<td></td>
</tr>
<tr>
<td>741</td>
<td>Economic Development Strategies and Programs</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>This course covers the most widely used strategies and programs for economic development within an action planning process, including retention and expansion of business and industry, retail development, downtown revitalization, incubating new firm creation, industrial attraction, and tourism development. Prereq: CED 709.</td>
<td></td>
</tr>
<tr>
<td>742</td>
<td>Economic and Fiscal Impact Analysis</td>
<td>1</td>
</tr>
<tr>
<td></td>
<td>Examines the underlying concepts of and the tools for conducting community economic and fiscal impact analysis. Prereq: CED 709.</td>
<td></td>
</tr>
<tr>
<td>743</td>
<td>Cost-Benefit Analysis</td>
<td>1</td>
</tr>
<tr>
<td></td>
<td>This course examines cost-benefit analysis, cost effectiveness, and cost-utility analysis in the context of community economic development. Prereq: CED 709.</td>
<td></td>
</tr>
<tr>
<td>744</td>
<td>Local Economic Analysis</td>
<td>1</td>
</tr>
<tr>
<td></td>
<td>This course offers descriptive tools of community economic analysis to assess the current or past state of a community’s economy, to predict the future of that economy, and to help leaders make effective economic decisions. Prereq: CED 709.</td>
<td></td>
</tr>
<tr>
<td>745</td>
<td>Land Management Planning</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>Examines the principles and practices of real estate, including legal, economic, and social implications from the viewpoint of real estate practitioners, investors, and society. The course covers land use programs and methods of zoning. Prereq: CED 709.</td>
<td></td>
</tr>
<tr>
<td>752</td>
<td>Basic Grant Development and Management</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>Introduces the grant development and management process, explores steps in the search for funding sources, examines program budgets and justifications, and lists plans for program sustainability. Prereq: CED 709.</td>
<td></td>
</tr>
</tbody>
</table>
753 Not-for-Profit Management 3
This course examines the unique management issues faced by not-for-profit community economic development organizations in terms of policy setting, participation, administration, and accountability. Prereq: CED 709.

755 Community Leadership and Capacity Building 3
This course defines and applies leadership strategies to the community economic development context. The course examines the link between leadership and community capacity. Prereq: CED 709.
COMPUTER SCIENCE (CSCI)
Slator, Head; Denton, Do, Jin, King, Knudson, Kong, Li, Magel, Nygard, Perrizo, Salem, Ubhaya, WaliaYan, Zhang

COURSES

114 Microcomputer Packages (CCN) 3
General introduction to computer concepts, operating systems, the internet, word processing, spreadsheets, database management and presentation software. Credit awarded only for CSCI 114 or 116, not both. (ND:COMPSC)

116 Business Use of Computers (CCN) 4
Exploration of how microcomputers are used in business. Use of word processing, spreadsheet, database, graphing, and telecommunication applications. Credit awarded only for CSCI 114 or 116, not both. (ND:COMPSC)

122 Visual BASIC (CCN) 3
Introduction to programming in the BASIC/Visual BASIC language. (ND:COMPSC)

125 Beginning COBOL (CCN) 3
Introduction to programming in the COBOL language. (ND:COMPSC)

126 Beginning FORTRAN (CCN) 3
Introduction to programming in the FORTRAN language. Prereq: MATH 103 or 107.

155 Immigration (CCN) 2
Introduction to programming in the current language of CSCI 160. For transfer students with CSCI 160 or equivalent, in a language different from that used here. Prereq: CSCI 160.

159 Computer Science Problem Solving 3
Computer-based problem solving techniques are introduced in the context of the Internet, including web-site development. Programming concepts, data structures and algorithms, as well as modeling techniques are discussed. (ND:COMPSC)

160 Computer Science I (CCN) 4
Introduction to computer science including problem solving, algorithm development, and structured programming in a high-level language. Emphasis on design, coding, testing, and documentation of programs using accepted standards of style.

161 Computer Science II (CCN) 4
Advanced concepts in computer science including data structures, algorithm analysis, standard problems such as searching and sorting and memory management issues. Prereq: CSCI 160.

162 Intense FORTRAN (CCN) 2
Intensive introduction to FORTRAN and its use in engineering applications. Students receive an introduction to numerical analysis, particularly error analysis. Prereq: MATH 103 or 107.

172 Intermediate Visual BASIC 3
Elements of Visual Basic for those with previous programming background. Topics include fundamental constructs, Active X controls, file processing, database management, and SQL. Prereq: one semester/experience in any programming language.

212 Self-Paced C++ 1
Introduction to the C++ programming language. Students complete exercises and programming assignments at their own pace. Prereq: Programming skill in another language.

214 Self-Paced C 1
Introduction to the C programming language. Students complete exercises and programming assignments at their own pace. Prereq: CSCI 160.

222 Discrete Mathematics 3
Sets, functions, relations, logic, methods of proof, mathematical induction, combinatorics, recurrence relations, generating functions. Prereq: CSCI 160.

227, 228 Computing Fundamentals I, II 3 each
Two-semester sequence focused on problem solving and writing computer programs in a modern high-level programming language in a state-of-the-art programming environment. Second semester includes an introduction to the object-oriented programming paradigm. Prereq: MATH 103 or 107, CSCI 227 respectively.

275 Digital Systems I 3
See Electrical and Computer Engineering for description.

277 Introduction to UNIX 3
This course introduces students to the UNIX operating system environment. Topics include basic UNIX commands, operating system installation and administration, application installation, use of alternative shells, web servers, and system security. Cross-listed with MIS.

315 System Analysis and Design 3
Introduction to the front end of the software development life cycle. Includes various modern concepts, techniques, and tools for analyzing and designing well-structured software systems. Prereq: CSCI 160.

316 System Testing and Maintenance 3
Introduction to the back end of the software development life cycle. Includes various modern concepts, techniques, and tools for testing and maintaining software systems. Prereq: CSCI 315.

335 Theoretical Computer Science I 3
Models of computation, regular expressions, finite automata, Kleene’s Theorem, lexical analysis, context-free grammars, pushdown automata, introduction to parsing. Prereq: CSCI 161, 222.

336 Theoretical Computer Science II 3
Parsing techniques, context-free languages, Turing machines, recursive and recursively enumerable languages, unrestricted grammars, unsolvable decision problems, computability, introduction to complexity. Prereq: CSCI 335.

345 Topics on Personal Computers 3
Exploration of some aspects of personal computers not covered in other courses, varies each time it is offered. May be repeated. Prereq: CSCI 161.
366 Files for Database Systems
File organization techniques, design, and implementation of database systems. Prereq: CSCI 161.

371 Web Scripting Languages
This course examines Scripting Languages and their applications. Emphasis will be placed on web scripting. A representative set of scripting languages will be covered. Prereq: CSCI 122. Cross-listed with MIS.

372 Comparative Programming Languages
Explanation of the concept and impact of a block-structured language. Several languages will be compared with respect to application, suitability, syntax, and semantics. Prereq: CSCI 161 or 228.

373 Assembly Programming
Machine language, assembly language, and related hardware concepts, assembly language programming, macros and subroutines, system facilities and macros. Prereq: CSCI 160. Cross-listed with ECE.

374 Computer Organization and Architecture
Organization and structure of the major sections of a computer: CPU, memory, and I/O system organization and implementation issues. Prereq: CSCI 373. Cross-listed with ECE.

413/613 Principles of Software Engineering
An introduction to concepts of software engineering. Software development activities through a project. Lifecycle models, requirements, specification, design, implementation, and testing. Software quality, tools, and techniques. A term paper for graduate students. Prereq: CSCI 161.

418/618 Simulation Models
Fundamental techniques involved in using a computer to simulate business, social, and industrial systems. Includes principles of random variate generation, statistical sampling, and design of experiments. Prereq: STAT 367.

426/626 Introduction to Artificial Intelligence
Introduction to artificial intelligence for undergraduates. Includes basic AI concepts and techniques. Prereq: CSCI 372.

436/636 Intelligent Agents
Fundamentals of Intelligent Agents technology, agent communication languages, applications, and intelligent agents development. Prereq: CSCI 372.

445 Software Projects Capstone
Presentations on the mechanics of working cooperatively as a team doing commercial software development. Students work in teams to deliver realistic work products to local businesses. Course presentations cover teamwork, software development pragmatics, and software documentation. Prereq: CSCI 366. Coreq: CSCI 489.

448/648 Digital Image Processing
Introduction to fundamental principles and techniques of digital image processing; image enhancement, image compression, and image analysis. Emphasis on hands-on experience in using software development packages and implementation of various image processing algorithms. Prereq: CSCI 372, MATH 166.

453/653 Linear Programming and Network Flows
Linear programming models and applications, primal and dual formulations, computational procedures; introduction to networks, maximum flow, and shortest path problems. Prereq: MATH 265.

454/654 Operations Research
Deterministic and probabilistic models of operations research; networks and project management, dynamic programming, non-linear programming, inventory, queuing, reliability, stochastic processes, and simulation. Prereq: CSCI 453/653, STAT 367.

458/658 Microcomputer Graphics
Information on the techniques by which computers generate images of 2 and 3D objects. Principles to guide the use of computer graphics to enhance human-computer interaction. Prereq: CSCI 372, MATH 146 or 165.

459/659 Foundations of Computer Networks
This is an introduction to fundamental concepts for the design and analysis of broadband networks. Topics include resource allocation, routing, congestion control, medium access, scheduling, and multicast. Concepts are applied to state-of-the-art systems and protocols such as current and future Internet protocols.

460/660 Dynamic Programming
Basic principles and algorithms of dynamic programming as applied to sequential decision problems in CS and OR. Prereq: MATH 166.

467/667 Algorithm Analysis
Design, correctness, and analysis of algorithms and data structures. Prereq: MATH 166, CSCI 161 and CSCI 222 or MATH 270.

468/668 Database Systems Design
Overview of the maintenance and manipulation of databases. Includes a large project in C++. Prereq: CSCI 366.

469/669 Network Security
Cryptography and its application to network and operating system security; authentication; email, web, IP, and wireless security; firewalls and intrusion detection techniques; security threats and countermeasures; legal and ethical issues. Prereq: CSCI 222, 459/659, C/C++ or JAVA.

473 Foundations of the Digital Enterprise
This course is designed to familiarize individuals with current and emerging electronic commerce technologies using the Internet. Prereq: CSCI 372.

474 Operating Systems Concepts
How operating systems manage the resources of a computer. Topics include processes, concurrency, scheduling, deadlocks, memory allocation, virtual and secondary storage. Prereq: CSCI 374.

475/675 Operating Systems Design
Advanced operating systems topics such as protection, errors, and distributed systems. Case studies of representative operating systems. Students work in small teams to implement their own basic operating systems. Prereq: CSCI 474.
476/676 Computer Forensics 3
This course introduces principles, techniques, tools, and practical skills necessary to perform rudimentary investigations of incidents in which computers play a significant or interesting role. Prereq: CSCI 474.

477/677 Object-Oriented Systems 3
Introduction to the concepts and advantages of object-oriented computer systems. Introduces exercises with at least one such language. Prereq: CSCI 372.

479/679 Introduction to Data Mining 3
Introduction to data mining includes basic data mining techniques, querying, spreadsheet data mining, data warehouses, evaluation techniques, knowledge discovery in databases, examples and a survey of advanced techniques. Prereq: Basic database course (e.g. CSCI 366, 468, 668, or 765).

488/688 Human-Computer Interaction 3
Survey of the methodologies and alternatives used in developing and evaluating human-computer interfaces. Prereq: CSCI 372.

489/689 Social Implications of Computers 3
Capstone course for Computer Science. Presentation and discussion of several ethical and social issues that have arisen from the introduction of the computer including copy-protected software and liability for computer software errors. Prereq: CSCI 372.

702 Performance Evaluation 3
Examination of basic techniques used to evaluate multi-programming systems. Both queuing models and other analytical approaches are constructed with simulation and direct measurements of actual systems. Prereq: CSCI 475.

708 Foundations of Programming 3
Introduction to formalisms, in which computer programs are considered as mathematical objects, including weakest precondition and predicate calculus. Prereq: CSCI 336.

713 Software Development Processes 3
This course is designed as a breadth course on the software engineering process. Basic concepts are reviewed and reassured to create a basis for higher concepts and techniques.

714 Software Project Planning and Estimation 3
This course is designed to introduce the student to concepts and techniques of how to plan for a software project. This includes time and effort estimation, planning and teaming the project, and managing the development activities. Prereq: CSCI 713.

715 Software Requirements Definition and Analysis 3
This course is designed to make the student able to identify and capture requirements for a software system and be able to document and assess the requirements. Prereq: CSCI 713.

716 Software Design 3
This course covers both architectural design and module design. Students receive practice using a set of patterns to produce software designs with several different types of architecture. Substantial presentation and practice with the UML modeling language is provided. Prereq: CSCI 713.

717 Software Construction 3
This course covers the fundamentals of software construction including programming and evaluation of the source code. Students receive a good grounding in and extensive practice with the comprehensive libraries associated with a modern programming language. Prereq: CSCI 713.

718 Software Testing and Debugging 3
This course covers the goals, practices, evaluation and limitations of software testing and software debugging. Students receive practice in developing and using test plans and various testing and debugging techniques. Prereq: CSCI 713.

722 Compiler Construction 3

724 Survey of Artificial Intelligence 3
Survey of major areas of AI including theorem proving, heuristic search, problem solving, computer analysis of scenes, robotics, natural language understanding, and knowledge-based systems. Prereq: CSCI 372.

728 Computer Graphics 3
Principles and algorithms used in computer graphics packages. Emphasis on raster graphics, clipping, hidden-surface elimination, ray-tracing, radiosity.

730 Office Information Systems 3
Exploration of the evolution of the office since the introduction of the computer. Examination of the introduction of computers, word processors, database management systems, networks, and AI into the office. Prereq: CSCI 160.

732 Introduction to Bioinformatics 3
See Mathematics for description.

734 Expert Systems 3
Examination of types of expert systems, their powers and limitations. Students write their own expert system. Prereq: CSCI 724.

735 Neural Networks 3
Introduction to the parallel processing paradigms that have been developed recently including neuronetworks and genetic algorithms. Students will work on projects using these tools. Prereq: CSCI 724. Cross-listed with PSYC and IME 774.

737 System Simulation 3

741 Algorithm Analysis 3
Algorithm design and analysis, asymptotic analysis, worst and average case, recurrences, generating functions, divide-and-conquer, the greedy method, search and traversal, backtracking, branch-and-bound. Prereq: CSCI 161, MATH 166.

742 Algorithms and Complexity 3
Linear and nonlinear recurrences, algebraic problems, fast Fourier transforms, lower bound theory, computational geometry, the classes P and NP-completeness, Cook’s theorem, NP-hard problems. Prereq: CSCI 741.
745 Formal Methods for Software Development 3
The course is a high level course with the aim of formal representation to be able to formally assess characteristics of software. The formal representations are based on the theoretical foundations of computer sciences such as set theory, logic or graph theory. Prereq: CSCI 713.

746 Development of Distributed Systems 3
This course is an advanced course in software engineering aiming at strategies and solutions of distributed systems. It assumes the knowledge of software engineering and particularly design and implementation of software systems, then builds on these concepts to how distributed systems are designed and implemented. Prereq: CSCI 713.

747 Software Complexity Metrics 3
This course covers complexity metrics for the entire software lifecycle. Students gain experience in using requirements metrics, design metrics, program metrics, test metrics, and planning metrics. The effectiveness and limitations of metrics in all these areas are emphasized. Prereq: CSCI 718.

758 Bioinformatics Data Mining 3
Techniques and objectives of data mining for biological data with focus on diverse data sources including graphs, sequences and text. Preparation for research in bioinformatics with focus on functional genomics problems. Prereq: CSCI 732.

759 Computational Methods in Bioinformatics 3
An introduction to computer science and operations research methods and algorithms that are used for analysis and solution of optimization and other models in bioinformatics.

760 Dynamic Programming 3
Dynamic programming as an algorithm design method, formulating and solving problems using dynamic programming, deterministic and stochastic problems in OR and CS. Prereq: MATH 166.

761 Integer Programming 3
Integer linear programs and modeling, theory and algorithms, duality and relaxation, cutting plane and branch-and-bound methods, combinational problems, total unimodularity, matching and matroids. Prereq: CSCI 653.

762 Network Flows 3
Theory and algorithms for network flow optimization including network representation data structures, basic change methods, maximum flow, shortest path, minimum cost problems, and generalized networks. Prereq: CSCI 653.

765 Introduction to Database Systems 3
Basic database concepts, models, management facilities, data structures, storage structures, data definition languages, data manipulation languages, normalization, operator implementation algorithms, transactions, correctness, reliability, distribution, performance analysis. Prereq: CSCI 366.

766 Database System Internals 3
Transaction management, processing; correctness; recoverability; serializability (conflict and view); concurrency control (2PL, BTO, SGT, multiversion); recovery; distributed systems (correctness, recovery, replication); query processing and optimization. Prereq: CSCI 765.
CONSTRUCTION MANAGEMENT AND ENGINEERING (CM&E)

Asa, DeSaram, Gao, Ge, McIntyre, Saafi, Song

COURSES

111 Introduction to Construction Management and Engineering  
This course provides an introduction to the roles and duties of construction professionals and the various career opportunities available to construction graduates. 1 lecture. F

200 Construction Documents and Codes  
This course provides an introduction to construction working drawings; methods and materials of construction; and building codes. Prereq: Construction majors only.

203 Building Construction: Methods and Materials  
This course provides an introduction to the fundamentals of building construction, materials, and methods for residential and commercial construction. Prereq: CM&E 200.

204 Construction Surveying  
This course provides an introduction to basic surveying operations, procedures, and equipment required for building construction site organization, layout, alignment, and dimension control. Laboratory topics include: surveying fieldwork, leveling instruments, transit theodolites, total stations, GPS and GIS. Prereq: MATH 105, Construction majors only.

205 Building Construction  
Introduction to planning, design, and construction of residential structures, including cost estimating and project scheduling. Computer applications. 3 lectures. S

212 Construction Graphic Communications  
This course provides an introduction to computer aided drafting (AutoCAD) for the creation of two-dimensional drawings related to the construction industry including a comprehensive final project layout using the techniques introduced in the course. Prereq: CM&E 200 and Construction majors only.

240 Financial Cost Concepts for Construction Managers  
This course provides an introduction to financial management and economic appraisal of construction projects. Topics include: accounting systems; financial documents; managing costs and cash flow; setting profit margins for bidding; time value of money; and economic evaluation of projects. Prereq: ECON 105, Construction Management major.

250 Construction Statics and Mechanics  
This course provides an introduction to the principles of statics and strength of materials with a focus on the behavior of structural components and systems in the construction industry. Prereq: MATH 165, Construction Management major.

301 Construction Technology and Equipment  
This course provides a discussion of construction techniques; analysis of equipment costs; production; methods of equipment selection; earthwork; dewatering systems; and aggregate production. Prereq: Junior standing. S

310 Construction Quality Control Management  
Discussion of inspection procedures and requirements; design and management of quality control/assurance programs for design and construction phases of a project. Includes statistical quality control methods and total quality management in construction. 2 lectures. Prereq: Junior standing. Coreq: STAT 330 or IME 460. S

315 Specifications and Contracts  
This course provides a discussion of various types of construction contracts; contract administration; specifications using CSI and AIA documents. 3 lectures. Prereq: Junior standing F

320 Soils and Foundations  
This course provides a discussion of the aspects of engineering and physical properties of soils; stress; settlement; consolidation; slope stability; earth pressure; bearing capacity; drainage; pore pressure; and foundations. 3 lectures, 1 three-hour laboratory. Prereq: CM&E 250. F

325 Fluid Mechanics for Technologists  
Basic principles of fluid mechanics are introduced with an emphasis on topics pertinent to construction management students. Topics include fluid properties, fluid statics, fluid kinematics, energy and impulse-momentum considerations in fluid flow, pumping systems, steady uniform flow in open channels, fluid measurements, and forces on immersed bodies. Prereq: ME 221. S

370 Introduction to Cost Estimating  
Includes plan reading, definitions of drawing symbols, and material takeoff for estimating quantities for a commercial construction project using the Construction Specifications Institute Technical Divisions 1 through 16. 2 lectures. Prereq: Junior standing. F

380 Construction Estimating: Quantities and Costs  
This course provides an introduction to the methods and techniques of conceptual and detailed construction estimating, including: quantity takeoffs; costs related to labor, materials, equipment, overhead and profit; and bidding strategies. Prereq: CM&E 200.

385 Construction Safety  
This course provides an introduction to the planning and administration of construction safety programs, including: history and development of federal and state construction safety standards; methods for abatement and control of job site hazards to develop safe working environments. 2 lectures. S

403/603 Scheduling and Project Control  
This course provides a discussion on the theories, principles, and techniques of construction planning and scheduling with an emphasis on time management, costs, and resources through the preparation and analysis of network schedules. Prereq: CM&E 380. F

409/609 Highway Construction  
This course discusses the employment of the mechanistic-empirical design framework to the design and construction of rigid and flexible highway pavements, including: sub-grade, base courses, surface courses, evaluation criteria (soil, climate, traffic, material and drainage), and construction/maintenance costs. Prereq: CM&E 320. S

<th>Course Code</th>
<th>Course Name</th>
<th>Credits</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>411/611</td>
<td>Construction Cost Estimating</td>
<td>4</td>
<td>This course provides an advanced discussion of construction cost estimating; labor, materials, equipment, and overhead costs; profit; and bidding strategies for construction projects. Prereq: CM&amp;E 380. S</td>
</tr>
<tr>
<td>412/612</td>
<td>Construction Management Capstone</td>
<td>3</td>
<td>This course provides a discussion of the organization of project information; contractual administration, project delivery systems; construction management methods; constructability review; value engineering; and construction productivity. Prereq: Senior standing. F</td>
</tr>
<tr>
<td>413</td>
<td>Construction Capstone</td>
<td>2</td>
<td>This capstone course provides students with hands-on real-world design and construction applications concerning an actual construction project. Meets jointly with CM&amp;E 489 and CE 489. Prereq: Senior standing.</td>
</tr>
<tr>
<td>420</td>
<td>Labor Productivity in Construction</td>
<td>3</td>
<td>This course focuses on the study of issues related to labor productivity; labor contracts and regulations; and labor resources. 3 lectures. Prereq: CM&amp;E 315. Senior standing. S</td>
</tr>
<tr>
<td>421</td>
<td>Electrical and Mechanical Construction</td>
<td>3</td>
<td>This course provides an introduction to electrical and mechanical systems, the design and construction procedures used, code-based requirements, interaction with general construction and structural components, and spatial requirements. Prereq: PHYS 211, Senior standing. S</td>
</tr>
<tr>
<td>425/625</td>
<td>Decision Making and Risk Analysis</td>
<td>3</td>
<td>Decision-making and decision theory. Decision support systems, applied risk identification, and analysis in construction activities. Computer applications. 3 lectures. Prereq: CM&amp;E 403. S</td>
</tr>
<tr>
<td>430/630</td>
<td>Land Development</td>
<td>3</td>
<td>This course provides an introduction to the practical applications of the planning, design, and construction phases of the land development process. Prereq: CM&amp;E 204, 212.F</td>
</tr>
<tr>
<td>450</td>
<td>Steel Design for Technologists</td>
<td>3</td>
<td>This course provides a discussion of the selection and design of structural steel systems and methods of construction assembly. 3 lectures. Prereq: CM&amp;E 250. F</td>
</tr>
<tr>
<td>453</td>
<td>Concrete Design and Construction</td>
<td>3</td>
<td>This course provides an introduction to the fundamental concepts of concrete construction from both design and construction perspectives. 3 lectures. Prereq: CM&amp;E 250. S</td>
</tr>
<tr>
<td>460/660</td>
<td>Infrastructure Management</td>
<td>3</td>
<td>This course provides an introduction to the methodologies, tools, and techniques of infrastructure management. Course topics focus on performance measures; deterioration modeling; life-cycle costs; optimization; budgeting; financial management; and policy analysis. Prereq: Junior standing.</td>
</tr>
<tr>
<td>465/665</td>
<td>Bridge Engineering and Management</td>
<td>3</td>
<td>This course provides an introduction to the planning, design, construction, and management concepts of structural steel and reinforced concrete bridges, including: application of AASHTO LRFD specifications and latest developments in bridge management systems. Prereq: Senior standing.</td>
</tr>
<tr>
<td>470/670</td>
<td>Information Technologies for Construction Managers</td>
<td>3</td>
<td>This course provides an introduction to the applications and techniques of information technologies used in construction. Topics to include: operational concepts and computer software packages for estimating, scheduling, data management, CAD, and automation. Prereq: CM&amp;E 200 and CM&amp;E 212.</td>
</tr>
<tr>
<td>489</td>
<td>Construction Design Capstone</td>
<td>3</td>
<td>This course focuses on the design and construction aspects of an actual construction project. Prereq: Senior standing in Construction Engineering.</td>
</tr>
<tr>
<td>701</td>
<td>Construction Technology and Equipment</td>
<td>4</td>
<td>This course provides an advanced discussion of construction techniques; analysis of equipment costs; production; methods of equipment selection; earthwork; dewatering systems; and aggregate production. Prereq: CM&amp;E 301.</td>
</tr>
<tr>
<td>705</td>
<td>Building Construction</td>
<td>3</td>
<td>This course provides an advanced discussion of the fundamentals of building construction, including building materials and construction methods for both residential and commercial structures. Prereq: CM&amp;E 203.</td>
</tr>
<tr>
<td>710</td>
<td>Managing for Quality in Construction Organizations</td>
<td>3</td>
<td>This course provides an advanced study of the fundamentals of construction management and managing organizational dynamics for improvement, specifically related to construction companies. Prereq: CM&amp;E 310.</td>
</tr>
<tr>
<td>715</td>
<td>Construction Specifications and Contracts</td>
<td>3</td>
<td>This course provides a discussion of the procedures used to prepare and administer construction specifications and contracts, including: Construction Specification Institute format, AIA Documents, General Conditions, and liabilities and incentives for various construction contracts. Prereq: CM&amp;E 315.</td>
</tr>
<tr>
<td>720</td>
<td>Geotechnical Construction</td>
<td>3</td>
<td>This course provides an advanced discussion of the construction and management practices associated with geotechnical construction, including a variety of field applications for various geotechnical construction methods; a discussion of foundation construction; and the management practices related to geotechnical construction. Prereq: CM&amp;E 320.</td>
</tr>
<tr>
<td>725</td>
<td>Underground Construction</td>
<td>3</td>
<td>This course provides a discussion of the design and construction of underground infrastructure systems, including: tunnels, microtunnels, shafts, trenchless technologies, drilling, tunnel boring, and ground stabilization. Prereq: CM&amp;E 320.</td>
</tr>
<tr>
<td>740</td>
<td>Financial and Economic Concepts for Construction Managers</td>
<td>3</td>
<td>This course provides an advanced discussion of financial management and the economic appraisal of construction projects, including: accounting systems, financial documents, managing costs and cash flow, setting profit margins for bidding, time value of money, and economic evaluation of projects. Prereq: CM&amp;E 240.</td>
</tr>
<tr>
<td>753</td>
<td>Concrete Design and Construction</td>
<td>3</td>
<td>This course provides a discussion of the fundamentals of concrete construction, including: the properties of Portland cement concrete; concrete quality control and application; concrete additives and curing; concrete placement; reinforcement; and current technologies of concrete construction. Prereq: CM&amp;E 453.</td>
</tr>
</tbody>
</table>
**775 Facilities Management**  
This course provides an advanced discussion of the principles and practices needed to successfully construct and manage commercial, industrial and institutional facilities, buildings, and physical plants, from the perspective of a construction manager. Prereq: CM&E 412.

**780 Construction Systems and Temporary Structures**  
This course provides an advanced discussion of the planning, selecting and designing a variety of construction systems and temporary support and access structures, such as: formwork, falsework, earth retaining structures, cofferdams, diaphragms, dewatering, shoring, bracing, rigging, erosion and sedimentation, and blasting. Prereq: CM&E 301.
COUNSELOR EDUCATION (CNED)
Buchholz, Hannon, Nelson, Nielsen, Sommer

COURSES
(All courses require admission to the Counselor Education program.)

710 Counseling Techniques 3
Basic principles and techniques in the counseling process. Emphasis given to counseling techniques from several counseling orientations.

711 Counseling Theory 3
Study of various theories and philosophies of counseling and therapy.

712 Dynamics of Self 3
Application of personality theory and the life stages to human behavior and the counseling process.

713 Assessment Techniques 3
Techniques and procedures of studying the individual and diagnostic process in identifying client issues. Prereq: CNED 710, 711.

714 Career Counseling and Testing 3
Study of theories of career development and the use of career information and testing in career counseling.

715 Professional Orientation and Ethics 3
Introduction to dealing with professional and ethical responsibilities and multicultural issues in the counseling field.

716 Social and Cultural Foundations of Counseling 3
Issues and trends in counseling with multicultural and diverse populations within our society. Prereq: CNED 710, 711.

720 Group Counseling 3
Study of group counseling principles appropriate to various counseling settings including schools, treatment centers, and agencies. Includes a group experience. Prereq: CNED 710, 711.

723 Assessment and Diagnosis in Counseling 3
Assessment and diagnostic procedures: how to use appropriate tools for accurate diagnosis and assessment, how to interpret assessment and diagnostic instruments, and how to make effective use of assessment results in counseling with clients.

728 Guidance Administration and Consulting 3
Role of administrators, counseling personnel, and teachers in the management of and consulting in K-12 counseling programs.

729 Professional K-12 School Counseling 3
Overview of principles and functions of a K-12 school counseling program, and examination of K-12 school counseling issues and resources. Prereq: CNED 728.

730 Sexual Functioning and Abuse Issues in Counseling 3
Study of sexual dysfunction, incest and abuse, and strategies of intervention and counseling with victims and perpetrators. Prereq: CNED 710, 711.

731 Counseling Children and Adolescents 3
Counseling with children and adolescents including specific counseling strategies; mental, physical, and emotional development issues related to counseling. Prereq: CNED 710, 711.

732 Family Counseling 3
Principles and techniques of family counseling, study of family dynamics, family systems, and theories of family counseling. Prereq: CNED 710, 711.

733 Marital Counseling 3
Survey of marital counseling theories and techniques; analyses of dysfunctional communications. Prereq: CNED 710, 711.

734 Dynamics of Addiction 3
Study of the theories and scope of addiction from both the personal and social viewpoints with consideration given to the impact on the family. Prereq: CNED 710, 711.

(The following courses require Admission to doctoral program and completion of master’s program courses.)

763 Advanced Testing and Appraisal 3
Theory, methods and techniques of assessment of client strengths and deficits will be examined. Common instruments used in counseling will be studied, as well as their administration and interpretation.

767 Advanced Group Counseling 3
Theory and practice of group facilitation will be covered, building on the student’s current expertise. Supervised practice in group work is included.

769 Theory and Practice for Counselor Educators 3
Instructional models, educational techniques and the unique relationship between counselor educator and counseling student will be featured. Supervised experience in facilitating student learning will be included as well as feedback from the professor and fellow classmates.

770 Counselor Supervision 3
Theory and practice of counselor supervision. Major schools of thought in counselor supervision will be examined, as well as the process of supervision and relationship between supervisor and supervisee.

771 Counselor Education and Supervision in a Multicultural Society 3
An overview of becoming a professor in Counselor Education. The nature, scope and vista of being a scholar, educator, supervisor and practitioner in a multicultural context will be explored.

772 Advanced Counseling Theories 3
An exploration of what constitutes the human condition. Appropriate components of good theory will be addressed and the major schools of thought within counseling theory will be surveyed.
776 Qualitative Research and Program Evaluation 3
Major approaches in qualitative research in counseling and counselor education will be examined. Theory and practice issues will be included, as well as data analysis. Positivistic and non-positivistic approaches will be explored.

779 Quantitative and Survey Research 3
In-depth analysis of theory, method and technique for conceptualizing and conducting quantitative research in counseling and counselor education will be examined. Survey design and methodology will be included.

780 Ethical and Legal Issues in Counselor Education 3
Current challenges in counselor education regarding ethical and legal issues in the practice of counselor education and supervision. Equivalent to EDUC 757.

787 Professional Issues: Professional Development, Consultation and Publishing 3
A seminar that addresses the following: needs of practitioners for professional development, both as consumers and providers; theory and practice of consultation; and, the process of developing, writing and submitting manuscripts for publication.
CRIMINAL JUSTICE (CJ)
Thompson, Chair: Archbold, Browning, McDonald, Stichman, Waid

COURSES

<td>226 Criminal Investigation (CCN)</td>
<td>2</td>
<td>Researches the process of gathering information and evidence in solving crimes. Focus on the role of evidence gathering and its importance to prosecuting cases and administering justice.</td>
</tr>
<tr>
<td>230 Criminology and Criminal Law</td>
<td>3</td>
<td>Study of criminal behavior and the measurement of crime and victimization. Major theories of crime causation and specific types of crime will be examined.</td>
</tr>
<tr>
<td>325 Applied Research Methods</td>
<td>4</td>
<td>See Political Science for description.</td>
</tr>
<tr>
<td>330 Criminal Law and Procedure</td>
<td>2</td>
<td>Examination of criminal law and procedure including search and seizure laws, rights of defendants and victims, and due process in criminal law.</td>
</tr>
<tr>
<td>406/606 Crime and Delinquency</td>
<td>3</td>
<td>Study of the nature and extent of juvenile delinquency. Analysis of causes of juvenile offending and an exploration of policies to combat delinquency. Prereq: Junior standing.</td>
</tr>
<tr>
<td>407/607 Deviant Behavior</td>
<td>3</td>
<td>Analysis of the precursors, the processes, and the consequences of deviance in Western society. Prereq: SOC 110 or PSYC 111. Cross-listed with SOC.</td>
</tr>
<tr>
<td>460/660 Criminalization</td>
<td>3</td>
<td>Analysis of historical and contemporary developments in the functions of police and courts. Focuses on societal, inter- and intra-organization contexts.</td>
</tr>
<tr>
<td>461/661 Corrections</td>
<td>3</td>
<td>Analysis of institutional and community-centered corrections. Emphasis on historical, contemporary, and developing trends regarding structures, program content, and problems.</td>
</tr>
<tr>
<td>465 Women and Minorities in Criminal Justice</td>
<td>3</td>
<td>Analysis of roles and contributions of women and minorities in criminal justice system as offenders, victims and practitioners. Examines effect of court decisions, rule-making and contemporary criminal justice practices on women and ethnic minorities.</td>
</tr>
<tr>
<td>489 Senior Capstone in Criminal Justice</td>
<td>1</td>
<td>Synthesis of criminal justice research, methods, and criminological theory. Prereq: Senior standing.</td>
</tr>
<tr>
<td>702 Program Evaluation</td>
<td>3</td>
<td>Examination of the development and implementation of criminal justice program/policy evaluation, including the techniques of applied research and practical considerations. Topics also include ethical issues, evaluation planning, process, impact and cost-benefits analyses, grant writing, and dissemination of findings.</td>
</tr>
<tr>
<td>703 Advanced Criminology</td>
<td>3</td>
<td>Advanced study of the distribution of crime and the major theories of crime causation from an interdisciplinary perspective, including special attention to issues relating to the measurement, nature, and extent of crime in the US.</td>
</tr>
<tr>
<td>707 Juvenile Corrections</td>
<td>3</td>
<td>Examination of the history of ideas about and responses to juvenile delinquency, the scope and nature historically and today, and the responses by various parts of the juvenile justice system, as well as responses by other social institutions such as the family, community and schools.</td>
</tr>
<tr>
<td>709 Criminal Justice Policy</td>
<td>3</td>
<td>Examination of concepts related to the development, implementation, and evaluation of public policy as it relates to the criminal justice system, including the history, development and operation of policing, courts/sentencing, corrections, crime prevention, offender rehabilitation, and issues related to drugs and crime and race and crime.</td>
</tr>
<tr>
<td>722 Structural Theories of Crime</td>
<td>3</td>
<td>Review of historical and contemporary structural theories of crime, including criteria of good theory, the assumptions of various criminological theories, and the similarities and differences in theories. Prereq: CJ 703.</td>
</tr>
<tr>
<td>733 Issues in Institutional Corrections</td>
<td>3</td>
<td>Course examining the various issues in adult prisons and jails in the United States. Topics include male and female inmates’ life in prison, violence, prisoners’ rights, management and staff issues, and differences between prisons and jails.</td>
</tr>
<tr>
<td>734 Advanced Criminal Justice Methods</td>
<td>3</td>
<td>Provides an examination of the research process. Explores how criminologists conduct research, pitfalls of research and importance of discovery and application. Prereq: Undergraduate methods course in social or behavioral sciences and a statistics course.</td>
</tr>
</tbody>
</table>
750 Violence 3
Examination of various aspects of criminal violence, including various social settings (e.g., community, domestic, and school) with attention to the causes, consequences, moderating factors and proposed solutions associated with violent criminal behavior.

752 Criminogenic Commodity 3
Examination of the role of drugs, guns, and gangs in contributing to crime. Analysis of the laws pertaining to drugs, guns, and gangs and their impact on criminality.

755 Administrative Policing 3
Organizational theory, leadership, communication, labor relations, and crisis management in police administration.

757 Community Policing 3
Examination of the history, philosophy, theory, and implementation of community policing. Comparison of community policing styles with other policing styles.

760 Police and Race Issues 3
Provides an in-depth, historical, and contemporary view of the police and race issues in the United States. Discussions on diversity, use of force, racial profiling, and citizen complaints.

761 Police Effectiveness 3
Examines effectiveness of police delivery services in the U.S. Examines theories and scrutinizes factors that are associated with police effectiveness.

762 Community Corrections 3
Evaluation of practices, issues, and trends in community corrections. Focus on probation, parole, halfway houses, and other community alternatives to incarceration.

763 Correctional Rehabilitation 3
Examines issues related to the implementation and effectiveness of various correctional treatment approaches and programs. In-depth examination of the history, purpose and common targets of correctional treatment interventions.

765 Crime Prevention 3
Examination of the theoretical underpinning, implementation and effectiveness of crime prevention approaches within and outside of the traditional settings of law enforcement, courts and corrections, including schools, families, labor markets, and the community.

768 Gender and Justice 3
Examination of the role of gender in crime and the criminal justice system, including the changing roles of men and women in society, differential involvement in criminal behavior, and differential criminal justice response.
ECONOMICS (ECON)

COURSES

105 Elements of Economics (CCN)  3  Study of demand and supply, competitive and noncompetitive markets, concepts of national income, unemployment, inflation, money, and fiscal and monetary policies. This course cannot be substituted for ECON 201 and 202. (ND:SS)

201 Principles of Microeconomics (CCN)  3  Nature, method, and scope of economic analysis; economic scarcity, resources, specialization of labor; supply-demand analysis; production and cost analysis; product and resource market structures; distribution of income; international trade. (ND:SS)

202 Principles of Macroeconomics (CCN)  3  Aggregate income and employment analysis; business cycles, unemployment, inflation and economic growth; fiscal policy; money and monetary policy; the U.S. economy and the world economy. (ND:SS)

324 Money and Banking  3  Institutional and theoretical framework of the financial structure including the banking system, Federal Reserve, money markets, and international monetary systems. Prereq: ECON 201, 202.

341 Intermediate Microeconomics  3  Analysis of markets in terms of efficiency, resource use, and economic welfare. Prereq: ECON 201, 202, MATH 146.

343 Intermediate Macroeconomics  3  Analysis of national output, business cycles, inflation, unemployment rates, interest rates, exchange rates, impact of monetary and fiscal policies, and economic growth. Prereq: ECON 201, 202.

410/610 Econometrics  3  Introduction to estimation, hypothesis-testing techniques and econometric applications in economics, with emphasis on ordinary least squares regression analysis. Use of econometric software reinforces econometric theory and methods through applications to economic data. Prereq: ECON 341, STAT 330.

456/656 History of Economic Thought  3  Development of economic thought from the mercantilists to Keynesian economics. Prereq: ECON 341 or BUSN 487 and ECON 324 or 343.

461/661 Economic Development  3  Analysis of the main causes of economic development. Prereq: ECON 341 or BUSN 487.

465/665 Labor Economics  3  Theoretical analysis and survey of empirical studies relating to labor markets, human capital formation, and nature and causes of unemployment. Prereq: ECON 341 or BUSN 487.

470/670 Public Finance  3  Taxation, intergovernmental fiscal relations, and public expenditures; implications of various taxation policies. Prereq: ECON 341 or BUSN 487.

472/672 International Trade  3  Theories of international trade, payments, and foreign exchange markets. Prereq: ECON 341 or BUSN 487.

476/676 Monetary Theory and Policy  3  Analysis of relationships among money, credit, employment, price stability, and national monetary policy. Prereq: ECON 324 or 343.

481/681 Natural Resource Economics  3  Application of economic tools to evaluate natural resource policies. Concepts such as property rights, non-market goods, resource allocation over time, externalities, open access, and public goods are discussed in an intermediate micro-economics and calculus-based format. Prereq: ECON 341 or BUSN 487.

482 Environmental Economics  3  Application of economic tools to evaluate environmental policies. Topics include cost benefit analysis, regulatory versus market pollution control approaches, environmental damage assessment, and green accounting. Prereq: ECON 341 or BUSN 487.

710 Advanced Econometrics  3  Advanced econometric methods applied to time series and panel data analysis, limited dependent variable models, maximum likelihood estimation, systems estimation, and discrete choice models. Prereq: ECON 410/610.

NDSU Undergraduate Bulletin 2010-2011
EDUCATION (EDUC)

Martin, Chair: Borr, Clapper, Duffield, Eighmy, Enger, Hall, Hanson, Ketterling, Lajimodiare, Napoleon, Overton, Peterson, Silkenat, Wageman, Welch, Wood, Young

COURSES

120 Peer Counseling 1
Designed to bring peer counseling theory and practice together in helping freshmen overcome the hurdles of the first year. May be repeated.

121 Improvement of Reading 1
A developmental reading program designed to help the student improve in reading efficiency.

122 Interpersonal Relationships 1
Study of the development of interpersonal relationships with a focus on listening and sharing in an experiential manner.

123 Study Skills 1
Assistance in the development of study skills necessary for academic achievement through learning and practice.

124 Career Planning 1
Study of the world of work with attention to self-assessment, vocational choice, and career planning.

125 Assertiveness Training 1
Behavioral approach to assertiveness combining a cognitive approach with role-play and discussion.

300 Orientation to Elementary Teaching 2
Overview of elementary education with special emphasis on the role of music and physical education. Required for K-12 certification in music and physical education.

321 Introduction to Teaching 3
Nature and aims of education at middle and high school levels; social, philosophical, historical, curricular, and political foundations in a changing multicultural society; analyze teaching as a career choice, initiate teacher education program exit portfolio. Recommended coreq: EDUC 381.

322 Educational Psychology 3
Review of human development with special emphasis on development of the young adolescent. Learning theories and learning styles with applications to individual student differences, exceptionalities, and cultural diversity; strong emphasis on educational research.

381 Early Experience 1
Field-based experience in a middle or high school setting. Overview of professional educators; opportunity to observe and interact with students, teachers, and administrators. At least five hours required in special education classroom with ESL teacher. Recommended coreq: EDUC 321. Cross-listed with H&CE.

451/651P Instructional Planning, Methods, and Assessment 3
Process of planning for teaching and implementing plans; micro-teaching activities reflecting various models for middle and high school classrooms; personalizing instruction; meeting multicultural needs. Includes computer applications; use of audiovisual equipment and other resources. Prereq: EDUC 321, 322, 381, admission to School of Education.

460/660 Adolescent Readers 3
This course focuses on developmental reading instruction, including relevant theories, the process of reading, important research, and instructional practice for adolescent-aged learners.

471/671 Middle School Philosophy and Curriculum 2
Educational foundations for middle schools, essential to meeting young adolescent needs and improving their learning. Identifies and expands central ideas in philosophy, historical background, curriculum, facilitating learning, organizational structures and practices, assessment, and planning. Prereq: EDUC 451 or Graduate standing.

472/672 Middle Level Teaching Methods 3
Instruction and guidance in the design, implementation, and assessment of teaching strategies adapted to young adolescents. Prereq: EDUC 451 or Graduate standing.

475 Reading in the Content Area 2
Introduction to the relevance and need for incorporating reading and developing reading skills in middle and high school classrooms.

480 Stress Management 2
The dynamics of stress, sources and symptoms of stress, and stress management techniques will be presented and practiced.

481/681P, 482/682P, 483/683P Classroom Practice/Methods of Teaching I, II, III 2-3 each
Specialized methods and classroom practices appropriate to the specific subject area. May be repeated. Prereq: EDUC 321, 322, 381, admission to School of Education. For 482/682P: EDUC 481/681P. For 483/683P: EDUC 482/682P.

485/685P Student Teaching Seminar 1

486/686P Classroom Management for Diverse Learners 2
Examine and apply various classroom management and evaluation techniques to middle and high school levels. Prereq: EDUC 321, 322, 381, admission to School of Education.

487/687P Student Teaching 9

488/688P Applied Student Teaching 3
Guided student teaching experience including application of lesson planning, portfolio development, professional goal-setting, and supervised teaching in an approved and accredited school. Prereq: Admission to School of Education, completion of professional education sequence. Coreq: EDUC 485/685P or H&CE 483P, EDUC 487/687P. Cross-listed with H&CE.
489/689 Native Americans and Multicultural Instructional Practices 3

702 Statistics in Educational Research 3
Applications of statistical concepts in educational research with emphasis on matching analytical techniques to research questions or study design. Descriptive and inferential statistics will be addressed as well as appropriate applications in research contexts. Students will also develop competency in using commonly used statistical software.

703 Research, Measurement, and Program Evaluation 3
Methodology and design of research studies; organization, reporting analysis, and interpretation of research.

705 Teaching College Science 3
See Biological Sciences (Biology) for description.

707 Foundations of Educational Research 3
Examines various and diverse philosophical/theoretical frameworks, methodologies, techniques and designs for educational research. Explores the nature of educational research and the underpinnings of positivism/post-positivism, interpretive/constructivist and orientational paradigms with emphasis on reflective planning of studies. Prereq: admission to Doctoral program.

710 Philosophy of Education 2
Major philosophical concepts and principles of education from Plato to the present.

712 Social, Cultural, and Political Dimensions of Schools 4
Social processes and interaction among diverse populations in educational settings. Relationship of schools to society.

714 History of American Education 2
Historical and intellectual development of education in the United States from the colonial period to the present.

715 The Superintendency 2
This course deals with examining the role and functions of the public school district administrator.

716 Comparative Education 2
Analysis of educational systems of selected nations, including emerging and economically developed countries.

717 Adult Learning 2
Includes recent research concerning adult learning in the context of planning and operating effective adult education programs.

718 Community Education 2
Study of the theory base on which community education is founded. Consideration is given to implementing the concept in the community with available resources.

719 Planning and Conducting Needs Assessment 3
A three-phase model will be compared and contrasted to provide the skill and knowledge necessary for conducting needs assessments for educational schools and institutions. Prereq: Admission to doctoral program.

720 Supervision of Student Teachers 2
Planning and carrying out effective supervision techniques when supervising student teachers in respective subjects.

721 Assessment Techniques for Educational Institutions 3
This course addresses all aspects of educational assessments in order to select the assessment technique that meets specific accountability mandates in the field of education. Prereq: Admission to doctoral program.

722 Instructional Systems, Media, Materials 2
Preparation of instructional systems in support of a variety of teaching techniques and alternative media approaches.

723 Diversity and Educational Policy 3
The purpose of this course is to help educators understand ethnic and racial identity formations among high school and college students of racially mixed heritage. Prereq: Admission to doctoral program.

724 Advanced Educational Psychology 3
Principles of effective human learning. Discussion of learning theories, the teacher as a director of learning experiences, and factors influencing students representing a variety of cultures and abilities in the educational setting.

725 Institutional Analysis Techniques 3
Surveys, focus groups, longitudinal studies, national data sets, correct statistical design and analyses, and effective reporting techniques will be reviewed and utilized in depth to address questions of institutional performance in academic and student affairs. Prereq: Admission to doctoral program.

727 Higher Education Law 3
To develop expertise in legal issues for students whose current positions or future career goals include administrative and management positions in higher education where they will work on legal issues with attorneys. Prereq: Admission to doctoral program.

728 Instructional Technology for Teaching and Learning 3
This course provides an advanced understanding of technology concepts and contemporary computer-based programs for the teaching and learning processes. Prereq: Admission to doctoral program.

729 Organization and Administration of Telecommunication Technologies 3
This course provides the procedures for developing videoconferencing training materials to prepare faculty, students and staff to effectively use the videoconferencing equipment both for meetings and instruction. Prereq: Admission to doctoral program.

730 Leadership, Planning, and Organizational Behavior 3
Introduction to models of educational leadership including organizational structure, theory, and leadership styles. Consideration of concepts, problems, and issues in administration.

Examination of the legislative and judicial actions affecting the public schools. Consideration is given to contemporary legal issues for teachers, administrators, and boards.

Investigation of curricular decision-making and program evaluation strategies as they affect the educational program. Problem-solving skills are presented through theory and simulation.

Provides an understanding of selected computer applications for educational administrators at the building and district office levels.

Prepares aspiring school leaders to plan for their personal and professional development and to understand and use the principles of communication, ethics, and values.

Specific techniques and systems to supervise instruction. Review of interpersonal communication and group process skills as applied to administrative supervision.

Provides school leaders with an understanding of managing and allocating resources in a political climate in which policy decisions are based on historical resource allocations.

The theoretical foundations and the techniques of the helping relationship between the helper and people of advanced age will be studied and applied.

Common elements of leadership as they apply to the principalship. Consideration of practical applications in an elementary school setting.

Common elements of leadership as they apply to the principalship. Consideration of practical applications in a secondary school setting.

This course provides funding theories and procedures necessary to develop and maintain financing for higher education institutions. Prereq: Admission to doctoral program.

The purpose of this course is to teach about the role of student affairs professionals in schools, colleges, and other educational organizations, including recruitment, selection, orientation, development, compensation, and evaluations. Prereq: Admission to doctoral program.

History, development, evaluation, and revision of the curriculum. Review of recent research in elementary school curriculum.

Study of contemporary curriculum patterns with emphasis on curricular construction and evaluation.

Organization and administration of educational programs for early adolescents with special consideration given to block scheduling, interdisciplinary teams, and advisor-advisee problems.

Major theoretical approaches to the evaluation of educational programs are reviewed, analyzed, and critiqued. Pragmatic implications for educational and social policy are addressed, as well as constructive impact on program decision-making. Prereq: Admission to doctoral program.

History and effecting of quality control will be briefly reviewed. Global, U.S. societal, state government, accreditation, and student accountability forces will be elucidated. Successful, failed, and future institutional responses to these forces will be discussed. Prereq: Admission to doctoral program.

Study of the principles and processes of collective bargaining in public educational institutions. Development of negotiation skills through participation in simulations.

The purpose of this course is to have graduate students understand statistical meanings and concepts that will provide the professional expertise needed to serve schools and institutions with their contemporary research and accountability needs. Prereq: Admission to doctoral program.

An examination of teaching and professional practice based on reflective practice. Analyze educational research as related to and informs practice.

Exploration of student differences and ways of adjusting teaching practice to meet individual needs. Application of learning theories to educate the whole child (cognitive, affective, social). Equitable treatment of students.

An inquiry-based course for the reflective practitioner to develop deep understandings of curriculum content emphasized by state and national standards documents and to acquire an effective repertoire of instructional skills.

This course is based on the concept that assessment drives instruction. A working definition of student learning will be defined. Multiple measures of assessment will be investigated and impacts on student learning will be explored.

Legal and ethical requirements for educating exceptional learners; identification, referral, and placement procedures; development and use of the Individual Education Program; strategies for teaching and evaluating; managing academic and social behaviors of exceptional learners.
763 Education and Training for Business and Industry 3
The purpose of this course is to teach the fundamentals necessary to educate and train people for the workforce according to evolving training needs of business, industry, military and government. Prereq: Admission to doctoral program.

767 Organization and Administration of Higher Education 3
This course deals with the organization and administration of higher education and the current and evolving problems and possibilities for higher education. Prereq: Admission to doctoral program.

769 Politics and Policy Analysis in Education 2
The purpose of this course is to examine political and policy development in American public education in order to understand current local, state, and national issues. Prereq: Admission to specialist program.

770 Empowerment and Advocacy in Human Development and Education 3
An examination of theory, research, and practice in individual and group empowerment and advocacy in the multi cultural and diverse contexts that contemporary human beings find themselves.

771 Structural and Equation Modeling Fundamentals 3
This course is designed for faculty and doctoral-level students who need a significant familiarity with those statistical techniques known collectively as "structural equation modeling." Prereq: Admission to doctoral program.

772 Curriculum and Instructional Development 3
A five-phase model will be compared and contrasted to provide the skill and knowledge necessary to establish a systematic curriculum and instructional development. Prereq: Admission to doctoral program.

775 Content Area Reading 2
Examination of content, instructional methodologies, and evaluation techniques for reading in content classes.

776 Qualitative Research and Program Evaluation 3
The purpose of this course is to address theory and practice approaches in qualitative research for education settings that include data analysis, content analysis, interpretive analysis, positivistic, and non-positivistic. Prereq: Admission to doctoral program.

777 Tort Liability 2
Examination of the legal liability of teachers, administrators, and public school boards for injurious intentional or unintentional acts. Prereq: EDUC 731.

778 School Fund Management 3
Proper recording and reporting of financial accounts for elementary and secondary schools. Use of procedures and concepts for governmental fund accounting and financial management. Prereq: M.S. in Educational Administration.

779 Quantitative and Survey Research 3
The purpose of this course is to have an in-depth analysis of theory, method, and technique for conceptualizing and conducting quantitative research, survey design and methodology in educational leadership. Prereq: Admission to doctoral program.

780 Instructional Models 2
Investigation of current practices and trends in instructional models. Emphasis is on the relationship of current research to contemporary practice.

781 Science Teaching and Curriculum 3
Overview of recent research on science teaching, learning, and curriculum. Special attention given to contemporary theories on science teaching models that enhance student understanding.

782 Supervisory and Administrative Theories 4
Study of management models and techniques, needs assessment, goal setting, planning and evaluation systems, and decision-making problems as they relate to the school improvement process. Prereq: EDUC 732.

783 Computer Data Management and Decision Making 2
Interpretation of effective computer applications for computer use as a decision-making and planning tool for school finance and managerial functions relating to the field of school business administration and school district superintendency. Prereq: EDUC 730, 10 credits in Educational Administration.

784 School Personnel Administration 2
Study of personnel administration in public school systems. Includes an examination of the purposes, policies, plans, procedures, and personnel administration. Prereq: EDUC 782.

785 Organization and Administration of Vocational/Technical Education 2
Overview of the vocational education services of local educational agencies and their relation to post-secondary education. Emphasis on planning, organizing, administering, and managing resources.

786 School Facility Planning 2
Overview of the principles in planning, construction, and maintenance of school buildings. Visits to educational facilities and the assessment of school buildings. Prereq: M.S. in Educational Administration

787 Issues in Education 2
This course delves into the issues of why a person would pursue a doctoral degree in light of the current issues facing educators. Helps define a professional course of study available in respect to educational issues. Leads to studying creators and leaders in different realms by people who have special interest in creativity and ethical pursuits.

788 School Finance and Business Management 4
Overview of school fund revenues and expenditures pertaining to local, state, and federal funding. Includes in-depth study of the practices of school business administration pertaining to all fund activities in instruction and ancillary operations.

789 School Community Relations 2
Purposes, organization, agencies, and criteria of good school-community relationships; knowledge and techniques for effective public relations. Prereq: EDUC 739, M.S. in Educational Administration.
ELECTRICAL AND COMPUTER ENGINEERING (ECE)

Ababei, Braaten, Farden, Glower, Green, R. Katti, Kavasseri, Khan, Li, Lima, B. Rao, Rogers, Schroeder, Srinivasan, You, Yuvarajan

COURSES

111 Introduction to Electrical and Computer Engineering 3
Introduction to electrical and computer engineering problem solving, design and professional issues. 3 lectures. Prereq: MATH 105. F

173 Introduction to Computing 3
Programming in a high level language with applications to engineering computation, analysis, and design. 3 lectures, 1 recitation. Prereq: MATH 105. F, S

EE 206 Circuit Analysis I (CCN) 4
Linear electric circuits. Component models, circuit laws, transient analysis, design issues, computer tools. 3 lectures, 1 two-hour recitation/laboratory. Prereq: MATH 166 with a grade of C or better. Coreq: MATH 129 and PHYS 252. F, S

275 Digital Systems I 3
Introduction to number systems, combinational circuits, and sequential circuits. 3 lectures. Prereq: MATH 105. Cross-listed with CSCE. F, S

301 Electrical Engineering I 3
Introduction to electrical engineering for non-majors. Fundamental laws of circuit analysis. Steady-state and transient analysis of DC and AC circuits. 3 lectures. Prereq: MATH 259 or 265, PHYS 252. F, S

303 Electrical Engineering II 3
Electronic circuits and their applications. Electromechanical energy conversion. Transformers, DC and AC machines. 3 lectures. Prereq: ECE 301. F, S

306 Electrical Engineering Lab I 1
Electronic instruments and measurements. Applications to electrical and electronic circuits, power devices, and systems. 1 two-hour laboratory. Coreq: ECE 303. F, S

311 Circuit Analysis II 4
Analysis of single-phase and three-phase circuits. Laplace transforms in circuit analysis. Fourier series. Two-port networks. 3 one-hour lectures, 1 two-hour laboratory. Prereq: EE 206 with a grade of C or better. Coreq: MATH 266. F, S

321 Electronics I 5

331 Energy Conversion 4
Magnetic circuits, transformers, DC and AC rotating machines. 3 one-hour lectures, 1 two-hour laboratory. Coreq: ECE 311. S

341 Random Processes 3
Principles of probability. Application of probability and statistics to electrical and computer engineering problems. 3 lectures. Prereq: MATH 266. F

343 Signals and Systems 4
Discrete-time and continuous-time signals and systems. Linearity, frequency response, difference and differential equations, transfer techniques. 4 lectures. Prereq: ECE 311. F, S

351 Applied Electromagnetics 4
Lecture and laboratory introduction to electromagnetic waves in linear media, effects of boundaries, transmission lines, electrostatics, and magnetostatics. Introduction to time dependence and engineering applications. 4 lectures, 1 two-hour laboratory. Coreq: ECE 311. F, S

373 Assembly Programming 3
See Computer Science for description. Prereq: ECE 173, 275 with a grade of C or better.

374 Computer Organization 3
See Computer Science for description. Prereq: ECE 173, 275 with a grade of C or better.

375 Digital System Design and Implementation 3
Experience with digital system design and prototyping, including use of digital laboratory equipment. 2 lectures, 1 two-hour laboratory. Prereq: ECE 173, 275 with a grade of C or better. F

376 Embedded Systems 4
Use of microcontrollers for data acquisition and device control. Includes assembly language and high-level programming, serial and parallel I/O, timers and interface design. 3 lectures, 1 two-hour laboratory. Prereq: ECE 173, 275, EE 206 with a grade of C or better. F

401 Design I 1
Capstone experience in formulation and design of a system or device. Basic project planning and software tools. 1 lecture. Coreq: ECE 321. F, S

403 Design II 2
Capstone experience in formulation and design of a system or device. 2 two-hour design laboratories. Prereq: ECE 401, Senior standing in program. F, S

405 Design III 3
Capstone experience in formulation and design of a system or device. 3 two-hours design laboratories. Prereq: ECE 403, Senior standing in program. F, S

411/611 Optics for Scientists and Engineers 3
See Physics for description.

411L/611L Optics for Scientists and Engineers Laboratory 1
See Physics for description.

417/617 Optical Signal Transmission 3
Optical signal transmission including geometric optics and modal analysis for homogeneous and inhomogeneous light guides. Systems studies including coupling, inter-symbol interference, sources, photodetectors, and modulation. Prereq: ECE 351. S/2

421/621 Communication Circuits 3
Resonant circuits and tuned amplifiers, oscillators, modulators and demodulators, phase-locked loops, and power amplifiers. Analysis, design, and applications in communication systems. 3 lectures. Prereq: ECE 321. S

<tr>
<td>733</td>
<td>Power Distribution</td>
<td>3</td>
<td>Power distribution systems. Lines and transformers, characteristics of loads, voltage drops and corrective measures, lightning protection. Fault analysis, fuses, reclosers, sectionalizers, Power system harmonics and power quality. 3 lectures. Coreq: ECE 431/631. F</td>
</tr>
<tr>
<td>745</td>
<td>Statistical Communications</td>
<td>3</td>
<td>Advanced topics in communications theory including detection theory, estimation theory, and information theory. 3 lectures. Prereq: ECE 443/643. S</td>
</tr>
<tr>
<td>748</td>
<td>Elements of Information Theory</td>
<td>3</td>
<td>This course will cover: entropy, asymptotic equipartition property, data compression, channel capacity, differential entropy, the Gaussian channel, an introduction to rate distortion theory and network information theory.</td>
</tr>
<tr>
<td>751</td>
<td>Electromagnetic Theory and Applications</td>
<td>3</td>
<td>Theory of radiation, antenna characteristics, complex waves, potential functions and spectral domain methods for wave guides and cavities, and dispersive media. 3 lectures. S/2</td>
</tr>
<tr>
<td>755</td>
<td>Advanced Topics in Electromagnetics</td>
<td>3</td>
<td>Topics of current interest in electromagnetics, microwaves, and optics. 3 lectures. Prereq: ECE 751. S/2</td>
</tr>
</tbody>
</table>

**761, 763 Advanced Control Theory I, II**                               
State variable formulation of the control problem; system identification. Introduction to adaptive, distributed, multivariable, nonlinear, optimal, and stochastic control. Prereq: ECE 461, 761 respectively.

**774 Computer Architecture**                                          
Processor operations, computer arithmetic, control mechanism, instruction sets, classification schemes, pipelining, parallel processing, hierarchical memory and memory management, I/O methods and interrupts, and interconnection buses. 3 lectures. Prereq: ECE 374.

**775 Hardware for Cryptography**                                     
This course covers the mathematical background, modern cryptographic techniques like block ciphers, hash functions and public-key cryptosystems. Hardware and embedded implementations of cryptosystems and recent research in hardware implementation are also covered. Prereq: CSCI 469/669, ECE 341, 423, 470.

**777 System Level Design and Automation**                            
Background, useful abstractions and needed techniques for system-level modeling, performance analysis, synthesis and optimization. Emphasis is on both computation and communication aspects involved in the Systems-On-Chip design of embedded applications. Prereq: ECE 173, 470.

**778 Computer Networks**                                             
Examination of computer networks using the ISO-OSI model as a framework. Exploration of practical and theoretical issues in modems, codes, error, impairments, modulation, protocols, and interfaces. 3 lectures. Prereq: CSCI 474. (alternate years)
EMERGENCY MANAGEMENT (EMGT)

Klenow, Chair; Cwiak, Yoon, Youngs

COURSES

101 Emergencies, Disasters, and Catastrophes 3
An overview of emergencies, disasters, and catastrophes from a social, political, historical, policy, environmental, international and cross-cultural perspective. Focuses on differences in these events in terms of scale as well as cause from the disaster phase approach.

210 Emergency and Disasters: A Visual Approach 3
This course studies emergencies and disasters through documentaries and feature films highlighting technological and anthropogenic causes, consequences and management issues. Special attention will be placed upon emergency response operations.

261 Disaster Preparedness 3
Nature and rationale for public awareness of potential hazards that communities face, preparedness for these hazards, and potential strategies to mitigate adverse consequences. Prereq: EMGT 101.

262 Disaster Mitigation 3
Role of emergency management programs in community resilience and sustainability; incorporation of preparedness, mitigation, response, and recovery in community comprehensive and strategic planning. Prereq: EMGT 101.

263 Disaster Response 3
Principles and procedures related to emergency operations plans, warning, evacuation, search and rescue, mass casualty care, sheltering, donations, management, disaster declaration, and incident debriefing. Prereq: EMGT 101.

264 Disaster Recovery 3
Examination of post-disaster policies and programs that protect the natural environment, improve disaster resistance, support diverse populations, improve economic conditions, and preserve community resources. Prereq: EMGT 101.

411/611 Community Disaster Preparation 3
Nature and rationale for public awareness of potential hazards that communities face, preparedness for these hazards, and potential strategies to mitigate adverse consequences.

413/613 Building Disaster Resilient Communities 3
Role of emergency management programs in community resilience and sustainability; incorporation of preparedness, mitigation, response, and recovery in community comprehensive and strategic planning.

414/614 Spatial Analysis in Emergency Management 3
This course is designed to provide emergency management students with specific disaster related applications of spatial analysis techniques in state of the art GIS software. Prereq: EMGT 101 and any one of the following; EMGT 261, 262, 263 or 264.

415 Rural Society and Emergency Management 3
Application of emergency management principles and procedures of disaster preparedness, mitigation, and response and recovery in the rural context.

430 Socio-Behavioral Foundations of Emergency Management 3
Study of theories and substantive findings from multiple disciplines that explain how humans, organizations, and government create, interact, and cope with hazards, risks, vulnerabilities, and related events.

431/631 Disaster Response Operations and Leadership 3
Principles and procedures related to emergency operations plans, warning, evacuation, search and rescue, mass casualty care, sheltering, donations management, disaster declaration, and incident debriefing.

451 Floods, Blizzards, and Tornadoes 3
Role of emergency management in floods, blizzards, and tornadoes; response of local, state, and federal governments and agencies to these conditions.

453 Emergency Management Law and Regulation 3
This course examines legal principles, policy and regulation that impact emergency management, including both the provision of care and services and the management of services. Prereq: PHIL 210.

461/661 Business Continuity and Crisis Management 3
This course provides an overview of planning and management principles applicable to business or operational resumption following an emergency. The emphasis will be on minimizing the impact of a disaster on business operations.

463/663 Voluntary Agency Disaster Services 3
Examination of the roles played by local, state, national, and international voluntary agencies in emergency preparedness, mitigation, response, and recovery.

464/664 Disaster and Culture 3
See Anthropology for course description.

481/681 Disaster Analysis 3
Examination of natural and human-made disasters from a multidisciplinary perspective.

483/683 Holistic Disaster Recovery 3
Examination of post-disaster policies and programs that protect the natural environment, improve disaster resistance, support diverse populations, improve economic conditions, and preserve community resources.

489 Capstone in Emergency Management 1
Integrate course work taken in Emergency Management major; apply emergency management principles to real world events; and explore career and graduate options in the field of emergency management. Prereq: Senior standing.

714 Hazardous Materials Regulation 3
Hazardous materials contingency planning and environmental regulations at the community, state, and federal levels.

715 Emergency Management for Public Health Professionals 3
This course provides an overview of emergency management for public health professionals and addresses the public health nexus in emergency management activities at the federal, state and local level.
720 Emergency Management Theory 3
This course reviews the theoretical assumptions and foundation of disaster management from the interpersonal, small group, organization and societal levels.

721 Hazard Mitigation Theory and Practice 3
Examination of disaster mitigation theory and the rationale and context of mitigation procedures, programs, and planning. Students will acquire both theoretical and applied understandings of mitigation principles and practices. Prereq: EMGT 413/613.

730 Advanced Research Methods 3
This course reviews qualitative and quantitative methodologies and provides additional depth on their application to emergency management research projects. Prereq: SOC 700, 701.

732 Disaster Response Theory and Practice 3
Examination of theory and practice in the relationship between incident command systems and emergency operating centers.

761 [712] Preparedness Theory and Practice 3
Examination of natural and human-made disasters from a risk assessment perspective, and preparedness and control procedures for each of these types of disaster.

782 Damage Recovery Theory and Practice 3
Theory, principles, and procedures used in disaster damage assessment and in emergency supply and service dissemination.

- **111 Introduction to Engineering**: Designed to provide general engineering students with an opportunity to review, study, discuss, and evaluate various engineering professions as career choices. F, S

- **310 Entrepreneurship for Engineers and Scientists**: How to turn a great idea into a business by starting a company and/or profiting from a new invention. Developing a product, conducting patent searches, securing intellectual property rights, writing a business plan, obtaining financing, etc. are covered. F

- **311 History of Technology in America**: Development of tools, technology, and whole systems, especially the U.S. experience since 1700. Contributions of Jefferson, Richards, Edison and others as models of creativity as a foundation for the emergence of modern conceptions of progress.

- **312 Impact of Technology on Society**: Study of the impact of technology on the natural environment; discussion of values, ethics, citizenship, social responsibilities, and the relationship of humans to the environment.

- **402 Engineering Ethics and Social Responsibility**: Philosophical basis for ethical decisions, guidance for ethical decision making in engineering practice, ethics of social responsibility, professionalism, case studies, and codes of conduct for engineers. F, S

- **489 Collaborative Engineering Capstone**: Integration of engineering and architecture topics and job functions projects. Students will plan, design, develop, verify, produce/construct/service facilities and systems created to fulfill industrial, agricultural, urban, and business needs. Prereq: Senior standing and major departmental approval. F, S

- **715 Engineering Systems**: Interdisciplinary systems analysis approach to engineering problems. Mathematical and physical stochastic process and control systems.

- **741 Systems—Linear and Nonlinear Concepts**: Nonlinear and linear programming methods for engineering design optimization. Formulation and optimization of design problems from all areas of engineering.

- **771 Probabilistic and Deterministic Methods**: Applications modeling. Domains include transportation, logistics, manufacturing, service systems scheduling, and supply-chain management. Quantitative models and tools include Markov chains, stochastic processes, queuing, deterministic and stochastic decision analysis, time series, forecasting, and regression modeling. Prereq: MATH 265, IME 460/660. Cross-listed with IME.

- **780 Electromagnetic Theory**: Physical concepts and mathematical solutions of Maxwell equations; boundary conditions, force, and energy equations; potential equations; Green’s functions; wave equations, radiation, and propagation of electromagnetic waves. F/2

- **789 Advanced Research Methods in Engineering**: Advanced study of the philosophy, reasoning, design, methods, and procedures employed in conducting and disseminating scientific research. Includes a survey of current and original research with interpretation and assessment.
ENGLISH (ENGL)

Sullivan, Head; Birmingham, Brooks, Brown, Cavins, Ebert, Fricker, Hanson-Dittmer, Helstern, Johnson, Johnston, Krishnan, A. Mara, M. Mara, Martinsson, Maylath, McEnery, Nichols, O'Connor, Pull, Rupiper Sandland, E. Sassi, K. Sassi, Scott, Taggart, Temanson, Theile, Totten, Trump, Tunstall, Voesen

COURSES

110 College Composition I (CCN)  3
Guided practice in college-level reading, writing, and critical thinking. Includes process writing and an introduction to library research. (ND:ENGL)

111 Honors Composition I (CCN)  3
Accelerated reading, writing, and critical thinking activities designed to enhance qualified students’ well-developed skills of language use. Requires enrollment in the Scholars Program. Equivalent to ENGL 110. (ND:ENGL)

112 ESL College Composition I (CCN)  4
Guided practice in college level reading, writing, and critical thinking, with special attention to the issues of usage encountered by non-native speakers of English. Includes process writing and an introduction to library research. Equivalent to ENGL 110.

120 College Composition II (CCN)  3
Advanced practice in college-level writing from sources and in applying rhetorical strategies. Requires library research and use of summaries, paraphrases, and quotations from relevant sources in analysis and persuasion essays. Prereq: ENGL 110. (ND:ENGL)

121 Honors Composition II (CCN)  3
Accelerated practice in college-level writing for qualified students with skills in research and argumentation. Essays using library research and summaries, paraphrases, and quotations from relevant sources. Requires enrollment in the Scholars Program. Equivalent to ENGL 120. Prereq: ENGL 111. (ND:ENGL)

122 ESL College Composition II (CCN)  4
Guided advanced practice in college level writing from sources and in rhetorical strategies, with additional support related to higher level language acquisition and usage for non-native speakers of English. Equivalent to ENGL 120. Prereq: ENGL 112.

167 Introduction to English Studies (CCN)  3
An introduction to the different areas of English studies including literature, writing studies, and linguistics and the ways in which they are studied.

209 Introduction to Linguistics (CCN)  3
Entry-level knowledge for the scientific study of language, including such topics as phonetics, phonology, morphology, semantics, grammar, social and cultural dimensions, acquisition, variation and similarities among languages of the world, and related cultural history. Cross-listed with ANTH.

213 Literary Publications (CCN)  3
Theory and practice in the process of producing a literary magazine. Prereq: ENGL 120.

220 Introduction to Literature (CCN)  3
Reading and discussion of representative examples of poetry, drama, and fiction, with emphasis on the use of common literary terminology. Classic and contemporary works. Focus on enjoyment and appreciation of verbal art. (ND:HUM)

222 Introduction to Poetry (CCN)  3
Examination of poetic forms including the uses of figurative language and the techniques of rhythm and meter, as well as imagery and structure. Includes traditional and contemporary lyrics.

225 Introduction to Film (CCN)  3
General introduction to film studies, including analysis of narrative and stylistic elements of films for their artistic merits and their reflection of an influence on society. (ND:HUM)

226 The Poetry of Rock (CCN)  3
Examination of rock lyrics as contemporary poems, using techniques of literary criticism to analyze their themes, their aesthetic principles, and their place in art and culture.

240 World Literature Masterpieces (CCN)  3
Study of representative cultural and literary materials from the ancient world to modern times.

251 British Literature I (CCN)  3
Survey of major works and writers in British literature from the Anglo-Saxon period through the 18th century. (ND:HUM)

252 British Literature II (CCN)  3
Survey of major works and writers in British literature from the Romantic Age to the present. (ND:HUM)

261 American Literature I (CCN)  3
Survey of major works and writers in American literature from the colonial period through the Civil War. Emphasis on the development of unique American values and literature. (ND:HUM)

262 American Literature II (CCN)  3
Survey of major works and writers in American literature from the Civil War to the present. Includes traditional as well as experimental, innovative, and counter-cultural works and authors. (ND:HUM)

271 Literary Analysis (CCN)  3
Introduction to traditional and contemporary approaches in the study of literature and the fundamental skills required for the analysis of literary texts.

275 Introduction to Writing Studies (CCN)  3
A broad history of writing and rhetoric as well as an introduction to spheres of writing studies: creative, academic, professional/technical, and public writing. Prereq: ENGL 120.

301 Peer Tutoring and Writing in the Disciplines  3
Introduction to individual writing instruction and conventions of disciplinary writing. In addition to classroom work and assignments, students will complete a practicum in the Center for Writers. Recommended for prospective educators, writing specialists in all fields, and peer tutors in the Center for Writers. Prereq: ENGL 120.
313 Literary Publications II  
Theory and practice in the process of producing a literary magazine. Prereq: ENGL 120.

320 Business and Professional Writing  
Intensive practice employing the conventions of writing needed in professional genres and settings; writing for specific audiences and purposes. Inform, analyze, evaluate, and persuade. Prereq: ENGL 120, Junior standing.

321 Writing in the Technical Professions  
Intensive practice employing the conventions of professional genres to write about technology development and use for expert, business, and more general audiences. Prereq: ENGL 120, Junior standing.

322 Creative Writing I  
Imaginative writing with an emphasis on exploring multiple genres, developing critical awareness, and becoming acquainted with the literary fine arts. Prereq: ENGL 120, Junior standing.

323 Creative Writing II  
Imaginative writing with a concentration in one or two genres. Emphasis on developing critical awareness and becoming acquainted with the literary fine arts. Prereq: ENGL 120, Junior standing.

324 Writing in the Sciences  
The study and practice in written conventions of the sciences for academic, scientific, and public audiences. Prereq: ENGL 120, Junior standing.

325 Writing in the Health Professions  
Study of and practice in language use and written conventions of the health professions for academic, scientific, and public audiences. Prereq: ENGL 120, Junior standing.

326 Writing in the Design Professions  
This course provides intensive practice employing the conventions of those professional genres needed to write for professional contexts and audiences in design fields. Prereq: ENGL 120, Junior standing.

330 British and American Women Writers  
Investigation of the literary portrayal of women and its effects on society. Some consideration of problems specific to women writers.

331 Contemporary Women Writers  
Study of the language, imagery, themes, and genres in 20th century literature by women of various cultural, ethnic, and national backgrounds.

333 Fantasy and Science Fiction  
Study of social and psychological implications of fantasy literature and works of fiction concerned with the impact of science and technology on the human imagination.

335 Multicultural Writers  
Major literary figures within and outside the United States. Includes Asian, Mexican, and Canadian, as well as Native-American, Black, Asian-American, and Chicano writers.

336 Literature and the Environment  
Milestones of American writing about nature and culture from Thoreau to the present. Reading and analysis of literary encounters with place and issues that arise when the local is global. Prereq: ENGL 120.

340 19th Century American Fiction  
Selected fiction reflecting problems and ideas, emphasizing the shift from romanticism to realism and naturalism, of the 19th century. Representative writers: Cooper, Hawthorne, Twain, Jewett, James, and Wharton, and includes minority voices.

341 20th Century American Fiction  
Selected fiction reflecting social, psychological, and literary trends in the 20th century. Includes multicultural and women authors, as well as experiments in genre.

345 Themes in American Culture  
A multidisciplinary approach, including art, music, and literature, to various eras and themes in American cultural history.

357 Visual Culture and Language  
This course will cover the rise of visual culture and the impact this historical shift has made on print culture and writing. Students will produce information graphics, photo essays, videos, and other genres. Prereq: ENGL 120, Junior standing.

358 Writing in the Humanities and Social Sciences  
Theory and practice for writing multiple genres in the humanities and social sciences. Prereq: ENGL 120, Junior standing.

360 Grammatical Structure  
Examines the system of the English sentence. Emphasis on structures and components with attention to application in teaching, stylistic analysis, and editing.

377 Modern Poetry  
Experimentation and innovation in poetry from 1910 to 1945. American, English, and Irish poets, including such transnational writers as Eliot, Pound, H.D., D.H. Lawrence, and Auden. Prereq: ENGL 120.

380 Shakespeare  
Study of representative poetry, comedies, histories, and tragedies.

381 American Road Book  
A study of the American road narrative in cultural and historical contexts, including the rise of the automobile and tourism, the American dream, the frontier myth, race, class, and gender, and national and individual identity.

382 Film Genres and Styles  
Study of one or more film genres, styles, or movements, focusing on aesthetic conventions, cultural context, socio-historical significance, and critical approaches. May be repeated with change of topic. Prereq: THEA 115 or ENGL 225 or 271.

385 British Fiction  
Examines significant works of British short and long fiction in terms of their cultural, social, and psychological content and their literary artistry.

<td>Social and Regional Varieties of English</td>
<td>3</td>
<td>Study of sociological factors as they relate to language (American English). Examines region, age, gender, ethnicity, self-identity, situation, profession, etc. and their relation to pronunciation, word choice, politeness, formality, turn-taking, etc. Students conduct original research.</td>
</tr>
<tr>
<td>454/654</td>
<td>Language Bias</td>
<td>3</td>
<td>Application of current linguistic, rhetorical, and literary theory to examine and analyze the ways in which the social asymmetries of gender, sexuality, race, and ethnicity are reflected and sustained through discourse practices.</td>
</tr>
<tr>
<td>455/655</td>
<td>International Technical Writing</td>
<td>3</td>
<td>Theories and practical applications of approaches to international technical documents, including globalization, localization, and translation preparations and procedures. Extensive use of case studies and cultural models. Prereq: ENGL 120, Junior standing.</td>
</tr>
<tr>
<td>456/656</td>
<td>Literacy, Culture, and Identity</td>
<td>3</td>
<td>Reading, writing, research, and discussion of diverse types of literacy from functional to cultural to technological and their roles in culture and identity formation. Completion of related community projects. Prereq: ENGL 120, Junior standing.</td>
</tr>
<tr>
<td>457</td>
<td>Electronic Communication</td>
<td>3</td>
<td>This web-based class will explore issues related to electronic communication through selected readings, projects that allow students to develop skills and insight through experiential learning, and though reflection on the dynamics of online education itself. Prereq: ENGL 120.</td>
</tr>
<tr>
<td>458</td>
<td>Advanced Writing Workshop</td>
<td>3</td>
<td>Writing, revising, and editing projects based on rhetorical principles. Frequent response from peers and instructor. Analysis of selected readings and students' own writing. Prereq: ENGL 358.</td>
</tr>
<tr>
<td>459/659</td>
<td>Researching and Writing Grants and Proposals</td>
<td>3</td>
<td>A rhetorical approach to researching and writing academic grants, business proposals, and related professional documents. Students develop a portfolio of professionally designed and edited documents as well as the vocabulary of grants writing and research. Prereq: ENGL 120, Junior standing.</td>
</tr>
<tr>
<td></td>
<td><strong>English Studies Capstone Experience</strong></td>
<td>3</td>
<td>Cumulative and integrative study for English majors of English language, literature, and composition. Prereq: ENGL 271.</td>
</tr>
<tr>
<td>471/671</td>
<td>American Realistic Literature</td>
<td>3</td>
<td>Principles of American literary realism as exhibited in the major works of Howells, James, Twain, Crane, Chopin, Gilman, Norris, Wharton, Dreiser, and others. Combination varies.</td>
</tr>
<tr>
<td>472/672</td>
<td>20th Century American Writers</td>
<td>3</td>
<td>Intensive study of major American writers from 1900 to 1950.</td>
</tr>
<tr>
<td>474/674</td>
<td>Native American Literature</td>
<td>3</td>
<td>The development of literature by and about Native Americans is traced from 1850 to the present. Focus on Native American identity and contributions to the American culture.</td>
</tr>
<tr>
<td>476/676</td>
<td>Topics in American Literature</td>
<td>3</td>
<td>Intensive study of a special theme, form, period, or group of writers central to the formation and development of American literature. May be repeated with change of topic.</td>
</tr>
<tr>
<td>480/680</td>
<td>Medieval Literature</td>
<td>3</td>
<td>British poetry and prose from the beginning of the Middle Ages to 1500, excluding Chaucer.</td>
</tr>
<tr>
<td>482/682</td>
<td>Renaissance Literature</td>
<td>3</td>
<td>Study of British writers of the 16th and 17th centuries.</td>
</tr>
<tr>
<td>483/683</td>
<td>Topics in British Literature</td>
<td>3</td>
<td>Intensive study of a special theme, form, period, or group of writers central to the formation of British literature. May be repeated with change of topic.</td>
</tr>
<tr>
<td>485/685</td>
<td>18th Century Literature</td>
<td>3</td>
<td>Study of major writers: Dryden, Pope, Swift, and Johnson, with occasional excursions into the fictional territory of Richardson, Fielding, Sterne, and Smollett.</td>
</tr>
<tr>
<td>486/686</td>
<td>Romantic Literature</td>
<td>3</td>
<td>Study of major British writers from the French Revolution to the coronation of Queen Victoria.</td>
</tr>
<tr>
<td>751</td>
<td>Multi-Disciplinary Academic Writing</td>
<td>3</td>
<td>Practice of inter-disciplinary forms of writing and independent research of writing norms and expectations in individual disciplines. Focus on developing clear, correct, and audience-appropriate documents. Major assignments are tailored to help write disquisitions and articles for publication.</td>
</tr>
<tr>
<td>752</td>
<td>Writing: Invention to Innovation</td>
<td>3</td>
<td>Exploration of the use of rhetorical canon in writing, spanning a period from the Aristotelian concept of invention to the contemporary manifestation of innovation. Prereq: admission to English graduate program.</td>
</tr>
<tr>
<td>753</td>
<td>Rhetorics and Poetics of New Media</td>
<td>3</td>
<td>This web-based class will provide in-depth study of major new media theorists and require students to consider the research and teaching implications of new media for the humanities and social sciences.</td>
</tr>
</tbody>
</table>
754 Rhetorics of Science and Technology 3
The study and critique of the rhetorics of science and technology, informed by rhetorical theory and by the philosophy of and the social studies of science and technology.

755 Composition Theory 3
Study of contemporary theories of teaching writing with frequent summary/response papers on assigned readings and a research paper on composition theory.

756 Composition Research 3
Study of designs and basic statistics for writing research; analysis of current research; and a research project in composition.

758 Topics in Rhetoric and Writing 3
Intensive study of a theory, theorist, or issue in rhetoric or writing with regard to relevance for critical and production practices in English studies. May be repeated with change of topic.

759 History of Writing Instruction 3
The study of the history of writing instruction from antiquity to the present, with emphasis on relevance to modern writing instruction.

760 Graduate Scholarship 3
Introduction to scholarship in English studies and to the nature and state of the discipline.

762 Critical Theory 3
Study of contemporary literary theory and criticism.

764 Classroom Strategies for TA's 3
Introduction to current issues in composition pedagogy, research, and theory, focusing on how they inform teaching practices. Instruction on developing philosophy of and strategies for teaching through short position papers, literacy autobiography, and a sequence of assignments for ENGL 120.

770 Studies in American Literature 3
Intensive study of a special period, theme, technique, or group of writers central to the formation, development, or flowering of American literature. May be repeated for credit with change of topic.

780 Studies in British Literature 3
Intensive study of a special period, theme, technique, or group of writers central to the formation, development, or flowering of British literature. May be repeated for credit with change of topic.

782 Studies in Irish Literature 3
Intensive study of a special theme, form, period, group of writers, or individual writer (Joyce, Yeats) in Irish literature. May be repeated for credit with change of topic.
## ENTOMOLOGY (ENT)

Boetel, Foster, Harmon, Harris, Knodel, Prischmann-Voldseth, Rider

### COURSES

<table>
<thead>
<tr>
<th>Course Number</th>
<th>Course Title</th>
<th>Credits</th>
<th>Description</th>
<th>Prerequisites</th>
</tr>
</thead>
<tbody>
<tr>
<td>210</td>
<td>Insect Biology, Humans, and the Environment</td>
<td>3</td>
<td>Insect biology and its relevance to humans and the environment. 2 lectures. S (ND:SCI)</td>
<td></td>
</tr>
<tr>
<td>350</td>
<td>General Entomology</td>
<td>3</td>
<td>Fundamental aspects of Entomology, including: insect classification, identification, structure, biology, adaptations, and impact on human society. 2 lectures, 1 two-hour laboratory. F</td>
<td></td>
</tr>
<tr>
<td>360</td>
<td>Economic Entomology</td>
<td>1-3</td>
<td>A distance education course covering agronomic and horticulture insect pests including impact of insects, introduction to IPM, pest management tools, and insect vectors of diseases. May be repeated for 1 credit if previously taken for 2 credits. Prereq: BIOL 151. F</td>
<td></td>
</tr>
<tr>
<td>410/610</td>
<td>Management of Pests</td>
<td>3</td>
<td>How pests are managed and influenced by the environment, society, economics, and pest biology. This class will look at these factors and how they affect pest management practice across taxonomic groups. Prereq: BIOL 151, ENT 350, PPTH 324, PLSC 323. S (even years)</td>
<td></td>
</tr>
<tr>
<td>446/646 [732]</td>
<td>Plant Resistance to Insects</td>
<td>3</td>
<td>This course covers the challenges that insects pose for plants as well as the resistance mechanisms that plants have evolved to meet these challenges. Examples will come from natural, agricultural, horticultural and range systems. Prereq: ENT 350. F (even years)</td>
<td></td>
</tr>
<tr>
<td>470/670</td>
<td>Insect Ecology</td>
<td>3</td>
<td>This course is an introduction to the fundamental concepts of ecology as they relate to insects. We will emphasize how ecological principles help inform many areas of applied and basic entomological research. Prereq: ENT 350. S (even years)</td>
<td></td>
</tr>
<tr>
<td>731</td>
<td>Principles of Integrated Pest Management</td>
<td>3</td>
<td>Principles embodied in the implementation of multifaceted tactics designed to successfully manage pest populations. Prereq: ENT 350, STAT 330. S (even years)</td>
<td></td>
</tr>
<tr>
<td>742</td>
<td>Quantitative Biology</td>
<td>3</td>
<td>Philosophy and techniques for collecting, handling, and interpreting research data in the biological sciences. Prereq: STAT 330. Cross-listed with BIOL</td>
<td></td>
</tr>
<tr>
<td>750</td>
<td>Systematic Entomology</td>
<td>5</td>
<td>Introduction to systematic methods and principles; identification of common families of insects. Prereq: ENT 350. F (even years)</td>
<td></td>
</tr>
<tr>
<td>751</td>
<td>Immature Insects</td>
<td>3</td>
<td>Characteristics of the immature forms of the orders and principal families of insects. Prereq: ENT 750. F (odd years)</td>
<td></td>
</tr>
<tr>
<td>760</td>
<td>Insect Structure</td>
<td>4</td>
<td>Structure of insects and physiological functions. The development of adult form from embryonic and larval precursors during growth and metamorphosis; evolutionary development of insect structures. Prereq: ENT 350. F (odd years)</td>
<td></td>
</tr>
<tr>
<td>761</td>
<td>Insect Physiology</td>
<td>4</td>
<td>Function of major insect organ systems and metabolism, growth, and molting of insects. Prereq: ENT 350, CHEM 260. S (odd years)</td>
<td></td>
</tr>
<tr>
<td>765</td>
<td>Biological Control of Insects and Weeds</td>
<td>3</td>
<td>The natural or applied regulation of pests by predaceous and parasitic insects and pathogens. Prereq: ENT 350. F (odd years)</td>
<td></td>
</tr>
</tbody>
</table>
ENVIRONMENTAL AND CONSERVATION SCIENCES (ECS)

Saini-Eidukat

COURSES

740 Environmental Management 3
Regional and global environmental issues, policies, and regulations. Integrated approach to control and prevention of environmental degradation. Methods for environmental data collection, analysis, and management. Environmental modeling. Environmental risk assessment, feasibility study, and decision making.

750 Environmental Decision Analysis 3
This course will teach students quantitative methods for analyzing problems involving uncertainty and multiple, conflicting objectives. Topics include subjective probability, utility, value of information, and multiple attribute methods. Students will apply these tools to current environmental problems. Prereq: Statistics course.

760 Environmental Impact Assessment 3
Analysis of environmental protection legislation, biological, physical and socioeconomic impacts. National Environmental Policy Act (NEPA) and related regulations. Prereq: ECS 750.

770 Environmental Law and Policy 3
Introduction of major federal and state statues and regulatory programs that governs environmental quality, pollution control and wildlife management, including legislative enactment, regulatory development, enforcement, federal/state relationship and judicial interpretation.
ENVIRONMENTAL DESIGN (ENVD)
Faulkner, Lindquist, Moore

COURSES

101 Introduction to Environmental Design 3
Introduction to the environmental design fields of city planning, urban design, landscape architecture, architecture, and interior design. Particular attention is given to basic design concepts, visualization, visual analysis, imagination, and creativity.

130 Drawing for Environmental Designers 3
Introduction to traditional freehand methods of graphic exploration as employed in architecture and landscape architecture. Prereq: ENVD 101.

172 Environmental Design Fundamentals 4
Introduction to design studio, with practice in representational media, techniques and skills exploring drawing, visual abstraction, visual literacy relating to environmental design problem-solving, visual resolution of form and proportion, and graphic communication. Prereq: ENVD 101.
FINANCE (FIN)

Bowlin, Head; Huseynov, Tian, W. Zhang

COURSES

(All courses 300 level and above require a minimum of junior standing and a 2.50 cumulative GPA.)

320 [BUSN 340] Principles of Finance 3
Various concepts and analytical tools in business finance. Includes financial mathematics, valuation, financial analysis and planning, funding sources, capital budgeting, cost of capital, leverage, dividend policy, and working capital management. Prereq: ACCT 200, 201, ECON 201, 202, STAT 330.

410/610 [BUSN 441/641] Investment Analysis and Management 3
Evaluation of various securities for investment (stocks, bonds), investment analysis (fundamental and technical), concepts of efficient markets, and market risk. Portfolio management and international investment aspects are briefly covered. Prereq: FIN 320.

420/620 [BUSN 442/642] Speculative Markets 3
Evaluation of options, futures, and other derivative securities used for hedging, speculation, and arbitrage. Related market structure, trading strategies, and risks are examined. Prereq: FIN 320 and any FIN 400 level course.

Development, role, and functions of depository financial institutions. Emphasis on domestic and international regulation, structure, management, and operations of commercial banks. Prereq: FIN 320.

440/640 [BUSN 445/645] International Finance 3
Concerns international financial markets, exchange rates, currency futures, and options. Includes financial aspects of international corporations such as management of corporate assets and liabilities, capital structure, cost of capital, capital budgeting, and international risks. Prereq: FIN 320.

460 [BUSN 446] Corporate Finance 3
This course is an extension of FIN 320 with specific focus on the time value of money, risk and return trade-off, capital structure and firm value, project analysis, dividend policies, and financial case analysis. Prereq: FIN 320.

740 [BUSN] Advanced Financial Management 3
In-depth coverage of concepts and decision-making tools in financial analysis, cost of capital, capital structure, capital budgeting, and dividend policy. Emphasis on risk analysis, international perspectives, and current topics in corporate finance. Prereq: FIN 320.
FOOD SAFETY (SAFE)

Myers, Director; Hall, Wolf-Hall

COURSES

401/601 Food Safety Information and Flow of Food 1
An orientation to food safety. How to find, evaluate and report credible food safety information, and comprehension of the complexity of food systems. F, S

402/602 Foodborne Hazards 1
This course will lead students into the comprehension of the vast variety of chemical, physical and biological foodborne hazards. Recommended Prereq: SAFE 401 or 601. F, S

403/603 Food Safety Risk Assessment 1
This course will enforce the concept that no food is 100% safe, and will lead students to understand how to assess the likelihood of foodborne illness events. Recommended Prereq: SAFE 402 or 602. F, S

404/604 Epidemiology of Foodborne Illness 1
This course will lead students to understand foodborne disease outbreaks, comprehend and apply epidemiologic models of disease causation and causal inference, and apply disease outbreak investigation steps. Recommended Prereq: SAFE 403 or 603. F, S

405/605 Costs of Food Safety 1
This course will lead students to comprehend and analyze the economic and societal costs of foodborne illness outbreaks. Recommended Prereq: SAFE 404 or 604. F, S

406/606 Food Safety Crisis Communication 1
This course will lead students to understand the best ways to disseminate food safety information during or following a foodborne illness outbreak. Recommended Prereq: SAFE 405 or 605. F, S

407/607 Food Safety Risk Management 1
This course will lead students to understand strategies and costs of reducing risk of foodborne illness. Recommended Prereq: SAFE 406 or 606. F, S

408/608 Food Safety Regulatory Issues 1
This course will lead students to understand the food safety regulatory structure. Recommended Prereq: SAFE 407 or 607. F, S

409/609 Food Safety Risk Communication and Education 1
This course will lead students to understand the importance of worker training and consumer education in food safety. Recommended Prereq: SAFE 408 or 608. F, S

452/652 Food Laws and Regulations 3
Regulations, laws, and dynamics governing development of food policy. Prereq: SAFE 470. Cross-listed with CFS and AGEC. S

474/674 Epidemiology 3

484/684 Food Safety Practicum 1-3
Supervised experience to give students hands-on practice at addressing food safety problems. Placement with industry, government or academic settings will be arranged. Program permission required for registration.

485 Crisis Communication 3
See Communication for description.

720 Food Safety Costs and Benefits Analysis 3
Theoretical and empirical impacts of food safety costs and benefits. Prereq: SAFE 470/670, AGEC 741. Cross-listed with AGEC.

725 Food Policy 3
Provides quantitative tools and models used to analyze general food safety policies. Prereq: SAFE 470/670. Cross-listed with AGEC and CFS.

750 Advanced Topics in Epidemiology 3
Distribution and dynamics of disease in populations, and factors contributing to the costs of foodborne illness and its prevention. Three lectures. Prereq: SAFE 474/674. Recommended: MICR 460. F (even years) Cross-listed with MICR.

752 Advanced Food Microbiology 3
State-of-the-art techniques in isolation, detection, and characterization of foodborne pathogens. Prereq: MICR 653. Cross-listed with CFS and MICR.

753 Food Toxicology 2
Discussions on the properties of toxic substances found both naturally and as contaminants in foods, the hazards they present to humans and their food supplies, and ways to reduce risks. Prereq: BIOC 460. S (even years)

785 Advanced Crisis Communication 3
Long- and short-term issues for managing communication related to organizational crises are discussed in the stages of pre-crisis, crisis and post-crisis. Cross-listed with COMM.

786 Risk Communication 3
Explores the relationship between communication strategies and risk perception, assessment, and management. Cross-listed with COMM.
## COURSES

### 101, 102 First-Year French I, II (CCN)
- 4 each
- Basic structures and vocabulary of French. Practice in the fundamentals of listening, speaking, reading, and writing. No previous knowledge of French required for FREN 101. Prereq for FREN 102: FREN 101 (ND:HUM)

### 201, 202 Second-Year French I, II (CCN)
- 3 each

### 311, 312 French Conversation and Composition I, II
- 3 each
- Advanced practice to develop greater proficiency in oral and written skills through the study of cultural and literary readings. Prereq: FREN 202.

### 315 Contemporary France
- 3
- An interdisciplinary study of present-day France; discussion of the political, social, and cultural context, including a brief historical overview and the role of France within the global community. Taught in French. Prereq: FREN 312.

### 340 The French-Speaking World
- 3
- Study of works by Francophone writers and the history and cultures that influence their writings. Taught in English and French.

### 345 Women in French Literature
- 3
- Study of works by French and Francophone women writers of different literary periods; portrayals of women by French male and female authors. Taught in English and French.

### 350 Introduction to French Linguistics and Pronunciation
- 3
- Study of the basic nature and function of languages as applied to French. Application of principles of phonetics to the pronunciation of the French language, plus extended practice in diction and intonation. Prereq: FREN 312.

### 360 Studies in Language and Style
- 3
- Focus on the theory and practice of writing in multiple genres in French. Taught in French. Prereq: FREN 312, ENGL 120, Junior standing.

### 365 Advanced Conversation Through Contemporary Culture
- 3
- Advanced practice oral skills in the context of contemporary current events in France and the Francophone world; may be repeated for credit. Taught in French. Prereq: FREN 312.

### 370 Translation: Practice and Theory
- 3
- Introduction to basic concepts, strategies, and issues in translation; practice and development of skills and techniques for translation of a wide variety of texts. Taught in French and English. Prereq: FREN 312.

### 381 Masterpieces of French Literature in Translation
- 3
- Designed for those with no background in French. Introduction to important writers of several periods. Taught in English. Does not count toward a French major or minor.

### 401 Approaches to Literature
- 3
- Introduction to a variety of critical approaches to literature; how to read, understand, and write about French and Francophone texts from various genres and periods. Taught in French. Prereq: FREN 312.

### 410 French Literature and Culture before 1800
- 3
- Overview of the cultural and political history of France before the Revolution and an introduction to important writers and artists through representative works. Taught in French. Prereq: FREN 312.

### 412 French Literature and Culture since 1800
- 3
- Overview of the cultural and political history of France since the Revolution and an introduction to important authors and artists through representative works. Taught in French. Prereq: FREN 312. (alternate years)

### 420 Themes and Topics in French Literature and Culture
- 3
- Exploration of a significant theme or topic in French or Francophone literature and culture (e.g. the comic; philosophy and literature) not routinely included in the curriculum. May be repeated for credit with change in topic or theme. Taught in French. Prereq: FREN 312.

### 422 Genres in French Literature
- 3
- In-depth study of works in French on a specific genre. Course may be repeated for credit with change in genre. Taught in French. Prereq: FREN 312.

### 489 Senior Thesis
- 1
- Integrative capstone experience for seniors majoring in French; faculty guided research within the context of a 400-level literature or culture course leading to a substantive written project in French and its oral presentation to faculty and departmental majors. Prereq: Senior standing; study abroad.
GEOGRAPHY (GEOG)

Saini-Edukat, Chair; Oduor

COURSES

151 Human Geography (CCN)  
Non-ethnocentric understanding of geography of human lifestyles and activities; their place and role in human-environment interaction. (ND:SS)

161 World Regional Geography (CCN)  
Study of geographic processes shaping major world regions and inter-relationships in the global village; geographic bases and implications of current world events. (ND:SS)

262 Geography of North America (CCN)  
Spatial approach to the development of the United States and Canada, which stresses changing cultural landscapes and assessing impacts of planning for resource utilization.

412/612 Geomorphology  
See Geology for description.

455/655 Introduction to Geographic Information Systems  
Application of the principles of geographic information systems and integrally related mapping to solve problems related to environment site characterizations, resource exploration, soil and groundwater contamination, geological and geotechnical investigations, waste management, construction, etc. Comprehensive lab assignments included to give students hands-on experience solving problems with current state-of-the-art software and hardware, digitizers, scanners, and GPS units.

456/656 Advanced Geographic Information Systems  
Application and analysis of advanced techniques and principles of geographic information systems and remote sensing technologies to fully address spatial and time related problems related to urban site characterizations, hydrologic analyses, risk assessment, policy making, disaster response and strategic defense techniques. Comprehensive lab assignments included to give students hands-on experience solving problems with current state-of-the-art software and hardware, digitizers, scanners, and GPS units. Prereq: GEOG 455/655.

470/670 Remote Sensing  
See Geology for description.
COURSES

105, 105L Physical Geology, Lab (CCN) 3,1
Study of the Earth as a physical body; its structure, composition, and the geologic processes acting on and within the Earth. (ND:LABSC)

106, 106L The Earth Through Time, Lab (CCN) 3,1
Introduction to the Earth through time; its origin, history, and evolution of animal and plant life. (ND:LABSC)

107L [304] Eastern North Dakota Field Course 1
Field study of Mesozoic and Cenozoic sediments, landforms, and geological processes that have shaped the landscape of eastern North Dakota. Two-day field excursion and a report. Fee required. Recommended: GEOL 105 or 106.

210 Dinosaurs: Rulers of the Mesozoic 2
A survey of the dinosaurs: their fossil record, environment and place in Earth history.

300 Environmental Geology 3
Human interaction with Earth’s environment. Earthquakes, floods, volcanoes, landslides, water use, pollution, energy, mining, and land-use planning. Recommended: GEOL 105, 105L. (alternate years)

301 Lake Superior Field Course 2

302 Black Hills Field Course 2

303 Paleontology Field Course 1
Paleozoic stratigraphy and paleontology of southeastern Minnesota and northern Iowa. Lecture by arrangement, 1 three and one-half day field excursion. Fee required. Recommended: GEOL 106, 106L. (alternate years)

310 Planetary Geology 3
Survey of planetary geology reinforcing concepts of physical geology; formation and composition of the solar system, comparative planetary geology and geomorphology, extra-solar systems and habitable worlds, astrobiology. Recommended: GEOL 105.

350 Invertebrate Paleontology 3
Survey of invertebrate fossils emphasizing systematics, environments and as stratigraphic markers. Offered periodically. Recommended: GEOL 106, 106L.

410 Sedimentology/Stratigraphy 4
Origin and classification of sedimentary rocks and their stratigraphic relationships. 3 lectures, 1 laboratory. Recommended: GEOL 105, 105L, 106, 106L. (alternate years)

412/612 Geomorphology 3
Land forms and the processes by which they are formed and modified. Recommended: GEOL 105, 105L. (alternate years) Cross-listed with GEOG.

413/613 Glacial Geology 3
Glaciers as agents of geologic change; evolution of landforms and landscapes shaped by glaciers; glaciers and glacial landscapes as records of global climate and environmental change; glacial history of North America. Recommended: GEOL 105, 105L. (alternate years)

414/614 Hydrogeology 3
Concepts of surface and groundwater hydrogeology in natural systems; the hydrologic cycle; physical properties of aquifers and subsurface flow; open channel flow; aqueous geochemistry. Recommended: GEOL 105, MATH 147 or 166, CHEM 122 or 161. (alternate years)

420/620 Mineralogy 4
Crystal forms, crystal chemistry, and formation of non-silicate and silicate minerals. Recommended: CHEM 121 or 150. (alternate years)

421/621 Mineralogy Laboratory 2
Identification and classification of minerals using morphology, physical properties, XRF and XRD. Coreq: GEOL 420/620. (alternate years)

422/622 Petrology 4
Principles of igneous and metamorphic petrology including geochemistry, phase relations, and rock forming processes. Prereq: GEOL 420/620. (alternate years)

423/623 Petrography 2
Identification and classification of rocks in hand specimens and thin sections. Optical mineralogy. Field and laboratory projects required. Coreq: GEOL 422/622. (alternate years)

428/658 Geochemistry 3
Introduction to geochemistry: chemistry of the Earth, groundwater, isotopes, global geochemical cycles, geochemical modeling, and environmental geochemistry. Recommended: CHEM 121 or 150. (alternate years)

440/640 Quaternary Biology 4
Biotic responses to climatic changes; the role of adaptation, extinction, and dispersal in response to the climatic changes of the Quaternary. 2 lectures, field and laboratory studies. Recommended: GEOL 106, 106L. (alternate years)

450/650 Field Geology 3
Interpretation of geology in the field; preparation of base maps and plotting geological data. Lectures, one-week fieldwork, and report. Fee required. Prereq: GEOL 410, 421/621, 423/623, 457/657. (alternate years)

457/657 Structural Geology 4
Dynamics of rock deformation and analyses of Earth structure. Recommended: GEOL 105, 105L, MATH 105. (alternate years)
460/660 Biogeochemistry 3
An overview of how life affects Earth’s chemistry, examining interactions between the atmosphere, the land surface, and the oceans. Biotic mechanisms will be followed via the global cycles of biologically relevant elements stressing human impacts. Offered periodically. Recommended: GEOL 105, 105L, 106, 106L, CHEM 121, 122, BIOL 150, 151.

470/670 Remote Sensing 3
Application of principles of Remote Sensing technology to integrate multiple interrelated data, to identify and/or accentuate spectral indices, magnetic force, electromagnetic energy and other remotely collected data to analyze temporal and spatial variation.

760 Advanced Biogeochemistry 3
Examines the nature of the interaction between Earth’s biogeochemical cycles and climate and how this interaction has evolved over time and will change in the future. Offered periodically. Recommended: GEOL 460/660.
GERMAN (GERM)

Grollman

COURSES

101, 102 First-Year German I, II (CCN) 4 each
Basic structures and vocabulary of German. Practice in the fundamentals of listening, speaking, reading, and writing. No previous knowledge of German required for GERM 101. Prereq: For GERM 102: GERM 101 (ND:HUM)

201, 202 Second-Year German I, II (CCN) 3 each

220 German Culture and Society 3
Exploration of German culture (including everyday culture, film, and literature), politics, history, geography, and religion. A broad overview with particular emphasis on Germany since 1945. Taught in English.

311, 312 German Conversation and Composition I, II 3 each
Advanced practice to develop greater proficiency in oral and written skills through the study of cultural and literary readings. Prereq: For GERM 311: GERM 202.
HEALTH, NUTRITION, AND EXERCISE SCIENCE (HNES)

Albrecht, Ary, Barnhart, Christensen, Deutsch, Gange, Garden-Robinson, Gold, Hansen, Hetland, Liguori, Miller, Rhee, Stastny, Strand, Terbizan, Tucker, Winters

COURSES

100 Concepts of Fitness and Wellness (CCN)  2
Facts about exercise and physical fitness.

108 Tae Kwon Do I  1
The purpose of this course is to teach basic technique and practice of Tae Kwon Do.

109 Beginning Aikido  1
The purpose of this course is to teach basic technique and practice of beginning Aikido.

110 Introduction to Health, Nutrition, and Exercise Sciences  1
Introduction to career opportunities and requirements within the profession. Investigation of the various majors in health, physical education, athletic training, human performance and fitness, nutrition, recreation and sport management. Coreq: HNES 150, 160, 170, or 190.

111 Wellness  3
Examination of personal lifestyle choices related to emotional, nutritional, and mental well-being, 3 lectures.

112 Activity II  1
Basic techniques and practice of individual and dual sports activities.

113 Activity III  1
Basic techniques and practice of team sports.

114 Racquetball  1
Basic techniques and practice of racquetball.

115 Bowling  1
Basic techniques and practice of bowling.

116 Billiards  1
Basic technique and practice of billiards.

117 Judo  1
Basic techniques and practice of judo.

118 Tae Kwon Do II  1
See department for description.

119 Beginning PADI Open Water Scuba  2
Beginning level scuba skills.

121 Intermediate Aikido  1
The purpose of this course is to teach intermediate techniques and practice of Aikido.

122 Advanced PADI Open Water Scuba  2
Advanced level scuba skills.

123 Yoga  1
Basic technique and practice of yoga.

124 Tai Chi  1
Basic technique and practice of tai chi.

125 Tai Chi II  1
The purpose of this course is to teach intermediate techniques and practice of Tai Chi.

126 Social Dance  1
Basic techniques and practice of social and ballroom dance forms such as foxtrot, waltz, jitterbug, polka, schottische, and Latin American dances.

127 Self Defense  1
Basic technique and practice of self defense.

128 Golf  1
Basic technique and practice of golf.

130 Rock Climbing  1
Basic technique and practice of rock climbing.

131 Pilates  1
Basic technique and practice of Pilates.

132 Ultimate Frisbee  1
Basic technique and practice of Ultimate Frisbee.

133 Volleyball  1
Basic technique and practice of volleyball.

134 Basketball  1
Basic technique and practice of basketball.

135 Badminton  1
Basic technique and practice of badminton.

137 Tennis  1
Basic technique and practice of tennis.

138 Flag Football  1
Basic technique and practice of flag football.

139 Dodgeball  1
Basic technique and practice of dodgeball.

141 Food Sanitation  1
Principles of safe food handling practices designed for food service operators. Includes Food Safety Managers’ Certification. Restricted to Dietetics, Hospitality, Family Consumer Science, Food Science, and Food Safety majors and minors only.

142 Yoga II  1
The purpose of this course is to teach intermediate technique and practice of Yoga.
150 Foundations of Physical Education 2
Introduction to developing a conceptual framework for teaching physical education. Includes an overview of the preparation needed and what is expected of physical education teachers.

154 Professional Preparation in Elementary School Activities 3
Instruction of various fundamental movements for elementary aged students. Students will be exposed to such activities as dance, gymnastics, fundamental movement skills, and games. Prereq: HNES 150.

160 Foundations of Health Professions 2
Introduction to health education and health promotion that examines the professional activities and competencies required for successful practice in the field.

170 Introduction to Exercise Science 2
Investigation of various Exercise Science career opportunities within the field and the professional track at NDSU.

190 Introduction to Sport and Recreation Studies 3
This course is designed to introduce sport and recreation studies majors to the foundations and underlying principles of sport and recreation management.

200 Principles of Nutrition 3
Current nutrition facts and philosophy as a basis for meeting nutritional needs in a changing society.

210 First Aid and CPR (CCN) 2
Successful course completion leads to American Red Cross CPR certification for adult, child, and infant AED certification for the adult and child; and First Aid involving a variety of emergency situations.

211 Successful Coaching 1
This course is designed to help potential coaches develop a successful coaching philosophy. Students will complete an examination through the American Sport Education Program that will certify them to coach in 35 states.

217 Personal and Community Health (CCN) 3
Study of vital personal and community health issues. Particular attention to current health facts, habits, and attitudes as they relate to home, school, and community.

224 Event Management in Sport 3
Introductory course in event management that will provide students the opportunity to investigate the facilitation of sports events. A major component of this course will be participation in a major sports event. Prereq: HNES 190 and Sports and Recreation Leadership majors only.

225 Camp Management and Outdoor Recreation Skills 3
Principles and practices in camp management and counseling. Camping skills, activities and techniques.

231 Officiating Football 1
Rules and techniques of officiating football.

232 Officiating Basketball 1
Rules and techniques of officiating basketball.

250 Nutrition Science 3
Scientific principles of nutrition based on chemical structure and function of the nutrients. Prereq or Coreq: CHEM 117 or 121.

251 Nutrition, Growth, and Development 3
Examination of growth and nutrient needs through the lifecycle. Prereq: HNES 200 or HNES 250.

253 Motor Learning and Performance 3
Study of the principles of motor learning and development and how those principles apply in physical education and sport skill development. Prereq: HNES major or minor or Coaching minor.

255 Professional Preparation in Middle School Physical Education 3
Instruction of various fundamental movement for middle school students. Students will be exposed to such activities as team sports, intermediate movement skills, and games. Prereq: HNES 150, 154, 253, 256 and HPE professional standing.

256 Professional Preparation in High School Physical Education 3
Instruction in the fundamentals of teaching high school physical education activities. Prereq: HNES 150, 154, 253 and HPE professional standing.

260 Athletic Training Medical Terminology 1
Medical terminology related to athletic training and other allied health professions.

261 Food Selection and Preparation Principles 3
Scientific principles underlying food selection, preparation, and preservation; integration of nutrition principles, food standards, cost comparisons, and new food developments. Prereq: HNES 141 and CHEM 117 or 121.

261L Food Selection and Preparation Principles Laboratory 2
Illustrates and extends lecture topics and stresses practical application of scientific food preparation principles. Prereq: HNES 141. Coreq: HNES 261.

270 Consumer Issues in Nutrition 3
Current developments in food and nutrition recommendations and consumer related concerns.

271 Techniques of Strength and Conditioning 3
The course presents strength training and conditioning theory and practice. Explored are principles of strength and conditioning, mastery and analyses of different exercises, and program design and implementation for general/athletic/special populations. Exercise Science majors only.

272 Techniques of Cardiovascular Conditioning 3
Understanding the techniques of conditioning the cardiovascular system. Types of conditioning explored: walking, jogging, spinning, aerobic dance, step aerobics, bench programming, cardio-kickboxing, TaeBo, and other popular types of programming. Exercise Science majors only.

276 Professional Observation 1
Observation in a setting providing established health-fitness services. Prereq: HNES 170, 272.
### 300 Curriculum, Standards, and Assessment in Physical Education  
This course bridges the gap between theory and practice by providing a practical approach to curriculum writing, standards development and assessment techniques used in K-12 physical education programs. Prereq: HNES 253, 255, 256 and HPE professional standing.

### 326 Recreation Programming  
Principles of the process for designing leisure experiences. Art, crafts, music, dance, sport and games, special events, and environmental activities are examined. Risk management, intramural sports organization and program budgeting are stressed. Prereq: Sports and Recreation Leadership majors only.

### 330 Coaching Football  
Rules, theory, principles, and fundamentals of coaching football. Prereq: Knowledge of the sport.

### 331 Coaching Basketball  
Rules, theory, principles, and fundamentals of coaching basketball. Prereq: Knowledge of the sport.

### 332 Coaching Track and Field  
Rules, theory, principles, and fundamentals of coaching track and field. Prereq: Knowledge of the sport.

### 333 Coaching Wrestling  
Rules, theory, principles, and fundamentals of coaching wrestling. Prereq: Knowledge of the sport.

### 334 Coaching Baseball and Softball  
Rules, theory, principles, and fundamentals of coaching baseball and softball. Prereq: Knowledge of the sport.

### 335 Coaching Volleyball  
Rules, theory, principles, and fundamentals of coaching volleyball. Prereq: Knowledge of the sport.

### 336 Methods of Coaching  
Provides information necessary to coach at any level from elementary to college. Includes broad overview of the philosophy, methodology, and management of sport.

### 341 Psychosocial Aspects of Health  
Study of the interaction of the person and his/her environment. Discussion of emotional states, physiological responses and behaviors influencing a person’s health, and the health of those around them. Prereq: PSYC 111.

### 345 Materials and Concepts of Health Education  
Development and dissemination of health content helping community and school health educators place health instruction in a perspective that relates it to efforts aimed at protecting and promoting the health of children, youth and adults. Prereq: HNES 217, HNES 160, health major or minor.

### 350 Fitness Education Activities and Materials  
Topics related to teaching concepts-based fitness in high school physical education. Prereq: HNES 253, 255, 256, 300, 367 and HPE professional standing.

### 351 Metabolic Basis of Nutrition  
Biochemical and physiological principles of human nutrition. Nutrients in relation to metabolic regulation. Prereq: HNES 250, CHEM 240, BIOC 260 or 460 and Dietetics professional standing.

### 352 Physical Education Activities and Materials  
Study of physical education activities and materials that physical education majors and minors will use in EDUC 481. Prereq: HNES 253, 255, 256, 300, 367 and HPE professional standing.

### 354 Introduction to Medical Nutrition Therapy  
Introduction to the role and skills in nutritional care and application of skills necessary for beginning competency as a clinical dietitian. Prereq: HNES 251, 351, Dietetics professional standing.

### 354L Introduction to Medical Nutrition Therapy Laboratory  
Supervised practice in dietetics, for Coordinated Program Dietetics students, in a health care setting, 1 three-hour laboratory. Prereq: HNES 251, 351. Coreq: HNES 354.

### 355 International Health  
Introduction to the interrelationship of health and international affairs focusing on health as an issue of international relations and the technical and financial cooperation for health and the development.

### 361 Food Production Management  
Principles and methods of purchasing, production, and management for quantity foodservice operations. Prereq: HNES 261, 261L.

### 361L Food and Production Management Laboratory  
Menu and special event planning, food production, recipe analysis, and safety & sanitation for student-led “made-from-scratch” lab experience. Coreq: HNES 361.

### 365 Kinesiology  
Study of movement analysis with emphasis on anatomical and movement principles. Prereq: BIOL 220, 220L.

### 367 Principles of Conditioning  
Scientific theory and application of principles and techniques of physical conditioning to optimize training programs. Introduction of a wide variety of sports activities and associated training protocols. Prereq: BIOL 220, 220L.

### 368 Biomechanics of Exercise  
Study of the application of the principles of biomechanics and physics to human movement. Prereq: HNES 365.

### 370 Activity Benefits and Exercise Prescription in Disease  
Focus on the role of physical activity in the development and treatment of chronic/metabolic diseases, with description of exercise interventions. Prereq: BIOL 220, 220L, 221, 221L.

### 371 Fitness Programming and Management  
Implementing various types of health and fitness programs focusing on worksite health promotion programming. Prereq: Exercise Science majors only.
388 Concepts of Athletic Training
This course is designed to discuss current information related to the various domains of the athletic training profession. Prereq: BIOL 220, BIOL 220L, BIOL 221 and BIOL 221L.

420 Needs Assessment and Program Planning in Health Education
This course provides students with the practical knowledge and skills to assess health resources and needs, and to develop and implement health promotion programs to meet specific needs in particular populations.

426 Sport and Recreation Administration
This course is intended to familiarize sport and recreation leadership majors with common administrative practices in sport and recreation. Prereq: Junior standing and Sports and Recreation Leadership majors only.

427 Leisure and Society
Survey of leisure problems and opportunities in society. Emphasis on critical analysis of completed writing and research in sport and recreation. Historical foundations and development of a personal philosophy of sport and recreation are stressed. Prereq: Junior standing.

428 Sport Management Internship
Course offers students $20 hours of sport industry work experience.

429 Sport & Recreation Internship
Capstone course for Sport and Recreation Leadership majors. Supervised professional internship in an approved professional sport and/or recreation setting. (400 hours of experience) Prereq: HINES 491.

430/630 Socio-Cultural Dimensions in Sport
Students will gain a level of understanding of how sport has and does contribute to the notion of nation building in North America and across the world. Prereq: Sports and Recreation Studies or Physical Education-Community Sports majors only.

431/631 Governance in Sport
The students will gain a level of understanding of (1) how governance in sport is structured, (2) what governance aims to do, and (3) how and why governance impacts sport. Prereq: Sports and Recreation Leadership majors only.

436/636 Issues in Sport Management Economics
Students will gain a level of understanding of issues in sport management economics. Prereq: Sports and Recreation Studies or Physical Education-Community Sports majors only.

442/642 Community Health and Nutrition Education
Nutrition education in community settings. Topics include behavior change, education and counseling theory, needs assessment, planning, implementation, and evaluation in a community setting. Prereq: HINES 251.

442L/642L Community Health and Nutrition Education Lab
Application of nutrition education and program development in community settings. Coreq: HINES 442/642.

445 Organization and Administration of Coordinated School Health Programs
Capstone course for health educators. Examination of coordinated school health programs (CSHP). Analysis of the components of and approaches to development of CSHP. Emphasis on skills required for entry-level health educators. Prereq: HINES 345, Senior standing.

452/652 Nutrition, Health, and Aging
Physiological changes with aging and their relationship to food habits and nutritional need. Common nutritional health problems with emphasis on prevention and treatment. Prereq: HNES 200 or HNES 250.

453 Food and Dairy Microbiology
See Microbiology for description.

455/655 Sports Nutrition
Provides both current research and the translation of research findings into practical advice, offering unique insights on how nutrition can be used to design and effectively implement the optimal diet for performance. Prereq: HINES 200 or equivalent and sophomore standing.

458/658 Advanced Medical Nutrition Therapy
Principles in the nutrition care of patients with conditions requiring nutrition care. Prereq: HINES 354.

458L Advanced Medical Nutrition Therapy Laboratory

460 Foodservice Systems
Role of foodservice in today's society. Application of administration concepts in foodservice operation including equipment, layout, marketing, and budget management. Prereq: HINES 361, 361L.

460L Foodservice Systems Laboratory
Supervised practice for CP students in foodservice to accompany HINES 460. Coreq: HINES 460.

461 Administrative and Social Aspects of Physical Education and Athletics
Study of administrative principles and social aspects that influence the development of physical education and athletic programs. Prereq: HINES 300, 350, 352, 367, Senior standing and HPE professional standing.

465 Physiology of Exercise
Effects of exercise on the physiology of the human body. Includes aerobic systems, strength/muscle adaptations, body composition, training programs, and other areas related to training. Prereq: HINES 365 and BIOL 221, 221L.

466 Physiology Exercise Laboratory
Laboratory exercises to test aerobic and anaerobic capacity, strength, body composition, dietary analysis. Coreq: HINES 465.

467 EKG Monitoring
EKG monitoring and interpretation. Prereq: HINES 466.

472 Aerobic Fitness Assessment and Techniques
Physiological testing procedures applicable to physical activity and fitness settings, with application to aerobic fitness and body composition assessment. Prereq: HINES 465 and HNES 370.

473 Anaerobic Exercise Prescription and Advanced Resistance Training Techniques
Designing resistance training programs for various sports and activities, with hands on experience leading people through advanced resistance training exercises. Prereq: HINES 368.
474 Methods in Resistance Training and Cardiovascular Conditioning
This course is designed to provide the student knowledge in the techniques of resistance training, cardiovascular conditioning, and program design. Prereq: HNES 465 and restricted to Exercise Science professional students only.

475 Exercise Science Internship 12
Capstone course for human performance and fitness majors. Supervised field work in a professional setting with emphasis on administration, supervision, and program leadership.

480 Dietetics Practicum (Capstone Experience) 12
Practical experience for students in the Coordinated Program in Dietetics with the responsibility equal to that of an entry-level dietitian. 40 hours laboratory per week in a clinical facility. Prereq: HNES 458L, 460L.

481 Dietetics: Capstone Course for DPD 1
Capstone for Dietetics majors in the Didactic program in Dietetics.

482 Community Health Internship 12
Capstone course for Health Education Majors - Community Health Option. Supervised field work in an approved professional setting with an emphasis on administration, supervision and program implementation leadership. Prereq: Senior standing.

483 Community Sports Internship 9
Capstone course for Physical Education majors - Community Sports option. Supervised field work in an approved professional setting. Prereq: Senior standing.

487/687 Athletic Training Organization and Administration 3
Organization and administrative components of athletic training including budgeting, facilitation design, human resource topics and professional development items. Prereq: HNES 485/685.

488 Clinical Experience V 1
Clinical proficiencies and clinical experience hours. Prereq: HNES 387.

489 Athletic Training Capstone Experience 1
Capstone experience providing students the opportunity to utilize athletic training skills and knowledge in an off-site setting under the supervision of a clinical instructor. Prereq: HNES 488.

701 Administrative Leadership in HNES 3
This course provides an introduction to administrative leadership in health, physical education, recreation and sport. The course is designed to provide students with skills, techniques and practices for successful leadership.

702 Sport Marketing and Public Relations in HNES 3
Course explores the breadth of the sports marketing industry and how industry interfaces with the consumer. Focuses on research studies and marketing theory related to marketing efficacy.

703 Scientific Aspects of Sport 3
Essentials of physical training and biomechanical analysis in sport.

704 Psychological Foundation of Sport and Physical Activity 3
Comprehensive description of sport psychology, application of concepts to sport performance improvements as well as other areas in physical activity.

710 Recent Literature and Research 3
Directed readings and class discussions of recent literature, steps involved in problem solving, and critical analysis of research in the field.

711 Physical Education Curriculum 3
To provide an understanding of the role and importance of physical education in today's society, steps involved in curriculum planning, trends and issues in physical education curriculum and to orient students to various ideas in physical education curriculum design.

712 Supervision and Analysis in HNES 3
To study the scope of supervision, techniques for improvement of various phases of the learning process of teaching or coaching, and means of evaluating the effectiveness of supervision in the field.

713 Graduate Exercise Physiology 3
Comprehensive state-of-the-art review of the current knowledge of the physiological responses to exercise.

714 Legal Liability in HNES 3
Focused on risk management and legal liability in health, physical education, and recreation. Overview of civil and criminal law related to sports and recreation.

717 Recreation and Sport Complex Management 3
The goal of this class is to explore guidelines and develop a base of information important for the design and management of facilities for physical activity and sport.

719 Wellness and Leisure in Adults 3
Explores the role of leisure in adult development with specific focus on the aging process, leisure needs, and leisure services. Basic concepts associated with leisure, aging, targeting leisure services, research and public policy are presented.

721 Health Promotion Programming 3
This course is designed to help students understand and develop skills for health promotion programming, regardless of settings.

723 Advanced Techniques in Sports Medicine 3
This course will review current research in the latest and most advanced techniques in sports medicine.

724 Nutrition Education 3
Principles and practices of teaching individuals and groups to translate nutrition knowledge into action. Emphasis on research in evaluation of nutrition education. Prereq: HNES 200 or HNES 250.

726 Nutrition in Wellness 3
Course will address wellness promotion through nutrition. Nutritional risk and protective factors will be examined as they relate to public health and individual nutrition.
727 Physical Activity in Wellness
Information and discussion regarding the influence of physical activity on personal wellness. Review of the association between sedentary habits, risk for chronic disease, and the most recent physical activity recommendation to battle disease.

729 Grant Writing for the Health Professional
Steps needed for successful grant applications. Identification of funding sources and completion of the application form. Designed for Registered Dietitians.

730 Fundamentals of Leadership
An appreciation of the basic principles of leadership by gaining an insight into one's own leadership abilities and developing the practical skills necessary to function as a leader in a realistic context.

732 Foodservice Operation Management
In-depth analysis of several critical foodservice operations management decisions and development of analytical skills needed in solving operation management problems encountered in the foodservice industry.

740 Maternal and Child Nutrition
Behavioral, physiological and public health issues impacting dietary and nutritional factors that support normal growth and development. Focuses on the early stages of the life cycle: gestation, lactation, infancy, preschool, school age and adolescence.

741 International Nutrition
Presents major nutritional problems that influence the health, survival, and developmental capacity of populations in developing societies. Covers approaches implemented at the household, community, national, and international levels to improve nutritional status.

750 Advanced Human Nutrition
Physiological and biochemical aspects of human nutrition. Prereq: HNES 351, BIOC 701.

751 Metabolism of Micronutrients
This course focuses on nutrition that integrates mechanisms and interactions of vitamins and minerals from the cellular level, through the integration and regulation of metabolism in the whole organism.

752 Phytochemicals
Overview of phytochemicals (non-nutritive biologically active compounds) from fruits, vegetables, cereals and oilseeds with implications related to chemistry, physiological functions, and potential health implications.

754 Assessment in Nutrition and Exercise Science
Techniques to assess nutritional status, physical fitness status and how to interpret the information received.

755 Advanced Clinical Nutrition
In-depth study of the pathophysiology of nutritional disease. The emphasis is in endocrinology, metabolism, and gastroenterology. Includes pathological disorders that result in nutritional disease or those nutrition diseases which affect physiological function.

756 Pediatric Clinical Nutrition
The physiological, biochemical and nutritional aspects of disease processes relevant to infants and children up to 18 years of age, including inborn errors of metabolism, food hypersensitivity, obesity, and diseases of the major organ systems. Prereq: HNES 755.

777 Current Research Practices In Athletic Training
Introduces students to current research methods and the importance of conducting athletic training research.

781 Orthopedic Assessment I
Practical exposure to evaluation, application, and construction of protective taping devices and techniques. In addition, practice and guidance of injury recognition and evaluation techniques of the lower extremity.

782 Orthopedic Assessment II
Guidance and practice in the evaluation and recognition of athletic injuries to the upper extremity, head, neck, and back, and skin disorders. In addition, environmental conditions will be discussed.

783 Athletic Training Clinical Experience I
Taping/Protective Devices and other clinical proficiencies plus required clinical experience hours. Prereq: HNES 781.

784 Athletic Training Clinical Experience II
Lower Extremity and other clinical proficiencies plus required clinical experience hours. Co-req: HNES 782.

785 Athletic Training Clinical Experience III
Upper Extremity/Head/Neck/Back, Therapeutic Modalities and other clinical proficiencies plus required clinical experience hours. Co-req: HNES 784.

786 Diagnostic Evaluation of Athletic Injuries
This course will focus on new exam techniques to advance the practice of athletic training skills in assessment and diagnosis.

787 Advanced Therapeutic Modalities
An advanced comprehensive examination of therapeutic modalities through readings, discussions, hands-on practice, and research. Emphasis will be on the current literature, how recent research fits into clinical practice, and new modalities/techniques.

788 Technology in Athletic Training
This course introduces students to a variety of technology applications currently utilized in the field of athletic training education, research, and in areas of athletic training clinical practice.
HISTORY (HIST)

Cox, Head; Barnett, Danbom (Emeritus), Harvey, Helgeland, Isern, Justitz, Norris, Peterson, Silkenat

COURSES

101 Western Civilization I (CCN)  
Introductory survey of Western Civilization from prehistory to 1648, emphasizing major political, social, cultural, and intellectual developments. (ND:HIST)

102 Western Civilization II (CCN)  
Introductory survey of Western Civilization from 1648 to the present, emphasizing major political, social, cultural, and intellectual developments. (ND:HIST)

103 U.S. to 1877 (CCN)  
Survey of United States history to 1877, emphasizing major political, economic, social, and cultural developments. (ND:HIST)

104 U.S. Since 1877 (CCN)  
Survey of United States history since 1877, emphasizing major political, economic, social, and cultural developments. (ND:HIST)

135 Race in U.S. History  
The historical development of racism and racial ideas and the interactions among Native Americans, European-Americans, and groups of various races from precontact to the present. (ND:HIST)

220 North Dakota History (CCN)  
Survey of North Dakota history. Includes social, economic, cultural, and political history of North Dakota from prehistoric times to the present.

251 Introduction to Public History (CCN)  
Introduction to history career paths outside of the classroom including museums, historical societies, historic preservation, and historic sites.

252 Introduction to Museum Work (CCN)  
Introduction to the variety of careers available and procedures used in museums and historical societies: curatorial, administrative, conservation, research, and educational. Prereq: HIST 251.

259 Women in European History 1400-1800 (CCN)  
Exploration of what it meant to be female in early modern Europe: women’s options, how women saw themselves, how they were perceived, and origins of these perceptions.

261 American Indian History (CCN)  
Survey of Native American history, emphasizing diversity of historical experience. Themes include cultural persistence, leadership and activism, and strategies adopted by Indian communities for coping with change. (ND:HIST)

270 American Religious History  
See Religious Studies for description.

271 Introduction to Latin American History  
Study of important social, economic, and cultural developments in Latin American history. Emphasizes the socio-economic and cultural topical developments and the political and international factors influencing the region. (ND:HIST)

280 History of East Asia to 1600  
The history of East Asia to 1600, focusing on the political, economic, and cultural phenomena critical to the development of traditional China, Japan, and Korea.

281 History of East Asia from 1600  
The history of modern East Asia from 1600 to the present, focusing on the political, economic, and cultural phenomena critical to the development of modern China, Japan, and Korea.

320 History of Christianity  
See Religious Studies for description.

381 Australia and New Zealand  
Comprehensive, but not exhaustive, historical comparison of Australia and New Zealand with emphasis on formation of national identity(ies). Organized topically to facilitate comparisons.

382 Canada  
Topical treatment of the history of Canada, beginning with First Nations and charting the evolution of a bi-cultural, multi-cultural nation-state.

390 Historical Research and Writing  
Techniques and skills of historical research and writing. Includes researching in libraries and archives, constructing thesis statements, outlining papers, building logical arguments, writing clear and concise English, using primary sources, footnoting, and copyediting. Prereq: ENGL 120, Junior standing.

401/601 Archival Theory and Practice  
Archival theory and its practical application in supervised projects utilizing the resources of the Institute for Regional Studies and University Archives.

403/603 Archival Photography  

422/622 U.S. History 1829-1917 I  
Political, social, and economic history of the United States 1829-1877; emphasizing socioeconomic change, the Sectional Crisis, the Civil War, and Reconstruction.

423/623 U.S. History 1829-1917 II  
Political, social, and economic history of the United States 1877-1917; emphasizing industrialization, urbanization, and progressive reform.

424/624 U.S. History 1917-Present I  
Political, social, and economic history of the United States 1917-1960; emphasizing the New Deal, the world wars, and the Cold War era.

425/625 U.S. History 1917-Present II  
Political, social, diplomatic, and economic history of the United States since 1960; emphasizing foreign policy, domestic developments, and socioeconomic change.
429/629 History of the American South to 1850 3
Key historical developments in early American history in the South. Major topics include the establishment of white dominance in the southern colonies, the move to a slave culture, and the development of a regional identity.

430 Prairie Earth, Prairie Homes: A Field School 3
Exploration, investigation, and restoration of earth buildings on the northern plains. Students study the cultures that created earth buildings; encounter the buildings as cultural artifacts; and engage in hands-on restoration work. Prereq: Junior standing.

431/631 The North American Plains 3
Historical treatment of the Great Plains of North America as an international region, comprising the Canadian prairies and the American plains.

434/634 Environmental History 3
Traces the changing relationship between human cultures and the natural world through time, mainly in North America. Examines the causes and consequences of major changes to landscapes and plant and animal species and ecosystems, analyzes the emergence of the conservation and environmental movements, identifies shifts in environmental thought, and traces the development of environmental laws and policies.

436/636 American Frontier to 1850 3
Early American frontier from 1500s to mid-1800s, emphasizing Indian-White relations, colonial wars, social life in the backcountry, and exploration and settlement.

437/637 American West Since 1850 3
Centers on a century of enormous change in the trans-Mississippi west. Major topics include the Plains Indian wars, post-conquest Indian history, mining, cattle, homesteading frontiers, the urban West, and environmental history.

440/640 The Ottoman Empire 3
This course examines the growth of the Ottoman Empire after 1300 and then analyzes its responses to a variety of challenges after 1683. We examine Balkan states such as Greece and Serbia, Arab lands such as Iraq and Egypt, and Turkey itself. Topics examined include the role of Islam in Ottoman administration, the rights of religious minorities such as Christians and Jews, and the evolution of Arab nationalism.

450/650 Ancient History 3
Cultural, political, economic, military, and social history of the ancient Near East, Greece, and Rome.

451/651 Medieval History 3
Cultural, political, economic, and social history of the Middle Ages.

454/654 Renaissance and Reformation 3
Political, social, and economic history of continental Europe from 1400 to 1650; with a focus on Renaissance and Reformation.

455/655 The Eighteenth Century 3
Political, social, and economic history of continental Europe from 1650 to 1815; with a focus on Enlightenment and French Revolution.

456/656 Europe 1815-1914 3
Political, social, and economic history of Europe from the defeat of Napoleon to outbreak of World War I.

457/657 Europe Since 1914 3
Political, social, and economic history of Europe including World War I, the Russian Revolution, Nazism, World War II, and the postwar era.

465/665 Germany since 1750 3
This course traces the evolution of the main German-speaking regions of Europe into modern, industrialized nation-states. From the time of Bach to the fall of the Berlin Wall and beyond, we analyze key trends and events in the politics, society, and culture of Prussia, Imperial Germany, the Weimar Republic, Austria, the Nazi dictatorship, East and West Germany, and the expanded Federal Republic after 1989.

467/667 History of Russia II 3
Cultural, diplomatic, intellectual, and political history of Russia and the Soviet Union; agriculture, industry, Marxism in Russia, revolution of 1905 and 1917, and the Soviet Union from Lenin to present.

470/670 Modern Latin America I 3
Examines the social, economic, political, and cultural developments in Latin American history. Begins with the wars of independence (circa 1800) and concludes with the emergence of modern states at the close of the 19th century.

471/671 Modern Latin America II 3
Study of important social, economic, political, and cultural developments in Latin America from the late 19th century through the modern epoch.

473/673 Mexico I 3
Study of the important social, economic, political, and cultural developments in Mexican history from the pre-Columbian epoch through the wars for independence, ending in 1821.

474/674 Mexico II 3
Study of the important social, economic, political, and cultural developments in Mexican history from independence in 1821 through the contemporary era.

476/676 Southwestern Borderlands to 1848 3
Study of the important social, economic, political, and cultural developments of the American southwest from the pre-Columbian epoch, through Spanish and Mexican ownership, to U.S. acquisition in 1848.

480 History of Modern China from 1600 3
The history of modern China from 1600 to the present focusing on the expansion of China's empire, confrontation with the West, and the dramatic political and social changes of the 20th century.

481 History of Japan 3
This course surveys the history of Japan from its myths of creation to the present, focusing on the development of traditional Japanese culture, the rise of the samurai, Japan's response to the West, and the militarization and modernization of Japan during the 20th century.

482 Vietnam: 125 Years of Conflict 3
The history of Vietnam from the 1850s to the present focusing on French colonial rule, American involvement in the region, revolutionary warfare, and Vietnam's emergence as an autonomous, independent state.

COURSES

340 Colloquium in the Humanities  3
Interdisciplinary exploration of selected topics in the humanities; emphasis on integrating information and perspectives from multiple disciplines and on student participation through discussion, research, writing, and projects. May be repeated for credit with change in topic. Prereq: Admission to Honors program.

341 Colloquium in the Social Sciences  3
Interdisciplinary exploration of selected topics in the social sciences; emphasis on integrating information and perspectives from multiple disciplines and on student participation through discussion, research, writing, and projects. May be repeated for credit with change in topic. Prereq: Admission to Honors program.

342 Colloquium in the Sciences  3
Interdisciplinary exploration of selected topics in the sciences; emphasis on integrating information and perspectives from multiple disciplines and on student participation through discussion, research, writing, and projects. May be repeated for credit with change in topic. Prereq: Admission to Honors program.

386 World Literature: Imaginary Homelands  3
Reading and discussion of works from literatures around the world, including philosophical non-fiction, emphasizing the diversity of responses to the human condition. Prereq: Admission to Honors Program.

489 Senior Thesis  1-6
Primary research or creative activity under the guidance of a faculty member.

</tbody>
</table>
773 Occupational Programs in Family and Consumer Sciences 3
Planning and implementing occupational Family and Consumer Science programs in career and technical education. Focus on cooperative education, career pathways and work-based education.

774 Teaching Family and Consumer Science with Technology 3
This course will prepare family and consumer science teachers to use technology as a tool in their classrooms by focusing on the knowledge, skills, and attitudes necessary to effectively use a variety of technological applications.

775 Internship 1-3
Supervised experience in a formal or informal environment relevant to the application of educational principles. Setting may include middle, secondary, post-secondary, and adult programs.

777 Evaluation in Family and Consumer Sciences 2
Examination of the role of course assessment, teacher effectiveness, facilities, equipment, and staffing patterns in program evaluation. Review of research on evaluation and exploration of alternative evaluation models.

781 Professional Development in Agricultural Education 1-3
Continued professional development in technical and pedagogical subjects of current importance for professionals in agricultural education.

787 Issues in Education 1-3
Exploration and assessment of a current issue associated with middle and secondary applied academic programs. Prereq: Current employment or experience as middle/secondary teacher.
HUMAN DEVELOPMENT AND EDUCATION (HD&E)

COURSES

189 Skills for Academic Success  1
See University Interdisciplinary Studies for description.

220 Individual and Family Wellness  2
Integrative investigation of the wellness of individuals and families in today's complex society. The interdisciplinary nature of human wellness is examined critically and means of optimizing lifelong wellness are addressed. 2 lectures.

320 Professional Issues  1
Analysis and integration of professional perspectives and trends; life career development skills (self-assessment, resume writing, interviewing, and correspondence.) 1 lecture. Prereq: Junior standing.

777 Advanced Stress Management  3
The dynamics of stress, sources and symptoms of stress, and stress management techniques will be presented. Research in stress from the interdisciplinary perspectives of wellness, applied gerontology, and counseling.
HUMAN DEVELOPMENT AND FAMILY SCIENCE (HDFS) [CDFS]

Deal, Head; Benson, Bjele; Blodgett-Salafia, Brotherson, Duggin, Fitzgerald, Fuller-Iglesias, Habeldank, Hektner, Kaler, Light, McGeorge, Pankow, Philbrick, Randall, Sanders, Stone-Carlson, Torges, Werlinger, Woods

COURSES

135 Family Science 3
Introduction to family science concepts including family life cycle, different styles of family life, and the influence of society on the family.

182 Wellness and Aging 3
Study of wellness in the later years with a focus on the positive aspects of aging and the contributions of elders in society including emphases on research, theory, and wellness resources.

186 Consumer and Society 3
Consumer rights, responsibilities, and consequences of consumer decision-making. Overview of advertising, fraud, and other issues.

230 Life Span Development 3
Study of human growth and development throughout the life span.

242 Couples, Marriages, and Families 3
Study of the formation of relationships in varied contexts: examines the diversity of couples, marriages, and families that exist in our contemporary society. Emphasis will be on relationship health as well as barriers to relationship wellness.

250 [403] Introduction to Research Methods in Child Development and Family Science 3
Undergraduate orientation to research methods in child development and marital/family relationships; students will explore the scientific method as applied to CDFS, methods/issues related to data collection, and methods of data analysis.

310 Citizenship & Social Activism 3
This course is designed to help students understand and promote civic engagement and leadership. Students will learn to analyze social, economic, and political problems through a theoretical framework and practical application. Leadership development will be emphasized using tools of social change. Instructor approval required.

320 Prenatal, Infant and Toddler Development 3
Study of growth and development of the child from conception to age 3.

330 Child Development 3
Study of children, birth through middle childhood. Emphasis on social, cognitive, physical, and emotional development. Recommended: HDFS 230, 320, or PSYC 250.

341 Parent-Child Relations 3
Contemporary parenting principles and strategies. Emphasis on application in the home and professional settings. Prereq: HDFS 230 or PSYC 250.

350 Fundamentals of Hospital Child Life 3
Introduction to the child life profession through exploring the needs of hospitalized children. Child development theories will be used to understand coping and intervention techniques for the hospitalized child. Prereq: HDFS 320 or 330.

353 Children, Families, and Public Policy 3
Interaction of the national economy and the family economy with regard to the public programs affecting well-being of families. Emphasis on philosophies of service delivery and policy alternatives. Prereq: 6 credits social science.

357 Personal and Family Finance 3
Factors influencing decisions on acquiring and using financial resources and budgeting to achieve goals. Overview of credit, taxation, savings, insurance, and investments. Recommended: HDFS 186.

424/624 Observation and Assessment of Children 3

425/625 Risk, Resilience and Competence in Children and Adolescents 3
Critical examination of research and theory on elements that place children and adolescents at risk, factors that promote resilience for those who are at risk, and the promotion of competent development for children and adolescents.

430/630 Topics in Cognitive Development 3
Understanding the fundamentals of cognitive development In children and adolescents. Topics vary each time the course is offered and may include cognition, perception, concepts, reasoning, memory, and language. May be repeated for credit with change in subtopic. Prereq: HDFS, 320, 330, 450 or equivalent.

435/635 Topics in Socioemotional Development 3
Understanding the fundamentals of socio-emotional development in children and adolescents. Topics vary each time the course is offered and may include temperament, peer relations, moral development, emotional development, gender development, or development of self-concept. May be repeated for credit with change in subtopic. Prereq: HDFS 320, 330, 450 or equivalent.

448/648 Issues in Sexuality 3
Study of personal, interpersonal, and societal meanings of human sexuality. Decision making relevant to sexual behavior. Prereq: 6 credits social science.

450/650 Adolescent Development 3
Study of physical, social, cognitive, and emotional development of adolescents. Includes examination of contemporary issues related to this age group. Prereq: HDFS 230, 320, 330, or PSYC 250.

460/660 Adult Development and Aging 3
Study of development during adulthood and later life. Emphasis on perceptual-motor and cognitive functioning, personality, adjustment, social, familial, and cultural aspects of adulthood. Prereq: 6 credits social science.

462/662 Methods of Family Life Education: Models of Family Crisis and Wellness 3
Introduces students to the study of various family issues including crisis, stress, diversity and change and the role of family life education as a method of preventing or mediating family distress. Prereq: HDFS 135 or HDFS 242.
468/668 Families and Work
Issu es, opportunities and problems related to the interface of work and family. Topics include household division of labor, trends in the labor market, and work-family policy. Prereq: 6 credits social science or HDFS.

472 Family Trauma and Burnout
An overview of primary and secondary systemic family stress as it affects children, spouses, and parents. Emphasis is on family burnout, the mental and physical exhaustion caused by continual and demanding care-giving situations.

473 Teens at Risk
An investigation of opposing viewpoints about issues related to factors that put teens and their families at risk, including crime and violence, pregnancy and parenthood, substance abuse, school failure, and the consequences of risk behaviors.

474 How Women Changed America
Investigation of issues since 1970 that significantly affected discrimination against women in society's institutions, racial discrimination among women, and current gender and racial issues as they affect families and children.

475/675 Children and Families Across Cultures
Study of developmental and family issues as viewed from a cross-cultural diversity perspective.

476 Child Exploitation and Abuse

477/677 Financial Counseling

478/678 Financial and Consumer Issues of Aging
Integration of economic and consumer problems of the elderly including income trends in retirement and health care. Prereq: 6 credits social science.

479 Children as Witnesses
Critical analyses of issues related to children's testimony in the family and child-care legal arena. Emphasis on developmental perspective of credibility and validity of children's testimony, including cognition, memory, suggestibility, effects of repeated questioning.

481/681 Women and Aging
Study of theory, research, and application of issues related to women and the aging experience. Prereq: HDFS 460.

482/682 Family Dynamics of Aging
Examination of issues related to family life in the later years from the perspectives of the elderly and the family. Prereq: 6 credits social science.

483 [381] Developmentally Appropriate Practices from Birth through Adolescence
This course will provide guidance in planning, implementing, and evaluating developmentally appropriate activities and programming from birth through adolescence including infancy, preschool-age, childhood, and adolescence. A strong emphasis on careers from birth through adolescence in child development and family science will be incorporated into this course. Prereq: HDFS 320, 330, 450.

484 Developmentally Appropriate Practices Across the Adult Lifespan
This course will provide guidance in planning, implementing, and evaluating developmentally appropriate activities and programming across the adult lifespan from emerging to later adulthood. A strong emphasis on family science careers working with adults, their families, and connecting the generations will be incorporated into this course. Prereq: HDFS 450, 460.

485 Capstone Experience in HDFS
Integration and application of concepts. Emphasis on theory and research in CDFS, processing and presenting information, and community service. For HDFS majors who will graduate within one year. Prereq: 6 credits social science.

487 Practicum in Child Development Programs
Supervised on- or off-campus experience in early childhood settings. Application of theoretical and practical knowledge as a professional. Prereq: Grade of C or better in HDFS 330, 341, 371, 381, first aid and infant/toddler CPR certification.

701 Graduate Orientation Seminar
Introduction to graduate program, faculty, policies and procedures.

702 Teaching Developmental Science
Introduction to research and theory on college teaching, including course preparation, grading, and classroom management. Emphasis on acquiring skills related to teaching in developmental science.

703 Research Methods in Child Development and Family Science
Introduction to research methods in child development and marital and family relationships. Includes instrument selection/construction, data collection, interpretation of results, and proposal writing. Emphasis on the unique methodological features associated with the field.

705 Quantitative Methods in Developmental Science
This course is an introduction to quantitative methods commonly used in research in developmental and family science. Areas covered will include basic univariate, bivariate, and multivariate analysis, including appropriate software, interpretation of results, and reading and writing technical research reports.

710 Foundations of Youth Development
This course will examine the fundamentals of youth development and the youth development profession. Through this introduction to the field, students will explore the ethical, professional, and historical elements of youth development as it has evolved toward professionalization.

711 Youth Development
An introduction to theory and research in positive youth development. The course emphasizes how the developmental tasks of this life stage are influenced by (and influence) family and home, school, peers, and other contextual forces. The course will help students recognize and become familiar with the major issues and transitions of adolescents.

712 Community Youth Development
Focuses upon community youth development from a strength-based approach. This approach is a holistic and dynamic understanding of youth and communities encompassing both individual development (i.e. positive youth development) and adolescents’ interrelationships with their environments. Emphasis is placed upon research, theory, and practice.

NDSU Undergraduate Bulletin 2010-2011
713 Adolescents and Their Families  
This course explores adolescent development in the context of the family. The bi-directional influences between adolescents and their families will be examined. Implications for professionals working with youth and families will be explored and highlighted.

714 Contemporary Youth Issues  
This course presents issues faced by youth today and associated risk and resiliency factors. A different topic is presented each year. Past topics have included Youth Violence, Youth and Appearance, and Volunteerism. The course may be taken more than once, as long as the topic areas are different each time.

715 Youth In Cultural Contexts  
This course will examine the cultural contexts that affect youth from within and outside the family. Students will be encouraged to think critically about society and culture, gain further knowledge of how ethnic groups fit historically into society, and examine how history has shaped the current cultural climate of the U.S.

716 Youth Professionals as Consumers of Research  
Students will learn the basics of quantitative and qualitative research approaches that will enable them to understand, evaluate, and critique research articles. Students will be able to judge the validity and usefulness of research articles in order to guide their educational or therapeutic interventions or public policy decisions.

717 Program Design, Implementation, and Evaluation  
Focuses on hands-on tools for conducting strategic planning, designing program logic model, and evaluating the performance of programs for youth and families. Students will develop knowledge through participating in a community-based project involving the practical application of program design and evaluation methods.

718 Administration and Program Management  
This course introduces students to the development, administration and management of youth-serving organizations.

719 Youth Policy  
This course examines federal and state policies that impact the developmental opportunities for youth. A guiding question that will be used to evaluate these existing (and prospective) policies is whether they contribute to, or act as barriers to desired developmental outcomes.

720 Basic Grant Development and Management  
This course introduces students to the grant development and management process. Restricted to HDFMS or PhD program students only.

722 Applied Research in Gerontology  
Study of research in applied social gerontology. The course will explore quantitative and qualitative approaches to studying older persons and related systems.

724 Advanced Topics in Socioemotional Development  
Critical examination of socio-emotional development. Topics vary each time the course is offered and may include temperament, peer relations, moral development, emotional development, gender development, or development of self-concept. May be repeated for credit with change in subtopic.

725 Advanced Topics in Cognitive Development  
Critical examination of cognitive development. Topics vary each time the course is offered and may include cognition, perception, concepts, reasoning, memory, and language. May be repeated for credit with change in subtopic.

750 Culture and Aging: Global and Multicultural Perspectives  
Using a cross-cultural perspective, this course explores the developmental processes of aging in various social and cultural contexts, both within the U.S. and across the globe. Focus will be specifically on how culture influences the processes and experience of aging as well as well-being during late-life.

758 Longitudinal Research Methods and Analysis  
The primary focus will be on multilevel models (general linear mixed models or hierarchical linear models) as applied to studies in human development. Topics will include the measurement of change over time and the modeling of individual differences in growth trajectories by the inclusion of both time invariant and time varying covariates. Prereq: PSYC 762.

760 Aging Policy  
Formation, implementation and impact of policies that affect the well-being of the elderly in the United States.

761 Applications in Gerontology  
Study of the applications of gerontology research and theory. The course will provide an overview of programs, methods and evaluations of services for older adults.

762 Retirement Planning, Employee Benefits and the Family  
Critical examination of micro and macro considerations in retirement planning for individuals and families.

763 Personal Income Taxation  
Study of principles and concepts of personal income tax planning as they relate to families.

764 Family Economics  
Overview of basic concepts and theories in family economics with emphasis on the economics situation of families in the United States.

765 Insurance Planning for Families  
An in-depth study of risk management concepts, tools, and strategies for individuals and families.

766 Estate Planning for Families  
Study of principles and concepts of estate planning as they relate to families.

767 Professional Practices in Family Financial Planning  
Study of strategies and methods for managing private family financial planning practices including ethics, compensation, client-centered marketing and practice management.

768 Housing/Real Estate  
Overview of the role of housing and real estate in the family financial planning process including taxation, law, mortgages, ethics and financial calculations.

<td>Foundations of Couple and Family Therapy II</td>
<td>3</td>
<td>Study of theories and interventions that apply to work with couples in therapy. Other topics include sex therapy, domestic violence, issues related to gender, race, and class, and therapy with LGBT couples.</td>
</tr>
<tr>
<td>775</td>
<td>Clinical Applications of Couple and Family Therapy I</td>
<td>3</td>
<td>This course offers an introduction to socially just approaches to couple and family therapy including narrative and feminist therapies. This course also focuses on working with the gay, lesbian, bisexual, and transgender community. Coreq: HDFS 794.</td>
</tr>
<tr>
<td>776</td>
<td>Clinical Applications of Couple and Family Therapy II</td>
<td>3</td>
<td>This course explores ethical issues related to working with children; assessment of children; child play therapy; family play therapy; child abuse; and grief and loss within the context of sexism, racism, classism, and heterosexism. Coreq: HDFS 794.</td>
</tr>
<tr>
<td>777</td>
<td>Diagnosis and Assessment in Couple and Family Therapy</td>
<td>3</td>
<td>This course explores issues related to assessment and diagnosis in the treatment of individuals, couples, and families within the context of sexism, racism, classism, and heterosexism; and practical application of the DSM-IV-TR. Coreq: HDFS 794.</td>
</tr>
<tr>
<td>780</td>
<td>Ethics and Professional Issues in Couple and Family Therapy</td>
<td>3</td>
<td>Study of ethical and professional issues in couple and family therapy. Focusing on legal, feminist, personal, and relational ethics. Exploring the influence of the contextual issues of racism, classism, sexism, and heterosexism on ethical practice.</td>
</tr>
<tr>
<td>781</td>
<td>Family Systems</td>
<td>3</td>
<td>Advanced study of contemporary family systems with emphasis on research, ethics, media, and current family issues.</td>
</tr>
<tr>
<td>783</td>
<td>Dynamics of Parent-Child Relations</td>
<td>3</td>
<td>Study of selected theories and research in parent-child relations. Emphasis on interaction between adults and children from infancy to youth. Prereq: HDFS 784, 785.</td>
</tr>
<tr>
<td>784</td>
<td>Advanced Human Development: Adolescence Through Early Adulthood</td>
<td>3</td>
<td>This course examines the physical, cognitive, emotional, and social changes that occur in the lives of individuals as they progress through adolescence and early adulthood. We will also examine how these changes affect or influence individuals, families, romantic partners, researchers, professionals, and therapists.</td>
</tr>
<tr>
<td>785</td>
<td>Family Theory</td>
<td>3</td>
<td>Identification and analysis of theoretical approaches to research on the family. Study of frameworks currently used.</td>
</tr>
<tr>
<td>786</td>
<td>Advanced Human Development III: Middle through Late Adulthood</td>
<td>3</td>
<td>Critical examination of current research and theories on development in middle and late adulthood. Emphasis on applying theoretical understanding and knowledge of the current empirical research base to current issues facing older adults.</td>
</tr>
</tbody>
</table>
COURSES

256 Questions of Philosophy 3
Introduction to philosophy, some of its major problems and personalities.

257 Traditional Logic 3
Study of the art and science of critical thinking; scientific method emphasized. Cross-listed with PHIL.

304 Humanities Tutorial R-6
Development of an individual project based on the theme of the student’s program. This project must be submitted and approved during the junior year.

356 Ancient Philosophy 3
An overview of the main philosophical thinkers and positions in the ancient world. Among the key thinkers addressed are Socrates, Plato, and Aristotle. Cross-listed with PHIL.

357 Medieval Philosophy 3
An overview of the main philosophical thinkers and positions in the medieval period of western civilization. The key thinkers addressed are Augustine, Aquinas, and Scotus.

366 Metaphysics 3
Historical and systematic philosophical study of fundamental principles of reality, especially as concerns the human person. Cross-listed with PHIL.

367 Ethics: The Acting Person 3
Philosophical study of the foundations of human actions, virtue, and vice.

369 Philosophy of Religion 3
An introduction of the philosophical analysis of the core concepts of religion, focusing on the possible existence and nature of God, understood philosophically as the maximally perfect being. Cross-listed with PHIL.

371 The Law and the Prophets 3
How to interpret the central documents of the faith of Israel for contemporary readers by attending to their distinctive literary structures.

372 Wisdom and the New Testament 3
Study of special themes in Wisdom and Apocrypha. Introduction to principal New Testament authors.

385 Comparative Arts 3
Study of Western arts in light of the aesthetic, social, and philosophical ideas that nurtured them.

405 Topics in Philosophy 3
A detailed study of a particular thinker or topic. May be repeated.

476 History of Philosophy: Modern Period 3
An overview of the main philosophical thinkers and positions in the modern period of western civilization. Among the thinkers addressed are Descartes, Leibniz, Locke, Hume, and Kant. Cross-listed with PHIL.

477 Contemporary Philosophy 3
An overview of the main philosophical thinkers and positions in the contemporary period. Cross-listed with PHIL.

486 Philosophy and Literature 3
Philosophical elements of selected works from Western literature, such as those of Dante, More, Milton, and Newman. Cross-listed with PHIL.

487 Aesthetics 3
Principles of aesthetics as revealed by artists, writers, and philosophers. Cross-listed with PHIL.

488 Epistemology 3
A detailed study of the philosophical analysis of the nature of knowledge and associated concepts. Prereq: HUM 257.
INDUSTRIAL AND MANUFACTURING ENGINEERING (IME)

Farahmand, Chair; Bilen Green, Cook, Maleki, Marinov, Shi, Wells, Yadav, Zhang

COURSES

111 Introduction to Industrial and Manufacturing Engineering  3
Overview of industrial engineering and manufacturing engineering professional careers and work environments. Basic skill acquisition using computer software tools to solve engineering problems, prepare reports, plan projects, deliver professional presentations, and manage data.

311 Work/Station Design and Measurement  3
Analytical methods for measuring human performance in industrial, commercial and manufacturing settings. Development of work procedures and design of workstations. Considerations of ergonomics, safety, performance effectiveness and efficiency, interactions between workstations, information and data requirements, production throughput, training and skill requirements, and resources. Weekly laboratory. S

330 Manufacturing Processes  3
Traditional manufacturing processing methods as employed in contemporary practice. Includes properties of materials, machining, casting, forming, and fabrication techniques. Several experiments will be conducted on various manufacturing processes in the laboratory.

335 Welding Technology  2
Study of arc and gas welding technology together with related metallurgy. Laboratory instruction in welding techniques and skills. 1 recitation, 1 two-hour laboratory. F

380 CAD/CAM for Manufacturing  3
Coverage of CAD, numerical control, and CAM software. Use of manufacturing standards for geometric dimensioning and tolerancing. Prereq: ME 212. F

411/611 Human Factors Engineering  3
A survey of human factors engineering topics with an emphasis on optimizing person-machine and person-system interactions. Human physical and cognitive capabilities will be investigated to improve work design, interface design, and usability. Prereq: IME 311, 460. F/2 (even years)

427/627 Packaging for Electronics  3
Processes and materials for packaging of electronic components and devices, including integrated circuit chips, chip packages, and board level packaged systems; boards and substrates technology; quality and reliability of electronic packages. Open to all engineering majors. Prereq: Junior standing. S/2 (odd years). Cross-listed with ECE.

429/629 Introduction to IC Fabrication  3
See Electrical and Computer Engineering for description.

430/630 Process Engineering  3
Comprehensive analysis of selected manufacturing processes; development of process flow maps, schematic and mathematical modeling of process dynamics, and evaluation of processing alternatives. Design of effective and efficient processes for selected industrial products. Seminar/case study format. Prereq: IME 330. F

431/631 Production Engineering  3

432 Composite Materials Manufacturing  3

435/635 Plastics and Injection Molding Manufacturing  3
Product and process engineering for manufacturers of plastic products; material evaluation and selection, mold design, process design, quality evaluation of manufactured plastic parts. Cross-listed with ME.

440/640 Engineering Economy  2-4
Capital investment decision foundation within the rules of general and project accounting. Analysis of benefits and returns against cost for engineering installation, operation, life cycle, and buy-rent-lease decisions. Prereq: Junior standing or IME major.

450/650 Systems Engineering and Management  3
Integration of technical disciplines through the stages of systems life cycle: needs and requirements determination, operating and support concepts, design and prototyping, test and evaluation, facilitation, manuals, training, and supportability. Prereq: Junior standing. F

451/651 Logistics Engineering and Management  3
This course emphasizes integrated logistics management methods to improve the effectiveness and efficiency of material flow, information flow and cash flow for the entire supply chains. Prereq: IME 470. Coreq: IME 450. F/2 (odd years)

452/652 Integrated Industrial Information Systems  3
Integration of technical, business, and operational information for status, progress, and decision making in product development, manufacturing, and logistical support of product and customers. Prereq: IME 450. S

453/653 Hospital Management Engineering  3
Survey of management engineering roles in the delivery of health care. Review of functional relationships present in health care delivery systems. Application of industrial engineering tools to solve health care delivery problems focused on cost reduction, process redesign, facility design, quality improvement, and systems integration. Prereq: Core IME courses. S/2 (even years)

455/655 Management of People Systems  2
Study of traditional management functions (planning, organizing, influencing, and controlling) in the context of engineering and management system interactions. Emphasis on communication skills, teaming, job design, leadership, facilitation, and improving employee productivity. Prereq: Junior standing. F
456/656 Program and Project Management 3
Capstone experience. Integration of technical, business, and operational specialties in a project consulting firm. Work with multidisciplinary teams that design, plan, and present for a variety of industrial clients. Prereq: Senior standing. S

460/660 Evaluation of Engineering Data 3
Design of engineering experiments and evaluations, curve fitting, regression, hypothesis testing, ANOVA, Taguchi methods in engineering design. Coreq: MATH 166. F, S

461/661 Quality Assurance and Control 3-4
Proactive and reactive quality assurance and control techniques; emphasis on quality planning, statistical process control, acceptance sampling, and total quality management. Issues in reliability and maintainability engineering. Prereq: IME 460/660. S

462/662 Total Quality in Industrial Management 3
The meaning and means for achieving "total quality" in all dimensions of industrial activities and organizations. Topics include continuous improvement, statistical process control, leadership, and training. F/2 (even years)

463/663 Reliability Engineering 3
Study and application of statistical models and methods for defining, measuring and evaluating reliability of products, processes and services: life distributions, reliability functions, reliability configurations, reliability estimation, parametric reliability models, accelerated life testing, reliability improvement. Prereq: IME 460/660. S/2 (odd years)

470/670 Operations Research I 3
Techniques to optimize and analyze industrial operations. Use of linear programming, transportation models, networks, integer programming, goal programming, dynamic programming, and non-linear programming. Prereq: MATH 129. Co-req: IME 460. S

472/672 Simulation of Business and Industrial Systems 3
Development of the fundamentals and techniques of simulating business and industrial systems. Monte-Carlo techniques and computer usage. Prereq: IME 460/660, high-level computer language. S

480/680 Production and Inventory Control 3
Planning and controlling of industrial production and inventory: demand forecasting, master scheduling, materials requirements planning, job scheduling, assembly line balancing, and just-in-time production. Prereq: IME 460/660. F

482/682 Automated Manufacturing Systems 3
Design of integrated production systems including flexible, programmed automatic control for fabrication, assembly, packaging, movement, and storage. Numerical control, flexible manufacturing systems, and computer integrated manufacturing. 2 recitations, 1 three-hour laboratory. Prereq: IME 311, 330, PHYS 252. F

485/685 Industrial and Manufacturing Facility Design 3
Capstone integration of analysis and design tools to convert product design into production plans and plants. Prereq: Senior standing. S

489 Manufacturing Engineering Capstone 3
Capstone experience. Student projects in design, analysis, and experimental investigation related to manufacturing. Prereq: Senior standing. S

711 Advanced Human Factors Engineering 3
Research-based study of current human factors engineering problems. Students will review current human factors topics, design and conduct research studies, and produce technical papers reporting results. Prereq: IME 411/611, 460/660. F/2 (odd years)

720 Surface Engineering 3

740 Advanced Engineering Economy 3
Advanced topics in engineering economy including replacement analysis, capital budgeting, income tax effects on equipment selection, probabilistic models, and manufacturing costing. Prereq: IME 440/640. F/2 (odd years)

761 Quality Engineering 3
Study and application of advanced statistical tools and techniques for defining, monitoring and improving quality of products, processes and services: statistical control charts, process capability analysis, acceptance sampling of variables and attributes, application of design-of-experiments for product and process optimization, response surface methodology, Taguchi methods. Prereq: IME 461/661. F/2 (odd years)

765 Data Analysis 3
Applications oriented. Topics include: statistical estimation, hypothesis testing, non-parametric methods, design of experiments, factorial experiments, response surface methodology, regression analysis, time series analysis and forecasting, multivariate methods, statistical control charts. Prereq: IME 460/660.

770 Quantitative Modeling 3
Cross-listed with Engineering. See Engineering for course description.

771 Probabilistic and Deterministic Methods 3
Applications modeling. Domains include transportation, logistics, manufacturing, service systems scheduling, and supply-chain management. Quantitative models and tools include Markov chains, stochastic processes, queuing, deterministic and stochastic decision analysis, time series, forecasting, and regression modeling. Prereq: MATH 265, IME 460/660. Cross-listed with ENGR.

772 Advanced Simulation 3
In-depth study of special purpose simulation languages to model, analyze, and design industrial and engineering systems. Stochastic and deterministic methods are included. Prereq: IME 472/672. S (even years)

773 [770] Advanced Operations Research Topics 3
Study of the theory and applications of linear programming, network flows, and nonlinear programming. Prereq: IME 470/670. F/2 (odd years)

774 Neural Networks 3
See CSC1735 for description.

780 Advanced Production and Inventory Control 3
Study of the theory and applications of production scheduling, inventory management, production planning, just-in-time production, and materials requirement planning. Prereq: IME 480/680. F (even years)
782 Robotics/CAD/CAM/Control Systems 3
Study of automation, integration of fabrication, and assembly systems. Includes automated material handling and intelligent control systems. Prereq: IME 482/682. S/2 (odd years)

784 Computer Integrated Manufacturing 3
Study of the continuum of integrated manufacturing processes where computer technology is incorporated in the conception, design, planning, and fabrication of a good or service. The study of philosophy and methods of systematically building flexible and efficient production systems. Prereq: IME 482/682. S/2 (even years)

785 Facilities Location 3
Theory and methods of locating facilities. Domains include plant and warehouse siting, emergency service sites, vehicle and hazardous material routing, distribution systems design. Topics include planar single and multi-facility models, network location problems, cyclical networks. Prereq: IME 470/670 or ENGR 770.

786 Manufacturing Systems Analysis 3
Comprehensive analysis of complex issues in the technology and management of modern manufacturing systems and enterprises. Technological issues will impinge on product realization, production of goods, and manufacturing equipment and facilities; management issues addressed will be those drawn from operation of global production enterprises. Seminar format. Prereq: IME 630 or 631 (both preferred). S
INTERNATIONAL STUDIES (INTL)
Ambrosio; Coordinator

COURSES

110 Introduction to International Studies 3
An interdisciplinary course which introduces students to a variety of global topics, concepts, and perspectives.

488 Integrative Senior Project Proposal 1
This course is designed to provide students with an opportunity for students in the International Studies major to develop their Integrative Senior Project in collaboration with their peers and NDSU faculty.

489 Integrative Senior Project 2
This course involves the independent research and writing of an integrative senior project paper which will serve as the capstone of the International Studies major.
Prereq: INTL 488.
LANDSCAPE ARCHITECTURE (LA)

Famulari, M. Lindquist, Pepple, Wiley

COURSES

231 Landscape Architecture Graphics 3
This course will give some insight into the design approach used by landscape architects. It will explore the theories that influence landscape architecture and the manner in which these theories are transformed into physical environments via drawing and other graphic techniques. Prereq: LA major, LA 272.

232 Design Technology 3
Introductory exploration of digital design media and environmental technology in landscape architecture.

271 Introduction to Landscape Architecture Studio 6
Entry-level design generation methods involving concept formation, site inventory and analysis, programming, and simple site organization and planning. Problem solving through graphic, computer-generated, and model development; oral and written communication skills. Prereq: LA major, LA 131. Coreq: LA 231.

272 Parks & Open Spaces Studio 6
Continued design development in site organization and planning. Design issues in natural resources, land reclamation, construction technology, and rural development. Intermediate problem solving through two- and three-dimensional graphic techniques; continued oral and written communication skills. Prereq: LA major, LA 271.

322 History of Landscape Architecture 4
Global overview of the landscape developments from prehistoric civilizations through the 20th century using styles and trends. Emphasis on analyzing historic places and locations as a problem-solving method.

341 Site Development and Detailing I 4
Intermediate investigations into site planning and design development with a primary focus on site design integration with the technically-related concepts. Prereq: for LA majors: 2nd year standing. For ARCH majors: ARCH 272.

342 Site Development and Detailing II 4
Intermediate-level focus on fundamental site landscape and engineering issues within the construction process. Emphasis on site grading and storm water management. Lecture. Prereq: LA major, LA 271.

371 Site Planning & Design Studio 6
Visual problem solving and large-scale site planning issues. Two-part focus involving the comprehensive visual inventory and analysis along with the immediate application of site planning and design skills. Prereq: LA major, LA 272.

372 Community Planning & Design Studio 6
Cultural and environmental design issues as they relate to large-scale land planning and site design involved with residential communities. Emphasis within the studio involves site engineering and design detailing. Prereq: LA major, LA 371.

441 Site Development and Detailing III 4
Advanced exploration into the use of computers and computer-aided design as part of the landscape architecture construction documentation process. Seminar/laboratory. Prereq: LA 372. Coreq: LA 471.

471 Urban Design Studio 6
Regional systems inventory, visual survey, analysis techniques, and methodologies for design problem solving through graphic, computer, and modeling development. Focus on urban studies and site planning. Studio. Prereq: LA major, LA 372.

472 Remediation & Planting Design Studio 6
Natural resource and land reclamation management techniques as part of contemporary design in landscape architecture. Emphasis on presentation and communication. Capstone course. Prereq: LA major, LA 471.

531 Advanced Landscape Architecture Planting Design 4
Exploration into the complexity of planning, design, and management of plant communities with an emphasis on natural systems ecology. Lecture and laboratory. Prereq: LA major, LA 331. F (odd years)

552 Advanced Landscape Planning 2
Theories and practices facing landscape architects and planners in the design of urban, suburban, and rural landscapes. Seminar/field trip. Prereq: Senior standing.

563 Programming and Thesis Preparation 3
Discussion and application of a comprehensive design process for production of the design thesis. Emphasis on preparing a design program. Prereq: LA 472.

571 Environmental Planning Studio 6
Environmental systems development and implementation of a complex design problem. Emphasis on landscape architecture design development through graphic, computer, and modeling techniques. Prereq: LA major, LA 472. Coreq: LA 563.

572 Design Thesis 8
Capstone opportunity as a culmination of design education. Student generated design topic is fully developed and realized from master planning through design development, detailing, and documentation. Prereq: LA 563, 571.

581 Professional Practice 3
See ARCH 681 for description. Prereq: LA 472.
LIBRARY SCIENCE (LIB)

COURSE
121 Introduction to Library Research 1
Basic information on libraries and their services. Exploration of sources of information in print and computer format; explanation of basic library research strategies.
MANAGEMENT (MGMT)

COURSES

(All courses 300 level and above require a minimum of Junior standing and a 2.50 cumulative GPA.)

301 Survey of Management for Non-Business Majors  
This course introduces non-business majors and non-degree seeking students to the basic functions and activities of managers. Students will become familiar with classical management principles, as well as modern management techniques, based on the concepts of planning, organizing, leading and controlling. Prereq: Non-business majors only and minimum 2.5 cumulative grade point average.

320 [BUSN 350] Foundations of Management  
Study of the major functional areas of management including an international perspective of management.

330 [BUSN 351] Foundations of Organizational Behavior  
A behavioral approach to management with emphasis on the understanding of individual behavior in groups in organizations. Topics include motivation, communication, perception, and cultural diversity. Prereq: MGMT 320.

360 [BUSN 352] Operations Management  

430/630 [BUSN 457/657] Leadership in Organizations  
This course will give students a comprehensive view of the principles, practices, and challenges of contemporary leadership and followership. Prereq: MGMT 320.

440/640 [BUSN 454/654] International Management  

Survey of human resource management, including job analysis, recruitment, selection, performance appraisal, compensation, training, and labor relations. The impact of environmental influences such as legislation, court decisions, and unions on human resource activities are addressed. Prereq: MGMT 320.

451/651 [BUSN 455/655] Negotiation and Alternative Dispute Resolution  
An exploration of negotiation and conflict settlement in interpersonal, business, and international settings. Topics include techniques used in negotiations and alternative dispute resolution procedures such as mediation and arbitration. May be repeated. Prereq: MGMT 320.

452/652 [BUSN] Compensation Management  
Study of the human resource management function of compensation. Topics include the job analysis, job evaluation, wage determination, pay-for-performance, and employee benefits. The impact of compensation on recruitment, satisfaction, and performance is examined. Prereq: MGMT 450/650.

453 [BUSN] Understanding and Managing Diversity in Organizations  
Use of case analysis and experiential learning to consider the theoretical perspectives and practical implications of different forms of diversity at three management levels: personal values and actions; group dynamics; institutional policies and practices. Prereq: MGMT 320.

454/654 [BUSN 458/658] Labor-Management Relations  
Analysis of human resource management in the presence of labor unions. Topics include: labor history, labor law, organizing unions, contract negotiations and administration, contract dispute resolution, labor-management cooperation, and strikes. Prereq: MGMT 320.

461 [BUSN 481] Supply Chain Management  
Identification of the key elements in a firm’s management of their supply chain. Theory and practical applications for analyzing and developing strategies to assist firms in obtaining and maintaining a competitive advantage.

470 [BUSN 456] Entrepreneurship/Small Business Management  
A comprehensive entrepreneurship/small business course that examines entrepreneurial ideas, processes, individuals; new venture creation and growth (including franchises and family business); and application of management, marketing, and finance tools to the small business context.

471/671 Leading the Nonprofit Organization  
This course covers theories, tools, and perspectives for leading and managing nonprofit organizations; exploration of similarities and differences between nonprofits and business firms; discussion of current and controversial issues in the nonprofit sector - all emphasizing practical applications for nonprofit leadership in managerial, staff, and volunteer roles.

750 [BUSN] Advanced Organizational Behavior  
Study of theory and current management research dealing with individual and small-group behavior in organizations. Topics include motivation, reward, job satisfaction, stress, communication, and conflict resolution. Prereq: MGMT 320.

751 [BUSN] Advanced Operations Management  
Advanced study of concepts and technologies used by service and manufacturing firms with emphasis on process analysis and improvements. Includes demonstration and application of techniques such as simulation, linear/integer programming, and project scheduling. Prereq: STAT 330.

752 Organizational Restructuring  
This course aims to provide students with a fundamental understanding of organizational restructuring, and exposes them to a broad range of restructuring activities, such as mergers and acquisitions, reorganization, and downsizing. The emphasis is placed on the driving forces and mechanisms of organizational restructuring and its impacts on organizations and employees.
COURSES

(All courses 300 level and above require a minimum of Junior standing and a 2.50 cumulative GPA.)

277 Introduction to UNIX 3
See Computer Science for description.

370 Management Information Systems 3
Introduction to basic concepts and developments in information technology. Overview of the opportunities and challenges in the development and management of organizational information systems from a socio-technical perspective. Prereq: CSCI 116.

371 Web Scripting Languages 3
See Computer Science for description.

375 Database Design for Business Application 3
Fundamentals of conceptualizing and implementing databases. Emphasis is on using query languages to obtain information for decision-making. Includes managerial topics related to database administration, security, integrity, optimization, and distributed databases. Prereq: MIS 370, CSCI 228.

376 Data and Telecommunications Administration 3
Introduction to a wide variety of topics in the voice and data communications field. Prereq: MIS 370, CSCI 228.

470 Information Systems 3
Exploration of managerial issues pertaining to administration of the information systems function in organizations. Issues include planning, operations, control, electronic commerce, and other current topics. Prereq: MIS 375, CSCI 315. Coreq: MIS 376.

479 Decision Support and Intelligent Systems 3
Information system support and modeling of the decision-making process via expert systems, neural networks, and hybrid intelligent systems are the primary focus of this course. The state-of-the-art in knowledge management will be explored. Prereq: CSCI 228, MIS 370.

770 Information Resource Management 3
Examination of the role of information resources in supporting a wide range of organizational functions by providing a managerial perspective on the use, design, and evaluation of information systems. Focus is managerial rather than technical.
COURSES

(All courses 300 level and above require a minimum of Junior standing and a 2.50 cumulative GPA.)

301 Survey of Marketing for Non-Business Majors 3
This course introduces non-business majors and non-degree seeking students to the four basic areas of marketing: product, price, place, and promotion. This course will also cover consumer behavior and strategic marketing. Prereq: Non-business majors only and minimum 2.5 cumulative grade point average.

320 [BUSN 360] Foundations of Marketing 3
Survey of the four basic areas of marketing: product, price, place, and promotion. Exposure to consumer behavior and strategic marketing from an international perspective.

362 [BUSN] Foundations of Retailing 3
Analysis of the global retail environment and exposure to issues such as the development of retailing image, location theory, inventory management, and integrated marketing communication. Prereq: MRKT 320.

372 [BUSN] Global Retailing 3
See Apparel, Design and Hospitality Management for description.

410/610 [BUSN 460/660] Consumer Behavior 3
Examination of dimensions of consumer buying theories. Aimed at understanding the buying behavior of customers. Prereq: MRKT 320.

420/620 [BUSN 461/661] Advertising and Integrated Marketing Communication 3
Examination of the use of advertising as part of the worldwide marketing function; prepares the student to analyze and plan integrated marketing communication campaigns. Prereq: MRKT 320.

430/630 [BUSN 462/662] Sales and Sales Force Management 3
Examination of different aspects of effective personal selling with focus on decision areas pertaining to sales force management. Prereq: MRKT 320.

440/640 [BUSN 464/664] International Marketing 3
Focused on identifying and satisfying global customer needs better than the competition, both domestic and international, and coordinating marketing activities within the context of the global environment. Prereq: MRKT 320.

450/650 [BUSN 463/663] Marketing Research 3
Study of research methods with focus on research design, data collection, and analysis techniques. Prereq: MRKT 320, STAT 331.

460 [BUSN 465] Marketing Strategy 3
The analysis, planning, implementation, and control of worldwide marketing programs to achieve an organization’s objectives including an examination of the progress of the Internet for the marketing of goods and services. Prereq: MRKT 320.

470/670 [BUSN 466/666] Services Marketing 3
This course focuses on management and strategic issues as they relate to the marketing of services. Prereq: MRKT 320.

480/680 [BUSN 467/667] Sports Marketing 3
Focus on effective sports marketing, including an understanding of the sport consumer, the sport product, research, development, and sponsorship and licensing. Areas of sport considered include professional, collegiate, and youth sport, as well as adult and youth recreation and fitness. Prereq: MRKT 320.

760 [BUSN] Strategic Marketing Management 3
Focus on the major decision areas that marketing executives face in their efforts to match the objectives and resources of the organization with the needs and opportunities in the marketplace. Prereq: MRKT 320.
MATERIALS AND NANOTECHNOLOGY (MNT)

COURSES

All courses require graduate standing in science, engineering, or pharmacy.

729 Materials Characterization 3
Covers basic techniques and methods for characterization of materials, x-ray diffraction and electron microscopy will be discussed in detail. Also covered will be spectroscopies, NMR, FTIR and RAMAN.

730 Nanotechnology and Nanomaterials 3
Reviews principles of nanotechnology, nanomaterials and develops a framework for their understanding. The basic tools of nanotechnology; nanoscale characterization, physics and materials design will be discussed in the context of current engineering applications.

732 Physical Properties of Materials 3
Describes the fundamental science and engineering concepts that form the foundation of Materials and Nanotechnology, including statistical mechanics, quantum mechanics, condensed matter physics and chemical engineering.

735 Optoelectronic Materials and Processing 3
This course covers the basic principles of semiconductor optoelectronic devices and their processing techniques. Students will learn the methods used for their fabrication and also current applications and limits of such technologies in nanotechnology.

745 Preparing Future Researchers 1
Involves presentations given by invited faculty from various academic institutions ranging from research oriented to teaching oriented and also R&D project leaders in companies.

756 Molecular Modeling of Materials 3
Covers basic fundamentals of molecular statics, molecular dynamics, Monte Carlo modeling techniques and allows students to be able to model complex lattice structures, structures of lattice defects, crystal surfaces, and interfaces.

760 Materials Synthesis Processing 3
Deals with synthesis and processing issues in materials design.

783 Nanomechanics 3
Covers essential tools (quantum mechanics, molecular dynamics, statistical physics, continuum mechanics) used at the nanoscale. The course will present methods that bridge atomistic and continuum models and discuss these techniques in the context of material design.
MATHEMATICS (MATH)

Comezl, Chair; Akhmedov, Alfonseca, Barabanov, Bocca, Ciuperca, Cope, Coykendall, Duncan, Hladly, Hodge, Littmann, Martin, Olsen, Popovici, Sather-Wagstaff, Shreve, Ungar

COURSES

101 Elementary Algebra 3
Fundamental operations, factoring, fractions, exponents and radicals, equations. For students with little or no background in algebra. Offered through Continuing Education. Special fee required. Does not satisfy any requirements for graduation.

102 Intermediate Algebra (CCN) 3
Properties of the real number system, factoring, linear and quadratic equations, functions, polynomial and rational expressions, inequalities, systems of equations, exponents, and radicals. Offered through Continuing Education. Special fee required. Does not satisfy any requirements for graduation. Prereq: MATH 101 or placement test.

103 College Algebra (CCN) 3
Relations and functions, equations and inequalities, complex numbers; polynomial, rational, exponential and logarithmic functions; systems of equations, matrices and determinants, sequences and summation. Prereq: MATH 102 or placement test. (ND:MATH)

104 Finite Mathematics (CCN) 3
Systems of linear equations and inequalities, matrices, linear programming, mathematics of finance, elementary probability and descriptive statistics. Prereq: MATH 102 or placement test. (ND:MATH)

105 Trigonometry (CCN) 3
Angle measure, trigonometric and inverse trigonometric functions, trigonometric identities and equations, polar coordinates and applications. Prereq: MATH 103, 107, or placement test.

107 Precalculus (CCN) 4
Equations and inequalities; polynomial, rational, exponential, logarithmic and trigonometric functions; inverse trigonometric functions; algebraic and trigonometric methods commonly needed in calculus. Prereq: Placement test. An expedited, combined offering of MATH 103 and 105.

128 Introduction to Linear Algebra 1
Systems of linear equations, row operations, echelon form, matrix operations, inverses, and determinants. Prereq: MATH 105 or 107. Credit awarded only for MATH 128 or 129, not both.

129 Basic Linear Algebra 2
Includes content of MATH 128 with the addition of vectors in n-space, subspaces, homogeneous systems, linear independence, rank, and dimension. Prereq: MATH 105 or 107. Credit awarded only for MATH 128 or 129, not both.

146 Applied Calculus I (CCN) 4
Limits, derivatives, integrals, exponential and logarithmic functions and applications. Prereq: MATH 103, 107, or placement test. (ND:MATH)

147 Applied Calculus II (CCN) 4
Definite integrals, double integrals, trigonometry, introduction to differential equations, infinite sequences and series, probability and applications. Prereq: MATH 146.

165 Calculus I (CCN) 4
Limits, continuity, differentiation, Mean Value Theorem, integration, Fundamental Theorem of Calculus and applications. Prereq: MATH 105, 107, or placement test. (ND:MATH)

166 Calculus II (CCN) 4
Applications and techniques of integration; polar equations; parametric equations; sequences and series, power series. Prereq: MATH 165.

259 Multivariable Calculus 3
Functions of several variables, vectors in two and three variables, partial derivatives, surfaces and gradients, tangent planes, differentials, chain rule, optimization, space curves, and multiple integrals. Prereq: MATH 166. Credit awarded only for MATH 259 or 265, not both.

265 Calculus III (CCN) 4
Multivariable and vector calculus including partial derivatives, multiple integration, applications, line and surface integrals, Green’s Theorem, Stoke’s Theorem, and Divergence Theorem. Prereq: MATH 166. Credit awarded only for MATH 259 or 265, not both.

266 Introduction to Differential Equations (CCN) 3
Solution of elementary differential equations by elementary techniques. Laplace transforms, systems of equations, matrix methods, numerical techniques, and applications. Prereq: MATH 259 or 265. Coreq: MATH 128, 129, or 429.

270 Introduction to Abstract Mathematics 3
Sets, symbolic logic, propositions, quantifiers, methods of proof, relations and functions, equivalence relations, math induction and its equivalents, infinite sets, cardinal numbers, number systems. Prereq: MATH 166.

374 Special Problems in Mathematics 1
Diverse and challenging mathematical problems are considered with the intent of preparing the student for the Putnam Mathematics competition. May be repeated for credit. Pass/Fail only. Prereq: MATH 270.

376 Actuarial Exam Study 1
Selected material from calculus, linear algebra, numerical analysis, and other areas that appear on national actuarial exams. May be repeated for credit. Pass/Fail only. Prereq: MATH 266, 429.

420/620 Abstract Algebra I 3
Groups, permutations, quotient groups, homomorphisms, rings, ideals, integers. Prereq: MATH 270.

421/621 Abstract Algebra II 3
Division rings, integral domains, fields, field extensions, Galois Theory. Prereq: MATH 420/620.

429/629 Linear Algebra 3
Vector spaces, linear transformations, eigenvalues and eigenvectors, canonical forms, inner product spaces, and selected applications. Prereq: MATH 270.
430/630 Graph Theory 3
Graphs and directed graphs, graph models, subgraphs, isomorphisms, paths, connectivity, trees, networks, cycles, circuits, planarity, Euler’s formula, matchings, bipartite graphs, colorings, and selected advanced topics. Prereq: MATH 270.

435/635 Mathematical Models of Biological Processes 3
This course provides an introduction to mathematical methods in biology. Prereq: MATH 270.

436/636 Combinatorics 3
Recurrence relations, formal power series, generating functions, exponential generating functions, enumeration, binomial coefficients and identities, hypergeometric functions, Ramsey theory, Sterling and Eulerian numbers. Prereq: MATH 270.

440/640 Axiomatic Geometry 3
Hilbert’s axioms for Euclidean geometry, projective geometry, history of parallel axiom, hyperbolic geometry, elliptic geometry. Prereq: MATH 270.

445/645 Differential Geometry 3
Basic properties of curves and surfaces, Frenet equations, the Gauss Map, intrinsic geometry of surfaces, geodesics, Gauss-Bonnet Theorem, and applications. Prereq: MATH 270.

446/646 Introduction to Topology 3
Topology of Euclidean space, metric spaces, topological spaces, bases and neighborhoods, Hausdorff property, continuity, homeomorphisms and embeddings, connectivity, and compactness. Prereq: MATH 270.

447/647 Molecular Topology 3
Applications of topological techniques to stereochemistry. Topics include three-dimensional manifolds, knots, embedded graphs, chirality, topological rubber gloves, Möbius ladders, topology of DNA, tangles, and the Ernst-Sumners theorem. Prereq: MATH 270.

450/650 Real Analysis I 3
Sequences and convergence in R, continuity, uniform convergence, spaces of continuous functions, compactness, fixed point theorems, differentiability, inverse and implicit function theorems, applications. Prereq: MATH 266, 270.

451/651 Real Analysis II 3
Riemann and Riemann-Stieltjes integration, convergence theorems, multiple integration and Fubini’s Theorem, elements of Fourier analysis, applications. Prereq: MATH 450/650.

452/652 Complex Analysis 3
Complex number systems, analytic and harmonic functions, elementary conformal mapping, integral theorems, power series, Laurent series, residue theorem, and contour integration. Prereq: MATH 265.

460/660 Intensive Mathematica 1
Thorough overview of the general purpose mathematical software MATHEMATICA: numerical and symbolic calculations for algebra and linear algebra, single and multivariable calculus, ordinary and partial differential equations, 2D- and 3D-graphics, animation, word processing. Prereq: MATH 259 or 265.

472/672 Number Theory 3
Properties of integers, number theoretic functions, quadratic residues, continued fractions, prime numbers and their distribution, primitive roots. Prereq: MATH 270.

473/673 Cryptology 3
This course provides an introduction to the methods of cryptography. Classical and modern ciphers are studied from both a cryptographic and cryptoanalytic point of view. Prereq: MATH 270 or graduate standing.

478/678 History of Mathematics 3
Historical considerations emphasizing the source of mathematical ideas, growth of mathematical knowledge, and contributions of some outstanding mathematicians. Prereq: MATH 270.

480/680 Applied Differential Equations 3
Power series expansions and the method of Frobenius, special functions and their use (Bessel functions, Legendre polynomials); phase plane analysis. Prereq: MATH 266.

481/681 Fourier Analysis 3
Discrete and continuous Fourier transforms, Fourier series, convergence and inversion theorems, mean square approximation and completeness, Poisson summation, Fast-Fourier transform. Prereq: MATH 265.

482/682 Survey of Mathematical Models 3
Lagrangian and Hamiltonian dynamics, potential theory, diffusion, hydrodynamics, elasticity; dimensional analysis, tensors; emphasis on how physical concepts are formulated mathematically rather than solution methods. Prereq: MATH 266.

483/683 Partial Differential Equations 3
Solution methods for potential, diffusion and wave equations; treatments of homogeneous and nonhomogeneous equations; boundary conditions; separation of variables, Greens’ functions, transform techniques. Prereq: MATH 480/680.

488/688 Numerical Analysis I 3
Numerical solution of nonlinear equations, interpolation, numerical integration and differentiation, numerical solution of initial value problems for ordinary differential equations. Prereq: MATH 266.

489/689 Numerical Analysis II 3

720, 721 Algebra I, II 3 each
Graduate level survey of algebra: groups, rings, fields, Galois theory, and selected advanced topics. Prereq: MATH 421/621.

724 Topics In Commutative Algebra 3
Topics vary each time the course is offered and may include: dimension theory, integral dependence, factorization, regular rings, Cohen-Macaulay rings, Gorenstein rings. May be repeated for credit with change in subtopic. Prereq: MATH 721.

725 Theory of Rings II 3
The ideal theory of commutative rings, structure of (non-commutative) rings, and selected advanced topics. Prereq: MATH 721.
726 Homological Algebra 3
An overview of the techniques of homological algebra. Topics covered will include categories and functors, exact sequences, (co)chain complexes, Mayer-Vietoris sequences, TOR and EXT. Applications to other fields will be stressed. Prereq: MATH 421/621.

728, 729 Linear Algebra I, II 3 each

730, 731 Graph Theory I, II 3 each

732 Introduction to Bioinformatics 3
An introduction to the principles of bioinformatics including information relating to the determination of DNA sequencing. Prereq: STAT 661. Cross-listed with CSCI and STAT.

736, 737 Discrete Mathematics I, II 3 each
Combinatorial reasoning, generating functions, inversion formulae. Topics may include design theory, finite geometry, Ramsey theory, and coding theory. Advanced topics may include cryptography, combinatorial group theory, combinatorial number theory, algebraic combinatorics, (0,1)-matrices, and finite geometry. Prereq: MATH 436/636.

746, 747 Topology I, II 3 each
Topological spaces, convergence and continuity, separation axioms, compactness, connectedness, metrizability, fundamental group and homotopy theory. Advanced topics may include homology theory, differential topology, three-manifold theory and knot theory. Prereq: MATH 446/646.

749 Topics in Geometry and Topology 3
Advanced topics in Geometry and/or Topology. Topics vary but may include: differential geometry, K-theory, knot theory, or noncommutative geometry. May be repeated for credit with change in subtopic. Prereq: MATH 721, 751.

750, 751 Analysis I, II 3 each

752, 753 Complex Analysis I, II 3 each
Analytic and harmonic functions, power series, conformal mapping, contour integration and the calculus of residues, analytic continuation, meromorphic and entire functions, and selected topics. Prereq: MATH 451/651.

754, 755 Functional Analysis I, II 3 each
Normed spaces, linear maps, Hahn-Banach Theorem and other fundamental theorems, conjugate spaces and weak topology, adjoint operators, Hilbert spaces, spectral theory, and selected topics. Prereq: MATH 751.

756 Dynamic Systems 3
A study of basic notions of topological and symbolic dynamics. Introduction to measurable dynamics and ergodic theory. Ergodicity, mixing and entropy of dynamical systems. Prereq: MATH 750.

757 Topics In Functional Analysis 3
Maximal monotone operators and the Hille-Yosida theorem, Sobolev spaces in dimension one and applications, Sobolev spaces in higher dimensions, extension operators, Sobolev embedding theorems, Poincare inequality, duality. May be repeated for credit with change in subtopic. Prereq: MATH 750. Coreq: MATH 751.

760, 761 Ordinary Differential Equations I, II 3 each
Existence, uniqueness, and extendibility of solutions to initial value problems, linear systems, stability, oscillation, boundary value problems, difference equations, and selected advanced topics. Prereq: MATH 751.

762, 763 Integral Equations I, II 3 each
Existence and uniqueness of solutions of Fredholm and Volterra integral equations, Fredholm Theory, singular integral equations, and selected advanced topics. Prereq: MATH 751.

764 Calculus of Variations 3
Variational techniques of optimization of functionals, conditions of Euler, Weierstrass, Legendre, Jacobi, Erdmann, Pontryagin Maximal Principle, applications, and selected advanced topics. Prereq: MATH 451/651.

767 Topics In Applied Mathematics 3
Topics will vary and may include: Homogenization and Optimal Design, Mathematical Theory of Elasticity, Optimal Control, Imaging, Multiscale Modelling and Analysis, Robust Control, Stability Analysis. May be repeated for credit with change in subtopic. Prereq: MATH 750.

772, 773 Number Theory I, II 3 each
Number theoretic functions, algebraic number fields, prime numbers and their distribution, the Prime Number Theorem and related results, Fermat’s Theorem. Prereq: MATH 472/672.

778 Modern Probability Theory 3
See Statistics for description.

780 Methods of Optimization 3
See Computer Science for description.

781 Mathematical Control Theory 3
Standard optimal control and optimal estimation problems; duality; optimization in Hardy space; robust control design. Prereq: MATH 450/650.

782, 783 Mathematical Methods in Physics I, II 3 each
Tensor analysis, matrices and group theory, special relativity, integral equations and transforms, and selected advanced topics. Prereq: MATH 429/629, 452/652. Cross-listed with PHYS 752, 753.

784, 785 Partial Differential Equations I, II 3 each
Classification in elliptic, parabolic, hyperbolic type; existence and uniqueness for second order equations; Green’s functions, and integral representations; characteristics, nonlinear phenomena. Prereq: MATH 751.

786, 787 Mixed Boundary Value Problems I, II 3 each
Methods for transient and steady-state solutions of diffusion problems with mixed boundary conditions; integral transforms; Green’s function and integral equations formulations, asymptotics. Prereq: MATH 452/652 or 752.
788, 789 Numerical Analysis I, II  

3 each

Numerical solutions to partial differential and integral equations, error analysis, stability, acceleration of convergence, numerical approximation, and selected advanced topics. Prereq: MATH 489/689.
MECHANICAL ENGINEERING (ME)

Kallmeyer, Chair; Akhatov, Azarmi, Goplen, Karami, Mahmud, Nazari, Pieri, Selewa, Stewart, Sumathy, Suzen, Tangpong, Ulven, Wu, Ziejewski

COURSES

189 Skills for Academic Success 1
See University Interdisciplinary Studies for description.

212 Fundamentals of Visual Communications for Engineers 3
Visual communications for design and manufacturing, computer-aided drawing and design, three-dimensional modeling and orthographic projections, geometric dimensioning and tolerancing, ASME Y14.5 1994 standard, sketching, parametric modeling, drawings and assemblies.

213 Modeling of Engineering Systems 3
Introduction to numerical methods used in the solution of engineering problems; computer methods, programming, and graphics; engineering system modeling and simulation; case studies. Prereq: MATH 129, ME 222. Coreq: MATH 266.

221 Engineering Mechanics I 3
Scalar and vector approaches to trusses, frames and machines, internal forces, friction forces, center of gravity, centroid, and moment inertia. Prereq: MATH 165.

222 Engineering Mechanics II 3
Dynamics of particles and rigid bodies, work energy, impulse-momentum, principles of conservation of energy and momentum. Prereq: ME 221, MATH 166.

223 Mechanics of Materials 3
Introduction to stress, strain, and their relationships; torsion of circular shafts, bending stresses, deflection of beams, stress transformations, buckling. Prereq: ME 221.

All upper-level courses require admission to the professional ME program.

311 Introduction to Aviation 3
General introduction to aviation and preparation for FAA examination for Private Pilot License, study of FAA regulations, weather conditions, visual and radio navigation.

312 Introduction to Flight 2
Instruction in flight procedures, operation of aircraft, and introduction to solo flight. Completion of 15 hours of dual flight instruction required. Coreq: ME 311.

313 Commercial Instrument Ground School 3
Preparation of student for FAA written examination for Commercial Certificate and Instrument Rating License; study of commercial flight maneuvers and instrument flying and procedures. Prereq: ME 311 or holder of private pilot license. On demand.

331 Materials Science and Engineering 4
Characterization of microscopic structures and associated macroscopic properties and performance of mechanical engineering design materials (metals, ceramics, plastics) and processing effects. Includes laboratory. Prereq: CHEM 122, ME 223 and admission to professional program.

332 Engineering Materials II 3
Characterization of properties and processes in metals; diffusion, phase diagrams, phase transformation, creep, wear, corrosion, fracture, and fatigue. Prereq: ME 331 and admission to professional program.

341 Mechanics of Machinery 3
Application of solid mechanics principles and computer methods in designing mechanisms for function and performance. Prereq: ME 213 and admission to professional program.

350 Thermodynamics and Heat Transfer 3
Basic concepts, first and second laws of thermodynamics. Introduction to heat transfer principles. Prereq: ME 222. For non-mechanical engineering majors.

351 Thermodynamics I 3
Basic concepts, properties of pure substances and ideal gases. First and second law, entropy, and availability. Prereq: ME 222, MATH 259.

352 Fluid Dynamics 3
Foundations of the science of fluid dynamics. Basic concepts including thermodynamic principles applied to fluids. Development of conservation principles and applications. Prereq: ME 351 and admission to professional program.

353 Thermodynamics II 3
Continuation of thermodynamics. Cycle analysis, thermodynamic relations, mixtures, chemical reactions, and related topics. Prereq: ME 351 and admission to professional program.

412/612 Engineering Measurements* 3
Principles and characteristics of instruments used for engineering measurements, statistical analysis of data, signal conditioning, data acquisition systems. Includes laboratory. Prereq: ECE 303, ME 223 and admission to professional program.

415 Emerging Technologies in Mechanical Engineering 3
Fundamental principles and applications of emerging technologies, including micro/nanofabrication, energy storage and conversion devices, nanotechnology, sensors, and biomedical engineering. Prereq: CHEM 122, PHYS 120 or 251, MATH 259 and admission to professional program.

421/621 Theory of Vibrations* 3
Fundamentals of vibrations; free, forced, and damped vibration of single and multiple degrees of freedom systems. Prereq: ME 213, MATH 266 and admission to professional program.

423/623 Intermediate Mechanics of Materials 3
Stress analysis, failure criteria and methods, composites, energy methods, symmetric and unsymmetric bending, thick- and thin-walled cylinders, curved beams and plastic deformation. Prereq: ME 223 and admission to professional program.

433/633 Composite Materials Science and Engineering 3
This course covers composite materials science and technologies which are combinations of raw materials, interfacial issues, curing science and basic relationship between raw materials and properties of composites. Prereq: ME 331 and admission to professional program.
435/635 Plastics and Injection Molding Manufacturing  3
See Industrial and Manufacturing Engineering for description.

442/642 Machine Design I  3
Application of engineering mechanics, material properties, and failure theories to the design of reliable machine components. Prereq: ME 331 and admission to professional program.

443/643 Machine Design II  3
Application of methods, procedures, and standards used in the design and selection of mechanical components and elements, including springs, roller and journal bearings, gears, brakes, belts and flexible elements. Prereq: ME 442 and admission to professional program.

454/654 Heat and Mass Transfer  3
Principles of heat transfer by conduction, convection, and radiation. Introduction to mass transfer principles. Prereq: ME 213, 352, MATH 266 and admission to professional program.

457 Thermal Systems Laboratory  3
Investigation of thermal, fluid and mechanical systems and instrumentation. Statistical methods are used in data collection and analysis. Prereq: Admission to professional program. Co-req: ME 454.

461, 462 Design Project I, II  3 each
Capstone student project in design, analysis, and experimental investigation in mechanical engineering. Prereq for 461: ME 361. Coreq for 461: ME 443, 454, Senior standing in ME. Prereq for 462: ME 461 and admission to professional program. Courses must be taken in consecutive semesters. Summer classes are based on minimum enrollment.

468/668 Introduction to Biomechanics  3
Introduction to the fundamentals of biomechanics including force analysis, mechanics of deformable bodies; stress and strain, transport phenomena, and viscoelasticity, as well as their applications on the biomechanics of soft and hard tissues. Prereq: ME 223 and ME 352.

470/670 Renewable Energy Technology  3
Introduction to energy renewable technology, solar thermal energy systems, solar photovoltaic systems, wind to electric energy conversion systems, biomass energy resources and conversion processes, urban waste to energy from pyrolysis plants, hydrogen energy and fuel cells. Prereq: ME 350 or 351 and admission to professional program.

471/671 Stress Analysis  3
Coordination of mathematical and modern experimental analysis as applied to engineering materials. Includes laboratory. Prereq: ME 331, 442 and admission to professional program.

472/672 Fatigue and Fracture of Metals  3
Causes and effects of fatigue failure and fracture of metals, analytical methods for fatigue design and fatigue life prediction, fatigue crack initiation and propagation, fatigue testing and validation. Prereq: ME 442 and admission to professional program.

473/673 Engineering with Polymeric Materials  3
This course will introduce basic polymer materials including plastics, rubbers, adhesives; structures, properties, and relationships of polymers; additives; processing technologies, applications and development. Prereq: ME 331 and admission to professional program.

474/674 Mechanics of Composite Materials  3
Materials, properties, stress, and strength analyses; engineering design and manufacturing aspects of short and continuous fiber-reinforced materials. Prereq: ME 331 and admission to professional program.

475/675 Automatic Controls  3
Introduction to industrial automatic controls. Theory and applications of pneumatic control, continuous process control, and programmable logic control. Demonstrations and discussion of the current industrial practice. Prereq: MATH 266 and admission to professional program.

476/676 Mechatronics  3
Design and development of mechatronic systems that require an integrated knowledge of mechanical engineering, electronics, computer science and control theory. Prereq: ME 412 or ME 475 and admission to professional program or graduate standing.

477/677 ME Finite Element Analysis  3
Introduction to the finite element method and its application to problems in mechanical engineering, including stress analysis. Prereq: ME 442 and ME 213 or ABEN 255 and admission to professional program.

479/679 Fluid Power Systems Design  3
Fluid dynamics principles and fluid properties are applied to the study of function, performance, and design of system components and system for power transmission and control purposes. Prereq: ME 352 and admission to professional program. Cross-listed with ABEN.

480/680 Advanced Fluid Dynamics  3
Formulation and solution of advanced problems in fluid dynamics; fluid dynamical phenomena in biological systems; analysis of cardiovascular and respiratory systems. Prereq: ME 352 and admission to professional program.

481/681 Fundamentals of Energy Conversion  3
Introduction to electric power generating systems and their major components such as turbines, boilers, condensers, and cooling towers. Prereq: ME 351 and admission to professional program.

482/682 Fuel Cell Science and Engineering  3
Fundamental principles, technologies, and applications of fuel cells, an emerging class of energy storage/conversion devices. Prereq: CHEM 121, ME 350 or 351 and admission to professional program.

483/683 Introduction to Computational Fluid Dynamics  3
Introduction to the methods and analysis techniques used in numerical solutions of fluid flow, heat and mass transfer problems of practical engineering interest. Prereq: ME 352 and admission to professional program.

484/684 Gas Turbines  3
Theory and design of gas turbines and components. Prereq: ME 454/654 and admission to professional program.
485/685 Heating, Ventilation, and Air Conditioning 3
Application of the basic fundamentals of thermodynamics, heat transfer, and fluid flow to heating, ventilating, and air conditioning. Prereq: ME 352 and admission to professional program.

486/686 Nanotechnology and Nanomaterials 3
See Civil Engineering for description.

487/687 Internal Combustion Engines 3
Theory and practice of power and propulsion engines utilizing gas as a working substance. Study of gas turbines, spark, and compression ignition engines. Prereq: ME 351 and admission to professional program.

488/688 Introduction to Aerodynamics 3
Introductions to aerodynamics, aerodynamic characteristics of airfoils, and other components subjected to inviscid-incompressible flows; dynamics of compressible fluids; shock waves, one-dimensional flow, expansion waves in two-dimensional flow, and compressible flow over aerodynamic bodies. Prereq: ME 352 and admission to professional program or graduating standing.

489/689 Vehicle Dynamics 3
Fundamental science and engineering underlying the design and operation of vehicles. Use of previous knowledge of statics, kinematics, dynamics, and machine design. Prereq: ME 222 and admission to professional program.

711 Advanced Engineering Analysis 3
Mathematical analysis and numerical treatment of engineering problems, eigenvalue problems in lumped and distributed parameter systems, advanced mathematics applied to engineering design.

712 Advanced Finite Element Analysis 3
Application of finite element methods to problems of plasticity, viscoelasticity, fracture, vibrations, fluids, material and geometric non-linearity, and heat transfer. Recommended: ME 477/677.

717 Advanced Controls for Mechanical Systems 3
Analysis and design of multivariable control systems for robust stabilization and optimal performance of mechanical systems.

720 Continuum Mechanics 3
See Civil Engineering for description.

721 Advanced Dynamics and Vibrations 3
Kinematics and dynamics of a particle, a system of particles and a rigid body, orbital motion. Lagrange's equations, vibration theory. Recommended: ME 421/621.

722 Advanced Mechanics of Materials 3
Stress, deformation, failure analysis of deformable bodies and structures under static and dynamic loadings, fundamental concepts and definitions in stress, strain, energy methods, plasticity, fracture, fatigue, creep, contact, impact and stability of solid bodies and plate bending problems. Recommended: ME 223.

723 Experimental Stress Analysis 3
Measurement of deformations that are of significance in the engineering design of load resisting members. Use of optical, electrical, and mechanical instrumentation; brittle coating and photoelastic techniques. Includes laboratory. Recommended: ME 471/671.

725 Advanced Mechanics and Failure of Composites 3

726 Fracture Mechanics 3

728 Stress Waves in Solids 3
Introduction to fundamental concepts and principles of stress waves propagating in solid materials and relevant applications and experimental techniques.

731 Mechanical Behavior of Materials 3
Fundamental concepts of elastic, viscoelastic, and plastic deformation of materials; emphasizing atomic and microstructure-mechanical property relationships. Theory of static and dynamic dislocations; fracture, fatigue, and creep as well as strengthening mechanisms in materials. Recommended: ME 331, basic materials science course.

733 Polymer Nanocomposites 3
Fundamental concepts and principles of nanotechnology, nanostructured materials and nanocomposites; polymer nanocomposites processing, property characterization, and relevant modeling.

734 Smart Materials and Structures 3
Physics, chemistry, engineering principles and applications of smart materials and structures. Recommended: Any basic materials science (ME 331), solid state physics class (PHYS 401 or 485), or CPM 472/672, 474/674.

736 Advanced Surface Analysis 3
Topics covered in this course include tribology, introduction to deposition technologies, surface protection mechanisms, surface preparation for deposition, hard coatings, materials science of deposition, analytical techniques for surface characterization, evaluation of mechanical performance of deposited layer, case studies.

743 Biomechanics of Impact 3
Fundamental sciences of engineering and human anatomy that form the basis of biomechanics of soft tissue and bone under dynamic conditions. Recommended: ME 331.

751 Advanced Thermodynamics 3
Rigorous treatment of thermodynamic principles. Emphasis on the concept of availability methods as applied to various engineering systems. Recommended: ME 353.

753 Gas Dynamics 3
Fundamental concepts of fluid dynamics and thermodynamics used in the treatment of compressible flow, frictional flows, and flows with heat transfer or energy release. Recommended: ME 352.

754 Boundary Layer Theory 3
Fundamental laws of motion of a viscous fluid used in the consideration of laminar boundary layers, transition phenomena, and turbulent boundary layer flows. Recommended: ME 352.
755 Multiscale Fluid Dynamics

Fundamental principles of fluid dynamics in micro and nanoscales, with applications to nanotechnology and biotechnology. Recommended: ME 352.

761 Heat Transmission I

*Courses ME 612, 621, 642, and 654 are not acceptable for credit in graduate programs in Mechanical Engineering (M.S. or Ph.D.).
### MICROBIOLOGY (MICR)

<tr>
<td>This course will emphasize the qualities of sound logic, good structure, and honesty in writing journal articles and science pieces for popular press. Prereq: ENGL 120, MICR 350, Junior standing. Satisfies upper-division writing requirement.</td>
<td></td>
</tr>
<tr>
<td><strong>370 Beef Cattle Health Management</strong></td>
<td>1</td>
</tr>
<tr>
<td>This course introduces the student to learning through a case-based approach to beef cattle disease. Case material highlights beef cattle health problems seen in the Midwest. Case questions encourage students to think about disease prevention, management and eradication. Prereq: ANSC 114 and VETS 135.</td>
<td></td>
</tr>
<tr>
<td><strong>371 Dairy Cattle Health Management</strong></td>
<td>1</td>
</tr>
<tr>
<td>This course introduces the student to learning through a case-based approach to dairy cattle disease. Case material highlights dairy cattle health problems seen in the Midwest. Case questions encourage students to think about disease prevention, management and eradication. Prereq: ANSC 114 and VETS 135.</td>
<td></td>
</tr>
<tr>
<td><strong>372 Sheep Health Management</strong></td>
<td>1</td>
</tr>
<tr>
<td>This course introduces the student to learning through a case-based approach to sheep disease. Case material highlights sheep health problems seen in the Midwest. Case questions encourage students to think about disease prevention, management and eradication. Prereq: ANSC 114 and VETS 135.</td>
<td></td>
</tr>
<tr>
<td><strong>373 Equine Health Management</strong></td>
<td>1</td>
</tr>
<tr>
<td>This course introduces the student to learning through a case-based approach to equine disease. Case material highlights equine health problems seen in the Midwest. Case questions encourage students to think about disease prevention, management and eradication. Prereq: ANSC 114 and VETS 135.</td>
<td></td>
</tr>
<tr>
<td><strong>374 Swine Health Management</strong></td>
<td>1</td>
</tr>
<tr>
<td>This course introduces the student to learning through a case-based approach to swine disease. Case material highlights swine health problems seen in the Midwest. Case questions encourage students to think about disease prevention, management and eradication. Prereq: ANSC 114 and VETS 135.</td>
<td></td>
</tr>
<tr>
<td><strong>375 Bison Health Management</strong></td>
<td>1</td>
</tr>
<tr>
<td>This course introduces the student to learning through a case-based approach to bison disease. Case material highlights bison health problems seen in the Midwest. Case questions encourage students to think about disease prevention, management and eradication. Prereq: ANSC 114 and VETS 135.</td>
<td></td>
</tr>
<tr>
<td><strong>376 Feline Health Management</strong></td>
<td>1</td>
</tr>
<tr>
<td>This course introduces the student to learning through a case-based approach to feline disease. Case material highlights feline health problems seen in the Midwest. Case questions encourage students to think about disease prevention, management and eradication. Prereq: ANSC 114 and VETS 135.</td>
<td></td>
</tr>
<tr>
<td><strong>377 Canine Health Management</strong></td>
<td>1</td>
</tr>
<tr>
<td>This course introduces the student to learning through a case-based approach to canine disease. Case material highlights canine health problems seen in the Midwest. Case questions encourage students to think about disease prevention, management and eradication. Prereq: ANSC 114 and VETS 135.</td>
<td></td>
</tr>
<tr>
<td><strong>445/645 Animal Cell Culture Techniques</strong></td>
<td>2</td>
</tr>
<tr>
<td>Methods of animal cell culture propagation and uses for cell culture systems.</td>
<td></td>
</tr>
<tr>
<td><strong>450/650 Infectious Disease Pathogenesis</strong></td>
<td>3</td>
</tr>
<tr>
<td>Students will study mechanisms of bacterial, viral, fungal, and parasitic pathogenesis and the immune response to pathogens. Prereq: MICR 350, 460/660 and 470/670.</td>
<td></td>
</tr>
<tr>
<td><strong>452/652 Microbial Ecology</strong></td>
<td>3</td>
</tr>
<tr>
<td>Study of the relationships between microbes and the physical, chemical, and biotic components of their environments. The role of microbes in nutrient cycling, bioremediation, biocontrol, biological waste treatment, fuel production, and energy recovery. Prereq: MICR 350, 350L.</td>
<td></td>
</tr>
<tr>
<td><strong>453/653 Food Microbiology</strong></td>
<td>3</td>
</tr>
<tr>
<td>Study of the nature, physiology, and interactions of microorganisms in foods. Introduction to foodborne diseases, effects of food processing on the microflora of foods, principles of food preservation, food spoilage, and foods produced by microorganisms. Prereq: MICR 202L or 350L. Cross-listed with CFS 453/653.</td>
<td></td>
</tr>
<tr>
<td><strong>454/654 Bioprocessing</strong></td>
<td>3</td>
</tr>
<tr>
<td>The use of microorganisms and enzymes for processing agricultural materials into industrial products including foods, bio-fuels, and antimicrobials. Prereq: MICR 202L, CHEM 260, or graduate standing. Cross-listed with CFS.</td>
<td></td>
</tr>
<tr>
<td><strong>460/660 Pathogenic Microbiology</strong></td>
<td>3</td>
</tr>
<tr>
<td>Study of the microorganisms that cause disease and of disease processes. Prereq: MICR 202 or 350.</td>
<td></td>
</tr>
<tr>
<td><strong>460L/660L Pathogenic Microbiology Laboratory</strong></td>
<td>2</td>
</tr>
<tr>
<td>Isolation and identification of pathogenic microorganisms. Prereq: MICR 350L.</td>
<td></td>
</tr>
<tr>
<td><strong>463/663 [363] Clinical Parasitology</strong></td>
<td>2</td>
</tr>
<tr>
<td>A study of protozoan and helminthic parasites of humans, with an emphasis on clinical identification, life histories, and control. Prereq: BIOL 150, 150L.</td>
<td></td>
</tr>
</tbody>
</table>
464/664 Etiology/Foodborne Illness
Study of the etiology, pathogenesis, disease manifestations and prevention of foodborne illnesses, including those caused by pathogens, allergens, toxins, and contaminants; detection of the etiologic agents, and their entrance into the food chain. Prereq: MICR 202, 202L.

465/665 Fundamentals of Animal Disease

470/670 Basic Immunology
An overview of the role of the immune system including the functions of humoral and cell-mediated immunity in health and disease. Prereq: MICR 350.

471/671 Immunology and Serology Laboratory
Basic immunological and serological procedures. Prereq: MICR 350. Prereq or Co-req: MICR 350L.

474/674 Epidemiology
See Food Safety for description.

475/675 Animal Virology
The biology of animal viruses with emphasis on virus replication and pathogenesis. Prereq: MICR 350.

480/680 Bacterial Physiology

482/682 Bacterial Genetics and Phage
Bacterial genetics as it pertains to antibiotic resistance, genetic testing and manipulation for biotechnological applications. Prereq: MICR 350. Coreq: BIOC 460.

486 Capstone Experience in Microbiology
The capstone experience course Is a culmination of all required coursework in the major assisting students in broadening and integrating the total experience of the microbiology major. Prereq: MICR 350, 350L and senior standing, semester of graduation.

561 Microbiology Laboratory for Pharmacy
Students are exposed to laboratory procedures currently used in clinical microbiology laboratories. Prereq: MICR 202, admission to the professional pharmacy program.

572 Clinical Immunology
Basic concepts in immunology including special attention to clinical conditions that may appear as a result of immune system activity. Prereq: MICR 202 or 350.

724 Applied Epidemiology and Biostatistics
This course will enable the students to get an understanding of how to apply epidemiological tools in study designs data management and analysis. Students will create or use existing databases and learn data management and analysis using software such as EPIINFO. Prereq: MICR/SAFE 474.

750 Advanced Topics in Microbiology
See Food Safety for description.

752 Advanced Food Microbiology
See Food Safety for description.

756 Zoonoses and Rural Public Health
This course introduces the student to learning through a case-based approach to zoonotic disease with an emphasis on rural public health. Case questions encourage students to think about disease prevention, management and eradication. Students will be expected to read and research information on each case and answer discussion questions.

762 Advanced Pathogenic Bacteriology
Biophysical and biochemical mechanisms by which microorganisms cause infectious disease and host reactions to the disease. Prereq: MICR 460.

770 Immunology of Chronic Infections
A study of the host’s response to chronic infections, which is illustrated using a framework of diseases of worldwide importance that present different pathologies and outcomes. Prereq: MICR 470/670.

775 Molecular Virology
An in-depth study of current areas of research on human and animal viruses. The replication, pathogenesis, diagnosis, prevention, and control of viruses using contemporary molecular and cellular biology approaches will be examined. Prereq: MICR 460/660, 470/670, 475/675.

781 Advanced Bacterial Physiology
In-depth consideration of various topics in bacterial physiology such as autotrophy, bacterial growth and growth yields, energy-yielding metabolism, and regulation of catabolic pathways. Prereq: MICR 480/680.

782 Molecular Microbiological Techniques
Familiarize students with current molecular and immunologic strategies and techniques commonly used to study infectious disease processes. Prereq: BIOC 460, 461, 474, MICR 471.

783 Advanced Bacterial Genetics and Phage

785 Pathobiology
A comprehensive understanding of the molecular mechanisms that underlie disease pathogenesis and lesion development. Investigation and presentation on mechanisms underlying a specific disease entity of either human or animal origin. Prereq: MICR 460/660.
**MILITARY SCIENCE (MS) (ARMY ROTC)**

**COURSES**

<table>
<thead>
<tr>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>101 Foundations of Officership</td>
<td>1</td>
</tr>
<tr>
<td>Introduce fundamental concepts consistent with the military culture; includes leadership, ethics, and Army values. Increase self-confidence through team study and activities involving military skills, leadership reaction course, and making presentations. Weekly lab required. Coreq: MS 310. F</td>
<td></td>
</tr>
<tr>
<td>102 Basic Leadership</td>
<td>1</td>
</tr>
<tr>
<td>Principles of effective leading; reinforce self-confidence; develop communication skills to improve performance and group interaction; relate organizational ethical values to leadership effectiveness. Weekly lab required. Coreq: MS 320. S</td>
<td></td>
</tr>
<tr>
<td>110 Army ROTC Physical Fitness</td>
<td>2</td>
</tr>
<tr>
<td>Instruction in planning and leading physical fitness programs. Development of physical fitness required of an Army officer. Emphasis on development of an individual fitness program and the role of exercise and fitness in one’s life. May be repeated. F, S</td>
<td></td>
</tr>
<tr>
<td>201 Individual Leadership Studies</td>
<td>2</td>
</tr>
<tr>
<td>Apply ethics-based leadership skills in oral presentations, writing concisely, planning events, coordinating group efforts, first aid skills, land navigation, and basic military tactics. Focuses on personal development and includes ROTC leadership assessment program. Coreq: MS 310. F</td>
<td></td>
</tr>
<tr>
<td>202 Leadership and Teamwork</td>
<td>2</td>
</tr>
<tr>
<td>Continuation of individual and team building concepts for small unit operations: provides a conceptual framework for decision making, planning, and time management; making safety assessments; introduces movement techniques and pre-execution checks. Coreq: MS 310. S</td>
<td></td>
</tr>
<tr>
<td>301 Leadership and Problem Solving</td>
<td>3</td>
</tr>
<tr>
<td>Continuation of individual and team building concepts for small unit operations; provides a conceptual framework for decision making, planning, and time management; making safety assessments; introduces movement techniques and pre-execution checks. Coreq: MS 310. S</td>
<td></td>
</tr>
<tr>
<td>302 Leadership and Ethics</td>
<td>3</td>
</tr>
<tr>
<td>Develop skills in planning and leading by conducting training for lower division students. Introduction to operational art and tactics; includes a series of practical opportunities to lead small groups, receive personal assessments and evaluations. Coreq: MS 310. F</td>
<td></td>
</tr>
<tr>
<td>310 Leadership Laboratory</td>
<td>1</td>
</tr>
<tr>
<td>Individual and collective drill, small unit leadership experience, and tactical training to lead small groups, receive personal assessments and encouragement, and defensive tactics. Develop skills in planning and leading by conducting training for lower-division students. Weekly lab, physical fitness program, and field exercises required. May be repeated. F</td>
<td></td>
</tr>
<tr>
<td>320 Leadership Laboratory</td>
<td>1</td>
</tr>
<tr>
<td>Small unit drill, as well as tactical application of leadership fundamentals at the squad/patrol leader level. May be repeated. S</td>
<td></td>
</tr>
<tr>
<td>401 Leadership and Management</td>
<td>3</td>
</tr>
<tr>
<td>Plan, conduct, and evaluate activities of the ROTC cadet organization. Articulate goals, put plans into action. Introduce staff organization and processes. Assess organizational cohesion and develop improvement strategies. Apply Army policies. Coreq: MS 410.</td>
<td></td>

MODERN LANGUAGE (LANG)

COURSES

101 Basic ESL: Integrated Skills
Intensive integrated skills approach to basic English for novice non-native speakers; emphasis on reading, writing, listening and speaking skills needed for academic work. May be repeated. Does not satisfy any requirements for graduation.

104 English for Non-Native Speakers: Vocabulary and Reading
Intensive instruction in vocabulary and reading skills required for successful completion of university work by speakers of English as a second language (ESL). May be repeated. Does not satisfy any requirements for graduation.

103 ESL Intermediate Grammar and Writing I
Grammar, usage, syntax, and extensive work with sentence and paragraph structure, stressing unity, and coherence. Emphasis on skills required for academic work. Does not satisfy any requirements for graduation.

105 ESL Intermediate Grammar/Writing II
Extended practice in grammar, usage, syntax, and work with paragraph and essay structure. Emphasis on skills needed for academic work. Does not satisfy any requirements for graduation.

106 English for Non-Native Speakers: Oral Skills
Intensive instruction in speaking and listening skills required for successful completion of university work by speakers of English as a second language (ESL). May be repeated. Does not satisfy any requirements for graduation.

107 Language Use in Writing for ESL I
Advanced English grammar forms and essay composition for ESL. Focuses on the production and control of grammatical sentences in written communication, with emphasis on skills needed for academic work. Does not satisfy any requirements for graduation.

109 Language Use in Writing for ESL II
A continuation of LANG 107. Focuses on production and control of grammatical structures in written communication. Emphasis on skills required for academic work. Does not satisfy any requirements for graduation.
MUSIC (MUSC)

Brekke, Froelich, Groves, Johnson, Jones, Mack, Jo Ann Miller, John Miller, Moe, Monroe, Noone, Olfert, Parnode, Sublett, Weber

COURSES

100 Music Appreciation (CCN)  3
Understanding and appreciating musical styles and composers with some emphasis on the relationship of music to concurrent social and artistic trends. Designed for non-music majors. (ND:HUM)

101 Fundamentals of Music (CCN)  3
Introduction to fundamental elements of music through the study of scales, chords, basic harmonic progressions, rhythms, and terminology.

103 Introduction to Music History (CCN)  3
Introduction to the major works of music in the Western tradition that define the stylistic elements of musical periods in history. (ND:HUM)

104 Introduction to Music Literature to 1825 (CCN)  3
Understanding and appreciating musical styles and composers up to circa 1825 with some emphasis on the relationship of music to concurrent social and artistic trends. Designed for non-music majors. (ND:HUM)

105 Introduction to Music Literature: 1825 to the Present (CCN)  3
Understanding and appreciating musical styles and composers from circa 1825 to the present with some emphasis on the relationship of music to concurrent social and artistic trends. Designed for non-music majors. (ND:HUM)

108 Roots of American Popular Music (CCN)  3
Survey of American popular music and musicians from Civil War times through the present with an emphasis on historical and sociological influences. Designed for non-music majors. (ND:HUM)

130, 131 Theory and Analysis I, II  3 each
Introduction to the compositional practices of the 18th and 19th centuries. Prereq for 131: MUSC 130. Coreq: MUSC 132, 133 respectively.

132, 133 Ear Training and Sight Singing I, II  1 each
Development of sight singing and ear training skills. Laboratory band and chorus required. Coreq: MUSC 130, 131 respectively.

160, 161 Piano Class I, II  1 each
Group instruction in the basic fundamentals of playing the piano. Designed primarily to meet the basic piano proficiency requirements for music education majors.

162 (CCN), 163 Voice Class I, II  1 each
Group instruction in the fundamentals of singing. For music students who do not major in voice. May be repeated.

Applied Music

Applied Piano  1
165, 265, 365, 465. May be repeated.

Applied Organ  1
166, 266, 366, 466. May be repeated. Tri-College course.

Applied Voice  1
167, 267, 367, 467. May be repeated.

Applied Wind Instruments  1
168, 268, 368, 468. May be repeated.

Applied Percussion Instruments  1
169, 269, 369, 469. May be repeated.

173, 273 Supplementary Applied Study  1-2 each
For music performance majors. 173 and 273 registrations should be for one credit; add one credit for supplementary pedagogy study. May be repeated.

174 Pronunciation for Singers I  1
Instruction in the proper pronunciation of English, Italian, German, Latin, and Spanish for song, oratorio, and opera.

175 Pronunciation for Singers II  1

180 Performance Attendance  0
Attendance at regional performances, including NDSU events. Minimum of five registrations necessary for graduation for music majors, two registrations for music minors. P/F only.

Applied Upper Strings  1
181, 281, 381, 481. May be repeated

Applied Lower Strings  1
182, 282, 382, 482. May be repeated

Applied Guitar  1
183, 283, 383, 483. May be repeated

201 World Music (CCN)  3
Survey of the music cultures of major non-Western and non-Anglo North American ethnic groups of the world.

228 Development of Musical Theatre  3
Introduction to Musical Theatre. Lectures provide historical survey. Weekly labs are devoted to active exploration of representative musical theatre repertoire, resulting in a final showcase. Prereq: THEA 161 and MUSC 162. Cross-listed with THEA.

230, 231 Theory and Analysis III, IV  3 each
Advanced harmonic and chromatic materials of the common practice period, and analysis and stylistic compositions of music from ancient Greece to contemporary practice. Prereq: MUSC 130, 231 respectively. Coreq: MUSC 232, 233 respectively.

232, 233 Ear Training and Sight Singing III, IV  1 each
Advanced work with ear training and sight singing materials. Laboratory band and chorus required. Coreq: MUSC 230, 232 respectively.
250 Basic Conducting
Study and development of basic ensemble conducting skills.

260, 261 Piano Class III, IV 1 each
Intermediate instruction in class piano. Prereq: MUSC 161.

301 Musical Theatre Troupe
A select performance ensemble of musical theatre performers. This ensemble meets twice a week to develop scenes, songs, and choreography from classic and contemporary musical theatre repertoire. May be repeated. Prereq: selection by audition only.

331 Instrumental Arranging
Arranging materials for bands. Prereq: MUSC 231.

346 Survey of Vocal Literature
An overview of local literature from 1600 to present. Representative works will include literature from the Western tradition.

347 Piano Pedagogy I
Methods and materials for teaching beginning and early-grade piano students. Prereq: Music majors or minors.

348 Piano Pedagogy II
Methods and materials for teaching intermediate and advance-level piano students. Prereq: Music majors or minors.

349 Vocal Methods and Pedagogy I
Instruction in vocal pedagogy and methods for music majors.

350 Vocal Methods and Pedagogy II
Advanced instruction in vocal pedagogy and methods for music education majors. Prereq: MUSC 349.

351 Instrumental Conducting and Literature
Fundamentals and techniques of conducting instrumental ensembles with practical application through the study of instrumental literature.

352 Choral Conducting and Literature
Fundamentals and techniques of conducting choral ensembles with practical application through the study of choral literature.

353 Woodwind Methods I
Class instruction in woodwind instruments for vocal and instrumental music education majors. Emphasis on pedagogical principles, applied competency of fundamentals, and literature.

354 Woodwind Methods II
Class instruction in woodwind instruments for instrumental music education majors. Emphasis on advanced pedagogical principles, applied competency of fundamentals and in-depth coverage of literature.

355 Brass Methods
Class instruction in brass instruments for vocal and instrumental music education majors. Emphasis on pedagogical principles, applied competency of fundamentals, and literature.

357 Marching Band Methods and Techniques
Methods and materials for directing, charting, and fielding a high school marching band.

358 Jazz Methods
History, methods, and materials for teaching jazz styles and improvisation.

359 Percussion Methods
Class instruction in percussion instruments for music education majors. Emphasis on pedagogical principles, applied competency, and literature.

364 Jazz Improvisation
Basic concepts necessary to play and teach the fundamentals of jazz improvisation. May be repeated.

373 Supplementary Applied Study
For music performance majors. Typical registration should be for two credits; add one credit for supplementary pedagogy study. May be repeated.

380 Recital
Preparation and presentation of a half recital in instrumental, keyboard, or vocal performance. May be repeated.

384 Composition I
This course will serve as an introduction to compositional techniques. Group and private instruction will be given during the semester. Prereq: MUSC 231.

411/611 Form and Analysis
Study of the types of tonal relationships that create musical works of art. Examination of small forms such as motive and phrase, and progressing to large forms such as fugue, variation, and sonata.

430/630 Counterpoint
Study of contrapuntal techniques of the Renaissance and Baroque periods through analysis and composition exercises. Prereq: MUSC 231.

431/631 Contemporary Harmonic Techniques
Study of harmonic and contrapuntal techniques of contemporary composers, with exercises in writing in the various styles. Prereq: MUSC 231.
440 History of Choral Literature
Survey of the history of choral literature from the Renaissance to the present, with special emphasis on representative compositions in both large and small forms. Prereq: Permission of instructor.

441/641 Symphonic Literature
Survey of the history of symphonic literature with emphasis on selected works. Prereq: Permission of instructor.

442/642 Operatic Literature
Survey of the history of opera with emphasis on selected works. Prereq: MUSC 340 and MUSC 341 or consent of instructor.

443/643 Keyboard Literature
Survey of keyboard styles, instrumental development, and literature (excluding organ) from the early 14th century through the 20th century, with special emphasis on works from 1775 to 1925. Prereq: Permission of instructor.

473 Supplementary Applied Study
For music performance majors. Typical registration should be for three credits; add one credit for supplementary pedagogy study. May be repeated.

480 Recital
Capstone for performance majors. May be repeated.

484 Composition II
This course will continue study of compositional techniques and will require finished compositions for performances. Group and private instruction will be given during the semester. Prereq: MUSC 231 and MUSC 384.

701 Psychology of Music
Study of acoustics, the anatomy and physiology of hearing, and how the listener perceives music and sound.

702 Graduate Theory Survey
This course is structured as a theory review course for graduate students in music. It will enable students to be able to do advanced course work in analytical studies and other technical graduate courses.

703 Foundations of Music Education
This course is designed to provide a comprehensive view of the basic foundations inherent in the study of music education at the graduate level, with the emphasis on the development of a personal philosophical perspective that accounts for historical, philosophical, practical and sociological perspectives. Prereq: admission to the Master of Music program.

704 Graduate Music History Survey
Reading, discussion and listening assignments covering music from the Medieval period through the 21st Century.

709 Graduate Ensemble
Ensemble registration for graduate students. Study and performance of major works of each ensemble. May be repeated.

713 Advanced Choral Music Methods
Advanced study of current choral music methods, materials and assessment strategies. The course will focus on implementation of teaching strategies into choral music classrooms to increase student learning and understanding. Additional information and resources will be studied and used to develop effective secondary music curriculum guidelines. Prereq: admission to graduate studies in music.

714 Advanced Elementary Music Methods
Advanced study of current elementary music methodologies and the implementation of teaching strategies into elementary music classrooms. Additional information and resources will be studied and used to develop effective elementary music curriculum guidelines. Prereq: admission to the Master of Music Education program.

715 History of Choral Literature
A survey of the history of choral literature from the Renaissance to the present, with special emphasis on representative compositions in both large and small forms.

721 Advanced Vocal Pedagogy and Repertoire
In-depth study of the physical and physiological considerations of vocal technique with application to specific voices and suitable repertoire. May be repeated.

722 Advanced Instrumental Music Pedagogy and Literature
Advanced study in the pedagogy and literature of wind instruments. Emphasis on techniques of teaching winds in grades 5 through 12. Section 1: Brass pedagogy. Section 2: Woodwind pedagogy. May be repeated.

731 Applied Study
Private applied music study (instrumental, keyboard, vocal, conducting). Course credit determined by program and recommendation of instructor. May be repeated.

734 Analytical Techniques
Analysis of music of all periods, using a variety of techniques. Music to be analyzed will vary with each offering; may be repeated with permission of instructor. May be repeated.

740 Medieval and Renaissance Music History
In-depth historical study of Medieval and Renaissance musical styles and genres through critical listening, discussions, and student and instructor presentations.

741 Baroque Music History
In-depth historical study of Baroque musical styles and genres through critical listening, discussions, and student and instructor presentations.

742 Classical Music History
In-depth historical study of Classical musical styles and genres through critical listening, discussions, and student and instructor presentations.

743 Romantic Music History
In-depth historical study of Romantic musical styles and genres through critical listening, discussions, and student and instructor presentations.

744 20th Century Music History
In-depth study of the 20th century musical language and compositional values and goals through critical listening, score analysis, discussions, and student and instructor presentations.
### 748 Music Bibliography and Research Methods
Introduction to music reference works, general music bibliography, and research methods.

### 760 Medieval/Renaissance Choral Literature
A study of choral literature of the Medieval and Renaissance periods, including major composers, genres, forms, and compositional styles.

### 761 Baroque Choral Literature
A study of choral literature of the Baroque period, including major composers, genres, forms and compositional styles.

### 762 Classical/Romantic Choral Literature
A study of choral literature of the Classical and Romantic periods, including major composers, genres, forms and compositional styles.

### 763 Contemporary Choral Literature
A study of choral literature of the 20th and 21st centuries, including major composers, genres, forms and compositional styles.

### 765 Band Literature: History and Development
Historical survey of instrumental literature for wind band, covering repertoire from the Renaissance to the present.

### 766 Band Literature: Chamber Music, Other Genres
Survey of instrumental literature for wind band, covering music for young bands, wind band and voice, wind band and solo instruments, chamber music, and other genres.

### 767 Vocal Literature I: Baroque and Classical
Performance and research-based study of the vocal literature of the Baroque and Classical eras, including national trends and performance practice.

### 768 Vocal Literature II: Romantic
Performance and research-based study of the vocal literature of the Romantic era (1800-1915), including national trends and performance practice.

### 769 Vocal Literature III: 20th Century and Contemporary
Performance and research-based study of the vocal literature from 1915 to present, including national trends and performance practice.

### 780 Recital
Preparation and presentation of a professional full-length recital in instrument, keyboard, vocal, or conducting performance, with accompanying document. May be repeated for credit.

### 789 D.M.A. Thesis
Preparation of a capstone written document for the Doctor of Musical Arts degree. At least three registrations required for the Music Education track. At least one registration required for the Performance and Conducting tracks. Restricted to Doctor of Musical Arts program students only.

### Organizations
Membership in all organizations is subject to approval of the director. May be repeated.

NDSU Undergraduate Bulletin 2010-2011
NATURAL RESOURCES MANAGEMENT (NRM)
Ashworth, Barker, Biondini, Blcier, Casey, Clambey, Goreham, Grygiel, Kirby, J. Leitch, Meister, Norlard, Padmanabhan, Steele, Zeleznik

COURSES

150 Natural Resources Management Orientation 1
Introduction to natural resources management issues, concepts, and careers.

225 Natural Resource and Agro-ecosystems (CCN) 3
Introduction to scientific theories and their relation to natural resources and agriculture. Influence of these theories on current perspectives toward the environment. 3 lectures. Cross-listed with RNG. (ND:SCI)

264 Natural Resource Management Systems 3
See Agricultural Systems Management for description.

401/601 Urban-Ecosystem Management 3
An interdisciplinary management survey examining the urban/rural interface and environmental and social factors driving the process of urbanization as a sustainable ecosystem.

402/602 River and Stream Resource Management 3
The structure and function of river and stream ecosystems: biotic and abiotic functioning, stream and river ecological theories, management and monitoring practices.

420/620 Scenarios in Natural Resources Management 2
An interdisciplinary course designed to understand the driving forces that will shape future natural resource management actions and philosophies.

421/621 Environmental Outreach Methods 3
Introduction to philosophies, theories, and methods common to environmental education and outreach.

431/631 NEPA and Environmental Impact Assessment 3
The interaction and effects of the National Environmental Policy Act (NEPA) with national environmental policy; implementation of the NEPA; public opinion on the state of the environment; introduction to EIS (Environmental Impact Statements).

432/632 Environmental Impact Statement 2
A comprehensive overview of the Environmental Impact Statement (EIS) planning process, document preparation, and project management.

453/653 Rangeland Resources Watershed Management 3
See Range Science for description.

454/654 Wetland Resources Management 3
Principles of wetland systems, wetland management, wetland functions, wetland assessment, and wetland improvement. Prereq: RNG 336. Cross-listed with RNG. F (even years)

701 Terrestrial Resources Management 3
Management and ecology of heterogeneous landscapes where ecosystem processes and human activities interact as dynamic components. Prereq: RNG/BOT 660.

702 Natural Resources Management Planning 3
Presentation of the principles, practices and key policy issues of natural resources management and planning.

720 Natural Resources Administration and Policy 2
A comprehensive analysis of the theory of externalities and their application to the design of natural resources policy. Prereq: ECON 681, NRM 702.

730 Environmental Law 1
Overview of the subject of environmental law.
COURSES

240 Nursing as a Scholarly Profession  3
Introduction to the practice of professional nursing. The course focuses on the philosophy of the nursing program, the nature of the nursing profession and utilization of the scientific process. Prereq: Admission to program.

250 Health Promotion  2
Introduction to community as client and setting for nursing practice. Focus on theory and methods of health promotion and teaching-learning. Introduction to providing culturally-sensitive care. Prereq: Admission to program.

251 Skills and Concepts for Nursing  2
Introduction to the nursing process, basic nursing skills and clinical decision-making. Prereq: NURS 240, 250 and admission to program.

252 Gerontologic Nursing  2
This course focuses on health, the deviations of health, and the nursing care of the geriatric population. Prereq: NURS 240, 250 and admission to program.

340 Leadership and Ethical Reflection  2
This course presents principles of leadership in the nursing profession and in civic life. The role of ethical reflection as an essential component of professional practice is discussed. Prereq: second year level nursing courses and admission to program.

341 Foundations of Clinical Nursing  3
This course emphasizes the physiologic, psychologic, and pathophysiologic concepts that provide the foundation for professional nursing care. Prereq: second year level nursing courses and admission to program.

342 Adult Health Nursing I  5
This course emphasizes the pathophysiology and the nursing care of adult clients experiencing common disorders of body systems. 3 credits didactic, 2 credits clinical. Prereq: second year level nursing courses and admission to program.

352 Family Nursing I  5
This course focuses on nursing care and health promotion for the childbearing family. Includes identification and care of high-risk clients, 3 credits didactic, 2 credits clinical. Prereq: second year level nursing courses, NURS 340, 341, 342, PHRM 300 and admission to program.

360 Health Assessment  4
Focusses on health assessment and health promotion of individual clients through utilization of the nursing process and basic nursing concepts. Prereq: Admission to program.

362 Family Nursing II  4
Focuses on nursing care of the child and family as client. Includes infancy through adolescence, hospitalized and within the community, acutely ill and chronically ill; common stressors throughout the growing years; strategies for health promotion. 3 credits didactic, 1 credit clinical. Prereq: second year level nursing courses, NURS 340, 341, 342, PHRM 300 and admission to program.

372 Integrated Family Nursing  2
Provides the student opportunity to integrate prior learning about pediatric and obstetrical care with an increased knowledge of family dynamics and cultural influences. Prereq: RN or LPN licensure, admission to program.

402 Mental Health Nursing  5
Synthesis and application of nursing and psychiatric-mental health concepts to promote the wellness of individuals and groups. 3 credits didactic, 2 credits clinical. Prereq: second year level nursing courses, NURS 340, 341, 342, PHRM 300 and admission to program.

403 Adult Health Nursing II  5
Focuses on the etiology, pathophysiology, and nursing care of adult clients experiencing selected clinical problems originating from respiratory and cardiovascular systems, neuro trauma, and multisystem problems. Care of families of clients is also emphasized. 3 credits didactic, 2 credits clinical. Prereq: second year level nursing courses, NURS 340, 341, 342, PHRM 300 and admission to program.

404 Adult Health III  4
The pathophysiologic mechanisms and organization of nursing care of adult clients experiencing selected complex stressors. 2 credits didactic, 2 credits clinical. Prereq: second and third year level nursing courses, NURS 402, 403, 440 and admission to program.

405 Psychosocial Nursing  2
In this course the student will synthesize prior learning with further exploration of psychosocial nursing. Prereq: RN or LPN licensure, admission to program.

406 Public Health Nursing  4
The focus of this course will include the core functions of public health, partnering with the community, primary prevention, creation of healthy environments, service to those at risk, stewardship of resources, and multidisciplinary collaboration. 3 credits didactic, 1 credit clinical. Prereq: second and third year level nursing courses, NURS 402, 403, 440 and admission to program.

407 Adult Health: Complex Problems  5
Designed for persons with a nursing license, this course focuses on the etiology, pathophysiologic mechanisms, and organization of nursing care for adult clients experiencing selected complex stressors. Prereq: NURS 240 or 360.

430 Nursing Management  2
Study of concepts and issues related to management and leadership in professional nursing. Prereq: second year level nursing courses, NURS 340, 341, 342 and admission to program.

440 Nursing Issues/Career  2
This course presents an overview of contemporary nursing issues and a guide for career development. Prereq: NURS 340.

450 Nursing Synthesis and Practicum  4
NURS 450 is the capstone course in the nursing major and provides a framework for the student’s transition to the entry-level professional role. 1 credit didactic, 3 credits clinical. Prereq: second, third and other fourth year level nursing courses and admission to program.
604 Advanced Nursing Research  
Research in nursing includes an exploration of the research process and the methodologies appropriate to nursing.

608 Transcultural and Social Perspectives  
Develop understanding of diversities in races, cultures, individuals, families, communities, populations, lifestyles, gender, and age groups. Changing demographics will be analyzed, major health needs identified, and health promotion and disease prevention plans formulated.

612 Advanced Health Assessment  
Performance of health histories, complete physical/psychosocial assessments, and developmental assessments of clients from across the lifespan. A laboratory component is included.

614 Advanced Pathophysiology I  
General pathophysiological responses to selected body systems to disease processes are presented from both biological and behavioral perspectives. Emphasis on normal cellular function, developmental changes and common physiological symptoms.

616 Advanced Pathophysiology II  
Builds on the context from NURS 614 with emphasis on normal cellular function, developmental changes and common physiological symptoms. Synergistic clinical manifestations and total body-mind responses to system alterations. Prereq: NURS 614.

618 Family Nursing Theory and Health Promotion  
Theoretical foundations and research based interventions related to psychosocial effects of illness, health behaviors, health promotion and disease prevention. Critically examines patterns of health behaviors, influence of psychosocial issues, risk assessment, lifestyles, and developmental stages.

620 Advanced Practice Roles  
Focus on the advanced practice nurse’s role expectations. Includes an understanding of the profession, regulations and rules of advanced practice, scope of practice, legal ramifications of scope of practice, interdisciplinary, collaborative practice. Prereq: NURS 634P, 641P.

621 Integrative Health Practices  
Integrative therapies with a focus on selected systems of health and specific modalities widely used by health care consumers. Emphasis on assessing patients for use and developing a list of educational and provider resources.

623 The Nurse as Educator  
Major study in selected area with an emphasis in research. Prereq: NURS 632.

624 Advanced Transcultural Nursing  
Program planning to promote the health of diverse populations will be based on epidemiological data, theory and research. Students will select a specific age group or health problem within a population/cultural group to study in depth. Prereq: NURS 608.

630 Advanced Community Assessment  
Epidemiologic techniques, reporting, and research will be presented. Emphasis is placed on disease prevention and control. Health problems of national and international significance will be examined and strategies for solutions and/or management will be proposed. Prereq: STAT 330.

631 Advanced Pharmacology I  
Information relative to therapeutic management guidelines for treatment of selected disease processes. Drug information by classification and basic principles of pharmacodynamics and pharmacokinetics, clinical uses, mechanisms of action, contraindications, adverse reactions, and client education implications.

632 Advanced Pharmacology II  
Continuation of information relative to therapeutic management guidelines for treatment of selected disease processes. Drug information by classification and basic principles of pharmacodynamics and pharmacokinetics, clinical uses, mechanisms of action, contraindications, adverse reactions, and client education implications. Prereq: NURS 631.

633 Family Primary Care I: Assessment and Management  
Clinical decision making skills are fostered in the diagnosis, management, monitoring and evaluation of common acute, emergent, and chronic health conditions. Selected case studies of clients will be examined in relation to problems, diagnoses, plans, and evaluations. Prereq: NURS 612P, 616.

634 Family Primary Care II: Assessment and Management  
Clinical decision making skills are fostered in the diagnosis, management, monitoring and evaluation of common acute, emergent, and chronic health conditions. Selected case studies of clients will be examined in relation to problems, diagnoses, plans, and evaluations. Prereq: NURS 633.

640 Adult Nursing I  
Evaluation and synthesis of advanced pathophysiology concepts applied to nursing and health related theories, and research related to client outcomes. Health and illness phenomena, symptom management, and nursing interventions will be reviewed. Prereq: NURS 612, 616.

640P Advanced Nursing Practicum I  
Clinical opportunities for application of clinical experiences in a primary care setting. Theory, research and didactic learning experiences are incorporated in the students practice and supervised by a health care provider with expertise in the area of specialization. Prereq: NURS 640.

641 Adult Nursing II  
Continuation of Adult Nursing I. Emphasis on clinical decision-making, teaching/learning theory and formulation of researchable questions for advanced nursing practice as an adult CNS. Prereq: NURS 640.

641P Advanced Nursing Practicum II  
An extended practicum time allowing the student a chance to more fully integrate skills and knowledge learned through the graduate program. Emphasis will continue on consultation, program planning, education, health promotion, and prevention of disease/illness. Prereq: NURS 641.

701 [601] Theoretical Perspectives of the Discipline  
The course is designed to help the student analyze, critique and apply a variety of nursing theories, models and conceptual frameworks in advanced nursing practice.
702 [602] Ethics and Health Policy in Nursing  
Analyze interactions among common clinical, organizational, societal, and policy decisions from ethical and legal perspectives. Evaluates selected theories and models of decision making and health care.

706 [606] Health Care Delivery Systems, Financing and Informatics  
Analysis of health care system, financial management, use of informatics, and measurement of patient outcomes are the focus of this course. Advanced practice nurses play a leadership role while participating in system decisions including monitoring financial information, promoting quality improvement and managing and utilizing health care information.

710 Health Promotion and Disease Prevention  
Critically examines patterns of health behaviors, risk assessment, lifestyles, developmental stages, sociocultural, psychological, and spiritual contributions to well-being. Includes data-based assessment and management of preventive health services and common acute and chronic conditions. Prereq: Graduate standing.

712P Assessment Practicum  
In this course the student integrates health history, physical examination and laboratory evaluations in a plan for management of client needs. Prereq: NURS 612.

720 Advanced Practice Roles  

724 Curriculum Design in Nursing Education  
Presents curriculum philosophies and methods of program development and evaluation that prepare the educator for designing learner centered curricula that meet professional and national standards. Prereq: NURS 701. Co-req: NURS 704.

725 Strategies for Teaching and Learning in Nursing Education  
Exploration of theory and evidence based teaching strategies for nursing education. Strategies and methods for teaching nursing education in a variety of settings are studied. The use of different technological tools and methods of student assessment are evaluated. Prereq: NURS 724.

726 Evaluation and Assessment in Nursing Education  
Principles of assessment, measurement, and evaluation related to nursing education are analyzed in this course. Topics relevant to evaluation and the assessment of individual learning are examined. Processes of faculty and program evaluation are examined as well as the measurement of program outcomes. Prereq: NURS 725.

728P Nurse Educator Practicum I  
Students apply principles of teaching, learning and assessment of student learning in selected learning settings under the guidance of course faculty and a preceptor. Prereq: NURS 726.

729P Nurse Educator Practicum II  
Students examine elements of the nursing program and participate in a faculty role under the supervision of course faculty and a program faculty preceptor. The focus of this practicum is participation in programmatic development, evaluation and assessment. Prereq: NURS 728P.

730 Clinical Applications  
Student designs individualized study in an area of focus. Options include extension of a scholarly study, extended clinical practice, intensive study of specialized treatment modality and other appropriate foci. Prereq: NURS 634.

733P FPC: Residency I  
Student synthesizes skills acquired in previous didactic and clinical courses to provide diagnosis, treatment, and management of an increasingly varied group of clients. Prereq: NURS 633.

734P FPC: Residency II  
Student synthesizes skills acquired in previous didactic and clinical courses, in particular NURS 733P, to provide diagnosis, treatment, and management of an increasingly varied group of clients. Prereq: NURS 634, 733P.

735 Family Primary Care III: Assessment and Management  
Continuation of Family Primary Care I and II. Focus on health promotion, maintenance, restoration and disease prevention. Application of health-related theories, family dynamics, methods of human genetics, research protocols, ethics, cost effectiveness and legal ramifications for advanced nursing practice. Prereq: NURS 734.

735P Practicum IV: FNP Role Integration  
Application of skills and clinical experiences in primary care. Didactic learning is incorporated in the student’s practice, supervised by a health care provider who has documented expertise in the area of specialization. History, PE, and lab will be integrated into evaluation of clients. Prereq: NURS 733P.

736P Practicum V: FNP Role Integration  
Application of skills and clinical experiences in primary care. Didactic learning is incorporated in the student’s practice, supervised by a health care provider who has documented expertise in the area of specialization. History, PE, and lab will be integrated into evaluation of clients. Culminating in 1020 hours of clinical experience. Prereq: NURS 735P.
PEACE AND CONFLICT STUDIES (PS)

Littlefield

COURSE
201 Introduction to Peace and Conflict Studies 3
Interdisciplinary exploration of the roots of violence and non-violence, making use of socio-political, historical, psychological, biological, and spiritual perspectives.
PHARMACEUTICAL SCIENCES (PSCI)

Singh, Chair; Guo, Law, LeClerc-Mallik, Nelson, B., Nelson R., O’Rourke, Qian, Schnell, Sheng, Sun, Vetter, Wu

COURSES

368, 369 Pharmaceutics I, II 4,2
Quantitative and theoretical principles of science applied to the design, preparation, evaluation, use, and therapeutic limitations of various pharmaceutical dosage forms. Biological and physicochemical principles that govern the absorption, distribution, metabolism, and excretion of drug dosage forms in humans. Prereq: Admission to Pharm.D. program.

409/609 Isotope Tracer Techniques 3
Theory and techniques for the use of radioactive and stable isotopes in research.

410/610 Pharmaceutical Biotechnology 2
Current and future biotechnologies in drug discovery, design, and production. Diagnostic technologies for individualized patient therapies. Prereq: admission to PharmD program.

411/611 Pharmacodynamics and Applied Therapeutics I 3
Basic chemical and pharmacological principles applied to the study of therapeutic agents: pharmacologic and therapeutic properties of drugs that affect the autonomic nervous system. Prereq: BIOC 460, PHRM 340.

412/612 Pharmacodynamics and Applied Therapeutics II 3
Pharmacologic and therapeutic properties of chemotherapeutic agents, anti-infectives, and drugs that affect the endocrine system. Prereq: PHRM 341, PSCI 411, BIOC 461.

413/613 Pharmacodynamics and Applied Therapeutics III 3
The pharmacological properties of therapeutic agents used in the treatment of the autonomic nervous system and endocrine system. Prereq: PHRM 341, PSCI 411, BIOC 461.

414/614 Pharmacodynamics and Applied Therapeutics IV 3
Pharmacologic and therapeutic properties of drugs that affect the cardiovascular, respiratory, and renal systems. Prereq: PSCI 413.

415/615 Pharmacodynamics and Applied Therapeutics V 3
Pharmacologic and therapeutic properties of drugs that affect the gastrointestinal and genitourinary tracts, integumentary/connective tissues, and the central nervous system. Prereq: PSCI 411.

416/616 Pharmacodynamics and Applied Therapeutics VI 3
The pharmacological properties of therapeutic agents used in the treatment of central nervous system disorders. Prereq: PHRM 341, PSCI 411, BIOC 461.

443/643 Toxicology 2
Poisons, their mode of action, detoxification, and treatment. Prereq: PSCI 412.

470/670 Pharmaceutics III: Pharmacokinetics 3
Concepts and mathematical techniques for describing the time course of drugs in biological systems.

545 Clinical Toxicology 2
Toxic potential of various poisonous substances including mechanism of toxicity, toxic doses, clinical presentation, clinical and laboratory monitoring and their specific treatment.
# PHARMACY PRACTICE (PHRM)

Miller, Chair; Alfano, Biberdorf, Brown, R. Claren, Dewey, Drummond, Eukel, Fitz, Focken, Frenzel, Friesner, Halbur, Kelsch, Naughton, R. Nelson, Omvig, Ottne, Roden, Schmitz, Scott, Skoy, Strandberg, Sylvester, Werremeyer, Wilhelm

## COURSES

### 125 Medical Terminology for Health Professionals
A systematic study of building medical terms and understanding their relationship to human anatomy and physiology, pathology and medical treatment. Restricted to pre-CLS, pre-RC, pre-RS, pre-Nursing, pre-Pharmacy and Pharmacy majors only.

### 170 Common Medicines and Diseases
Consumer-oriented introduction to drugs, common dosage forms, usage of common classes of prescription, and over-the-counter drug products. Does not count toward a pharmacy major.

### 300 Principles of Clinical Pharmacology
Principles of pharmacology and therapeutics for nursing and other non-pharmacy health professions. Does not count toward a pharmacy major. Prereq: non-Pharmacy majors only.

### 340 Pathophysiology I
Comprehensive study of the normal and abnormal physiological processes and the mechanisms important to the understanding of pharmacology and drug therapy. Prereq: BIOL 220, 220L, 221, 221L.

### 341 Pathophysiology II
Normal and abnormal physiological processes and the mechanisms important to the understanding of pharmacology and drug therapy. Prereq: PHRM 340.

### 351 Pharmaceutical Care I
The first in a six course series, this course is designed to introduce pharmaceutical care and teach pharmacy students about health care systems, drug literature sources, and a medical record. Coreq: PHRM 351L.

### 351L Pharmaceutical Care Laboratory I
Coursework will assist Doctor of Pharmacy candidates to develop competence in recognizing, analyzing, and resolving drug related problems; providing accurate drug information and education; promoting public health and managing a patient oriented pharmacy practice. Coreq: PHRM 351.

### 352 Pharmaceutical Care II
Continuation of the pharmaceutical care series, students will learn to develop a pharmaceutical care plan, interpret lab values, and discuss health care systems. Prereq: PHRM 351, 351L. Coreq: PHRM 352L.

### 355 [352L] Introductory Pharmacy Practice Experience I: Introduction to Institutional Pharmacy Practice
An introduction to institutional and health systems pharmacy. This practice experience will allow students to further develop the knowledge and skills learned in the pharmaceutical care series in addition to developing an understanding of the role of a hospital pharmacist as a member of the health care team. Prereq: PHRM 351L, 352. Pass/Fail grading.

### 451 Pharmaceutical Care III
The third course in a six-semester sequence, this course focuses on prescription dispensing and toxicology. Sample cases and dispensing activities are incorporated into the Concept Pharmacy Lab. Prereq: PHRM 352, 352L.

### 452 Pharmaceutical Care IV
The fourth course in a series of six courses designed to provide pharmacy students with the knowledge, skills, and practical tools necessary to provide pharmacy service to patients, physicians, nurses, and other allied health care professionals. Lectures include OTC product recommendations, ambulatory testing devices, durable medical equipment. Prereq: PHRM 451, 451L. Coreq: PHRM 452L.

### 452L Pharmaceutical Care Laboratory II
The introductory pharmacy practice experiences involve actual practice experiences in community and institutional settings and permits students, under supervision and as permitted by practice regulations, to assume direct patient care. Prereq: PHRM 451, 451L. Coreq: PHRM 452.

### 455 [451L] Introductory Pharmacy Practice Experience II: Introduction to Community Based Patient Care
IPPE II is designed to be an introduction to community based pharmacy practice. This course consists of a 3 week, 120 hour, unpaid, supervised pharmacy practice experience in a community pharmacy setting and required reflections. Prereq: PHRM 452, 452L. Pass/Fail grading.

### 461 Intro to Pharmaceutical Industry
Introduction to understanding the working environment of the traditional pharmaceutical industry, concentrating on the major business and research divisions and the role that each division plays in the drug development process. Prereq: P2 student.

### 462 Stress Management for Health Professionals
This course for health care professionals will focus on healthy coping skills and self-care techniques for stress reduction and relaxation, not only in their professional lives, but also in providing patient care. Prereq: Pharmacy or Nursing major.

### 463 Current Issues in Hospital Pharmacy
This course will provide students with a working knowledge of issues and requirements faced by hospital pharmacists and the managerial techniques and practice standards utilized in meeting them. Prereq: P2 student.

### 464 Current Concepts in Pharmacy Practice
An evaluation of current issues in pharmacy practice and an introduction to design of a research proposal and completion of IRB requirements. Prereq: P2 student.

### 465/665 Cultural Competence Health Care
The purpose of this course is to provide education and skill building that will enable students to effectively utilize cultural and linguistic competence as a key tool to improve health outcomes for diverse populations. Prereq: Admission to professional program.

### 471 Clinical Pharmacokinetics
Discussion of multiple dosing, determination of dosage regimens, and factors influencing these; drug monitoring, clinical pharmacokinetics of various drug groups. Prereq: PSCI 470.
475 Pharmacy Practice Management 3
This course introduces students to management techniques applicable to the contemporary practice of pharmacy in community and institutional settings. Prereq: Admission to professional program.

480 Drug Literature Evaluation 3
Survey of clinical drug literature sources and evaluation of the original literature. Prereq: Admission to professional program.

485/685 Economic Outcomes Assessment 2
The use of pharmacoeconomic analysis and outcomes assessment as applied to health care. Prereq: PHRM 480 or Doctor of Nursing or MBA standing.

520/620 PTDI: Pediatrics-Geriatrics 2
Focused on providing pharmaceutical care for patients from prenatal period to geriatric years. Specific therapy common to the very young or very old. Prereq: Bachelor of Science in Pharmaceutical Sciences.

532/632 PTDI: Infectious Disease 3

534 PTDI: Rheumatology, Endocrine, and Reproduction 2
Pathophysiology, diagnostic evaluation, and therapeutic approach to major rheumatology disorders (bones, joints, and musculoskeletal disorders); endocrine disorders (diabetes, mellitus, thyroid, adrenal, and endocrine-based gynecological disorders) and contraceptive pharmacotherapy. Prereq: BS in Pharmaceutical Sciences.

535 PTDI: Neoplastic Diseases 3
In-depth study of the pathophysiology, pharmacotherapy and diagnostic evaluation of major neoplastic diseases. Prereq: BS in Pharmaceutical Sciences.

536/636 PTDI: Neurology and Psychiatry 3
Pathophysiology and pharmacotherapy of the major neurologic and psychiatric disorders. Prereq: BS Pharmaceutical Sciences.

537 PTDI: Renal Disease/Fluid and Electrolytes 3
This course focuses on the pathophysiology and pharmacotherapy of major renal diseases including fluid and electrolyte disorders. Emphasis is placed upon application of knowledge to patient care situations and the mastery of pharmacotherapy. Prereq: BS in Pharmaceutical Sciences.

538/638 PTDI: Cardiovascular and Pulmonary Diseases 4

551 Pharmaceutical Care V 1
The fifth in a six-semester sequence, this course focuses on skills necessary to provide advanced pharmacy services. Sample cases, telepharmacy, and supervision of dispensing functions are incorporated into the Concept Pharmacy. Prereq: BS in Pharmaceutical Sciences. Coreq: PHRM 551L.

551L Pharmaceutical Care Laboratory III 1
Coursework will assist Doctor of Pharmacy candidates to develop competence in recognizing, analyzing, and resolving drug related problems; providing accurate drug information and education; promoting public health and managing a patient oriented pharmacy practice. Prereq: BS in Pharmaceutical Sciences. Coreq: PHRM 551.

552 Pharmaceutical Care VI 1
The sixth in a six-semester sequence, this course focuses on skills necessary to provide advanced pharmacy services. Sample cases, service learning, and use of diagnostic tests will be incorporated into the Concept Pharmacy laboratory. Prereq: PHRM 551, 551L. Coreq: PHRM 552L.

552L Pharmaceutical Care Laboratory IV 1
Coursework will assist Doctor of Pharmacy candidates to develop competence in recognizing, analyzing, and resolving drug related problems; providing accurate drug information and education; promoting public health and managing a patient oriented pharmacy practice. Prereq: PHRM 551, 551L. Coreq: PHRM 552.

555 Introductory Pharmacy Practice Experience III 2
Introduction to patient care opportunities focused on population and public health opportunities for pharmacists. This course consists of 40 hours of supervised pharmacy practice experiences and required reflections. Prereq: PHRM 452L. Coreq or Prereq: PHRM 551L.

556 Introductory Pharmacy Practice Experience IV 2
This course builds on PHRM 555 with a continued and expanded emphasis on population and public health opportunities for pharmacists. This course consists of 40 hours of supervised pharmacy practice experiences and required reflections. Prereq: PHRM 551L, 555. Coreq or Prereq: PHRM 552L.

558 PTDI: Gastroenterology and Nutrition 2
Pharmacotherapy of disorders involving the gastrointestinal track and patients requiring specialized nutritional support. Prereq: BS in Pharmaceutical Sciences.

565 Pharmacy-Based Immunization 1
This course will provide knowledge of immunology, vaccine-preventable diseases, indications for vaccination, and implementation and maintenance of a pharmacy-based vaccination program. Prereq: BS in Pharmaceutical Sciences.

572 Pharmacy Law 2
Pharmaceutical jurisprudence, including state and federal laws and regulations concerned with the practice of pharmacy.

575/675 Pharmacy Management 3
Case studies of retail and hospital pharmacy management concerns, as well as the unique consideration of retail pharmacy and institutional factors of hospital pharmacy management.

578 Non-Prescription Medications 2
Introduction to over-the-counter medications including indications, contraindications, dosage forms, interactions, side effects, warnings, and precautions.

581, 582, 583 Clinical Clerkship I, II, III 6-18 each
Experiential clinical training for pharmacy practice. Prereq: P4 student.
700 Chronic Illness 3
This course will explore the effects of chronic health issues on individuals, families, and lay caregivers from a pharmacy and public health care perspective. Psychosocial, cultural, behavioral, and health care system factors influencing chronic health issues will be examined as well as the role pharmacists can play. Prereq: MPH students only.

705 Public Health as a Team Endeavor 1
Similarities in the practice and the art of business and public health are compared to seek out best practices, innovative leadership and management solutions in these complementary sectors. Prereq: MPH students only.

710 Health Care Systems 3
In this course, students will be introduced to health professions, health care systems, financing, health promotion, and behavioral issues. Prereq: MPH students only.

715 Quantitative Methods for Pharmaceutical Social and Administrative Sciences Research 3
The premise of this course is to provide the student with a basic understanding of management science techniques as they are applied in everyday pharmacoeconomics and pharmaceutical social/administrative sciences (PSAS)-related research. Prereq: STAT 725, PHRM 480.

716 Social and Administrative Sciences Research 3
The premise of this course is to provide the student with a basic understanding of how to conduct academic and professional research in the pharmaceutical social and administrative sciences (PS&AS). Prereq: PHRM 715 and either STAT 725 or PHRM 480.
### PHILOSOPHY (PHIL)
Cater (Emeritus), Cooley, Morris

PHYSICS (PHYS)

Kroll, Head; Bladow, Christensen, Croll, Denton, Hobbie, Ihle, Kryjevskai, Kryjevski, May, Swenson, Wagner

COURSES

110, 110L Introductory Astronomy, Lab (CCN) 3,1
Qualitative survey of the current understanding of the universe including planetary explorations, solar phenomena, stars, black holes, nebulas, galaxies. (ND:LABSC)

120, 120L Fundamentals of Physics, Lab (CCN) 3,1
Application of physics concepts and principles to the real world. Topics selected from mechanics, heat, optics, electricity, and magnetism. (ND:LABSC)

211, 211L College Physics I, Lab (CCN) 3,1
Beginning course for students without a calculus background. Includes basic principles of bodies at rest and in motion, fluids, vibrations, waves, sound and thermodynamics. Prereq: MATH 105. (ND:LABSC)

212, 212L College Physics II, Lab (CCN) 3,1
Second course for students without a calculus background. Includes electricity, magnetism, optics and modern physics. Prereq: PHYS 211, 211L. (ND:LABSC)

215 Research for Undergraduates 1-3
Special research studies in physics under the supervision of an instructor.

251, 251L University Physics I, Lab (CCN) 4,1
Newtonian mechanics of translational and rotational motion, work, energy, power, momentum, conservation of energy and momentum, periodic motion, waves, sound, heat, and thermodynamics. Prereq: MATH 165.

251R University Physics I Recitation 1
A recitation that complements PHYS 251 with theory and applications. Coreq: PHYS 251.

252, 252L University Physics II, Lab (CCN) 4,1
Electric charge, field, potential, and current; magnetic field; capacitance; resistance; inductance; RC, RL, LC and RLC circuits; EM waves; optics. Prereq: PHYS 251, 251L or ME 221 and ME 222. Coreq: MATH 166.

252R University Physics II Recitation 1
A recitation that complements PHYS 252 with emphasis on theory and applications. Prereq: PHYS 251. Coreq: PHYS 252.

350 Modern Physics 3
Breakdown of classical physics, special relativity, Bohr model, Schroedinger mechanics of simple systems, atomic structure, selected topics from nuclear and solid state physics. Prereq: PHYS 252 and MATH 265.

351, 352 Mechanics I, II 3 each
Rigid bodies and systems of particles analyzed by Lagrangians, Hamiltonians, and methods from vector calculus; gravitation; central field problems; wave motion; fluid dynamics. Prereq for 351: PHYS 252, MATH 266. For 352: PHYS 351.

360 Modern Physics II 3
Continuation of modern physics covering molecular structure, nuclear physics and solid state physics with an embedded modern physics laboratory with experiments such as atomic and molecular spectroscopy, electron diffraction, nuclear spectroscopy, photoelectric effect and computer simulations of experiments. Prereq: PHYS 350.

361 Electromagnetic Theory 3
Electrostatics, magnetostatics, dielectrics, electric circuits, time varying electric and magnetic fields, electromagnetic induction, and application of Maxwell’s equations. Prereq: PHYS 252, MATH 266.

370 Introduction to Computational Physics 3
Introduction to computational methods, with applications involving planetary motion, numerical integration, chaotic oscillations, percolation, random walks, diffusion limited aggregation, and Fourier transforms. 2 lectures, 2 one-hour laboratories. Prereq: PHYS 251, MATH 166, and CSCI 160 or ECE 173. Co-req: PHYS 252.

411/611 Optics for Scientists and Engineers 3

411L/611L Optics for Scientists and Engineers Laboratory 1
Required laboratory for PHYS/ECE 411/611. Ten optics experiments plus a major related optics project. Prereq: PHYS 252. Coreq: PHYS 411L/611L. Cross-listed with ECE.

413/613 Lasers for Scientists and Engineers 3
Lecture and laboratory introduction to lasers. Spontaneous and stimulated transitions, line-broadening, gain, gain saturation, optical resonators, Fabry-Perot interferometers, theory of laser oscillation, rate equations, transverse modes, coherence, and Gaussian beams. Prereq: PHYS 252.

415/615 Elements of Photonics 3
Analysis of optical systems using the matrix formulation, wave propagation in anisotropic media, electro-optic effect and laser modulation, physical origin of optical non-linearities, phase matching, optical second harmonic and parametric generation. Prereq: PHYS 252.

455/655 [755] Classical Mechanics 3
Lagrange’s equation, central force, rigid body motion, oscillations, Hamilton equations, canonical transformations, Hamilton-Jacobi theory. Prereq: PHYS 330 at MSUM. Co-req: PHYS 251, MATH 265 and MATH 266.

462/662 Heat and Thermodynamics 3

463/663 Statistical Mechanics 3

481/681 [401] Introduction to Solid State Physics 3
Crystal structure and binding, reciprocal lattices and x-ray diffraction, lattice vibrations, thermal properties, free electron model, band theory, magnetism, superconductivity. Prereq: PHYS 485.
485/685 Quantum Mechanics I
Operators, one-dimensional wells and barriers, Schroedinger equation, uncertainty, duality, Born interpretation, unstable states, bosons and fermions, central force problems, angular momentum, spin. Prereq: PHYS 350, MATH 266.

486/686 Quantum Mechanics II

489 Physics Projects
Capstone experience in physics.

752, 753 Mathematical Methods in Physics I, II 3 each
See MATH 782, 783 for description. Prereq for 753: PHYS 752.

758 Statistical Physics
3
Review of thermodynamics and statistical mechanics; Monte Carlo and molecular dynamics simulation; applications to phase transitions. Prereq: PHYS 463.

761 Electromagnetism
3
Review of Maxwell’s equations, radiation, collisions between charged particles, dynamics of relativistic particles and fields. Prereq: PHYS 361.

771, 772 Quantum Physics I, II 3 each
Schroedinger equation, wave packets, uncertainty, angular momentum, spin, second quantization, harmonic oscillator, resistance mechanisms. Prereq for 771: PHYS 486. For 772: PHYS 771.

781 Solid State Physics
3
Crystal structure and binding, reciprocal lattices and x-ray diffraction, lattice vibrations, thermal properties, free electron model, band theory, magnetism, superconductivity. Prereq: PHYS 485/685.

782 Condensed Matter Physics
3
An introduction to soft condensed matter, focusing on colloids, polymers, liquid crystals, surfactants, and biological systems. Topics will include characterization of soft materials, interparticle interactions, structure, equilibrium phase behavior, non-equilibrium properties, and practical applications. Prereq: PHYS 463/663.
## PLANT PATHOLOGY (PPTH)

Rasmussen, Chair; Adhikari, Brueggeman, del Rio, Goswami, Gudmestad, Kangas, Kinzer, Meinhardt, Nelson, Secor, Zhong

**324 Introductory Plant Pathology**

Etiology, symptomology and control of representative plant diseases and demonstrations. 2 lectures, 1 laboratory. F

**453/653 Microscopy**

Principles, advantages, and limitations of light and electron microscopic techniques, including sample preparation, data acquisition, interpretation, and photographic techniques. 2 lectures, 1 laboratory. S (odd years)

**454/654 Diseases of Field and Forage Crops**

Etiology, symptomology, control, and importance of field and forage crop diseases. 2 lectures, 1 laboratory. Prereq: PPTH 324. S (odd years)

**455/655 Plant Disease Management**

Diagnosis and control of horticultural crop diseases. 2 lectures, 1 laboratory. Prereq: PPTH 324. S (odd years)

**456/656 Forest and Shade Tree Pathology (CCN)**

Biotic and abiotic sources of tree decline are included, as are some pathogens of forest products. Recognition and treatment techniques will be covered. Emphasis of field diagnostic skills. Prereq: PPTH 324. S (odd years)

**460/660 Fungal Biology**

Fungal ecology, morphology, genetics, physiology, taxonomy, and relevance to humans. 2 lectures, 1 laboratory. Prereq: BIOL 150, PPTH 324. F (even years)

**751 Physiology of Plant Disease**

Infection, penetration, recognition, nutrient transfer, toxins, photosynthesis, and physiological materials. Use of tools, equipment, and supplies used in the industry and application of basic design styles, holiday designs, and displays. 1 lecture, 1 two-hour laboratory. S (odd years)

**754 Plant Disease Epidemiology**

Temporal and spatial dynamics of diseases and causative pathogens in plant populations. 2 lectures, 1 laboratory. Prereq: PPTH 324. F (even years)

**756 Techniques in Electron Microscopy**

Operation of transmission and scanning electron microscopes and ancillary equipment. Techniques include fixation, dehydration, critical point drying, embedding, ultra thin sectioning, and metallic sample coating. 1 lecture, 2 laboratories. F (odd years)

**758 Bacterial, Nematode, and Viral Diseases of Plants**

Biology, epidemiology, and management of plant diseases caused by bacteria, nematodes and viruses. Prereq: PPTH 324. F (odd years)

**759 Host-Parasite Genetics**

Host-parasite genetics including genetics of plant and pathogens and gene-for-gene relationships. 3 lectures. S (even years)

**760 Advanced Mycology**

Biology and classification of fungi. Emphasis on identification, growth and development, physiology, and etiology of fungi. 2 lectures, 2 laboratories. Prereq: PPTH 460. F (odd years)

**761 Advanced Plant Pathology**

Analysis of advanced and integrated concepts in host-parasite relationships, disease control, mechanisms of resistance, biotechnology, and professionalism. 3 lectures. Prereq: PPTH 324. F (even years)
PLANT SCIENCES (PLSC)

COURSES

110 World Food Crops (CCN) 3
Scientific principles of crop growth, worldwide production, management alternatives, and processing for domestic and international consumption. 2 lectures, 1 discussion, 1 tutorial laboratory. F, S (ND:SCI)

111 Genetics and You (CCN) 2
Basic concepts in genetics with emphasis on current human genetics. 2 lectures. S (ND:SCI)

150 Introduction to Horticulture Therapy 3
Horticultural therapy involves the use of plants and gardening activities to facilitate mental and physical rehabilitation. Students will become familiar with facilitation techniques, programs, clients, staff, budgets, facilities, equipment, and the various populations that horticulture therapists serve. 2 lectures and 2 lab hours per week. S

177 Floral Design (CCN) 2
History of floral design, care, handling, and identification of fresh cut flowers and dried materials. Use of tools, equipment, and supplies used in the industry and application of basic design styles, holiday designs, and displays. 1 lecture, 1 two-hour laboratory. S

210 Horticulture Science (CCN) 3
Principles of plant classification, structure, function, growth, propagation, culture, and use of horticultural crops. Covers vegetable and fruit production in the home garden, growing flowers and planting flower beds, and landscaping principles and materials. 3 lectures. F (ND:LABSC)

211 Horticulture Science Laboratory (CCN) 1
Exercises in plant identification, propagation, nutrition, gardening, greenhouses, lawn care, landscape design, interior plants, pruning, and culture of horticultural crops. 1 two-hour laboratory. F (ND:LABSC)

215 Weed Identification (CCN) 1
Identification of weed seeds and plants from seedling to mature stages. Emphasis on life cycles, common distribution, and family groupings. 1 one and one half-hour laboratory plus time by arrangement. F

219 Introduction to Prairie and Community Forestry (CCN) 2
Urban and traditional forestry as applied to the Great Plains region, as well as global forests. History, opportunities, and basic interactions of forestry with wildlife, parks and recreation, horticulture, and the ecology of the planet. 2 lectures. F (odd years)

225 Principles of Crop Production (CCN) 3
Principles of field crop production with emphasis on relationships of crops to their climate and production considerations as a means of managing resources and environmental factors. 2 lectures, 1 two-hour laboratory. Prereq: PLSC 110. S

307 History and Evolution of Wine in America 1
Introduction to wines and wine industries from a historical perspective. Include an overview of cultivar selection, cultivation, harvesting, expressing, fermenting, and processing wines for unique characteristics. Wine tasting is needed to link sensory perceptions to wine characteristics. 1 lecture. Students must be at least 21 years old. F

315, 315L Genetics, Lab 3,1
Study of the basis of heredity with emphasis on structure and function of DNA and Mendelian genetics. 3 lectures, 1 two-hour laboratory by separate registration. Cross-listed with BIOL, BOT, and ZOO. F, S

320 Principles of Forage Production 3
Introduction to several forage crops and their management, forage quality characteristics, use of legumes in rotations, and preservation of forages. 3 lectures, 1 one-hour recitation. Prereq: PLSC 110. F

323 Principles of Weed Science (CCN) 3
Introduction to biological, chemical, cultural, and mechanical weed control; characteristics of weeds and their identification; pesticides application and dissipation. 2 lectures, 1 discussion, 1 tutorial laboratory. Recommended prereq: Junior standing. S

335 Seed Technology and Production 2
Techniques involved in production, harvest, and processing of seed. Special attention to maintenance of genetic and mechanical quality during growth, harvesting, and processing. 3 lectures, 2 two-hour laboratories. Prereq: PLSC 110. S/2.

340 Grain Grading 2
Description and interpretation of the Grain Standards Act and instruction in grading of grain. 3 lectures, 2 two-hour laboratories. Recommended Prereq: PLSC 225. S/2

341 Landscape Bidding and Contracting 2
This course presents an overview of the landscaping industry from a business perspective. Students will learn about employee and customer relations, business law, money management, bidding, installation, and maintenance. Two lecture hours per week. S

350 Sugarbeet Production 2
History, growth, and development; soil and fertility management; weed, insect, and disease control; cultivars; harvesting, storage, and processing of sugarbeets. Prereq: PLSC 110 or 210. F/2

355 Woody Landscape Plants 3
Nomenclature, identification, and landscape characteristics of native and introduced deciduous and evergreen woody plants commonly used in the Northern Plains. Field trips. 1 lecture, 2 two-hour laboratories. Recommended Coreq: BIOL 150 or 151, PLSC 210. F

<td>3</td>
<td>Integrative capstone focus on the scientific, professional, and ethical issues associated with crop production and management practices using decision case studies. 3 lectures. Recommended Prereq: Senior standing. S</td>
</tr>
<tr>
<td>457</td>
<td>Horticulture and Turfgrass Systems</td>
<td>3</td>
<td>A problem-solving approach to many facets of horticulture and turfgrass management that addresses important issues such as the environment, ecology, biotechnology, pesticides, employment, and business management. An emphasis will be placed on literature reviews, problem solving and communications. 3 lectures. Prereq: Senior standing. S</td>
</tr>
<tr>
<td>465/665</td>
<td>Advanced Landscape Plants</td>
<td>2</td>
<td>Nomenclature, identification, and landscape characteristics of native and introduced deciduous and evergreen woody plants grown in Upper Midwest. Emphasis on cultivar introduction, trademarks/patents, adaptation, and diversity within species. Field trips required. 2 two-hour laboratories. Prereq: PLSC 355. F (even years)</td>
</tr>
<tr>
<td>468</td>
<td>Golf Course Irrigation I</td>
<td>2</td>
<td>Students will work between the classroom and regional golf courses to learn the basic issues of water management, irrigation system design, and maintenance of golf course and other sports facilities. 1 lecture plus hours arranged. Prereq: Senior standing in program. Cross-listed with ASM. F</td>
</tr>
<tr>
<td>469</td>
<td>Golf Course Irrigation II</td>
<td>1</td>
<td>Irrigation system installation, winterization, start-up, troubleshooting, renovation, and drainage. 1 lecture. Prereq: PLSC 468. Cross-listed with ASM. S</td>
</tr>
<tr>
<td>480/680</td>
<td>Advanced Turfgrass Topics</td>
<td>3</td>
<td>Development of the turfgrass industry and the scientific basis of strategic turfgrass management, including relationships between turfgrasses, the environment, management and methodologies in turfgrass research. Prereq: PLSC 375. S (even years)</td>
</tr>
<tr>
<td>484/684</td>
<td>Plant Tissue Culture and Micropropagation</td>
<td>2</td>
<td>Principles, techniques, and applications of plant tissue, organ, cell, protoplast, and embryo culture. Emphasis on micropropagation. 1 lecture, 1 two-hour laboratory. Prereq: PLSC 315. F</td>

<td>Arboriculture Science</td>
<td>3</td>
<td>Tree, shrub, and vine care based on the physiology of shoot and root growth and limitations of the environment. Includes plant and site selection, transplanting, staking, fertilizing, pruning, mulching, and related subjects. 3 lectures. Recommended Prereq: PLSC 355. S (even years)</td>
</tr>
<tr>
<td>486/686</td>
<td>Eco-Physiology of Horticultural Crops</td>
<td>2</td>
<td>Influence of environmental factors, stress and hardiness on plant growth and development, and their relationship to production practices. 2 lectures. Prereq: PLSC 210 or 225. S (odd years)</td>
</tr>
<tr>
<td>710</td>
<td>Professional Development I</td>
<td>1</td>
<td>This course introduces students to professional society structure and function, mechanics of data presentation, and written discussion. Assignments will emphasize skills needed to complete a research proposal and prepare a research presentation. F</td>
</tr>
<tr>
<td>711</td>
<td>Professional Development II</td>
<td>1</td>
<td>This course emphasizes manuscript preparation, manuscript review, poster development, and grantsmanship. Consideration of professional ethics underlies all topics. Prereq: PLSC 724 or 710.S</td>
</tr>
<tr>
<td>718 [646]</td>
<td>Genetics and Plant Improvement</td>
<td>3</td>
<td>Genetic principles and their application to plant improvement. Crop evolution, chromosome structure, and population dynamics related to crop improvement methodology. Genetically modified plants, their impact on breeding technique, and the release of improved varieties. 3 one-hour lectures. Recommended Prereq: PLSC 444. F</td>
</tr>
<tr>
<td>721</td>
<td>Genomics Techniques</td>
<td>2</td>
<td>Principles, techniques, and applications of the large-scale analysis of DNA organization and sequence, RNA expression, protein sequence, and structure. Prereq: PLSC 411/611. Cross-listed with BIOC. S</td>
</tr>
<tr>
<td>724</td>
<td>Field Design I</td>
<td>3</td>
<td>Application of various field designs, factorial and split-plot arrangements, orthogonal and non-orthogonal comparisons, models, components of variance, correlation, and regression to biological problems. 3 lectures. Recommended Prereq: STAT 350 or 725. F</td>
</tr>
<tr>
<td>727</td>
<td>Crop Breeding Techniques</td>
<td>1</td>
<td>Hybridization of North Dakota crops. Laboratory by arrangement. Prereq: PLSC 718, 724. S (odd years)</td>
</tr>

POLITICAL SCIENCE (POLS)

Thompson, Chair; Ambrosio, Bauroth, Raile, Wood

COURSES

110 Introduction to Political Science (CCN) 3
Problems of political science as a discipline, political systems, and political behavior. Includes causes and consequences of individual and group political behavior. (ND:SS)

115 American Government (CCN) 3
Principles of American government, political behavior, and institutions. (ND:SS)

120 Terrorism (CCN) 3
Examination of problems of terrorism. Includes its historical perspectives; terrorist motivations, organizations, tactics, strategies; role of media; government responses; future trends, prospects. (ND:SS)

210 Current Politics (CCN) 3
Study of current national and state political issues.

215 Problems and Policies in American Government (CCN) 3
Study of the functioning of American government focusing on the policy process. (ND:SS)

216 Campaigns and Elections 3
Examination of political campaigns and elections with special emphasis for voting behavior, history and theory of political advertising, and effectiveness/ethics of negative advertising. Prereq: POLS 115.

220 International Politics (CCN) 3
Concepts, theories, and issues in international relations. (ND:SS)

225 Comparative Politics (CCN) 3
Comparative analysis of contemporary political systems, practices, institutions, and actors. (ND:SS)

230 Judicial Process (CCN) 3
Role of lawyers, judges, and courts in the political system. Special emphasis on judicial decision-making and the ideas behind law.

240 Political Ideologies (CCN) 3
Study of ideas, belief systems, and basic principles of ideologies.

325 Applied Research Methods 4
This course provides an overview of the scientific model, the philosophy and goals of science, and a detailed study of qualitative and quantitative methodologies. Lecture, laboratory. Cross-listed with COMM and CJ.

350 Gender Issues and the Law 3
This course examines gender differentiations reflected in the U.S. law from both the historical and contemporary perspectives and the impact of that differentiation, particularly on women, in the areas of employment, education and family law.

351 Women and Politics 3
Study of women leaders; their roles and perspectives within a national and international framework.

360 Principles of Public Administration 3
Empirical study of public administrators in their diverse roles and functions.

420/620 Political Behavior — Executive-Legislative Process 3
Behavioral study of executives and legislators with emphasis on examination of empirical data.

421/621 Political Behavior — Political Parties 3
Behavioral study of political leaders with emphasis on examination of empirical data.

422/622 State and Local Politics 3
This course is designed to guide students through a discovery of American politics at the sub-national level. From a comparative perspective, students examine differences between states in terms of their political structures, behavior, and environments. Prereq: Junior standing.

430/630 Constitutional Law — Civil Liberties 3
Examination of First Amendment rights including freedom of speech, press, religion, association, and assembly. Due process and equal protection concerns are also addressed.

431/631 Constitutional Law — Criminal Justice 3
Study of Fourth, Fifth, and Sixth Amendment rights. Emphasis on the law of arrest, search and seizure, self-incrimination, and right to counsel.

442/642 Global Policy Issues 3
Analysis of the impact of planetary limits to growth, increasing globalization of the world economy, and changing control over resource systems on global politics.

444/644 International Law 3
Examines the history and foundation of the international legal system, including custom, treaties, jurisdiction, and the relationship between international and municipal law. Prereq: POLS 220.

445/645 Ethnic Conflicts 3
Explores numerous topics and cases related to ethnic conflicts, including the nature of ethnic identity, the causes of ethnic conflicts, and ethnic conflict prevention/resolution.

450/650 Politics of the Developing Countries 3
Comparative examination of the government and politics of developing countries. Attention is given to special economic and cultural circumstances facing the political systems of these countries.

451/651 Politics of the Industrialized Countries 3
Comparative study of government and politics in the industrialized countries including the analysis of legislative and executive branches, parties, bureaucracies, constitutions, policies, and voting behavior.

452/652 Comparative Political Economy 3
Comparative study of the relationship between politics and the economy in industrialized and developing countries. Topics include elections, trade, development, investment, redistribution, and the political business cycle.
453/653 Environmental Policy/Politics 3
Course is designed to provide students with both a general and advanced understanding of environmental issues. Will examine philosophical underpinnings informing environmental policy making as well as analyze various substantive environmental issues in US.

489 Senior Seminar 3
Capstone experience. Emphasis on integrative skills needed to interrelate the concepts of the discipline.

720 Theoretical Perspectives to the Study of Political Science 3
Designed to guide beginning graduate students through the dominant paradigms and emerging subject areas of political science scholarship.
PSYCHOLOGY (PSYC)

Rokke, Chair; Blakeslee, Coleman, Council, Donohue, Friesen, K. Gordon, R. Gordon, W. Gordon, Hilmert, Hinsz, Langley, McCaul, McCourt, Nawrot, O'Neil, Ostafin, Rainville, Robinson, Routledge, Teder-Sälejärvi, Wittrock

COURSES

111 Introduction to Psychology (CCN) 3
Survey of the scientific study of behavior and mental processes. (ND:SS)

210 Human Sexuality 3
Survey of biological, developmental, and psychological aspects of human sexuality. Prereq: PSYC 111.

211 Introduction to Behavior Modification 3
Basic principles and procedures governing acquisition, maintenance, and change of behavior, emphasizing human applications. Laboratory involves designing, implementing, and reporting an individual project. Prereq: PSYC 111.

212 Psychological Aspects of Drug Use and Abuse 3
Examination of legal and illegal psychoactive drugs. Emphasis on psychological, physiological, and behavioral effects of these drugs and problems of drug abuse. Prereq: PSYC 111.

214 Social Interaction 3
See Sociology for description. (ND:SS)

216 Cultural Psychology 3
Examines the different ways in which cultural variables affect human cognition, emotion, and behavior. This course uses the lens of culture to consider topics such as cognition and emotion, personality, psychopathology, the self, prejudice and intergroup relations, and cultural conflict (e.g., terrorism, genocide). Prereq: PSYC 111.

221 Psychology in Business and Industry 3
Applications of psychology to work/business. Topics include personnel selection/placement, job satisfaction and morale, motivation, leadership, group performance, and organizational theory/development. Prereq: PSYC 111. (ND:SS)

250 Developmental Psychology (CCN) 3
Survey of the psychology of human life span development. Coverage also includes heredity and prenatal development. Prereq: PSYC 111. (ND:SS)

260 Introduction to Neuroscience 3
An introduction to behavioral neuroscience with an emphasis on what we know about human brain function and what it means for studying and understanding complex human behavior.

270 Abnormal Psychology (CCN) 3
Survey of the classification, symptoms, and etiology of psychological disorders. Attention given to diagnosis, etiology, and treatment according to prominent theoretical perspectives. Focus on empirical basis for understanding these problems. Prereq: PSYC 111. (ND:SS)

280 Introduction to Health Psychology (CCN) 3
Describes the interaction of psychology and health, including the ways in which thoughts, emotions, and behavior influence one's health. Prereq: PSYC 111.

322 Thinking and Making Decisions 3
Covers the functional uses of critical thinking. Focuses on uses in problem solving and decision-making. Applications are directed at both personal and professional concerns. Prereq: PSYC 111.

350 Research Methods I 3
Introduction to scientific method, ethics, principles of observation, measurement, survey research, and correlation. Laboratory training on conducting research, analyzing data, and preparing research reports. Prereq: PSYC 111, MATH 103. Coreq: STAT 330.

351 Research Methods II 3
Experimental and quasi-experimental designs in psychological research. Laboratory includes performance of experiments, data analysis, and preparation of research reports. Prereq: PSYC 350.

360 Animal Behavior 3
See Biological Sciences (Zoology) for description.

370 Forensic Psychology 3
Broad overview of the interactions of psychology and the law, including current areas of practice, assessment, and forensic techniques. Special focus upon psychology as applied to and affected by family, civil, and criminal law. Prereq: PSYC 270.

380 Clinical Psychology 3
Introduction to the science and practice of clinical psychology. Includes a survey of the assumptions on which clinical methods are based and an overview of clinical assessment and treatment techniques. Prereq: PSYC 270.

381 Understanding Suicide and its Impact 3
Overview of current understanding of the dynamics of suicide and its impact upon people left behind following the death.

382 Self-Injury: Recognition and Treatment 3
Overview of the current understanding of the dynamics of self injurious behavior, of the prevalence of various types of harmful behavior, and of the populations most at risk.

385 Psychology on Film 3
Many important issues and topics in psychology have been portrayed in feature films and documentaries. Movies and associated readings present significant concepts, persons, and historical events in psychology. Primary focus is on clinical psychology. Prereq: PSYC 111.

440/640 Experimental Methods 3
Intermediate experimental design and data analysis with emphasis on the analysis of variance. Laboratory includes data analysis on the computer. Prereq: PSYC 351.

453/653 Organizational Psychology 3
Survey of topics related to application of psychology to organizational settings. Emphasis on theoretical bases of the individual (motivation, satisfaction) and social (leadership, work group) factors involved in work behavior. Coreq: PSYC 351.
460/660 Sensation and Perception 3
Explores physical, anatomical, and physiological bases of sensation and perception and their psychophysical measurement. Laboratory experiments complement lectures and demonstrate various experimental techniques and sensory phenomena. 2 lectures, equivalent of 2-hour laboratory. Prereq: PSYC 351 or PSYC 260.

461/661 Memory and Knowledge 3
Examination of current behavioral and neuropsychological research and theory in the area of memory and knowledge representation. Various cognitive phenomena are demonstrated and relevant design issues are highlighted via laboratory experiments. Prereq: PSYC 351.

463/663 Experimental Development Psychology 3
Examination of historical and contemporary theory and research in social and cognitive development. Topics include attachment, adolescent risk-taking, theories of intelligence, and meta-cognition. Laboratory experiences illustrate methods of investigating psychological development. Prereq: PSYC 351.

464/664 Attention and Thinking 3
Examines current behavioral and neuropsychological research and theory in the area of attention and thought processes. Laboratory experiments will demonstrate various attentional phenomena and highlight relevant design issues. Prereq: PSYC 351.

465/665 Psychobiology 3
Fundamental anatomy (structure) and physiology (function) of the nervous system. Physiological bases of behavior. 2 lectures, equivalent of 2-hour laboratory. Prereq: PSYC 351 or PSYC 260.

468/668 Personality 3
Study of complex human behavior with attention to historically significant theories and current empirical issues. Laboratory experiences illustrate methods of investigating individual differences. Prereq: PSYC 351.

470/670 Experimental Social Psychology 3
Examination of historical and contemporary theory and research in social psychology. Study of the relationship between the individual and social context. 2 lectures, equivalent of 2-hour laboratory. Prereq: PSYC 351.

471/671 The Psychology of Aging 3
Survey of cognitive and psychosocial development in adulthood and old age, including psychopathologies of old age. Contemporary research findings are emphasized. Prereq: PSYC 111, Junior standing.

472/672 Advanced Psychopathology 3
In-depth coverage of recent research on diagnosis, etiology, and maintenance of behavior disorders emphasizing the interaction of biological, behavioral, and social factors. Prereq: PSYC 270, Junior standing.

473/673 Child Psychopathology and Therapy 3
Overview of the etiology and treatment of behavior disorders in children and adolescents. Emphasis on recent research findings and behavioral intervention strategies. Prereq: PSYC 270 or 351.

474/674 Behavior Analysis in Developmental Disabilities 3
Overview of developmental disabilities with emphasis on mental retardation. Application of behavior analysis procedures for skills training, functional assessment and treatment of problem behaviors and staff management. Students participate in assessment and treatment projects. Prereq: PSYC 211.

480/680 History and Systems 3
Historical development of scientific psychology. Emphasis on the development of various systems of psychology in America. Capstone experience. Prereq: PSYC 351 or Senior standing.

481/681 Health Psychology 3
Application of behavioral procedures to the prevention, treatment, and rehabilitation of medical disorders. Emphasis on contemporary research findings. Prereq: PSYC 350 or PSYC 260.

486/686 Neuropsychology 3
Introduction to human neuropsychology with emphasis on the neural basis of motor, perceptual, cognitive, emotive, and language behavior. Topics include normal and pathological conditions from clinical and experimental perspectives. Prereq: PSYC 351 or PSYC 260.

489 Honor Thesis 2-6
Capstone experience option.

718 Visual Neuroscience 3
A detailed survey of current ideas, methods, and perspectives in visual neuroscience.

720 Cognitive Neuroscience 3
Examines prominent theories, research approaches, and experimental findings in the field of cognitive neuroscience. Included topics are methodological issues and cognitive neuroscience approaches to research questions in a broad range of areas within cognitive psychology.

727 Advanced Topics in Visual Perception 3

731 Fundamental Processes in Cognition 3
Explores the underlying architecture of the human cognitive system—how it takes in, processes, stores, and retrieves information.

732 Applied Cognitive Processes 3
Explores the ways cognitive principles operate in ecologically valid (real-world) situations.

733 Social Judgment 3
Explores issues and topics related to judgment and decision-making in social contexts as well as the influence of social factors on judgment processes.

735 Neural Networks 3
See Computer Science for description.

750 Introduction to Clinical Issues and Practices 1
Instruction and practice in clinical interview techniques and discussion of clinical issues including ethics, laws, and crisis intervention.

755 Behavior Therapy and Assessment 4
Introduction to the nature and characteristics of behavioral assessment and behavior therapy. Laboratory includes behavioral interviewing and training in assessment and treatment procedures.
756 Behavior Therapy and Assessment II  
In-depth coverage of behavioral assessment and treatment approaches, emphasis on their empirical status. Laboratory includes instruction with practice in implementation of these procedures. Prereq: PSYC 755.

758 Diversity in Clinical Psychology  
This course emphasizes issues of cultural and individual diversity within the context of scientific research. In addition, the course will train students in culturally competent techniques for the assessment, diagnosis, and treatment of mental disorders in clinical practice.

760 Research Methods in Visual and Cognitive Neuroscience  
This course provides both theoretical and practical training in methodological skills essential for the conduct of high-quality research in the field of visual and cognitive neuroscience. May be repeated with change in topic.

761 Applied Research Methods  
Experimental methodology and design skills useful in clinical research including N=1 designs, experimental, and quasi-experimental designs. Laboratory includes reports on recent research articles, presentations on specific content areas, and development of a detailed research proposal.

762 Advanced Research Methods and Analysis  
Advanced experimental design and data analysis. Emphasis on regression models as applied to psychological data and designs. Includes analysis on the computer. Lecture, laboratory. Prereq: PSYC 640.

764 Advanced Topics in Attention  
Examines prominent theories of attention and empirical evidence in support of those theories. Included topics focus on the role of attention in thought, perception, and action.

770 Advanced Psychological Assessment  
Comprehensive approach to assessment in clinical psychology. Includes administration, interpretation, and report writing. Primary focus on Wechsler intelligence scales and personality testing by objective and projective methods.

771 Social/Health Psychology Research  
Covers research designs frequently utilized in conducting social psychology related research with particular emphasis on health psychology.

782 Emotions  
Focused on basic questions about defining emotions, differences in experiencing or expressing emotions, and relatedness to cognition. Includes emotions and psychotherapy, emotions in a social context, and the impact of emotional expressions versus repression on health.

787 Advanced Social Psychology and Health  
Covers theory and research from social psychology that has implications for health behavior. Emphasizes theories of attitudes and behavior applied to such topics as regimen adherence, self-protective health behavior, and disease prevention. Prereq: PSYC 670, 681.
RADIOLOGIC SCIENCES (RS)

P. Olson

COURSE
111 Introduction to Radiologic Sciences

Lectures, discussions, and field trips focus on professional traits, ethical behavior of the health care provider, major curriculum requirements, and scope of practice.
## RANGE SCIENCE (RNG) [ARSC]

Biondini, DeKeyser, Ganguli, Grygiel, Kirby, Sedivec

Introduction to the ways religious concerns are expressed, to religious values as a basis for human action, and to a spectrum of ethical styles. (ND:HUM)

See Philosophy for description.

Study of the religious, political, and social history of ancient Israel as reflected in the Hebrew Bible.

Psychological and ethical issues involved in growth to religious maturity. Attention to basic human activities such as love, faith, marriage, sexuality, death, and grief.

Introduction to the basic issues in American history including the study of Puritans, immigration, church and state, revivalism, civil and military religion, apocalypticism, and new age religion. Cross-listed with HIST.

Study of how contemporary cultural developments require the rethinking of historic religious perspectives in such topics as natural science, political thought, psychology, history, and gender.

Major developments in the Christian religion including scriptures, persecution, monasticism, papacy, Reformation, science and religion, and the ecumenical movement. Cross-listed with HIST.

See Sociology for description.

See Anthropology for description.
RESPIRATORY CARE (RC)

P. Olson

COURSE

111 Introduction to Respiratory Care 1

Introduction to the profession of respiratory care. Lectures, discussions, and field trips focus on professional traits and communication, ethical behavior of the health care provider, major curriculum requirements, and scope of practice.
SOCIOLGY (SOC)
Klenow, Chair; Biga, Corwin, Dingel, Gorchem, Klenow, Rathge, Smith, Weber, Youngs

COURSES

110 Introduction to Sociology (CCN) 3
Introductory analysis of the nature of society, the interrelationship of its component groups, and the process whereby society persists and changes. (ND:SS)

115 Social Problems (CCN) 3
Sociological analysis of major social problems.

116 Global Social Problems 3
Sociological analysis of global social problems.

150 Cornerstone in Sociology 3
This course provides an integrative in-depth survey of the discipline of sociology for sociology majors only. The course will focus on the core areas of the discipline as well as subdiscipline areas. Prereq: SOC 110.

202 Minorities and Race Relations 3
Analysis of lifestyles and characteristics of racial, cultural, and ethnic groups in society. Review of processes of discrimination, prejudice, and related dehumanizing biases toward minority groups including women. Prereq: SOC 110. (ND:SS)

214 Social Interaction 3
Examination of issues relevant to the study of individual behavior (e.g., self-concept, attitudes, social perception) in a social context. Cross-listed with PSYC. (ND:SS)

233 Sociology of Organizations and Work 3
This course examines major types of organizations, their goals, and characteristics. The course focuses on social issues as they relate to organizations and work.

340 Social Research Methods 3
Overview of the scientific method, the philosophy of science, and the goals of science. Detailed study of qualitative and quantitative methodologies. Cross-listed with COMM.

341 Social Research Methods Laboratory 1
Laboratory to accompany SOC 340. Provides application of conceptualization, operationalization, sampling methods, qualitative and quantitative research methods, and computer statistical analysis. Cross-listed with COMM.

401/601 Sociology of Religion 3
Study of religion viewed as a social institution with a characteristic history, ecology, structure, behavior, and purpose. Cross-listed with RELS.

403/603 Sociology of the Great Plains 3
Social and cultural patterns, trends, and problems peculiar to life in the semi-arid Great Plains.

404/604 Community Assessment 3
Students work with community leaders and their towns to conduct an asset-based community assessment of the town’s human, social, cultural, political, built, financial, and natural capitals.

405/605 Community Development 3
Study of communities viewed as social systems. Includes political, economic, social, and economic factors affecting community growth and decline. Community development methods are addressed. Prereq: SOC 404/604.

407/607 Deviant Behavior 3
See Criminal Justice for description.

410/610 Social Inequality 3
Analysis of social and economic inequities and investigation of the relationship between inequality and life chances.

412/612 Sociology of Gender 3
This course examines the institutional norms, values, and attitudes that shape gender identity, as well as their effects on women and men’s lives. Prereq: SOC 110.

416 Sociology Through Literature 3
Study of basic concepts of sociology as illustrated in selected literature from 19th and 20th century English, American, French, and Russian novels. Prereq: SOC 110.

417/617 Sociology of the Family 3
Comparative family types, member relationships, family dynamics in relation to personality, social change, and social values.

418/618 Social Psychology 3
Examination of both historical and contemporary research and theory in social psychology—the study of the relationship between the individual and the social context. Prereq: SOC 110.

422/622 Development of Social Theory 3
Sociological theories and systems from Comte, Marx, Durkheim, and Weber through the 20th century. Prereq: SOC 110.

424/624 Feminist Theory and Discourse 3
Historical overview of feminist ideas and major writings from the 18th century to the present, which includes issues related to women’s personal, social, and public lives.

426/626 Sociology of Medicine 3
Analysis of the social aspects of health and illness, the health care professions, organization of health care, and related issues.

431/631 Environmental Sociology 3
Examines the interactions between the biophysical environment and human society, how social processes define, construct, and threaten the environment, and the human causes and consequences of environmental problems and their solutions.

439/639 Social Change 3
Analysis of the complex nature of social change in communities, the nation, and internationally. Prereq: SOC 110.

440/440 Sociology of Aging 3
Examination of sociological perspectives on aging. Topics include social theories of aging, retirement, long-term care, chronic illness, and death.

441/441 Death and Dying 3
Examination of research, theories, and case studies on the sociocultural dimensions of death and dying across time and societies. Topics include suicide, funerals, hospice practice, disasters, afterlife beliefs, grief, bereavement and memory, organ donation, death in popular culture, end-of-life issues, cemeteries and body disposition, euthanasia, art, film, music and literature, genocide, and war. Cross-listed with ANTH.

443/443 International Disasters 3
Impacts of natural and human-made disasters on industrialized and developing societies; relief and reconstruction post-disaster programs.

445/445 Special Populations in Disasters 3
Identification of special populations and their needs that arise in emergency or disaster situations both in industrialized and developing countries.

465/665 Applied Demographics 3
Overview of demographic concepts and principles and their application to business and planning decisions. Emphasis on using databases and information sources available on the Internet.

489 Senior Capstone in Sociology 1
Synthesis of social research methods, sociological theory, and sub-discipline content material. Emphasis on integrative skills needed to interrelate the basic concepts of the discipline. Prereq: SOC 340 or Senior standing.

700 Qualitative Methods 3
Advanced analysis of the methods used in qualitative research projects such as intensive interviewing, focus groups, and participant observation. Prereq: SOC 340.

701 Quantitative Methods 3
Advanced analysis of the methods used in quantitative research projects, such as survey design, experimental design, and evaluation research. Prereq: STAT 330 or 725, SOC 340.

723 Social Theory 3
Examination of contemporary social theories and theory construction. Prereq: SOC 422/622.
# SOIL SCIENCE (SOIL)

Akyuz, Casey, Cihacek, DeSutter, Franzen, Goos, Hopkins, Overstreet, Prunty

## COURSES

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Title</th>
<th>Credits</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>210</td>
<td>Introduction to Soil Science (CCN)</td>
<td>3</td>
<td>Physical, chemical and biological properties of soils, as related to use, conservation and plant growth. 2 lectures, 1 laboratory, F/S</td>
</tr>
<tr>
<td>217</td>
<td>Introduction to Meteorology and Climatology (CCN)</td>
<td>3</td>
<td>Basic meteorology-climatology concepts and their application; includes energy balance, greenhouse effect, temperature, pressure systems, lows, highs, fronts, winds, clouds, storms, humidity, precipitation, and measurements. Lectures, discussions, demonstrations. Prereq: MATH 103. S (ND:SCI)</td>
</tr>
<tr>
<td>322</td>
<td>Soil Fertility and Fertilizers (CCN)</td>
<td>3</td>
<td>Principles of plant nutrition and soil nutrient availability; soil testing and fertilizer recommendations and management. Macronutrient emphasis. 3 lectures. Prereq: SOIL 210, CHEM 121, 121L. S</td>
</tr>
<tr>
<td>351</td>
<td>Soil Ecology</td>
<td>3</td>
<td>Principles of soil-plant-animal interactions and their influences on environmental and agricultural issues of global significance (e.g. sustainable agriculture, global climate change, diversity conservation). Prereq: SOIL 210. F</td>
</tr>
<tr>
<td>410/610</td>
<td>Soils and Land Use</td>
<td>3</td>
<td>Principles of chemistry, physics and biology will be used to determine the effects of soil management, agrichemical usage, livestock production, and vegetation on the environment using scales ranging from microsite to watershed. Prereq: SOIL 210, CHEM 121, 121L. S</td>
</tr>
<tr>
<td>433/633</td>
<td>Soil Physics</td>
<td>3</td>
<td>Soil as a three-phase system. Application to soil of physical principles and measurements of soil properties, including density, texture, structure, water content, heat capacity, and transport coefficients. Relationship of properties to agricultural and industrial contamination. 2 lectures, 1 laboratory. Prereq: SOIL 210, PHYS 211, MATH 146. F</td>
</tr>
<tr>
<td>444/644</td>
<td>Soil Genesis and Survey</td>
<td>4</td>
<td>Introduction to soil development, morphology, and survey. Soil classification, geography, and their interpretation will be highlighted by evaluating physical and chemical soil properties and their distribution at the landscape scale. 3 lectures, 1 three-hour laboratory (includes several field trips). Prereq: SOIL 210. F</td>
</tr>
<tr>
<td>447/647</td>
<td>Microclimatology</td>
<td>3</td>
<td>Characteristics and causes of the climate near the ground and its interaction with living organisms. Energy and mass transfer concepts. Lectures, discussions, demonstrations, field trips. Prereq: PHYS 211. F (odd years)</td>
</tr>
<tr>
<td>465/665</td>
<td>Soil and Plant Analysis</td>
<td>3</td>
<td>Laboratory analytical techniques for chemical characterization of soils and determining elemental composition of soils and plant materials for plant nutrition and environmental purposes. 1 lecture, 2 laboratories. Prereq: SOIL 210, CHEM 121, 122. S (odd years)</td>
</tr>
</tbody>
</table>

### Notes

- **480/680 Soils and Pollution**
  - To provide the basic physical, chemical, and biological fate and transport processes of pollution in soils and to neighboring water bodies. Also, how to model and apply these processes to the landscape scale. Prereq: MATH 146, CHEM 121, 121L. S

- **721 Environmental Field Instrumentation and Sampling**
  - To provide an overview of the tools (manual and electronic) concepts, and theories used to sample for physical, chemical, and biological parameters. Offered fall semester, odd years. 8-week course. (Two one-hour lectures and one four-hour laboratory per week.)

- **733 Modeling Environmental Fate and Transport**
  - To provide the principles of modeling physical, chemical, and biological fate and transport processes for application in current environmental problems. Emphasis placed on mathematically expressing processes and describing observations. Offered spring semester, even years. Prereq: MATH 146 and CHEM 121 and CHEM 121L.

- **755 Soil Chemistry**
  - Soil chemical reactions and equilibria, solubility relationships, mineral weathering, cation and anion adsorption, redox reactions, metal chelation, and fixation of nutrients in the soil. 3 lectures. Prereq: SOIL 322, CHEM 122, 122L. F (odd years)

- **763 Advanced Soil Physics**
  - Soil composition, infiltration, retention of water, and chemical absorption. Theory of water, heat, chemical, and solute transport processes of soil. Measurement of soil physical properties. 2 lectures, 1 laboratory. Prereq: SOIL 433 or SOIL 633, PHYS 211, MATH 146 or 165. S (even years)

- **782 Advanced Soil Fertility**
  - Advanced study of soil-plant-nutrient relationships with emphasis on concepts of soil fertility, ion absorption, nutrient transformation, and interpretation of experimental data. 2 lectures. Prereq: SOIL 322. F (even years)

- **784 Advanced Soil Genesis, Morphology and Classification**
  - Advanced study of processes of soil development, soil morphology, and principles of soil classification. 2 lectures (field trip and laboratory by arrangement). Prereq: SOIL 444/644. F (even years)
COURSES

101, 102 First-Year Spanish I, II (CCN) 4 each
Basic structures and vocabulary of Spanish. Practice in the fundamentals of listening, speaking, reading, and writing. No previous knowledge of Spanish required for SPAN 101. Prereq for SPAN 102: SPAN 101 (ND: HUM)

201, 202 Second-Year Spanish I, II (CCN) 3 each

311, 312 Spanish Conversation and Composition I, II 3 each
Advanced practice to develop greater proficiency in oral and written skills through the study of cultural and literary readings. Prereq: SPAN 202.

330 Introduction to Spanish Civilization 3
Introduction to the social, political and cultural history of Spain. Taught in Spanish. Prereq: SPAN 312.

331 Introduction to Spanish American Civilization 3
Introduction to the social, political and cultural history of the Spanish-speaking Americas. Taught in Spanish. Prereq: SPAN 312.

332 Introduction to Hispanic Cinema 3
Study of film genres, styles, or movements, focusing on aesthetic conventions, cultural context, socio-historical significance and critical approaches. Prereq: SPAN 312.

401 Advanced Spanish Grammar and Writing 3
Writing practice with primary focus on form, syntax, and style. Taught in Spanish. Prereq: SPAN 312, ENGL 120, Junior standing.

402 Advanced Spanish Conversation 3
Advanced practice to develop greater oral proficiency through the analysis and discussion of cultural and literary texts. Prereq: SPAN 312.

430 Approaches to Literature 3
Emphasis on critical analysis of Spanish-language literary texts from a variety of theoretical perspectives so that students will develop the technical vocabulary necessary to discuss literary texts in Spanish and grasp levels of meaning in the literature. Taught in Spanish. Prereq: SPAN 312.

440 Traditions in Spanish American Literature 3
Representative works from the pre-conquest era to the 21st century. Overview of literary movements, genres, and cultural background. Taught in Spanish. Prereq: SPAN 312.

441 Contemporary Spanish American Literature 3
Developments and techniques in contemporary texts through representative works. Overview of cultural, historical, and socio-political aspects, as well as literary background. Taught in Spanish. Prereq: SPAN 312.

442/642 Introduction to Chicano Literature 3
Study of Chicano Literature, from the 19th century "californios" through the Chicano Renaissance to recent work by Chicana writers. Taught in Spanish. Prereq: SPAN 312 plus 6 additional upper-division credits.

443 Spanish American Women Writers 3
Developments and techniques in major texts by Spanish American women writers through representative works. Overview of cultural, historical and socio-political aspects, as well as literary background and criticism. Taught in Spanish. Prereq: SPAN 312.

450 Traditions in Spanish Literature 3
Representative works of the literature of Spain from its epic beginnings to the contemporary period. Overview of literary movements, genres, and cultural background. Taught in Spanish. Prereq: SPAN 312.

451 Contemporary Spanish Literature 3
Representative works of the literature of Spain from modernity forward. Overview of literary movements, genres, and cultural background. Taught in Spanish. Prereq: SPAN 312.

452 Cervantes 3
Study of representative works by Miguel de Cervantes, including Don Quixote. Taught in Spanish. Prereq: SPAN 312.

453 Spanish Women Writers 3
Survey of representative works by women in the Spanish literary tradition. Prereq: SPAN 312.

489 Senior Thesis 1
Integrative capstone experience for seniors majoring in Spanish; faculty guided research within the context of a 400-level literature or culture course leading to a substantive written project in Spanish and oral presentation to faculty and departmental majors. Prereq: Senior standing, study abroad.
COURSES

330 Introductory Statistics 3
Frequency tables, histograms, probability, well-known probability distributions, one and two sample tests of hypotheses, confidence intervals, and contingency tables. Prereq: MATH 103, 104, or 107. (ND: MATH)

331 Regression Analysis 2

367 Probability 3
Probability, probability distributions for discrete random variables, probability density functions, marginal joint probability density functions, expected value and variance, and transformations. Prereq: MATH 166.

368 Statistics 3
Moments, moment generating functions, central limit theorem, one and two sample tests of hypotheses, estimation, and simple linear regression and correlation. Prereq: STAT 367.

450/650 Stochastic Processes 3
Discrete time Markov chains, Poisson processes, continuous time Markov chains, birth and death processes, renewal processes, branching processes, queuing systems, and applications. Prereq: STAT 461/661, 462/662, or 726.

451/651 Bayesian Statistical Decision Theory 3
Bayesian approach to statistics including utility and loss, prior and posterior densities, and Bayesian inference. Comparisons with classical statistical methods. Prereq: STAT 368 or 468.

460/660 Applied Survey Sampling 3
Simple random, stratified, systematic and cluster sampling; two-stage sampling. Estimation of population means and variances. Ratio and regression estimators. Prereq: STAT 350 or 368.

461/661 Applied Regression Models 3
Simple linear regression, matrix approach to multiple regression, and introduction to various tests and confidence intervals. Includes discussion of multicollinearity and transformations. Prereq: STAT 330 or 368, knowledge of matrix algebra.

462/662 Introduction to Experimental Design 3
Fundamental principles of designing an experiment, randomized block, Latin square, and factorial. Also covers analysis of covariance and response surface methodology. Prereq: STAT 330 or 368.

463/663 Nonparametric Statistics 3
Various tests and confidence intervals that may be used when the underlying probability distributions are unknown. Includes the Wilcoxon, Kruskal-Wallis, and Friedman. Prereq: STAT 330 or 368.

464/664 Discrete Data Analysis 3

465/665 Meta-Analysis Methods 3
Statistical methods for meta-analysis with applications. Various parametric effect size from a series of experiments: fixed effect, random effect linear models; combining estimates of correlation coefficients; meta-analysis in the physical and biological sciences. Prereq: STAT 331, 461/661, or 725.

467 Probability and Mathematical Statistics I 3
Random variables, discrete probability distributions, density functions, joint and marginal density functions, transformations, limiting distributions, central limit theorem. Prereq: MATH 265 or STAT 368.

468 Probability and Mathematical Statistics II 3
Properties of estimators, confidence intervals, hypotheses testing, Neyman-Pearson lemma, likelihood ratio tests, complete and sufficient statistics. Prereq: STAT 467.

470/670 Statistical SAS Programming 3
Focuses on statistical problem solving and writing SAS computer code. Data types, data management, data input/output, SAS as a programming language, data analysis, report writing, and graphing. Prereq: STAT 461/661, 462/662, or 726.

472/672 [750] Time Series 3
Estimation of trend in time series data; seasonal models; stationary models; moving average, autoregressive, and ARMA models; model identification; forecasting; and intervention analysis. Prereq: STAT 468 or 768, 461/661, course in matrix algebra.

476 Actuary Exam Study II 1
Selected material from probability and mathematical statistics in preparation for the actuarial exam. Prereq: STAT 368 or 468.

477/677 Introductory Survival and Risk Analysis I 3
Survival distributions, life tables, and various risk models, intended to prepare students for taking higher level actuarial exams: SOA1 Course FM/CAS2 Exam 2 and SOA Course MLC/CAS Exam 3L. Prereq: STAT 367 or STAT 467.

478/678 Introductory Survival and Risk Analysis II 3
Distribution of the random variable- the time until future of a joint-life status, life tables, competing risks and multiple decrement probabilities, Markov chain and Poisson models, indented to prepare students for taking the actuarial exams: SOA1 Course MLC/CAS2 Exam 3L. Prereq: STAT 477 or STAT 677.

520 Descriptive Statistics for Pharmacy 3
Descriptive statistics, life tables, probability, binomial and normal distributions, estimation, hypothesis testing, introduction to regression and ANOVA. Examples from the medical/pharmaceutical area. Prereq: MATH 103 or 107.

725 Applied Statistics 3
Data description, probability, inference on means, proportions, difference of means and proportions, categorical data, regression, analysis of variance, and multiple comparisons. Prereq: Knowledge of algebra. This course is not intended for statistics or mathematics majors.

</table>
THEATRE ARTS (THEA)
Engler, Dobrusky, Horvik, Koenig, Larew, Lifton, Varland

COURSES

101 Department Participation 0
Fulfillment of various departmental co-curricular obligations. May be repeated.

110 Introduction to Theatre Arts (CCN) 3
Basic orientation and historical perspective to the art of theatre. Includes the spectrum of dramatic literature, theatrical production, and performance. (ND:HUM)

115 World Film 3
Study of the development and practice of the art of film and its relationship to the theater emphasizing performance and production angles. (ND:HUM)

161 Acting I (CCN) 3
Beginning actors are introduced to basic mental and physical performance skills, stage conventions, and scene work. Emphasis on enhancing the student's spontaneity, imagination, and awareness. (ND:FA)

180 Dramatic Literature and Style 3
Survey of dramatic literature with emphasis on historical and cultural context, production style, and problems inherent in contemporary production. (ND:HUM)

201 Theatre Practicum (CCN) 1
Participation in various activities connected with the first Little Country Theatre production of current season. May be repeated. Requires cast or crew assignment on the production.

202 Theatre Practicum II 1
Participation in various activities connected with the second Little Country Theatre production of current season. May be repeated. Requires cast or crew assignment on the production.

203 Theatre Practicum III 1
Participation in various activities connected with the third Little Country Theatre production of current season. May be repeated. Requires cast or crew assignment on the production.

204 Theatre Practicum IV 1
Participation in various activities connected with the fourth Little Country Theatre production of current season. May be repeated. Requires cast or crew assignment on the production.

228 Development of Musical Theatre 3
Introduction to Musical Theatre. Lectures provide historical survey. Weekly labs are devoted to active exploration of representative musical theatre repertoire. Prereq: THEA 161 and MUSC 162. Cross-listed with MUSC.

261 Acting II (CCN) 3
Practical application of fundamental skills to textual work. Prereq: THEA 161.

262 Introduction to Dance 2
Practicum course expanding the beginning student performer's physical/kinesthetic awareness. Examines basic styles of dance as employed in theatrical presentation (ballet, modern dance, jazz, and/or tap). Basics in theatre dance audition techniques, and choreography.

263 Dance Studio 2
Introduction to the basic concepts and principles of ballet, modern, jazz, ballroom, swing, or tap dance through studio experiences. Each semester will focus on one specific style. May be repeated for credit with change in topic.

265 Script Analysis 3
Methods and procedures of play script analysis for theatre practitioners. Prereq: THEA 180.

266 Voice and Movement for the Actor 3
An introduction to the theory and practice of ideal vocal production and physical self-use. Exercises are offered addressing breath control, alignment, relaxation, resonance, articulation, projection, and expansion of physical and vocal creative expression. Prereq: THEA 161.

273 Stagecraft 3
An introduction to the crafts and technologies of theatre production. Includes fundamentals of scenery construction, tool usage and safety, costume materials and construction. Two 1-hour lectures, one 3-hour laboratory.

272 Drawing for the Theatre 3
Introduction to drawing for the theatre, to include hand and computer-assisted drafting techniques along with figure drawing.

274 Introduction to Stage Design 3
Translation of text and music into ideas for stage design (scenery, costumes, lights) and introduction to use of both traditional and modern technologies in the process.

275 Theatrical Makeup Design 3
Fundamentals of stage makeup; facial analysis and introduction to materials and techniques. Character interpretation through two and three-dimensional application.

280 World Theatre 3
Survey of the theatre and drama of various European and non-Western cultures. (ND:HUM)

286 Theatrical Design Studio I: Collaboration and Concept 3
Intermediate study, studio practice and critique. Application of standard processes for theatrical design and collaboration.

287 Theatrical Design Studio II: Materials and Techniques for Design 3
Intermediate study, studio practice and critique. Specialization in materials and design of theory and process.

301 Musical Theatre Troupe 1
A select performance ensemble of 10-20 students. Students will develop, do research on and present songs and choreography from musical theatre productions. By audition and permission of instructor. May be repeated.

350 Studio Theatre 1-2
Workshops in specialized techniques or a showcase for individual creativity. Includes projects in acting, directing, design, movement, and play writing. May be repeated.
361 Acting III: Advanced Realism 3
Advanced studies in realistic acting technique and scene work. Course open to student with BFA-standing only. Prereq: THEA 161, 261.

362 Dance Styles for Theatre 1
Integration of beginning dance techniques in the standard theatre dance repertoire through studio experiences. Prereq: THEA 262.

363 Dance Studio II 1
Intermediate study in the study of the concepts and principles of ballet, modern, jazz, or tap dance through studio practice and performance. May be repeated for credit. Prereq: THEA 263.

365 Directing I 3
Introduction to the creative process of directing. Focus on script analysis, basic directing tools, and scene work. Prereq: THEA 261.

368 Business of Acting 3
Advanced study in business of acting, addressing resume/portfolio, photos, audition package/interviews, agents, unions, graduate programs, national theatre organizations, and audition resources. Prereq: BFA Standing, THEA 261, 266.

370 Technical Theatre Production 3
Advanced study in technical theatre production. Emphasis on planning processes and individual duties/responsibilities for technicians at all levels of theatrical production. Hours arranged as appropriate to assignment. May be repeated.

372 Stage Management 3
Fundamentals of production stage management. Emphasis on the role, duties, and relationships of the stage manager as a member of the production team.

381 Technical Theatre Seminar 1
A detailed study into the different technologies and processes involved in the technical areas of theatrical production. Each class will involve concentrated study in one category of technical production skills. May be repeated for credit with change in subtopic.

386 Theatrical Design Studio III: Design for Alternative Venues 3
Advanced study, studio practice and critique. Development of concept and content for alternative venues. Prereq: THEA 286, 287.

387 Theatrical Design Studio IV: Research in the Studio 3
Advanced study, studio practice and critique. Emphasis on research techniques, professional practice, and presentation. Prereq: THEA 286, 287.

450 Capstone Experience 3
Demonstration of mastery in selected area of theatre through an advanced project in acting, directing, design/technical theatre, or dramaturgy. Departmental capstone experience. Prereq: Senior standing.

461 Period Styles for the Actor 3
Advanced training in classical acting focusing on effective vocal/rhetorical techniques. Exploration of Style/Language, Greek, Commedia, Elizabethan, Comedy of Manners/Morals. Prereq: BFA Standing, THEA 261, 266.

462 Modern Nonrealistic Styles for the Actor 3
Introduction to non-realistic performance styles of the late nineteenth through twentieth centuries, including symbolism, expressionism, Brechtian epic theatre, and absurdism, with overview of contemporary non-realistic styles. Prereq: BFA standing, THEA 261, 266.

465/665 Directing II 3
Problems in directing, formulating production concepts, casting, working with actors, and aiding characterization. Includes preliminary work with thrust and arena staging. Prereq: THEA 365.

466 Advanced Voice for the Actor 3
Intensive examination/development of the vocal mechanism. Focus on consonant/vowel production, diction/articulation, resonance/placement, and breath/posture complemented by introduction of IPA, character voices, and dialects. Prereq: BFA Standing in Performance Track, THEA 266.

467 Advanced Movement for the Actor 3
Advanced level movement course introducing codified styles of theatre movement including neutral and character mask, pedestrian mime, unarmed and armed stage combat. Prereq: BFA Standing, THEA 266.

480/680 History and Literature of the Theatre I 3
Historical study of theatre architecture, staging methods, individual artists and plays from the theatre’s origins through the 17th century. Prereq: THEA 265.

481/681 History and Literature of the Theatre II 3
Historical study of theatre architecture, staging methods, individual artists and plays from the 18th century to the present. Prereq: THEA 480/680. (alternate years)

486 History of Dress and Décor I: the Foundations of Western Style 3
Survey of historical architecture, interiors, and clothing beginning with antiquity through the 18th century.

487 History of Dress and Décor II: Western Style since 1800 3
Survey of historical architecture, interiors, and clothing after 1800 through the 1970s.
TRANSPORTATION AND LOGISTICS (TL)

Bilen-Green, Lambert, Tolliver, Traub, Varma

COURSES

711 Logistics Systems 4
Foundation material critical to establishing effective supply chains in various decision making environments. Topics include inventory theory, forecasting, aggregate planning, and project management. Decision making techniques include linear programming, process flow analysis, and simulation.

715 Enterprise Resource Planning 3
Covers material essential to the successful implementation of an ERP, addressing enterprise-wide functionality as well as required tactical functions such as project management and project planning, and provides an overview of implementation alternatives.

719 Crisis Analysis and Homeland Security 3
Provides an integrated approach to crisis analysis and response within the contexts of military logistics and homeland security. Focus is on the social and cultural context of emergencies, disasters and catastrophes.

721 International Logistics Management 4
This course provides a coherent perspective on contemporary global logistics from raw materials through production to the customer. Addressed are the roles of governments and intermediaries, international sourcing and the application of local trade laws. Discussion of economic, political and social issues that may affect international transportation. Prereq: TL 711, 715, 719.

723 Advanced Supply-Chain Planning 3
Continues to develop the concepts introduced in TL 613. Flexible supply chains are considered. By understanding both current capabilities and evolving needs of the enterprise, the appropriate modifications to the supply chain can be identified. Prereq: TL 711, 715, 719.

725 Technology Advances and Logistics 3
This course addresses the new technologies that help shape advanced logistics and the advantages that such technologies have brought to end users, suppliers, and a broad spectrum of related industries. Prereq: TL 711, 715, 719.

727 Organizational Change Management 3
Change management as the process of making either incremental improvements or radical changes to an organization for the purpose of enhancing both organizational and individual effectiveness. A multi-perspective systems viewpoint is employed, stressing pragmatic implications for leadership. Prereq: TL 711, 715, 719.

729 Adaptive Planning in Logistics 3
Presents a systems view with a focus on how remote sensing technology enables sense and respond logistics. Topics include organizational structure, strategic alliances, programmed decision making, supply-chain dynamics, and the value of information transparency. Prereq: TL 711, 715, 719.

731 Logistics Research Methods 3
This course covers key research concepts including: principles of scientific research, model-building, continuous-dependent variable models, qualitative-dependent variable models, and optimization modes. The emphasis is on applications and problem-solving in Transportation and Logistics. Prereq: TL 721, 723, 725, 727, 729.

733 Military Logistics Case Studies 3
This course will consist of case analysis based primarily on events from Operation Iraqi Freedom. Topics from courses within the military logistics curriculum are integrated into the cases. Prereq: TL 721, 723, 725, 727, 729. S/U grading.

735 Acquisition Contracts: Law/Management 3
Study of legal framework in the contracting process with emphasis on the law and legal processes of acquisition contracts. Prereq: TL 711, 715, 719.

751 Transportation Systems Security 3
This course examines security threats and solutions related to transportation systems. Specific focus is placed securing passenger and freight modes of transportation including railroad, highway, aviation, maritime and pipelines from acts of terrorism and intentional disruption.

752 Transportation Planning and Environmental Compliance 3
This course provides an overview of the procedures of transportation planning and environmental compliance, to include an understanding of the related policies and procedures as they relate to transportation systems, and compliance with local, state, and federal laws. A discussion of emissions, hazardous cargo, and permitting also will be provided.

753 Transportation System Modeling 3
This course focuses on quantitative techniques used for planning and operation of transportation systems. Topics include: system capacities and flows, comprehensive models of transportation and urban systems, and understanding how political processes, new technologies, and economic considerations affect transportation decisions.

754 Urban Transportation Systems Analysis 3
This course provides students with an understanding of system analysis tools used in urban transportation. Students will work with analytical techniques employed in urban transportation planning, such as traffic forecasting and system capacity analysis and apply these techniques using real-world data for analyzing both the demand and supply of transportation.

755 Context Sensitive Solutions 2
Context Sensitive Solutions (CSS) examine, in addition to traditional transportation engineering factors, impacts on the community as well as the natural and human environment. This course will introduce students to the main principles of CSS and allow them to learn how they are applied through use of case studies.

756 Transportation Systems Laboratory 3
This course applies urban transportation, traffic engineering, and data collection methods to real-world case studies in small urban areas. Students will work with a community to conduct a comprehensive urban transportation study, including data collection, assessment of current conditions, evaluation, alternative solutions, and presenting the findings.
782 Transportation Systems I  3
This course provides an overview of transportation systems, including relationships among transportation, the economy, environment, and land use. The focus is on highway and freight transportation (including demand, capacity, cost, service, and investment analysis) with applications to multimodal corridor planning. Prereq: MATH 265.

783 Transportation Systems II  3
This course focuses on railroads and freight multimodal planning. It includes an introduction to railroads, an overview of the railroad industry and services, cost models, regulations, energy requirements, route analysis, operations, line capacities, intermodal terminals, environmental considerations, and multimodal freight issues. Prereq: TL 782.

785 Spatial Analysis in Transportation  3
This course focuses on applications of Geographic Information Systems (GIS) to transportation networks and problems. The emphasis is on data modeling. Topics include: linear referencing, dynamic segmentation, network analysis, urban and land use planning, routing of hazardous materials, and asset management applications. Prereq: TL 782.

786 Public Transportation  3
This course focuses on public transportation issues and models. Topics include: policy issues, government’s role in transit, transit planning, demand forecasting, performance evaluation, and system costing. Students will work on projects directly related to a transit system. Industry experts will provide guest lectures.

788 Research in Transportation and Logistics  3
This course focuses on the conduct of scientific research in transportation and the application of a wide range of quantitative methods to transportation problems. The emphasis is on selecting the appropriate techniques for a problem and integrating them into interdisciplinary models. Critical research issues are highlighted.
UNIVERSITY STUDIES (UNIV)

COURSES

189 Skills for Academic Success 1
This course is designed to ease the transition for new students at NDSU. Students will learn skills and techniques used by successful college students. In addition to introducing the students to campus resources and governance, topics will include study techniques, time management, test taking, note taking, goal setting, wellness, stress management, and career orientation. Repeated course opportunity exists for failing grades only. Cross-listed with ABEN, AGRI, BUSN, HD&E, and ME. F, S

489 Capstone Experience 1
The Capstone Experience for a Bachelor of University Studies degree consists of a reflective paper designed to provide the student with the opportunity to integrate, synthesize and apply the cumulative academic experience. Course includes professional skills, a job packet and a brief oral presentation. F, S

*(The following courses are restricted to Veterinary Technology majors only.)*

## Additional Information

- **481 Ward Care/ Clinic Care**: Supervised experience managing the care and feeding of Veterinary Technology Program animals and clinical veterinary facilities. May be repeated 4 times.

- **482 Large Animal Techniques**: Handling, restraint, nursing, and management techniques used in large animal veterinary practice. Primarily focused on cattle and horses. Prereq: VETS 256.

- **483 Clinical Veterinary Practicum**: Supervised experience applying veterinary diagnostic and therapeutic techniques and procedures in a clinical setting. May be repeated with instructor approval.

- **485 Veterinary Technology Externship**: Capstone experience for veterinary technology students. Continued development of skills through supervised work in a veterinary practice or other appropriate clinical setting. Refer to Animal Science for information regarding Veterinary Technology program.
WOMEN AND GENDER STUDIES (WGS)

Burnett

COURSES

110 Introduction to Women’s Studies 3
Exploration of a range of social/domestic and global issues related to women; development of a feminist framework for thinking and writing about woman and gender. (ND:HUM)

112 Introduction to Masculinities 3
Exploration of the lives of men and boys and the diverse experiences and public discourses about masculinity; the role of men and boys in sports, family, work and other social relationships.

350 Perspectives in Women’s Studies 3
Exploration of women and gender from many perspectives. Course provides an opportunity to increase knowledge of the scholarship and writings in Women’s Studies, including authors such as Friedan, Baumgardner and Richards, Wolf, and Roiphe. Recommended: WS 110.

489 Internship/Capstone 3
Integrate coursework taken in Women and Gender Studies major; apply knowledge to women’s events and experiences; explore career and graduate options in the field of Women’s Studies.
Microbial ecology introduces local forms. Early morning field trips required. Prereq: BIOL 151, 151L.

Introduction to the biology, classification, and identification of birds, especially 456/656 trips plus an independent review project. Prereq: BIOL 151, 151L. Students must make a commitment to participate in at least one of two 4-day field Primarily a field and laboratory course focusing on amphibians and reptiles. 454/654 biology and taxonomy of fishes. Prereq: BIOL 151, 151L. Survey of the biology, classification, and evolution of invertebrates. Emphasis on microbial diversity. Prereq: ZOO 364. Comparative physiology of the vertebrates. Study of biochemical, morphological, and behavioral mechanisms involved with compensatory changes in response to changes in ontogeny and/or external environment. Prereq: BIOL 151, 151L. Introduction to the systematics, history, and structure of chordates, especially the vertebrates. Prereq: BIOL 151, 151L. See Plant Sciences for description. Ecology, evolution, and internal mechanisms. Prereq: BIOL 151, 151L. Comparative anatomy of vertebrate tissues and organs, especially mammals. Prereq: BIOL 151, 151L. Study of the physical and chemical principles that govern cell, tissue, organ system, and organismal function. Prereq: BIOL 150, 150L, CHEM 240 or 341. Biological, physical, and chemical features of freshwater ecosystems. Prereq: BIOL 364. Techniques used in the study and management of fish. Prereq: ZOO 472. Application of ecological principles to management of game and non-game wildlife populations. Field trips required. Prereq: BIOL 364. Students will learn traditional and state-of-the-art techniques used in the study and management of fish, wildlife, and other animal populations. Topics will include assessment of population characteristics, habitat, behavioral ecology and genetic structure. Field trips required. Prereq: ZOO 476. Analysis of the processes of development, with an emphasis on animal development. Topics range from classical embryology to the cellular and molecular basis of development. Prereq: BIOL 151, 151L.
**720 Advanced Cell Biology**  
Study of molecular biology of plant and animal cells including molecules, molecular organization, growth and development, nuclear function, cell cycle, and cellular communication. Prereq: BIOC 702.

**750 Advanced Conservation Biology**  
This class will cover recent developments in the field of conservation biology, with a specific focus on recent literature. Areas of focus will include Evolutionary Conservation and Conservation Genetics. Prereq: ZOO 364, 675.

**760 Evolutionary Ecology**  
Lecture-discussion course on recent developments in evolutionary theory and their implications in the study of animal adaptation, ecology, and behavior. Prereq: BIOL 364.

**764 Neuroendocrine and Endocrine Systems**  

**770 Aquatic Community Ecology**  
ADMINISTRATION AND FACULTY

State Board of Higher Education

Created by constitutional amendment in 1939, the State Board of Higher Education is the governing body of North Dakota State University and all other state supported institutions of higher education in North Dakota. The board's chief executive officer is the chancellor of the North Dakota University System, with offices in the state capitol in Bismarck.

- William Goetz, Bismarck, ND, Chancellor of the North Dakota University System
- Jon Backes, Minot, ND (term expires June 30, 2011) -- President
- Melissa Bonner, Grand Forks, ND (term expires June 30, 2011) -- Student Member
- Kristen Diederich, Fargo, ND (term expires June 30, 2014)
- Duaine Espegard, Grand Forks, ND (term expires June 30, 2014)
- John Girard, Minot, ND (term expires June 30, 2011) -- Faculty Advisor
- Michael Haugen, Grand Forks, ND (term expires June 30, 2012)
- Claus Lembke, Bismarck, ND (term expires June 30, 2013)
- Grant Shaft, Grand Forks, ND (term expires June 30, 2011) -- Vice President
- Richie Smith, Wahpeton, N.D. (term expires June 30, 2013)

Officers of Agencies Associated with the University

- Kenneth Bertsch, B.S., Commissioner, State Seed Department
- Timothy Flakoll, M.S., Provost, Tri-College University
- Gene C. Griffin, M.S., Director, Upper Great Plains Transportation Institute
- Tony Grindberg, Executive Director, Research Technology Park, Inc.
- William P. Kemp, Ph.D., Director, Red River Valley Agricultural Research Center
- Larry Kotchman, State Forester, North Dakota Forest Services
- James C. Miller, M.S., Executive Director, NDSU Alumni Association and Development Foundation
- Jon Skaare, M.S., Director, North Dakota Center for Distance Education
- Brian Sorenson, M.S., Director, Northern Crops Institute
- Kathleen Tweeten, M.B.A., Director, Center for Community Vitality and Institute for Business and Industry Development

Administration

- Dean L. Bresciani, Ph.D., President
  - Rick D. Johnson, J.D., General Counsel
  - Gene Taylor, M.S., Director, Athletics
- R. Craig Schnell, Ph.D., Provost and Vice President for Academic Affairs
  - Kenneth Grafton, Ph.D., Dean of the College of Agriculture, Food Systems, and Natural Resources
  - Thomas J. Riley, Ph.D., Dean of the College of Arts, Humanities and Social Sciences
  - Ronald Johnson, Ph.D., Dean of the College of Business
  - Gary Smith, Ph.D., Dean of the College of Engineering and Architecture
  - Virginia L. Clark Johnson, Ph.D., Dean of the College of Human Development and Education
  - Charles D. Peterson, Pharm.D., Dean of the College of Pharmacy, Nursing, and Allied Sciences
  - Kevin McCaul, Ph.D., Dean of the College of Science and Mathematics
  - David Wittrock, Ph.D., Dean of the College of Graduate and Interdisciplinary Studies
  - Carolyn Schnell, Ed.D., Associate Dean of the College of University Studies
  - Michele Reid, M.S., Dean of Libraries
  - Gene C. Griffin, M.S., Director of Upper Great Plains Transportation Institute
  - R. S. Krishnan, Ph.D., Associate Vice President for Academic Affairs and Director of Summer School
  - Lisa Nordick, M.S., Assistant Dean and Director of Distance Continuing Education and Group Decision Center
William Slanger, Ph.D., Director of Institutional Research and Analysis
Robert Harrold, Ph.D., Director of Accreditation and Assessment

**D. C. Coston, Ph.D., Vice President for Agriculture and University Extension**
- Kenneth F. Grafton, Ph.D., Dean of the College of Agriculture, Food Systems, and Natural Resources, Director of the N.D. Agricultural Experiment Station and Professor of Plant Sciences
- Duane Hauck, M.S., Director of the Extension Service

**Eveadean M. Myers, J.D., Vice President for Equity, Diversity and Global Outreach**
- Kerri Spiering, Ph.D., Associate Vice President, Global Outreach
- Jaclynn Davis Wallette, M.S., Assistant Vice President, Director, Multicultural Student Services
- Kara Gravley-Stack, M.S., Director, Equity and Diversity Center
- Lisa Hauck, M.A., Director, International Programs

**Bruce A. Bollinger, Vice President for Finance and Administration**
- Broc T. Lietz, B.S., Associate Vice President for Finance and Administration
- Ray E. Boyer, B.S., Director of University Police and Safety Office
- Colette D. Erickson, M.S.A., Associate Director of Human Resources
- Tricia R. Johnson, B.S., Associate Director of Payroll
- Mari L. Krag, Director of Student Loan Service Center
- Karla Mongeon-Stewart, M.B.A., Director of Budget
- Gary L. Wawers, M.B.A., Controller
- Stacey O. Winter, B.S., Director of Purchasing

**Bonnie Neas, M.B.A., Vice President for Information Technology**
- Jeff Gerst, Ph.D., Associate Vice President and Chief Information Officer, Information Technology Services
- Joan Chapek, B.S., Assistant Vice President, Telecommunications and Emergency Support Technologies
- Marc Wallman, Assistant Vice President, Enterprise Computing and Infrastructure

**Philip Boudjouk, Ph.D., Vice President for Research, Creative Activities and Technology Transfer**
- Gregory J. McCarthy, Associate Vice President, Interdisciplinary Research/CNSE/CATTT
- Valrey V. Kettner, J.D., Associate Vice President, Sponsored Programs Administration
- Sheri Anderson, M.B.A., Associate Vice President for Program Development and Operations
- Dennis Anderson, M.Sc., Associate Vice President for Business Development and Industrial Relations
- David R. Givers, M.S., Co-Project Director, ND EPSCoR
- Tony Grindberg, Executive Director, Research Technology Park, Inc.
- Dale F. Zetocha, M.S., Executive Director, Technology Transfer/Research Foundation

**Prakash C. Mathew, M.S., Vice President for Student Affairs**
- Catherine S. Haugen, Ph.D., Associate Vice President for Student Affairs
- Janna M. Stoskopf, M.S., Dean of Student Life
- Barbara Lonbaken, M.S., R.N., Dean for Student Wellness
- William Burns, Ph.D., Director of Counseling Center
- Wendy Clarin, B.A., Manager, Bison Connection/Bison Card Center
- Viet Q. Doan, B.S., Manager, Enrollment Management Technology Services
- John (Jack) Donahue, B.S./B.A., Director of Dining Services
- Jeanette Enebo, Director of Student Financial Services
- Gary Fisher, M.Ed., Director of the Wellness Center
- Michael Harwood, M.S., Assistant Dean of Student Life
- Bunnie Johnson-Messelt, M.S., Director of Disability Services
- Jobey Lichtblau, M.M., Director of Admission
- Carol Miller, B.S., Director of NDSU Bookstore
- Donna Morrison, M.S., Director of Student Health Services
- Rian Nostrum, M.S. Ed., Director of Residence Life
- Laura Oster-Aaland, Ph.D., Director of Orientation and Student Success
- Deanne Sperling, B.S./B.A., Coordinator of University Conference Programs; Assistant to the Vice President for Student Affairs
- Jill Wilkey, B.S., Director of the Career Center
- Steve Winfrey, M.A., Director of Memorial Union
Kristi Wold-McCormick, Ph.D., Registrar
Nona L. Wood, M.S.Ed., Associate Director of Student Rights and Responsibilities

Keith Bjerke, B.S., Vice President for University Relations
Laura McDaniel, M.S., Assistant Vice President for University Relations
Najla Amundson, Ph.D., Media Relations Director
Brad Clemenson, B.S., Creative Services Manager and Art Director

College of Agriculture, Food Systems, and Natural Resources

Aakre, Dwight G., Farm Management Specialist, Agribusiness and Applied Economics M.S., 1982, North Dakota State University
Acevedo, Maricellis, Assistant Professor of Plant Pathology, Ph.D., 2007, University of Nebraska-Lincoln
Adhikari, Tika B., Assistant Professor of Plant Pathology, Ph.D., 1991, IRRI/UPLB, The University of Philippines
Akyuz, F. Adnan, Assistant Professor of Soil Science, Ph.D., 1994, University of Missouri-Columbia
Anderson, Albin W., Emeritus Professor of Entomology, Ph.D., 1969, Iowa State University
Anderson, Donald E., Emeritus Professor of Agribusiness and Applied Economics, Ph.D., 1968, University of Minnesota
Anderson, James V., Adjunct Professor of Plant Sciences, USDA, Ph.D., 1990, Virginia Polytechnic Institute
Anderson, Robin, Adjunct Professor of Animal Sciences, Ph.D., 1995, Iowa State University
Anderson, Ronald, Emeritus Professor of Agribusiness and Applied Economics, Ph.D., 1971, Washington State University
Anderson, Vernon L., Adjunct Professor of Animal Sciences, Ph.D., 1998, North Dakota State University
Backer, Leslie F., Associate Professor of Agricultural and Biosystems Engineering; Department Chair, M.S., 1972, North Dakota State University
Bangsund, Dean A., Research Scientist of Agribusiness and Applied Economics, M.S., 1987, North Dakota State University
Barigye, Robert, Assistant Professor of Veterinary and Microbiological Sciences, Ph.D., 2003, National Autonomous University of Mexico
Bauer, Marc L., Associate Professor of Animal Sciences, Ph.D., 1996, University of Kentucky
Beaver, James S., Adjunct Professor of Plant Sciences, Ph.D., 1980, University of Illinois - Urbana
Berg, Eric P., Associate Professor of Animal Sciences, Ph.D., 1996, Purdue University
Berg, Erika L., Assistant Professor of Animal Sciences, Ph.D., 2006, University of Missouri
Berg, Ivan E., Emeritus Professor of Veterinary and Microbiological Sciences, D.V.M., 1960, University of Minnesota
Berg, Paul T., Associate Professor of Animal Sciences, Ph.D., 1975, North Dakota State University
Berglund, Duane R., Emeritus Professor of Plant Sciences, Ph.D., 1971, North Dakota State University
Berry, Eugene S., Associate Professor of Veterinary and Microbiological Sciences, Ph.D., 1983, Northeastern University
Berryhill, David L., Associate Professor of Animal Sciences, Ph.D., 1971, Iowa State University
Berti, Marisol, Associate Professor of Plant Sciences, Ph.D., 2007, North Dakota State University
Biondini, Mario E., Professor of Range Science, Ph.D., 1983, Colorado State University
Boe, Arthur A., Emeritus Professor of Plant Sciences, Ph.D., 1966, Utah State University
Boetel, Mark A., Associate Professor of Entomology, Ph.D., 1996, South Dakota State University
Bon, Thomas A., Senior Lecturer of Agricultural and Biosystems Engineering, Ph.D., 2003, North Dakota State University
Bora, Ganesh C., Assistant Professor of Agricultural and Biosystems Engineering, Ph.D., 2005, Kansas State University
Brueggeman, Robert, Assistant Professor of Plant Pathology, Ph.D., 2009, Washington State University
Brun, Lynn J., Emeritus Professor of Soil Science, Ph.D., 1972, Kansas State University
Brunner, Bryan R., Adjunct Professor of Plant Sciences, Ph.D., 1992, Michigan State University
Buchanan, David S., Professor of Animal Sciences, Ph.D., 1979, University of Nebraska-Lincoln
Bugbee, William M., Emeritus Adjunct Professor of Plant Pathology, USDA, Ph.D., 1965, University of Minnesota
Cai, Xiwen, Associate Professor of Plant Sciences, Ph.D., 1998, Washington State University
Campbell, Larry G., Adjunct Professor of Plant Sciences, USDA, Ph.D., 1974, Kansas State University
Cannayen, Igathinathane, Assistant Professor of Agricultural and Biosystems Engineering, Ph.D., 1997, Indian Institute of Technology
Carena, Marcelo J., Associate Professor of Plant Sciences, Ph.D., 1999, Iowa State University
Carlson, Robert B., Emeritus Professor of Entomology, Ph.D., 1965, Michigan State University
Carr, Patrick M., Adjunct Professor of Plant Sciences, Ph.D., 1989, Montana State University
Carter, Jack F., Emeritus Professor of Plant Sciences, Ph.D., 1950, University of Wisconsin
Casey, Francis X.M., Associate Professor of Soil Science, Ph.D., 2000, Iowa State University
Caton, Joel S., Professor of Animal Sciences, Ph.D., 1987, New Mexico State University
• Cattanach, Allan W., Adjunct Professor of Soil Science, Ph.D., 1979, University of Minnesota
• Chang, Kow-Ching, Professor of Cereal and Food Sciences, Ph.D., 1980, University of Nebraska
• Chao, Shiaoaman, Adjunct Professor of Plant Sciences, USDA, Ph.D., 1984, North Carolina State University
• Chao, Wun Shaw, Adjunct Professor of Plant Sciences, USDA, Ph.D., 1996, University of California - Davis
• Charlet, Laurence D., Adjunct Professor of Entomology, Ph.D., 1975, University of California, Riverside
• Christian, Gary R., Adjunct Professor of Veterinary and Microbiological Sciences, D.V.M., 1969, University of Minnesota
• Christoffers, Michael J., Associate Professor of Plant Sciences, Ph.D., 1998, University of Missouri - Columbia
• Cihacek, Larry J., Associate Professor of Soil Science, Ph.D., 1979, Iowa State University
• Cobia, David W., Emeritus Professor of Agribusiness and Applied Economics, Ph.D., 1967, Purdue University
• Colville, Thomas P., Professor of Animal Sciences, D.V.M., 1971, University of Minnesota, M.S., 1981, University of Stirling, Scotland
• Coston, D. C., Vice President for Agriculture and University Extension and Professor of Plant Sciences, Ph.D., 1976, Michigan State University
• Cross, Harold Z., Emeritus Professor of Plant Sciences, Ph.D., 1971, University of Missouri
• D’Appolonia, Bert L., Emeritus Professor of Cereal Science, Ph.D., 1968, North Dakota State University
• Dahl, Bruce L., Research Scientist in Agribusiness and Applied Economics, M.S., 1989, North Dakota State University
• Dahlen, Carl R., Assistant Professor of Animal Sciences, Ph.D., 2009, University of Minnesota
• Dahleen, Lynn S., Adjunct Professor of Plant Sciences, USDA, Ph.D., 1989, University of Minnesota
• Dahnke, William C., Emeritus Professor of Soil Science, Ph.D., 1962, University of Wisconsin
• Dai, David W., Associate Professor of Plant Sciences, Ph.D., 2001, North Dakota State University
• Danielson, Russell B., Emeritus Professor of Animal Sciences, M.S., 1973, North Dakota State University
• David, Nicholas L., Assistant Professor of Plant Sciences, Ph.D., 2007, Oregon State University
• Deckard, Brenda, Director of Plant Sciences Student Services, M.S., 2000, North Dakota State University
• Deckard, Edward L., Professor of Plant Sciences, Ph.D., 1970, University of Illinois
• DeKeyser, Edward S., Assistant Professor of Range Science, Ph.D., 2000, North Dakota State University
• Deibert, Edward J., Emeritus Professor of Soil Science, Ph.D., 1976, University of Nebraska
• del Rio Mendoza, Luis, Assistant Professor of Plant Pathology, Ph.D., 1999, Iowa State University
• DeSutter, Thomas M., Assistant Professor of Soil Science, Ph.D., 2004, Kansas State University
• Dexter, Alan G., Emeritus Professor of Plant Sciences, Ph.D., 1969, University of Illinois
• Disrud, Lowell A., Emeritus Professor of Agricultural and Biosystems Engineering, M.S., 1969, Kansas State University
• Dodds, Duaine L., Emeritus Professor of Animal Sciences, M.S., 1966, North Dakota State University
• Doehlert, Douglas C., Adjunct Professor of Cereal and Food Sciences, USDA and Plant Sciences, Ph.D., 1982, University of Wisconsin
• Duysen, Murray E., Emeritus Professor of Plant Sciences, Ph.D., 1966, University of Nebraska
• Dyer, Neil W., Interim Chair and Professor of Veterinary and Microbiological Sciences, D.V.M., 1991, Iowa State University
• Ebert, Jessica, Senior Lecturer of Veterinary and Microbiological Sciences, M.S., 2001, North Dakota State University, M.A., 2004, New York University
• Eck, Tate D., Equine Science Lecturer, Department of Animal Sciences, B.S., 1996, North Dakota State University
• Edwards, Michael C., Adjunct Professor of Plant Pathology, Ph.D., 1983, Cornell University
• Elias, Elias M., Professor of Plant Sciences, Ph.D., 1987, North Dakota State University
• Enz, John W., Emeritus Professor of Soil Science, Ph.D., 1976, University of Minnesota
• Erickson, Duane O., Emeritus Professor of Animal Sciences, Ph.D., 1965, North Dakota State University
• Erlandson, Gordon W., Emeritus Professor of Agribusiness and Applied Economics, Ph.D., 1968, University of Minnesota
• Erpelding, John E., Adjunct Professor of Plant Sciences, Ph.D., 1996, Montana State University
• Evans, Robert, Adjunct Professor of Agricultural and Biosystems Engineering, Ph.D., 1981, Colorado State University
• Fahn, Faysal, Lecturer of Agribusiness and Applied Economics, Ph.D., 2008, Washington University
• Fanning, Carl D., Emeritus Professor of Soil Science, Ph.D., 1965, University of Wisconsin
• Faris, Justin D., Adjunct Professor of Plant Sciences, USDA, Ph.D., 1999, Kansas State University
• Flaskerud, George, Emeritus Professor of Agribusiness and Applied Economics, Ph.D., 1970, Oklahoma State University
• Foley, Michael E., Adjunct Professor of Plant Sciences, USDA, Ph.D., 1982, University of Illinois
• Foster, Stephen P., Professor of Entomology, Ph.D., 1983, University of Waikato, New Zealand
• Franckowiak, Jerome D., Emeritus Professor of Plant Sciences, Ph.D., 1970, University of Wisconsin
• Franzen, David W., Professor of Soil Science, Ph.D., 1993, University of Illinois
• Freeman, Thomas P., Professor of Plant Pathology, Ph.D., 1968, Arizona State University
• Friesen, Timothy L., Adjunct Professor of Plant Pathology, USDA, Ph.D., 2001, University of Georgia
• Frohberg, Richard C., Emeritus Professor of Plant Sciences, Ph.D., 1964, Iowa State University
• Fugate, Karen L., Adjunct Professor of Plant Sciences, USDA, Ph.D., 1995, Ohio State University
• Funke, Berdell R., Emeritus Professor of Veterinary and Microbiological Sciences, Ph.D., 1964, Kansas State University
• Ganguli, Amy, Assistant Professor of Range Science, Ph.D., 2005, Oklahoma State University
• Gibbs, Penelope S., Assistant Professor of Veterinary and Microbiological Sciences, Ph.D., 2001, University of Georgia
• Giles, Joseph F., Emeritus Professor of Soil Science, Ph.D., 1974, Colorado State University
• Goos, Robert J., Professor of Soil Science, Ph.D., 1980, Colorado State University
• Goswami, Rubella S., Assistant Professor of Plant Pathology, Ph.D., 2005, University of Minnesota
• Graff, Kenneth F., Dean, College of Agriculture, Food Systems, and Natural Resources; Director, N.D. Agricultural Experiment Station; Professor of Plant Sciences, Ph.D., 1980, University of Missouri
• Gramig, Greta G., Assistant Professor of Plant Sciences, Ph.D., 2006, University of Wisconsin-Madison
• Grauzil-Bilska, Anna, Professor of Animal Sciences, Ph.D., 1983, University of Agriculture and Technology, Poland
• Grygiel, Carolyn E., Professor of Range Sciences, Ph.D., 1983, Colorado State University
• Gu, Yong Qiang, Adjunct Professor of Plant Sciences, Ph.D., 1994, University of California
• Gudnastad, Neil C., Professor of Plant Pathology, Ph.D., 1982, North Dakota State University
• Guo, Yong Qiang, Adjunct Professor of Agricultural and Biosystems Engineering, M.D., 1980, Kakatiya Medical College, India
• Guimaraes, Elcio P., Adjunct Professor of Plant Sciences, Ph.D., 1985, Iowa State University
• Gulya, Thomas J., Adjunct Professor of Plant Pathology, USDA, Ph.D., 1978, Iowa State University
• Gustafson, Cole R., Professor of Agribusiness and Applied Economics, Biofuels Economist, Ph.D., 1986, University of Illinois
• Gustas, Thomas R., Senior Lecturer of Veterinary and Microbiological Sciences, M.S., 1992, North Dakota State University
• Hadrich, Joleen, Assistant Professor of Agribusiness and Applied Economics, Ph.D., 2009, Michigan State University
• Haggart, Janice J., Instructor of Veterinary and Microbiological Sciences, M.S., 1996, North Dakota State University
• Hall, Clifford, Associate Professor of Cereal and Food Sciences; Associate Director Great Plains Institute of Food Safety, Ph.D., 1996, University of Nebraska
• Halvorson, Gary H., Adjunct Professor of Soil Science, Ph.D., 1979, Oregon State University
• Hammer, Carolyn J., Assistant Professor of Animal Sciences, D.V.M., 2002, Iowa State University, Ph.D., 2003, Iowa State University
• Hammond, James J., Professor of Plant Sciences, Ph.D., 1969, University of Nebraska
• Harreland, Gary A., Adjunct Professor of Cereal and Food Sciences, USDA, Ph.D., 1987, North Dakota State University
• Herrig, Christina L., Adjunct Professor in the School of Natural Resources, Ph.D., 2009, North Dakota State University
• Harris, Marion O., Professor of Entomology, Ph.D., 1986, Michigan State University
• Harmon, Jason P., Assistant Professor of Entomology, Ph.D., 2003, Purdue University
• Harrold, Robert L., Professor of Animal Sciences; Assistant Dean for Academic Programs, Ph.D., 1967, Purdue University
• Hatterman-Valentini, Harlene, Associate Professor of Plant Sciences, Ph.D., 1993, Iowa State University
• Haugse, Clayton N., Emeritus Professor of Animal Sciences, M.S., 1958, North Dakota State University
• Hearne, Robert R., Associate Professor of Agribusiness and Applied Economics, Ph.D., 1995, University of Minnesota
• Helgeson, Delmer L., Emeritus Professor of Agribusiness and Applied Economics, Ph.D., 1971, University of Nebraska
• Hellevang, Kenneth, Professor of Agricultural and Biosystems Engineering, Ph.D., 1989, North Dakota State University
• Helms, Theodore C., Professor of Plant Sciences, Ph.D., 1986, Iowa State University
• Herman, Dale E., Professor of Plant Sciences, Ph.D., 1966, Purdue University
• Herren, R. Stanley, Professor of Agribusiness and Applied Economics; Interim Chair, Ph.D., 1975, Duke University
• Hirming, Harvey J., Emeritus Professor of Agricultural and Biosystems Engineering, Ph.D., 1970, Iowa State University
• Hodur, Nancy M., Research Scientist in Agribusiness and Applied Economics, Ph.D., 2010, North Dakota State University
• Hoffman, Vernon L., Emeritus Professor of Agribusiness and Biosystems Engineering, Ph.D., 1969, North Dakota State University
• Holland, Neal S., Emeritus Professor of Plant Sciences, M.S., 1960, North Dakota State University
• Hopkins, David G., Associate Professor of Soil Science, Ph.D., 1997, North Dakota State University
• Horsley, Richard K., Professor of Plant Sciences, Ph.D., 1988, North Dakota State University
• Horvath, David P., Adjunct Professor of Plant Sciences, USDA, Ph.D., 1993, Michigan State University
• Hosford, Robert, Emeritus Professor of Plant Pathology, Ph.D., 1965, University of Arizona
• Hossain, Khawaja, Adjunct Professor of Plant Sciences, Ph.D., 1995, University of Wales
• Hovde, John, Adjunct Professor of Animal Sciences, B.S., 1969, North Dakota State University
• Howatt, Kirk A., Associate Professor of Plant Sciences, Ph.D., 1999, Colorado State University
• Hughes, Harlan, Emeritus Professor of Agribusiness and Applied Economics, Ph.D., 1971, University of Missouri
• Hulke, Brent S., Adjunct Professor of Plant Sciences, USDA, Ph.D., 2007, University of Minnesota
• Jackson, Jeremy, Assistant Professor of Agribusiness and Applied Economics, Ph.D., 2008, Washington University in St. Louis
• Jan, Chao C., Adjunct Professor of Plant Sciences, USDA, Ph.D., 1974, University of California-Davis
• Jaronsky, Stefan T., Adjunct Professor of Entomology, Ph.D., 1978, Cornell University
• Jauhar, P.P., Adjunct Professor of Plant Sciences, USDA, Ph.D., 1963, Indian Agricultural Institute, New Delhi, India
• Jenks, Brian M., Adjunct Professor of Plant Sciences, Ph.D., 1996, University of Nebraska-Lincoln
• Jia, Xinhua, Assistant Professor of Agricultural and Biosystems Engineering, Ph.D., 2004, University of Arizona
• Jiang, Yong, Research Assistant Professor for the Center for Agriculture, Policy and Trade Studies, 2007, University of Rhode Island
• Johnson, Burton L., Professor of Plant Sciences, Ph.D., 1993, North Dakota State University
• Johnson, Jerome E., Emeritus Professor of Agribusiness and Applied Economics, Ph.D., 1970, University of Minnesota
• Johnson, LaDon J., Emeritus Professor of Animal Sciences, Ph.D., 1965, Ohio State University
• Johnson, Paul J., Adjunct Professor of Entomology, Ph.D., 1992, University of Wisconsin-Madison
• Johnson, Robert L., Emeritus Professor of Animal Sciences, Ph.D., 1985, Iowa State University
• Johnson, Roger G., Emeritus Professor of Agribusiness and Applied Economics, Ph.D., 1962, University of Minnesota
• Kahl, Thomas J., Extension Horticulture Specialist, Plant Sciences, Ph.D., 1988, Virginia Polytechnic Institute & State University
• Kandel, Herman J., Associate Professor of Plant Sciences, Ph.D., 1995, North Dakota State University
• Kangas, Michael, Forest Health Specialist of Plant Pathology, M.S., 2002, Oregon State University
• Kemp, William P., Adjunct Professor of Entomology, Ph.D., 1984, University of Idaho
• Khaita, Margaret L., Associate Professor of Veterinary and Microbiological Sciences, Ph.D., 1999, The Ohio State University
• Khan, Khalil, Professor of Cereal and Food Sciences, Ph.D., 1977, University of Manitoba, Canada
• Khan, Mohamed, Associate Professor of Plant Pathology, Ph.D., 1998, Clemson University
• Kianian, Penny M. A., Assistant Professor of Practice of Plant Sciences, Ph.D., 2007, University of Minnesota
• Kianian, Shahryar, Associate Professor of Plant Sciences, Ph.D., 1990, University of California - Davis
• Kiesling, Richard L., Emeritus Professor of Plant Pathology, Ph.D., 1952, University of Wisconsin
• Kinzer, Kasia, Plant Pest Diagnostician, Plant Pathology, M.S., 1996, University of Minnesota
• Kirby, Donald R., Professor of Range Science; Director, School of Natural Resource Sciences, Ph.D., 1980, Texas A&M University
• Knodel, Janet J., Assistant Professor of Entomology, Ph.D., 2005, North Dakota State University
• Koch, Kim, B., Adjunct Professor of Animal Sciences, Ph.D., 1990, Kansas State University
• Koo, Won W., Professor of Agribusiness and Applied Economics; Director of the Center for Agriculture, Policy, and Trade Studies, Ph.D., 1974, Iowa State University
• Krupinsky, Joseph M., Adjunct Professor of Plant Pathology, USDA, Ph.D., 1977, Montana State University
• Kucera, Henry L., Emeritus Professor of Agricultural and Biosystems Engineering, M.S., 1959, North Dakota State University
• Lamey, H. Arthur, Emeritus Professor of Plant Pathology, Ph.D., 1965, Purdue University
• Lardy, Gregory P., Professor of Animal Sciences; Department Head, Ph.D., 1997, University of Nebraska
• Larsen, Ryan, Assistant Professor of Agribusiness and Applied Economics, 2009, Texas A&M University
• Laschkewitsch, Barbara A., Research Specialist in Plant Sciences, M.S., 2000, North Dakota State University
• Lee, Chiwon W., Professor of Plant Sciences, Ph.D., 1977, Purdue University
• Leistritz, F. Larry, Professor of Agribusiness and Applied Economics, Ph.D., 1970, University of Nebraska
• Leitich, Jay H., Professor of Natural Resources, Ph.D., 1981, University of Minnesota
• Leopold, Roger A., Adjunct Professor of Entomology, Ph.D., 1967, Montana State University
• Li, Deying M., Associate Professor of Plant Sciences, Ph.D., 2001, Iowa State University
• Li, Yin, Research Assistant Professor of Plant Sciences, Ph.D., 2006, Southern Yangtze University, P.R. China
• Liebig, Mark, Adjunct Professor of Soil Science, Ph.D., 1998, University of Nebraska
• Lim, Siew Hoon, Assistant Professor of Agribusiness and Applied Economics, Ph.D., 2005, University of Georgia
• Lin, Zhulu, Assistant Professor of Agricultural and Biosystems Engineering, Ph.D., 2003, University of Georgia
• Lindgren, Jon G., Emeritus Professor of Agribusiness and Applied Economics, Ph.D., 1968, University of Missouri
• Lindley, James A., Emeritus Associate Professor of Agricultural and Biosystems Engineering, Ph.D., 1972, Purdue University
• Logue, Catherine M., Professor of Veterinary and Microbiological Sciences, Ph.D., 1996, University of Ulster at Jordanstown, United Kingdom
• Lulai, Edward C., Adjunct Professor of Plant Sciences, USDA, Ph.D., 1978, North Dakota State University
• Lund, H. Roald, Emeritus Professor of Plant Sciences, Ph.D., 1965, Purdue University
• Lundstrom, Darnell R., Emeritus Professor of Agricultural and Biosystems Engineering, Ph.D., 1988, North Dakota State University
• Luther, Justin S., Adjunct Professor of Animal Sciences, Ph.D., 2006, North Dakota State University
• Lym, Rodney G., Associate Chair and Professor of Plant Sciences, Ph.D., 1979, University of Wyoming
• Maan, Shivcharan S., Emeritus Professor of Plant Sciences, Ph.D., 1961, Kansas State University
• Macchiavelli, Raul E., Adjunct Professor of Plant Sciences, Ph.D., 1992, Pennsylvania State University
• Mack, Lawrence E., Lecturer of Agribusiness and Applied Economics, Ph.D., 1969, University of Arizona
• MacRae, Ian V., Adjunct Professor of Entomology, Ph.D., 1994, Oregon State University
• Maddock-Carlin, Kasey R., Assistant Professor of Animal Sciences, Ph.D., 2005, Iowa State University
• Maddock, Robert J., Associate Professor of Animal Sciences, Ph.D., 2000, Texas A&M University
• Manthey, Frank A., Professor of Plant Sciences, Ph.D., 1985, North Dakota State University
• Marchello, Martin J., Emeritus Professor of Animal Sciences, Ph.D., 1968, Virginia Polytechnic Institute and State University
• Markell, Samuel G., Assistant Professor of Plant Pathology, Ph.D., 2007, University of Arkansas
• Maung, Thein, Research Assistant Professor for Agribusiness and Applied Economics, Ph.D., 2008, Texas A&M University
• McBride, Dean K., Emeritus Professor of Entomology, M.S., 1965, North Dakota State University
• McClean, Phillip E., Professor of Plant Sciences, Ph.D., 1982, Colorado State University
• McDonald, Clarence E., Emeritus Professor of Cereal Science, Ph.D., 1957, Purdue University
• McDonald, Hugh J., Emeritus Professor of Agribusiness and Applied Economics, Ph.D., 1969, Ohio State University - Columbus
• McEvoy, John, Assistant Professor of Veterinary and Microbiological Sciences, Ph.D., 2002, University of Ulster, Jordanstown Co., Antrim, Northern Ireland
• McKee, Gregory, Assistant Professor of Agribusiness and Applied Economics and Director of Quentin Burdick Center for Cooperatives, Ph.D., 2006, University of California - Davis
• McPhee, Kevin E., Associate Professor of Plant Sciences, Ph.D., 1995, University of Idaho
• McMullen, Marcia P., Professor of Plant Pathology, Ph.D., 1983, North Dakota State University
• McMullen, Michael S., Associate Professor of Plant Sciences, Ph.D., 1976, University of Minnesota
• Meinhardt, Steven, Associate Professor of Plant Pathology, Ph.D., 1984, University of Illinois, Urbana - Champaign
• Mergoum, Mohamed, Professor of Plant Sciences, Ph.D., 1991, Colorado State University
• Merrill, Stephen D., Adjunct Professor of Soil Science, Ph.D., 1976, University of California - Riverside
• Messersmith, Calvin G., Emeritus Professor of Plant Sciences, Ph.D., 1970, North Dakota State University
• Meyer, Dwain W., Professor of Plant Sciences; Interim Chair, Ph.D., 1970, Iowa State University
• Miljkovic, Dragan, Professor of Agribusiness and Applied Economics, Ph.D., 1996, University of Illinois
• Miller, James D., Emeritus Adjunct Professor of Plant Pathology, USDA, Ph.D., 1971, North Dakota State University
• Moilanen, Charles W., Emeritus Professor of Agricultural and Biosystems Engineering, M.S., 1963, North Dakota State University
• Moraghan, John T., Emeritus Professor of Soil Science, Ph.D., 1961, Iowa State University
• Myers, Deland, Professor and Director, School of Food Systems; Director, Great Plains Institute of Food Safety, Ph.D., 1985, Iowa State University
• Nalewaja, John D., Emeritus Professor of Plant Sciences, Ph.D., 1962, University of Minnesota
• Nelson, Berlin D., Jr., Professor of Plant Pathology, Ph.D., 1979, Washington State University
• Nelson, Donald C., Emeritus Professor of Plant Sciences, Ph.D., 1961, University of Minnesota
• Nelson, William C., Emeritus Professor of Agribusiness and Applied Economics, Ph.D., 1971, Ohio State University
• Newman, David J., Assistant Professor of Animal Sciences, Ph.D., 2009, North Dakota State University
• Nichols, Kristine, Adjunct Professor of Soil Science, Ph.D., 2003, University of Maryland
• Norland, Jack, Assistant Professor of Natural Resources Management, Ph.D., 2008, North Dakota State University
• Nowatzki, John F., Ag Machine Systems Specialist, Agricultural and Biosystems Engineering, M.S., 1974, North Dakota State University
• Nyren, Paul E., Adjunct Professor of Animal Sciences, M.S., 1975, Washington State University
• Nystuen, Peder A., Emeritus Associate Dean of Agriculture, M.S., 1956, North Dakota State University
• Ode, Paul J., Adjunct Professor of Entomology, Ph.D., 1994, University of Wisconsin
• Ohm, Jae-Bon, Adjunct Professor of Cereal and Food Sciences, Ph.D., 1996, Kansas State University
• Olson, Denise L., Adjunct Professor of Entomology, Ph.D., 1994, Kansas State University
• Olson, Frayne, Assistant Professor of Agribusiness and Applied Economics, Ph.D., 2007, University of Missouri
• O'Relley, Z. Edward, C.P.A., C.M.A., Ph.D., Emeritus Professor of Agribusiness and Applied Economics, Ph.D., 1972, University of Tennessee
• Osorno, Juan, Assistant Professor of Plant Sciences, Ph.D., 2006, North Dakota State University
• Ortiz, Carlos E., Adjunct Professor of Plant Sciences, Ph.D., 1993, University of Arkansas
• Ostenson, Thomas K., Emeritus Professor of Agribusiness and Applied Economics, M.S., 1966, North Dakota State University
• Overstreet, Laura F., Assistant Professor of Soil Science, Ph.D., 2005, North Carolina State University
• Panigrahi, Suranjan, Professor of Agricultural and Biosystems Engineering, Ph.D., 1992, Iowa State University
• Park, Chung S., Professor of Animal Sciences, Ph.D., 1975, Virginia Polytechnic Institute and State University
• Petry, Timothy A., Associate Professor of Agribusiness and Applied Economics, M.S., 1973, North Dakota State University
• Porch, Timothy, Adjunct Professor of Plant Sciences, Ph.D., 2001, Cornell University
• Pratt, George L., Emeritus Professor of Agricultural and Biosystems Engineering, Ph.D., 1967, Oklahoma State University
• Prischmann, Deirdre A., Assistant Professor of Entomology, Ph.D., 2005, Washington State University
• Preuss, Birgit, Assistant Professor of Veterinary and Microbiological Sciences, Ph.D., 1991, Institut fur Physiologische Chemie, Ruhr-Universitat, Bochum Germany
• Prunty, Lyle D., Professor of Soil Science, Ph.D., 1978, Iowa State University
• Pryor, Scott W., Assistant Professor of Agricultural and Biosystems Engineering, Ph.D., 2005, Cornell University
• Qi, Lili, Adjunct Professor of Plant Sciences, Ph.D. 1997, Nanjing Agricultural University, China
• Rahman, Shafiquur, Assistant Professor of Agricultural and Biosystems Engineering, Ph.D., 2004, University of Manitoba
• Ransom, Joel K., Professor of Plant Sciences, Ph.D., 1982, University of Minnesota
• Rasmussen, Jack B., Professor of Plant Pathology; Department Chair, Plant Pathology, Ph.D., 1987, Michigan State University
• Rathge, Richard W., Professor of Sociology and Agribusiness and Applied Economics, Ph.D., 1981, Michigan State University
• Redmer, Dale A., Professor of Animal Sciences, Ph.D., 1983, University of Missouri-Columbia
• Reff, Tommy L., Emeritus Professor of Agribusiness and Applied Economics, M.S., 1968, North Dakota State University
• Reinhiller, Merril J., Adjunct Professor of Veterinary and Microbiological Sciences, D.V.M., 1969, Iowa State University
• Rengifo, Judith, Research Assistant of Plant Pathology, M.S., 2003, University of Puerto Rico
• Reynolds, Lawrence P., University Distinguished Professor of Animal Sciences, Ph.D., 1983, Iowa State University
• Rice, Billy B., Emeritus Professor of Agribusiness and Applied Economics, M.S., 1965, North Dakota State University
• Richardson, Jimmie L., Adjunct Professor of Soil Science, Ph.D., 1974, Iowa State University
• Richman, Rachel L., Lecturer of Veterinary and Microbiological Sciences, M.S., 2002, University of Minnesota
• Rider, David A., Professor of Entomology, Ph.D., 1988, Louisiana State University
• Rinehart, Joseph, Adjunct Professor of Entomology, Ph.D., 1999, The Ohio State University
• Ringwall, Kris A., Adjunct Professor of Animal Sciences, Ph.D., 1985, Oklahoma State University
• Rivera, Viviana V., Research Assistant of Plant Pathology, M.S., 2000, North Dakota State University
• Roberts, David, Assistant Professor of Agribusiness and Applied Economics, Ph.D., 2009, Oklahoma State University
• Roodhanz, Richard, Adjunct Professor of Entomology, Ph.D., 1974, University of Wisconsin - Madison
• Saxowsky, David M., Associate Professor of Agribusiness and Applied Economics, J.D., 1979, Ohio State University
• Schauer, Christopher S., Adjunct Professor of Animal Sciences, Director, Hettinger Research Extension Center, Ph.D., 2003, Oregon State University
• Scherer, Thomas, Associate Professor of Agricultural and Biosystems Engineering, Ph.D., 1986, University of Minnesota
• Scholljegerdes, Eric J., Adjunct Professor of Animal Sciences, Ph.D., 2005, University of Wyoming
• Schroeder, Jerome (J.W.), Associate Professor of Animal Sciences, Ph.D., 1999, North Dakota State University
• Schroeder, Stephan A., Adjunct Professor of Soil Science, Ph.D., 1979, Purdue University
• Schuh, Jane, Assistant Professor of Veterinary and Microbiological Sciences, Ph.D., 2000, North Dakota State University
• Schwarz, Paul B., Professor of Plant Sciences, Ph.D., 1987, North Dakota State University
• Secor, Gary A., Professor of Plant Pathology, Ph.D., 1978, University of California - Davis
• Sedivec, Kevin K., Professor of Range Sciences, Ph.D., 1994, North Dakota State University
• Seiler, Gerald J., Adjunct Professor of Plant Sciences, USDA, Ph.D., 1980, North Dakota State University
• Shaik, Saleem, Assistant Professor of Agribusiness and Applied Economics, Ph.D., 1998, University of Nebraska-Lincoln
• Simsek, Senay, Assistant Professor of Plant Sciences, Ph.D., 2006, Purdue University
• Slanger, William D., Professor of Animal Sciences; Director of Institutional Research and Analysis, Ph.D., 1975, Cornell University
• Sleeper, Bayard P., Emeritus Professor of Veterinary and Microbiological Sciences, Ph.D., 1951, University of California
• Smith, David J., Adjunct Professor of Animal Sciences, Ph.D., 1990, Washington State University
• Smith, M. Herbert, Emeritus Professor of Veterinary and Microbiological Sciences, D.V.M., 1962, University of Minnesota, Ph.D., 1974, Iowa State University
• Smith, Ronald C., Professor of Plant Sciences, Ph.D., 1973, The Ohio State University
• Solseng, Elton G., Instructor of Agricultural and Biosystems Engineering, M.S., 1980, North Dakota State University
• Sowokinos, Joseph R., Adjunct Professor of Plant Sciences; USDA, Ph.D., 1969, University of North Dakota
• Spilde, LeRoy A., Emeritus Associate Professor of Plant Sciences, Ph.D., 1975, North Dakota State University
• Stackler, Jeff M., Assistant Professor of Plant Sciences, Ph.D., 2008, The Ohio State University
• Stack, Robert W., Emeritus Professor of Plant Pathology, Ph.D., 1976, Cornell University
• Staricka, James A., Adjunct Professor of Soil Science, Ph.D., 1990, University of Minnesota
• Statler, Glen D., Emeritus Professor of Plant Pathology, Ph.D., 1969, University of Wyoming
• Steele, Dean D., Associate Professor of Agricultural and Biosystems Engineering, Ph.D., 1991, University of Minnesota
• Stegman, Earl C., Emeritus Professor of Agricultural and Biosystems Engineering, Ph.D., 1965, Michigan State University
• Stokka, Gerald, Adjunct Professor of Animal Sciences, D.V.M., 1982, Iowa State University
• Stoltenow, Charles L., Associate Professor of Animal Sciences, D.V.M., 1985, Iowa State University
• Strange, James P., Adjunct Professor of Entomology, Ph.D., 2005, Washington State University
• Suttle, Jeffrey C., Adjunct Professor of Plant Sciences; USDA, Ph.D., 1979, Michigan State University
• Swanson, Tara J., Equine Science Lecturer, Department of Animal Sciences, B.S., 2004, University of Nebraska-Lincoln
• Swenson, Andrew L., Farm and Family Resource Management Specialist, M.S., 1981, North Dakota State University
• Tanaka, Donald L., Adjunct Professor of Soil Science, Ph.D., 1980, University of Nebraska
• Taylor, Bret J., Adjunct Professor of Animal Sciences, Ph.D., 2000, New Mexico State University
• Taylor, Ray, Research Scientist in Plant Pathology, Ph.D., 1986, North Dakota State University
• Taylor, Richard D., Research Scientist in Agribusiness and Applied Economics, M.S., 1990, North Dakota State University
• Thompson, Asunta L., Associate Professor of Plant Sciences, Ph.D., 1998, University of Idaho
• Thostenson, Andrew, Pesticide Program Specialist, Extension Service, M.S., 1984, University of Idaho
• Tilmon, Kelley, Adjunct Professor of Entomology, Ph.D., 2001, Cornell University
• Tilton, James E., Emeritus Professor of Animal Sciences, Ph.D., 1966, Oklahoma State University
• Treat, Daniel P., Adjunct Professor of Veterinary and Microbiological Sciences, D.V.M., 1971, University of Minnesota
• Trooien, Todd P., Adjunct Professor of Agricultural Engineering, Ph.D., 1988, Colorado State University

NDSU Undergraduate Bulletin 2010-2011
Ambrosio, Thomas, Associate Professor of Political Science, Ph.D., 2000, University of Virginia
Anderson, Gerald D., Emeritus Professor of History, Ph.D., 1973, University of Iowa
Andreiń, Carol J., Professor of Classical Languages, Cardinal Muench Seminary, Ph.D., 1979, University of Minnesota
Archbold, Carol A., Associate Professor of Criminal Justice, Ph.D., 2002, University of Nebraska - Omaha
Barrett, Tracy C., Assistant Professor of History, Ph.D., 2007, Cornell University
Baur, Nicholas G., Associate Professor of Political Science, Ph.D., 2003, Loyola University
Beck, Stephenson J., Assistant Professor of Communication, Ph.D., 2008, University of Kansas
Bergeson, Brady, Lecturer in English, M.F.A., 2006, Hamline University
Biga, Chris F., Assistant Professor of Sociology, Ph.D., 2006, Washington State University
Birmingham, Elizabeth, Associate Professor of English, Ph.D., 2000, Iowa State University
Bishop, Carol K., Lecturer and Coordinator of Intensive English Language Program, M.A., 1988, University of California, Los Angeles
Bonfield, June P., Emerita Professor of English, Ph.D., 1969, University of Texas
Bovard, Richard W., Emeritus Professor of English, Ph.D., 1973, University of Denver
Brekke, Jeremy, Associate Professor of Music, D.A., 2004, University of Northern Colorado
Brkic, Jovan, Emeritus Professor of Philosophy, Ph.D., 1959, Columbia University
Bromley, Kimberle A., Professor of Visual Arts, M.F.A., 1986, Southern Illinois University
Brooks, Kevin A., Associate Professor of English; Head, Department of English, Ph.D., 1997, Iowa State University
Brown, Muriel J., Associate Professor of English, Ph.D., 1971, University of Nebraska
Browning, Sarah, Assistant Professor of Criminal Justice, Ph.D., 2007, University of Toronto

Van Amburg, Gerald L., Adjunct Professor of Range Sciences, Ph.D., 1969, Texas A&M University
Vangsness, Elmer C., Emeritus Professor of Agribusiness and Applied Economics, M.S., 1963, North Dakota State University
Venette, James R., Professor of Plant Pathology; Associate Dean for Academic Programs, Ph.D., 1975, University of Minnesota
Voldseth, Richard A., Adjunct Professor in the School of Natural Resource Sciences, Ph.D., 2004, South Dakota State University
Vonnahme, Kimberly A., Associate Professor of Animal Sciences, Ph.D., 2003, University of Wyoming
Wachenheim, Cheryl, Professor of Agribusiness and Applied Economics, Ph.D., 1994, Michigan State University
Wagner, Sarah A., Associate Professor of Animal Sciences, D.V.M., 1994, Michigan State University, Ph.D., 2003, Iowa State University
Wahl, Thomas L., Professor of Agribusiness and Applied Economics, Ph.D., 1989, Iowa State University
Walla, James A., Research Associate in Plant Pathology, Ph.D., 1995, North Dakota State University
Wallace, Jacqueline M., Adjunct Professor of Animal Sciences, Ph.D., 1986, University of Aberdeen, Scotland
Wessl-Beaver, Linda, Adjunct Professor of Plant Sciences, Ph.D., 1981, University of Illinois - Urbana
Whited, Dean A., Emeritus Professor of Plant Sciences, Ph.D., 1967, North Dakota State University
Wiesenborn, Dennis P., Professor of Agricultural and Biosystems Engineering, Ph.D., 1988, Rice University
Williams, Benjamin J., Instructor, Department of Animal Sciences, M.S., 2009, University of Nebraska
Williams, Michael Dale, Seedstocks Director, Plant Sciences, Ph.D., 1978, University of Arizona - Tucson
Wilson, William W., Distinguished Professor of Agribusiness and Applied Economics, Ph.D., 1980, University of Manitoba, Canada
Windels, Carol E., Adjunct Professor of Plant Pathology, Ph.D., 1980, University of Minnesota
Wolf-Hall, Charlene, Professor of Veterinary and Microbiological Sciences; Assistant Dean, College of Graduate and Interdisciplinary Studies, Ph.D., 1995, University of Nebraska - Lincoln
Xu, Steven S., Adjunct Professor of Plant Sciences, USDA, Ph.D., 1994, North Dakota State University
Yocum, George D., Adjunct Professor of Entomology, Ph.D., 1992, Ohio State University
Youngs, Vernon L., Emeritus Professor of Cereal Science, USDA, Ph.D., 1965, North Dakota State University
Zeleznik, Joseph D., Extension Forester, School of Natural Resource Sciences, Ph.D., 2001, Michigan State University
Zhang, Qi, Assistant Professor of Plant Sciences, Ph.D., 2007, Kansas State University
Zhong, Shaobin, Assistant Professor of Plant Pathology, Ph.D., 2000, North Dakota State University
Zollinger, Richard K., Professor of Plant Sciences, Ph.D., 1989, Michigan State University
Zembriski, Joseph C., Emeritus Professor of Soil Science, Ph.D., 1951, University of Wisconsin
Zuk, Alan J., Assistant Professor of Plant Sciences, Ph.D., 2005, Kansas State University

Browning, Sarah, Assistant Professor of Criminal Justice, Ph.D., 2007, University of Toronto
• Brunton, Bill B., Emeritus Professor of Anthropology, Ph.D., 1974, Washington State University
• Burnett, Ann, Professor of Communication; Director of Women and Gender Studies, Ph.D., 1986, University of Utah
• Bye, John E., Instructor of Library Science; Curator of North Dakota Institute for Regional Studies; Archivist for North Dakota State University, M.A., 1973, University of Wisconsin
• Canku, Clifford, Assistant Professor of Practice in English, M.Div, 1984, University of Dubuque Theological Seminary, Dubuque, IA
• Cate, A. Catherine, Emerita Professor of English, Ph.D., 1945, University of Michigan
• Cavins, J. Wana, Senior Lecturer of English, B.A., 1979, University of Evansville, Indiana
• Clark, Jeffrey T., Professor of Anthropology, Ph.D., 1987, University of Illinois
• Collins, Ross F., Professor of Mass Communication, Ph.D., 1992, University of Cambridge, Britain
• Cooley, Dennis R., Associate Professor of Philosophy, Ph.D., 1995, University of Rochester
• Corwin, Patricia A., Senior Lecturer of Sociology, M.A., 1972, North Dakota State University
• Cosgrove, William E., Emeritus Professor of English, Ph.D., 1972, University of Iowa
• Cox, John K., Professor of History; Head of History, Philosophy and Religious Studies, Ph.D., 1995, Indiana University
• Crawford, Elizabeth Crisp, Assistant Professor of Communication, Ph.D., 2007, University of Tennessee, Knoxville
• Cwiak, Carol, Assistant Professor of Emergency Management, J.D., 1995, Western State University
• Danbom, David B., Emeritus Professor of History, Ph.D., 1974, Stanford University
• Dinu, Alexandru, Lecturer in Anthropology, Ph.D., 2006, University of Wisconsin-Madison
• Dobrusky, Pavel, Assistant Professor of Theatre, Certified Independent Designer, 1983, Academy of Fine Arts, Prague, Cz
• Ebert, Jessica O., Senior Lecturer in English, M.A., 2004, New York University
• Eidem, Orville M., Jr., Emeritus Professor of Music, M.M.Ed., 1960, Vander Cook College of Music
• Enger, Jennie, Lecturer in English, M.A., 2009, North Dakota State University
• Engler, Mark, Assistant Professor of Theatre, M.F.A., 1998, University of Wisconsin-Madison
• Flood, Anthony, Associate Professor of Philosophy, Cardinal Muench Seminary, Ph.D., 2003, University of Oklahoma
• Fricker, Linda M., Senior Lecturer of English; Academic Advisor, C.A.S., 1986, Northern Illinois University
• Froelich, Andrew L., Professor of Music, D.M.A., 1988, Michigan State University
• Fuglsby, Brandi, Lecturer of English, M.A., 2007, South Dakota State University
• Goreham, Gary A., Professor of Sociology; Ph.D., 1985, South Dakota State University
• Groberg, Kristi A., Assistant Professor of Visual Arts, Ph.D., 1999, University of Minnesota
• Grollman, Stephanie, Lecturer of German, Ph.D., 1998, University of Iowa
• Groves, Robert W., Professor of Music, Ph.D., 1981, University of Iowa
• Hageman, Jeanne K., Associate Professor of French; Chair, Department of Modern Languages, Ph.D., 1991, University of Wisconsin - Madison
• Hall, Lisa Cox, Assistant Professor of Sociology, Ph.D., 2006, University of Kansas-Lawrence
• Hanson-Dittmer, Louise, Lecturer of English, M.Ed., 1998, North Dakota State University
• Harvey, Mark, Professor of History, Ph.D., 1986, University of Wyoming
• Hawley, D. Carlton, Associate Professor of Spanish, Ph.D., 1999, University of Iowa
• Helgeland, John A., Professor of History and Religion, Ph.D., 1973, University of Chicago
• Helstern, Linda, Associate Professor of English, Ph.D., 2001, Southern Illinois University
• Homan, Paul W., Associate Professor of French; Coordinator, Scholars Program, Ph.D., 1988, University of Kansas
• Horvick, Lori A., Associate Professor of Theatre Arts, M.F.A., 1994, Northern Illinois University
• Isern, Thomas D., Distinguished Professor of History, Ph.D., 1977, Oklahoma State University
• Janecek, Kibbourn L., Emeritus Professor of Library Science, M.A., 1951, University of Denver
• Jensen, Jessica A., Lecturer of Emergency Management, M.S., 2008, North Dakota State University
• Johnson, Gayle, Lecturer of English, M.A., 1999, North Dakota State University
• Johnson, Roy D., Emeritus Professor of Music, M.M., 1954, University of Illinois
• Johnson, Sigurd, Associate Professor of Music; Director of Sports Bands, D.M.A., 1999, University of Memphis
• Johnston, Eunice, Senior Lecturer of English; Academic Advisor for English, M.A., 1982, North Dakota State University
• Jones, Robert J., Professor of Music, D.M.A., 1991, University of Oklahoma
• Justitz, Gerritdina, Associate Professor of History, Ph.D., 1996, University of California, San Diego
• Kappling, Kent, Associate Professor of Visual Arts, M.F.A., 1991, University of Iowa
• Kaye, Denise, Lecturer in Communication, Ph.D., 2006, Southern Illinois University
• Kitch, Travis, Lecturer in Anthropology, M.A., 2003, North Dakota State University
• Klenow, Daniel J., Professor of Emergency Management; Chair of Sociology, Anthropology, and Emergency Management, Ph.D., 1977, University of Notre Dame
• Kloberdanz, Timothy J., Emeritus Professor of Anthropology, Ph.D., 1986, Indiana University
• Koenig, Hardy, Assistant Professor of Theatre, M.F.A., 1994, University of North Carolina at Greensboro
• Krishnam, Ramakrishnan S., Professor of English; Associate Vice President for Academic Affairs, Ph.D., 1981, University of Nebraska
Larew, Donald E., Emeritus Professor of Theatre Arts, M.F.A., 1969, University of Iowa
Law, Bill, Assistant Director, Fine Arts; Lecturer of Music, M.A., 1994, Minnesota State University Moorhead
Lifton, Paul, Associate Professor of Theatre Arts, Ph.D., 1985, University of California, Berkeley
Lindgren, H. Elaine, Emerita Professor of Sociology, Ph.D., 1970, University of Missouri
Littlefield, Robert S., Professor of Speech Communication; Associate Head of Communication, Ph.D., 1983, University of Minnesota
Lodewyk, Richard, Lecturer in Communication, M.S., 2007, North Dakota State University
Lyons, Michael J., Emeritus Professor of History, Ph.D., 1969, University of Minnesota
Mack, Kyle D., Associate Professor of Music, D.A., 1992, Ball State University
Majdik, Zoltan P., Assistant Professor of Communication, Ph.D., 2008, University of Southern California
Mara, Andrew Flood, Associate Professor of English, Ph.D., 2003, University of New Mexico
Mara, Miriam O’Kane, Associate Professor of English, Ph.D., 2003, University of New Mexico
Matchie, Thomas F., Emeritus Professor of English, Ph.D., 1974, University of Wisconsin
Maylath, Bruce, Professor of English, Ph.D., 1994, University of Minnesota
McDonald, Thomas D., Professor of Criminal Justice, Ph.D., 1972, Southern Illinois University
McEnery, Deona, Lecturer of English, M.A., 2001, North Dakota State University
Meister, Mark A., Associate Professor of Speech Communication, Ph.D., 1997, University of Nebraska
Miller, John, Professor of Music; Director, Division of Fine Arts, Ph.D., 1992, Northwestern University
Miller, Jo Ann, Distinguished Professor of Music; Director of Choral Activities, D.M.A., 1989, Conservatory of Music, University of Cincinnati
Miller, Michael M., Assistant Professor of Library Science; Germans from Russia Bibliographer, M.Ed., 1967, University of North Dakota
Moe, Charlotte, Lecturer in Music, D.M.A., 2008, North Dakota State University
Monroe, Douglas, Assistant Professor of Music, DMA, 2008, The Ohio State University
Monzingo, John E., Emeritus Professor of Political Science, Ph.D., 1976, Claremont Graduate School
Morris, Bradley, Lecturer of Philosophy, M.A., 1992, University of Iowa
Nelson, Kjersten R., Assistant Professor of Political Science, Ph.D., 2009, University of Minnesota-Twin Cities
Nelson, Paul E., Professor and Head of Communication, Ph.D., 1968, University of Minnesota
Nichols, Cindy J., Senior Lecturer of English, M.F.A., 1981, University of Iowa
Noone, Katherine, Lecturer of Music, D.M.A., 2007, North Dakota State University
Norris, Jim D., Professor of History, Ph.D., 1992, Tulane University
O’Connor, Amy, Associate Professor of Communication, Ph.D., 2004, Purdue University
O’Connor, Patricia, Emerita Professor of Library Science, M.A.L.S., 1956, College of St. Catherine
O’Connor, Robert, Professor of English, Ph.D., 1979, Bowling Green State University
O’kigbo, Charles, Professor of Communication, Ph.D., 1982, Southern Illinois University
Olert, Warren D., Associate Professor of Music; Director of Bands, Ph.D., 1992, Florida State University
Olson, Robert W., Emeritus Professor of Music, D.M.A., 1973, University of Illinois
Patnode, Matthew A., Associate Professor of Music, D.M.A., 2000, Arizona State University
Pearson, Carol, Associate Professor of Spanish, Ph.D., 1998, University of New Mexico
Pearson, Judy C., Professor of Communication; Associate Dean of Arts, Humanities, and Social Sciences, Ph.D., 1975, Indiana University
Peet, Howard D., Emeritus Professor of English, M.S., 1965, Moorhead State University
Peterson, Larry R., Professor of History, Ph.D., 1978, University of Minnesota
Platt, Carrie Anne, Assistant Professor of Communication, Ph.D., 2008, University of Southern California
Pull, Mary E., Senior Lecturer of English; Director of Center for Writers, M.A., 2003, North Dakota State University
Query, Joy M., Emerita Professor of Sociology and Psychology, Ph.D., 1960, University of Kentucky
Raile, Amber N.W., Assistant Professor of Communication, Ph.D., 2008, Michigan State University
Raile, Eric, Assistant Professor of Political Science, Ph.D., 2008, Michigan State University
Rathge, Richard W., Professor of Sociology and Agribusiness and Applied Economics; Director of State Data Center, Ph.D., 1981, Michigan State University
Richardson, B. Lou, Emerita Professor of Mass Communication, M.S., 1966, North Dakota State University
Richardson, Gerald A., Emeritus Professor of Mass Communication, M.A., 1967, University of Washington
Riley, Thomas J., Professor of Anthropology; Dean, College of Arts, Humanities and Social Sciences; Director, Institute for Regional Studies, Ph.D., 1973, University of Hawaii
Saar, Cynthia L., Lecturer of French, M.A., 1980, Middlebury College
Sandland, Julie A., Lecturer of English, M.A., 1990, North Dakota State University
Sassi, Enrico, Senior Lecturer in English, M.F.A., 1997, University of Alaska Fairbanks
Sassi, Kelly, Assistant Professor of English, Ph.D., 2008, University of Michigan
Sather-Wagstaff, Joy, Assistant Professor of Anthropology, Ph.D., 2007, University of Illinois Urbana-Champaign
• Scott, Maureen T., Lecturer of English, M.A., 1989, University of North Dakota
• Shaw, Richard M., Emeritus Professor of English, Ph.D., 1985, Ball State University
• Sherman, William C., Emeritus Professor of Sociology, M.A., 1965, University of North Dakota
• Silkenat, David, Assistant Professor of History, Ph.D., 2007, University of North Carolina - Chapel Hill
• Slobin, Kathleen, Emerita Professor of Sociology, Ph.D., 1991, University of California, San Francisco
• Smith, Leretta, Lecturer in Sociology, Ph.D., 2006, South Dakota State University
• Soria-Dufner, Carmen, Lecturer of Spanish, M.A., 1980, University of Northern Iowa
• Stichman, Amy J., Assistant Professor of Criminal Justice, Ph.D., 2003, University of Cincinnati
• Stickney, Gwen, Associate Professor of Spanish, Ph.D., 2004, Indiana University, Bloomington
• Strand, Michael J., Associate Professor and Department Head of Visual Arts, M.F.A., 1999, University of Nebraska, Lincoln
• Strandness, Jean, Emerita Professor of English, Ph.D., 1974, Michigan State University
• Sublett, Virginia, Professor of Music, D.M.A., 1997, University of California, San Diego
• Sullivan, Dale L., Professor of English, Ph.D., 1988, Rensselaer Polytechnic Institute
• Swenson, David G., Associate Professor of Visual Arts, M.F.A., 1992, University of Minnesota
• Taggart, Amy Rupiper, Associate Professor of English, Ph.D., 2002, Texas Christian University
• Temanson, Kaye, Lecturer of English, M.A., 2001, North Dakota State University
• Theile, Verena, Assistant Professor of English, Ph.D., 2006, Washington State University
• Thomas, Kathryn A., Instructor of Library Science; Reference and Documents Librarian, M.A., 1974, University of Denver
• Thompson, Kevin M., Professor of Criminal Justice; Head of Department of Criminal Justice and Political Science, Ph.D., 1986, University of Arizona
• Tollefson, Wayne E., Emeritus Professor of Art, M.A., 1962, Michigan State University
• Totten, Gary, Associate Professor of English, Ph.D., 1998, Ball State University
• Trautwein, Charlotte G., Emerita Professor of Music, M.S., 1968, University of Illinois
• Trump, Andrew B., Lecturer of English, M.A., 1984, South Dakota State University
• Tunstall, William, Lecturer of English, M.A., 2001, North Dakota State University
• Ubbelohde, E. James, Emeritus Professor of Speech Communication, M.A., 1961, New York University
• Varland, Rooth, Associate Professor of Theatre Arts, M.F.A., 1989, Northwestern University
• Waid, Courtney A., Assistant Professor of Criminal Justice, Ph.D., 2006, Florida State University
• Ward, Steve A., Emeritus Professor of English, M.A., 1964, North Dakota State University
• Wargo, Vincent, Assistant Professor of Philosophy, Cardinal Muench Seminary, Ph.D., 2005, University of Leuven, Belgium
• Weber, Christina, Assistant Professor of Sociology, Ph.D., 2005, State University of New York - Buffalo
• Weber, Michael J., Associate Professor of Music, A.Mus.D., 1990, University of Arizona
• Whitsel, Christopher, Assistant Professor of Sociology, Ph.D., 2009, Indiana University, Bloomington
• Wood, Robert A., Emeritus Professor of Political Science, Ph.D., 1983, University of Missouri - Columbia
• Yoon, Dong Keun, Assistant Professor of Emergency Management, Ph.D., 2007, Cornell University
• Youngs, George A., Professor of Emergency Management; Director of Social Science Research Center, Ph.D., 1981, University of Iowa
• Yu, Nan, Assistant Professor of Communication, Ph.D., 2009, Penn State University

College of Business

• Altenburg, Karl, Assistant Professor of Management Information Systems, Ph.D., 1999, North Dakota State University
• Anderson, Margaret, Associate Professor of Accounting, Ph.D., 1989, Indiana University
• Bahrami, Bahman, Professor of Economics, Ph.D., 1983, University of Nebraska, Lincoln
• Bitzan, John, Assistant Professor of Management, Ph.D., 1997, University of Wisconsin - Milwaukee
• Brown, Paul R., C.P.A., Senior Lecturer of Business Administration, M.B.A., 1989, North Dakota State University
• Bowlin, William, Professor of Accounting; Department Head, Ph.D., 1984, University of Texas at Austin
• Clifton, James W., C.P.A., Assistant Professor of Accounting Practice, M.Acc., 1988, University of North Dakota
• Dietz, Donna K., Associate Professor of Accounting Practice; MAcc Director, Ph.D., 1989, University of North Dakota
• Dowdell, Thomas, Assistant Professor of Accounting, Ph.D., 2004, Temple University
• Eisele, C. Frederick, Emeritus Professor of Business Administration, Ph.D., 1971, University of Iowa
• Froelich, Karen A., Associate Professor of Management; MBA Director, Ph.D., 1994, University of Minnesota
• Glatt, Janice O., C.P.A., Eisele Teaching Fellow, M.B.A., 1985, North Dakota State University
• Herda, David, CPA, Assistant Professor of Accounting, Ph.D., 2010, The University of Texas at Arlington
• Hong, David, Assistant Professor of Accounting, Ph.D., 2008, Drexel University
• Huseynov, Fariz, Assistant Professor of Finance, Ph.D., 2009, University of Memphis
• Jacobson, Sarah W., Emeritus Professor of Business Administration, Ph.D., 1991, University of Massachusetts, Amherst
• Johnson, Ronald D., Professor; Dean of College of Business, D.B.A., 1970, Indiana University
• Jones, Joseph M., Associate Professor of Marketing, Ph.D., 1994, University of Missouri - Columbia
• Klam, Bonnie K., Associate Professor of Accounting, Ph.D., 1999, Virginia Commonwealth University
• Knoepfle, Terry W., Associate Professor of Business Law, J.D., 1981, University of North Dakota
• Krishnakumar, Sukumarakurup, Assistant Professor of Management, Ph.D., 2008, Virginia Polytechnic Institute and State University
• Krush, Michael, Assistant Professor of Marketing, Ph.D., 2009, University of Nebraska - Lincoln
• Lehmburg, Derek, Assistant Professor of Management, M.B.A., 1999, INSEAD, Fontainebleau, France
• Latimer, Joseph, Instructor of Management Information Systems, M.B.A., 1988, California Polytechnic State University
• Li, Jin, Assistant Professor of Marketing, Ph.D., 2007, University of Alberta
• Macintosh, Gerrard, Professor of Marketing; Department Chair, Ph.D., 1992, University of Nebraska - Lincoln
• Peterson, Tim, Professor of Management; Associate Dean, Ph.D., 1988, Texas A & M University
• Pillai, Rajani Ganesh, Assistant Professor of Marketing, Ph.D., 2008, University of Central Florida
• Rumph, R. Douglas, Assistant Professor of Management, Ph.D., 1999, University of South Carolina
• Schiebelhut, John H., Emeritus Professor of Business Administration, Ph.D., 1970, University of Oregon
• Snyder, Herbert, Associate Professor of Accounting, Ph.D., 1994, Syracuse University
• Stevens, Charles D., Associate Professor of Management, Ph.D., 1998, University of Kansas
• Stockman, H. Donald, C.P.A., Emeritus Professor of Business Administration, M.S.B.A., 1965, University of North Dakota
• Szemerekovsky, Joseph, Associate Professor of Management, Ph.D., 2003, Case Western Reserve University
• Tangpong, Charnchai, Associate Professor of Management, Ph.D., 2002, Southern Illinois University Carbondale
• Tian, Rulin, Assistant Professor of Finance, Ph.D., 2008, Georgia State University
• Traub, Rodney D., Associate Professor of Management, Ph.D., 1994, Purdue University
• Wright, Newell D., Director, Center for Global Initiatives; Professor of Marketing, Ph.D., 1993 Virginia Tech
• Zhang, David, Associate Professor of Finance, Ph.D., 2001, Syracuse University
• Zhang, Limin, Assistant Professor of Management Information Systems, Ph.D., 2005, University of Arizona

---

**College of Engineering and Architecture**

• Ababei, Cristinel, Assistant Professor of Electrical and Computer Engineering, Ph.D., 2004, University of Minnesota
• Abdelrahman, Magdy, Associate Professor of Civil Engineering, Ph.D., 1996, University of Illinois - Urbana
• Akhatov, Iskander, Professor of Mechanical Engineering, Ph.D., 1983, Lomonosov University of Moscow
• Aly Ahmed, Bakr, Assistant Professor of Architecture and Landscape Architecture, M.Arch., 1999, Minia University, Egypt, Ph.D., 2002, Virginia Tech
• Andersen, Donald A., Associate Professor of Civil Engineering, Eng.D., 1982, Texas A&M University
• Anderson, Edwin M., Emeritus Professor of Electrical Engineering, M.S., 1949, University of Denver, M.S., 1972, North Dakota State University
• Asa, Eric, Assistant Professor of Construction Management and Engineering, Ph.D., 2002, University of Alberta
• Azarim, Fardad, Assistant Professor of Mechanical Engineering, Ph.D., 2007, University of Toronto
• Backer, Leslie F., Associate Professor of Agricultural and Biosystems Engineering; Department Chair, M.S., 1972, North Dakota State University
• Bakken, Stewart E., Emeritus Professor of Mechanical Engineering, M.S., 1961, North Dakota State University
• Barnes, William A., Emeritus Professor of Electrical Engineering, Ph.D., 1968, University of Wyoming
• Barnthouse, Mark, Assistant Professor of Architecture and Landscape Architecture, M.Arch., 1988, Pratt Institute
• Bezbaruah, Achintya, Assistant Professor of Civil Engineering, Ph.D., 2002, University of Nebraska - Lincoln
• Bilen-Green, Canan, Professor of Industrial and Manufacturing Engineering, Ph.D., 1998, University of Wyoming
• Bon, Thomas A., Senior Lecturer of Agricultural and Biosystems Engineering, Ph.D., 2003, North Dakota State University
• Booker, Darryl, Associate Professor of Architecture and Landscape Architecture, M.Arch., 1979, University of Colorado
• Bora, Ganesh, Assistant Professor of Agricultural and Biosystems Engineering, Ph.D., 2005, Kansas State University
• Braaten, Benjamin, Assistant Professor of Electrical and Computer Engineering, Ph.D., 2009, North Dakota State University
• Christenson, Mike, Assistant Professor of Architecture and Landscape Architecture, M.Arch., 1997, University of Minnesota
• Chu, Xuefeng, Assistant Professor of Civil Engineering, Ph.D., 2002, University of California - Davis
• Cook, John R., Associate Professor of Industrial and Manufacturing Engineering, Ph.D., 1991, Purdue University
• Crutchfield, David, Assistant Professor of Architecture and Landscape Architecture, M.Arch., 2004, University of Texas
• DeSaram, Darshi, Assistant Professor of Construction Management and Engineering, Ph.D., 2002, Hong Kong Polytechnic University
• Famulari, Stevie, Assistant Professor of Architecture and Landscape Architecture, M.L.A., 2000, State University of New York
• Farahmand, Kambiz, Professor of Industrial and Manufacturing Engineering; Department Chair, Ph.D., 1992, University of Texas - Arlington
• Faulkner, Don C., Associate Professor of Architecture and Landscape Architecture, M.Arch., 1975, University of Utah
• Fischer, Heather, Lecturer of Architecture and Landscape Architecture, B.Arch., 2005, North Dakota State University
• Gajan, Sivapalan, Assistant Professor of Civil Engineering, Ph.D., 2006, University of California, Davis
• Gao, Zhili, Assistant Professor of Construction Management and Engineering, Ph.D., 2004 Iowa State University
• Godsey, Paul, Professor of Architecture and Landscape Architecture, Ph.D., 1983, University of California - Los Angeles
• Glower, Jacob, Associate Professor of Electrical and Computer Engineering; Interim Department Chair, Ph.D., 1988, Ohio State University
• Gorsen, Sherman P., Associate Professor of Mechanical Engineering, Ph.D., 1977, Texas A&M University
• Green, Roger, Associate Professor of Electrical and Computer Engineering, Ph.D., 1998, University of Wyoming
• Han, Chung-Souk, Assistant Professor of Civil Engineering, Ph.D., 1999, University of Hannover, Germany
• Hatlen, Vincen, Emeritus Professor of Architecture, M. Arch, 1963, University of Michigan
• Hellveev, Kenneth J., Professor of Agricultural and Biosystems Engineering, Ph.D., 1989, North Dakota State University
• Henderson, Allen J., Emeritus Professor of Industrial and Manufacturing Engineering, Ph.D., 1968, Iowa State University
• Hunt, LTC Curtis, Prof. of Aerospace Studies, MBA, 1999, Chapman University
• Isgrig, Elvin, Emeritus Professor of Industrial and Manufacturing Engineering, M.S., 1983, North Dakota State University
• Jenkinson, Harold L., Emeritus Professor of Architecture, M.Arch., 1972, University of Illinois
• Jia, Xinhua, Assistant Professor of Agricultural and Biosystems Engineering, Ph.D., 2004, University of Arizona
• Kallmeyer, Alan R., Professor of Mechanical Engineering; Department Chair, Ph.D., 1995, University of Iowa
• Karami, Ghodratollah, Professor of Mechanical Engineering, Ph.D., 1984, Imperial College of Science and Technology, University of London
• Katti, Dinesh R., Professor of Civil Engineering, Ph.D., 1991, University of Arizona
• Katti, Kalpana, Professor of Civil Engineering, Ph.D., 1996, University of Washington
• Katti, Rajendra, Professor of Electrical and Computer Engineering, Ph.D., 1991, Washington State University
• Kavasseri, Rajesh, Associate Professor of Electrical and Computer Engineering, Ph.D., 2002 Washington State University
• Khan, Eakalak, Professor of Civil Engineering; Department Chair, Ph.D., 1997, University of California, Los Angeles
• Khan, Samee, Assistant Professor of Electrical and Computer Engineering, Ph.D., 2007, University of Texas - Arlington
• Kim, Yail (Jimmy), Assistant Professor of Civil Engineering, Ph.D., 2006, Queen's University
• Kirschenman, Merlin D., Emeritus Associate Professor of Construction Management and Engineering, M.S., 1976, University of California - Berkeley
• Krause, Daniel J., Emeritus Professor of Electrical and Computer Engineering, Ph.D., 1972, Colorado State University
• Krishnan, Sumathy, Associate Professor of Mechanical Engineering, Ph.D., 1995, Indian Institute of Technology - Madras, India
• Kucera, Henry L., Emeritus Professor of Agricultural and Biosystems Engineering, M.S., 1959, North Dakota State University
• La Palm, George L., Emeritus Professor of Civil Engineering, Ph.D., 1968, Purdue University
• Li, Hongxian, Assistant Professor of Electrical and Computer Engineering, Ph.D., 2008, University of Washington
• Li, Kam, Emeritus Professor of Mechanical Engineering, Ph.D., 1965, Oklahoma State University
• Lima, Ivan, Associate Professor of Electrical and Computer Engineering, Ph.D., 2003, University of Maryland
• Lin, Wei, Associate Professor of Civil Engineering, Ph.D., 1992, New York State University, Buffalo
• Lin, Zhulu, Assistant Professor of Agricultural and Biosystems Engineering, Ph.D., 2003, University of Georgia
• Lindquist, Mark, Assistant Professor of Architecture and Landscape Architecture, M.L.A., 2002, University of Toronto
• Longhinry, Robert R., Emeritus Professor of Electrical Engineering, M.S., 1963, University of Minnesota
• Mahalingam, Ganapathy, Associate Professor of Architecture and Landscape Architecture; Interim Department Chair, Ph.D., 1995, University of Florida
• Mahmud, Zakaria, Assistant Professor of Mechanical Engineering, Ph.D., 2002, University of Alabama
• Maleki, Reza, Associate Professor of Industrial and Manufacturing Engineering, Ph.D., 1989, North Dakota State University
• Marinov, Valery, Associate Professor of Industrial and Manufacturing Engineering, Ph.D., 1992, Technical University of Sofia, Bulgaria
• Martens, Steve C., Associate Professor of Architecture and Landscape Architecture, M.Arch., 1988, University of Minnesota
• Maurer, Karl G., Emeritus Professor of Mechanical Engineering, Ph.D., 1966, University of Kansas
• Mazaheri, Mort L., Emeritus Professor of Community and Regional Planning, M.S., 1963, University of Wisconsin
• McIntyre, Charles, Associate Professor of Construction Management and Engineering, Ph.D., 1996, Pennsylvania State University
• Mehta, Sudhir I., Professor of Mechanical Engineering, Ph.D., 1982, Indian Institute of Technology, Bombay, India
Moilanen, Charles W., Emeritus Professor of Agricultural and Biosystems Engineering, M.S., 1963, North Dakota State University
Nazari, G. H., Lecturer of Mechanical Engineering, Ph.D., 1977, Texas A&M University
Padmanabhan, G., Professor of Civil Engineering, Ph.D., 1980, Purdue University
Pegg, Michael N., Emeritus Professor of Mechanical Engineering, M.S., 1959, North Dakota State University
Petersen, Donald E., Emeritus Associate Professor of Electrical Engineering, M.S., 1958, North Dakota State University
Pfister, Philip C., Emeritus Professor of Mechanical Engineering, Ph.D., 1962, Illinois Institute of Technology
Pieczega Lindquist, Kaarin, Assistant Professor of Architecture and Landscape Architecture, M.Arch., 2002, University of Toronto
Pieri, Robert V., Professor of Mechanical Engineering, Ph.D., 1987, Carnegie - Mellon University
Pratt, George L., Emeritus Professor of Agricultural and Biosystems Engineering, Ph.D., 1967, Oklahoma State University
Price, Edward W., Emeritus Professor of Mechanical Engineering, M.S., 1958, North Dakota State University
Pryor, Scott W., Assistant Professor of Agricultural and Biosystems Engineering, Ph.D., 2005, Cornell University
Rahman, Shafiqur, Assistant Professor of Agricultural and Biosystems Engineering, Ph.D., 2004, University of Manitoba
Ramsay, Ronald L.M., Associate Professor of Architecture and Landscape Architecture, M.Arch., 1992, University of Texas, Austin
Rao, Bapeswara V.V., Professor of Electrical and Computer Engineering, Ph.D., 1970, Indian Institute of Technology, Madras, India
Rieder, William G., Emeritus Professor of Mechanical Engineering, Ph.D., 1971, University of Nebraska - Lincoln
Rogers, David A., Professor of Electrical and Computer Engineering, Ph.D., 1971, University of Washington
Saafi, Mohamed, Associate Professor of Construction Management and Engineering, Ph.D., 2001, University of Alabama - Huntsville
Scherer, Thomas F., Associate Professor of Agricultural and Biosystems Engineering, Ph.D., 1986, University of Minnesota
Schroeder, Mark, Assistant Professor of Electrical and Computer Engineering, Ph.D., 1999, University of Texas, Austin
Schwaen, Regin, Associate Professor of Architecture and Landscape Architecture, M.Arch., 1992, Arkitektskolen i Aarhus, Denmark
Selekwa, Majura, Assistant Professor of Mechanical Engineering, Ph.D., 2001, Texas A&M University
Shi, Jing, Associate Professor of Industrial and Manufacturing Engineering, Ph.D., 2004, Purdue University
Smith, Donald A., Emeritus Professor of Electrical and Computer Engineering, Ph.D., 1968, University of Minnesota
Smith, Gary R., Professor; Dean, College of Engineering and Architecture, Ph.D., 1986, Purdue University
Solseng, Elton G., Instructor of Agricultural and Biosystems Engineering, M.S., 1980, North Dakota State University
Song, Jongchul, Assistant Professor of Construction Management and Engineering, Ph.D., 2005, University of Texas
Srinivasan, Sudarshan, Assistant Professor of Electrical and Computer Engineering, Ph.D., 2007, Georgia Institute of Technology
Steele, Dean D., Associate Professor of Agricultural and Biosystems Engineering, Ph.D., 1991, University of Minnesota
Steegm, Earl C., Emeritus Professor of Agricultural and Biosystems Engineering, Ph.D., 1966, Michigan State University
Stewart, Earl E., Emeritus Professor of Community and Regional Planning, M.S., 1953, Massachusetts Institute of Technology
Stewart, Michael, Assistant Professor of Mechanical Engineering, Ph.D., 1979, University of Illinois - Urbana
Stroud, LTC Shawn, Professor of Military Science, M.S., 2001, Indiana University
Stuehm, Donald L., Emeritus Professor of Electrical and Computer Engineering, Ph.D., 1972, Colorado State University
Suzen, Bora, Assistant Professor of Mechanical Engineering, Ph.D., 1998, Wichita State University
Tangpong, Annie, Assistant Professor of Mechanical Engineering, Ph.D., 2006, Carnegie Mellon University
Tolliver, Denver D., Adjunct Professor of Civil Engineering, Ph.D., 1989, Virginia Polytechnic Institute and State University
Ulven, Chad, Assistant Professor of Mechanical Engineering, Ph.D., 2005, University of Alabama, Birmingham
Urness, Cindy, Associate Professor of Architecture and Landscape Architecture, M.Arch., 1988, Pratt Institute
Varma, Amiy, Associate Professor of Civil Engineering, Ph.D., 1993, Purdue University
Vorderbruggen, Joann, Assistant Professor of Architecture, M.Arch, 2009, University of Oregon
Wang, Xinnan, Assistant Professor of Mechanical Engineering, Ph.D., 2008, University of South Carolina
Wang, Yechun, Assistant Professor of Mechanical Engineering, Ph.D., 2007, University of Maryland
Wells, David L., Professor of Industrial and Manufacturing Engineering, Ph.D., 1996, University of Missouri - Rolla
Wiesenborn, Dennis P., Professor of Agricultural and Biosystems Engineering, Ph.D., 1988, Rice University
Wiley, Catherine, Assistant Professor of Architecture and Landscape Architecture, M.L.A., 1998, University of Pennsylvania
Wischers, Stephen, Assistant Professor of Architecture and Landscape Architecture, M. Arch., 2004, University of Calgary, M.F.A., 2004, University of Calgary
Wu, Xiangfa, Assistant Professor of Mechanical Engineering, Ph.D., 2003, University of Nebraska - Lincoln
Yadav, Om P., Associate Professor of Industrial and Manufacturing Engineering, Ph.D., 2002, Wayne State University
Yazdani, Siamak, Professor of Civil Engineering, Ph.D., 1987, University of New Mexico
You, Chao, Assistant Professor of Electrical and Computer Engineering, Ph.D., 2005, Rensselaer Polytechnic Institute
College of Human Development and Education

- Aakre, Dean E., Extension Specialist, M.Ed., 1998, North Dakota State University
- Albrecht, Jay M., Assistant Professor of Health, Nutrition and Exercise Sciences, Ph.D., 2009, North Dakota State University
- Anderson, Sharon D., Emeritus Professor of Human Development and Education, Ph.D., 1994, University of North Dakota
- Ary, Judith M., Senior Lecturer of Health, Nutrition and Exercise Sciences/School of Education, M.H.E., 1989, Idaho State University
- Asperin, Amelia Estepa, Assistant Professor of Apparel, Design, and Hospitality Management, Ph.D., 2007, Kansas State University
- Bach, Annette S., Emeritus Professor of Extension, M.S., 1972, University of Southern California
- Barnhart, Thomas C., Professor of Health, Nutrition and Exercise Sciences, Ph.D., 1978, University of New Mexico
- Bastow-Shoop, Holly E., Professor of Apparel, Design, and Hospitality Management; Department Head, Ph.D., 1981, Oklahoma State University
- Beck, Patricia L., Emeritus Professor of Extension, M.S., 1965, Colorado State University
- Bisen, Kristen E., Assistant Professors of Human Development and Family Science, Ph.D., 2009, Virginia Polytechnic Institute and State University
- Berglund, Patricia, Emeritus Professor of Health, Nutrition and Exercise Sciences, Ph.D., 1988, North Dakota State University
- Biever, Adrian, Extension Specialist, M.S., 1981, North Dakota State University
- Birrenkott, Stacey, Head Teacher, Center for Child Development, B.S., 1995, North Dakota State University
- Bjelde, Kristine, Assistant Professor of Human Development and Family Science, Ph.D., 2007, North Dakota State University
- Blodgett Salafia, Elizabeth, Assistant Professor of Human Development and Family Science, Ph.D., 2008, University of Notre Dame
- Borgen, Vernon A., Adjunct Professor of Health, Nutrition and Exercise Sciences, B.S., 1979, North Dakota State University
- Borrr, Mari, Assistant Professor, School of Education, Ph.D., 2005, University of North Dakota
- Braaten, Ann W., Assistant Professor of Apparel, Design, and Hospitality Management, Ph.D., 2005, University of Minnesota

• Scoby, Donald R., Emeritus Professor of Botany/Biology and Education, Ph.D., 1968, North Dakota State University
• Silkenat, David, Assistant Professor of Education and History, Ph.D., 2007, University of North Carolina - Chapel Hill
• Stamm, Ronald M., Emeritus Professor of Education, Ph.D., 1990, Ohio State University
• Stastny, Sherri N., Assistant Professor, Health, Nutrition and Exercise Sciences, Ph.D., 2007, North Dakota State University
• Strand, Bradford N., Professor of Health, Nutrition and Exercise Sciences, Ph.D., 1988, University of New Mexico
• Sunderlin, Sara, Senior Lecturer, Apparel, Design, and Hospitality Management, M.S., 2001, North Dakota State University
• Tande, Desiree L., Extension Specialist and Coordinator, EFNEP/FNP, Ph.D., 2007, North Dakota State University
• Terbizan, Donna J., Professor of Health, Nutrition and Exercise Sciences, Ph.D., 1982, Ohio State University
• Torges, Cynthia, Assistant Professor of Human Development and Family Science, Ph.D., 2006, University of Michigan, Ann Arbor
• Trautwein, Charlotte G., Emeritus Professor of Music and Human Development and Family Science and Education, M.S., 1968, University of Illinois
• Tucker, Jared, Assistant Professor, Health, Nutrition, and Exercise Sciences, Ph.D., 2010, Iowa State University
• Vettern, Rachelle E., Assistant Professor of Education; Extension Specialist, Ph.D., 2006, North Dakota State University
• Wageman, Justin, Associate Professor, School of Education, Ph.D., 1999, University of North Dakota
• Wollman, George H., Emeritus Professor of Education, Ph.D., 1980, Michigan State University
• Welch, Anita, Assistant Professor of Education, Ph.D., 2007, University of Kansas
• Welrlinger, Ann, Lecturer of Human Development and Family Sciences, M.S., 2005, North Dakota State University
• Wigtill, James V., Emeritus Professor of Education, Ed.D., 1966, Indiana University
• Wilcox, Heidi, Adjunct Professor of Apparel, Design, and Hospitality Management, MPA, 2002, University of Mary
• Wilkening, Ryan, Lecturer of Apparel, Design, and Hospitality Management, B.S.A.S., 2005, University of Wisconsin-Milwaukee
• Winters, Lynette, Assistant Professor of Practice of Health, Nutrition and Exercise Sciences, M.S., 1987, South Dakota State University
• Wolfe, Kara L., Associate Professor, Apparel, Design, and Hospitality Management, Ph.D., 2002, Kansas State University
• Wood, Nathan, Assistant Professor of Education, Ph.D., 2006, University of Minnesota
• Woods, Rebecca, Assistant Professor of Child Development and Family Science, Ph.D., 2006, Texas A & M University
• Young, B. Brent, Assistant Professor, School of Education, Ph.D., 2006, Oklahoma State University, Stillwater

College of Pharmacy, Nursing, and Allied Sciences

• Adhumi, Naeem, Adjunct Professor of Allied Sciences, M.D., 1989, University of Karachi, Pakistan
• Albano, Christian, Assistant Professor of Pharmacy Practice, Ph.D., 2005, North Dakota State University
• Bergman, Mary Jo, Adjunct Professor of Allied Sciences, M.Ed., 1994, University of Mary
• Biberdorf, Robert, Assistant Professor of Pharmacy Practice, M.S., 1978, North Dakota State University
• Briese, Pamela G., Adjunct Professor of Allied Sciences, M.S., 1996, University of South Dakota
• Brown, Wendy, Assistant Professor of Pharmacy Practice, Pharm.D., 2001, North Dakota State University
• Brunelle, Patrick, Adjunct Clinical Instructor of Pharmacy Practice, B.S., 1992, North Dakota State University
• Carlson, James D., Adjunct Professor of College of Pharmacy, Nursing, and Allied Sciences, Pharm.D., 1976, University of Michigan
• Carlson, Matthew, Adjunct Professor of Pharmacy Practice, Pharm.D., 2003, North Dakota State University
• Chandrasekhar, Satischandran, Professor of Pharmaceutical Sciences; Director of CBRP-COE, Ph.D., 1985, Memorial University, Canada
• Christensen, Thomas P., Adjunct Professor of Pharmacy Practice, Ph.D., 1995, University of Michigan
• Clarens, Richard D., Lecturer of Pharmacy Practice, Pharm.D., 1979, University of Minnesota
• Copa, Alan, Adjunct Professor of Pharmacy Practice, Pharm.D., 1986, University of Minnesota
• DeBuhr, David A., Adjunct Clinical Instructor of Pharmacy Practice, B.S., 1987, North Dakota State University
• Dewey, Mark, Assistant Professor of Pharmacy Practice, Pharm.D., 1999, North Dakota State University
• Dexter, R. David, Adjunct Professor of Allied Sciences, M.D., 1986, University of Minnesota
• Dippold, Kyla, Adjunct Professor of Allied Sciences, M.S., 2005, Drake University
• Doherty-Johnson, Shelley, Adjunct Clinical Instructor of Pharmacy Practice, B.S., 1980, North Dakota State University
• Dohman, Tammie K., Adjunct Clinical Instructor of Pharmacy Practice, B.S., 1982, North Dakota State University
• Drummond, Amy, Assistant Professor of Pharmacy Practice, Pharm.D., 1996, North Dakota State University
• Eukel, Heidi, Assistant Professor of Pharmacy Practice, Pharm.D., 2008, North Dakota State University
• Falk, Kara, Assistant Professor of Nursing, M.S., 2006, University of North Dakota
• Fisher, Amy, Assistant Professor of Nursing, M.A., 1992, College of St. Catherine
• Fitz, Alicia, Assistant Professor of Pharmacy Practice, Pharm.D., 1996, Creighton University
• Focken, Rebecca, Assistant Professor of Pharmacy Practice, Pharm.D., 2004, North Dakota State University
• Forster, Keith A., Adjunct Professor of Pharmacy Practice, Pharm.D., 1995, North Dakota State University
• Frenzel, Jeanne, Assistant Professor of Pharmacy Practice, Pharm.D., 2003, North Dakota State University
• Friesner, Daniel, Associate Professor of Pharmacy Practice; Interim Associate Dean for Student Affairs, Ph.D., 2000, Washington State University
• Gillispie, Mary A., Adjunct Professor of College of Pharmacy, M.D., 1978, Wayne State School of Medicine
• Glunberg, Steven, Adjunct Professor of Pharmacy, M.D., 1981, Washington University
• Godfrey, Anthony, Adjunct Professor of Pharmacy Practice, Pharm.D., 1996, North Dakota State University
• Grandbois, Donna M., Assistant Professor of Nursing, Ph.D., 2008, North Dakota State University
• Grindahl, Kevin, Adjunct Clinical Instructor of Pharmacy Practice, B.S., 1984, North Dakota State University
• Gross, Carla J., Associate Professor of Nursing, M.S. in Nursing, 1987, University of Kentucky
• Gross, Dean, Assistant Professor of Nursing, D.N.Sc., 1998, Rush University
• Grosz, William J., Adjunct Professor of Pharmacy Practice, D.Sc., 1990, North Dakota State University
• Guo, Bin, Associate Professor of Pharmaceutical Sciences, Ph.D., 1999, Roswell Park Cancer Institute, University of New York - Buffalo
• Hanel, Harvey J., Adjunct Professor of Pharmacy Practice, Pharm.D., 1988, North Dakota State University
• Harrington, Agnes E., Emeritus Professor of Pharmacy, M.S.Ed., 1969, North Dakota State University
• Haug, Karla, Assistant Professor of Nursing, M.S., 2005, North Dakota State University
• Henderson, William M., Emeritus Professor of Pharmaceutical Sciences, Ph.D., 1967, North Dakota State University
• Heuer, Loretta, Professor of Nursing, Associate Dean for Nursing and Allied Sciences, Ph.D., 1995 University of North Dakota
• Hollister, Susan, Lecturer of Allied Sciences, M.S., 2010, University of North Dakota
• Johnson, Todd, Adjunct Professor of Pharmacy Practice, Pharm.D., 1976, University of Minnesota
• Kelsch, Michael, Assistant Professor of Pharmacy Practice, Pharm.D., 1999, North Dakota State University
• Khalil, Shoukry K.W., Emeritus Professor of Pharmaceutical Sciences, Ph.D., 1960, Cairo University, Egypt
• Kiser-Larson, Norma, Associate Professor of Nursing, Ph.D. in Nursing, 1999, University of Minnesota
• Knutson, Paulette, Adjunct Clinical Instructor of Pharmacy Practice, M.S., 1988, North Dakota State University
• Koo, Ji M., Adjunct Professor of Pharmacy Practice, Pharm.D., 1991, North Dakota State University
• Larson, Laurelyn, Adjunct Clinical Instructor of Pharmacy Practice, B.S., 1976, North Dakota State University
• Law, Shek H., Assistant Professor of Pharmaceutical Sciences, Ph.D., 2002, University of Manchester, UK
• Leclerc, Estelle, Assistant Professor of Pharmaceutical Sciences, Ph.D., 1994, University of Paris XI, France
• Lee, Margaret S., Assistant Professor of Nursing, M.S., 1996, University of North Dakota
• Lehman, Paul, Adjunct Professor of College of Pharmacy, Nursing, and Allied Sciences, M.S., 1986, University of Washington
• Lundeen, Tina, Assistant Professor of Nursing, DNP, 2009, North Dakota State University
• Magarian, Edward O., Emeritus Professor of Pharmacy Practice, Ph.D., 1964, University of Mississippi
• Mallik, Sanku, Professor of Pharmaceutical Sciences, Ph.D., 1991, Case Western Reserve University
- Marsden, Richard J., Adjunct Professor of Allied Sciences, M.S., 1974, Texas Tech University

• Duncan, Benton, Assistant Professor of Mathematics, Ph.D., 2004, University of Nebraska - Lincoln
• Duyesen, Murray E., Emeritus Professor of Biological Sciences, Ph.D., 1966, University of Nebraska
• Esslinger, Theodore L., Professor of Biological Sciences, Ph.D., 1974, Duke University
• Euliss, Ned, Adjunct Professor of Biological Sciences, Ph.D., 1989, Oregon State University
• Fawley, Marvin W., Adjunct Professor of Biological Sciences, Ph.D., 1985, Miami University
• Fawley, Karen, Adjunct Professor of Biological Sciences, Ph.D., 1998, North Dakota State University
• Fischer, Allan G., Emeritus Dean and Emeritus Professor of Biochemistry and Molecular Biology, Ph.D., 1966, Indiana University
• Frank, Albert B., Adjunct Professor of Biological Sciences, Ph.D., 1969, North Dakota State University
• Friese, Charles R., Emeritus Professor of Mathematics, M.S., 1958, North Dakota State University
• Friessen, Chris, Assistant Professor of Psychology, Ph.D., 2001, University of Alberta
• Fulton, Mark R., Adjunct Professor of Biological Sciences, Ph.D., 1991, Uppsala University
• Galitz, Donald S., Emeritus Professor of Biological Sciences, Ph.D., 1961, University of Illinois
• Gammill, Robert C., Emeritus Professor of Computer Science, Ph.D., 1969, Massachusetts Institute of Technology
• Garvey, Roy G., Emeritus Professor of Chemistry and Biochemistry, Ph.D., 1966, University of Utah
• Gelling, Victoria Johnston, Assistant Professor of Coatings and Polymeric Materials, Ph.D., 2001, North Dakota State University
• Gephard, Matthew S., Adjunct Professor of Coatings and Polymeric Materials, Ph.D., 1990, Stanford University
• Gerst, Jeffery W., Professor of Biological Sciences, Ph.D., 1973, University of Nebraska
• Gillam, Erin H., Assistant Professor of Biological Sciences, Ph.D., 2007, University of Tennessee
• Glass, J. Edward, Adjunct Professor of Coatings and Polymeric Materials, Ph.D., 1964, Purdue University
• Gordon, Kathryn H., Assistant Professor of Psychology, Ph.D., 2008, Florida State University
• Gordon, Robert, Associate Professor of Psychology, Ph.D., 1999, University of Illinois at Urbana - Champaign
• Grier, James W., Emeritus Professor of Mathematics, M.A., 1972, University of Illinois
• Hatzenbuhler, Elaine C., Senior Lecturer of Geology, B.S., 1971, Kansas State University
• Heilmann, Larry J., Adjunct Professor of Chemistry and Biochemistry, Ph.D., 1984, Wesleyan University
• Hershberger, John F., Professor of Chemistry and Biochemistry, Ph.D., 1986, Yale University
• Hill, Loren, Adjunct Professor of Coatings and Polymeric Materials, Ph.D., 1965, Pennsylvania State University
• Hilmert, Clayton J., Assistant Professor of Psychology, Ph.D., 2003, University of California - San Diego
• Hinderliter, Brian, Research Assistant Professor of Coatings and Polymeric Materials, Ph.D., 2000, University of Virginia
• Hinsz, Verlin B., Professor of Psychology, Ph.D., 1983, University of Illinois
• Hladky, Robert, Assistant Professor of Mathematics, Ph.D., 2004, University of Washington
• Hobbie, Erik K., Professor of Physics/Coatings and Polymeric Materials; Director of Materials and Nanotechnology Program, Ph.D., 1990, University of Minnesota
• Hodge, Angela, Assistant Professor of Mathematics, Ph.D., 2007, Purdue University
• Hodgson, Angela L., Assistant Professor of Biological Sciences, Ph.D., 2010, University of Minnesota
• Hyun, Seung Won, Assistant Professor of Statistics, Ph.D., 2010, University of Missouri
• Ihle, Thomas, Associate Professor of Physics, Ph.D., 1996, Tech. University of Aachen
• Jacob, Donna L., Research Assistant Professor of Biological Sciences, Ph.D., 2004, University College Dublin
• Jacobson, Denley B., Associate Professor of Chemistry and Biochemistry, Ph.D., 1984, Purdue University
• Jin, Wei, Assistant Professor of Computer Science, Ph.D., 2008, State University of New York at Buffalo
• Johnson, Dana L., Emeritus Senior Lecturer of Computer Science, M.S., 1980, University of Denver
• Johnson, Douglas H., Adjunct Professor of Biological Sciences, Ph.D., 1986, North Dakota State University
• Johnson, Ivan M., Adjunct Professor of Biological Sciences, Ph.D., 1969, University of Montana
• Johnson, Kenneth R., Emeritus Professor of Mathematics, Ph.D., 1980, University of Colorado
• Kaster, Jessica, Adjunct Professor of Psychology, Ph.D., 2004, University of North Dakota
• Kenyon, Mary Jo, Senior Lecturer of Biological Sciences, M.S., 1997, North Dakota State University
• Kilina, Svetlana, Assistant Professor of Chemistry and Biochemistry, Ph.D., 2007, University of Washington
• Killilea, S. Derek, Professor Emeritus of Chemistry and Biochemistry, Ph.D., 1972, National University of Ireland, Galway, Ireland
• King, Tariq, Assistant Professor of Computer Science and Operations Research, Ph.D., 2009, Florida International University
• Kolk, Randall, Adjunct Professor of Biological Sciences, Ph.D., 1996, University of Minnesota
• Kong, Jun, Assistant Professor of Computer and Operations Research, Ph.D., 2005, University of Texas at Dallas
• Kornfeld, Isaac, Emeritus Professor of Mathematics, Ph.D., 1975, Tashkent State University, Uzbekistan
• Kose, Muhammet Erkan, Assistant Professor of Chemistry and Biochemistry, Ph.D., 2005, University of Florida
• Kroll, Daniel, Professor of Physics, Department Head, Ph.D., 1973, University of Chicago
• Krush, Joann, Lecturer/Advisor of Computer Science and Operations Research, M.S., 1999, University of Iowa
• Kryjevskaya, Lioudmila, Assistant Professor of Physics and School of Education, Ph.D., 2008, University of Washington
• Kryjevski, Andrei, Research Assistant Professor of Physics, Ph.D., 2004, University of Washington
• Langley, Linda, Associate Professor of Psychology, Ph.D., 1998, University of Minnesota
• Larsen, Gerald L., Adjunct Professor of Chemistry and Biochemistry, Ph.D., 1980, North Dakota State University
• Leopold, Roger A., Adjunct Professor of Biological Sciences, Ph.D., 1967, Montana State University
• Lepper, Kenneth, Associate Professor of Geology, Ph.D., 2001, Oklahoma State University
• Lewis, Adam R., Assistant Professor of Geology, Ph.D., 2005, Boston University
• Li, Juan, Assistant Professor of Computer Science, Ph.D., 2008, University of British Columbia
• Liu, Guodong, Assistant Professor of Chemistry and Biochemistry, Ph.D., 2001, Hunan University, China
• Linz, George M., Adjunct Professor of Biological Sciences, Ph.D., 1981, North Dakota State University
• Littmann, Friedrich, Assistant Professor of Mathematics, Ph.D., 2004, University of Illinois at Urbana-Champaign
• Ludwig, Simone, Associate Professor of Computer Science and Operations Research, Ph.D., 2004, Brunel University, United Kingdom
• Lukat-Rodgers, Gudrun, Assistant Professor of Chemistry and Biochemistry, Ph.D., 1985, Iowa State University
• Magel, Kenneth I., Professor of Computer Science, Ph.D., 1977, Brown University
• Magel, Rhonda, Professor of Statistics, Department Chair, Ph.D., 1982, University of Missouri - Rolla
• Marry, Andrew M., Adjunct Professor of Biological Sciences, Ph.D., 1998, John Innes Centre
• Martin, John C., III, Associate Professor Emeritus of Computer Science, Ph.D., 1971, Rice University
• Martin, William O., Professor of Mathematics, Ph.D., 1993, University of Wisconsin - Madison
• Mathew, Febina, Lecturer/Advisor of Biological Sciences, M.S., North Dakota State University, 2006
• Mathsen, Ronald M., Emeritus Professor of Mathematics, Ph.D., 1965, University of Nebraska
• May, Sylvio, Associate Professor of Physics, Ph.D., 1996, Friedrich Schiller University
• McCarthy, Gregory J., Distinguished Professor of Chemistry and Biochemistry, Adjunct Professor of Geology, Ph.D., 1969, Pennsylvania State University
• McCaul, Kevin D., Dean, Dale Hogoboom Professor of Psychology, Ph.D., 1978, University of Kansas
• McCourt, Mark, James A. Meier Professor of Psychology, Ph.D., 1982, University of California, Santa Barbara
• Meidingier, Alfred, Adjunct Professor of Physics, Ph.D., 2000, North Dakota State University
• Mitchell, James E., Adjunct Professor of Psychology, M.D., 1972, Northwestern University
• Montplaisir, Lisa M., Assistant Professor of Biological Sciences, Ph.D., 2003, University of Arizona
• Morris, Melvin L., Emeritus Professor of Chemistry and Biochemistry, Ph.D., 1958, Ohio State University
• Munski, Douglas, Adjunct Professor of Geosciences, Ph.D., 1978, University of Illinois at Urbana - Champaign
• Nawrot, Mark, James A. Meier Professor of Psychology, Ph.D., 1991, Vanderbilt University
• Nelson, Carolyn C., Emeritus Senior Lecturer of Mathematics, M.S., 1960, North Dakota State University
• Nelson, Gilbert W., Emeritus Professor of Mathematics, M.S., 1958, North Dakota State University
• Nickell, Gary S., Adjunct Professor of Psychology, Ph.D., 1982, Oklahoma State University
• Nuechterlein, Gary L., Emeritus Professor of Biological Sciences, Ph.D., 1980, University of Minnesota
• Nygard, Kendall E., Professor of Computer Science, Ph.D., 1978, Virginia Polytechnic Institute and State University
• Oduor, Peter, Assistant Professor of Geology, Ph.D., 2004, University of Missouri - Rolla
• Offerdahl, Erika, Assistant Professor of Chemistry and Biochemistry and School of Education, Ph.D., 2008, University of Arizona
• Oleson, Arland E., Emeritus Professor of Biochemistry and Biochemistry, Ph.D., 1963, University of Minnesota
• Olsen, James H., Professor of Mathematics, Ph.D., 1968, University of Minnesota
• Olson, Lloyd D., Emeritus Professor of Mathematics, M.Ed., 1954, North Dakota State University
• O'Neill, George P., Adjunct Professor of Psychology, Ph.D., 1974, Georgia State University
• O'Neill, H.K., Assistant Professor of Psychology, Ph.D., 1991, University of North Dakota
• Ostafln, Brian, Assistant Professor of Psychology, Ph.D., 2004, Boston University
• Otte, Marinus, Professor of Biological Sciences, Department Head, Ph.D., 1991, Vrije Universiteit of Amsterdam
• Page, Michael, Associate Professor of Chemistry and Biochemistry, Ph.D., 1982, State University of New York, Buffalo
• Park, Ernest, Adjunct Professor of Psychology, Ph.D., 2003, Michigan State University
• Pavicic, Mark J., Adjunct Professor of Computer Science, Ph.D., 1985, Columbia University
• Perrizo, William K., University Distinguished Professor, Jordan Engberg Professor of Computer Science, Ph.D., 1972, University of Minnesota
• Peterka, John J., Emeritus Professor of Biological Sciences, Ph.D., 1964, University of Minnesota
• Pokhodnya, Konstantin, Adjunct Professor of Chemistry and Biochemistry and Physics, Ph.D., 1977, Moscow Institute of Physics and Technology
• Popovici, Cristina, Assistant Professor of Mathematics, Ph.D., 2005, Carnegie Mellon University
• Provder, Theodore, Adjunct Professor of Coatings and Polymeric Materials, Ph.D., 1965, University of Wisconsin
• Puyear, Robert L., Emeritus Professor of Biological Sciences, Ph.D., 1964, Oregon State University
• Rainville, Stéphane J., Assistant Professor of Psychology, Ph.D., 2000, McGill University
• Rasmussen, Seth C., Associate Professor of Chemistry and Biochemistry, Ph.D., 1994, Clemson University, South Carolina
• Reed, Wendy, Assistant Professor of Biological Sciences, Ph.D., 2000, Iowa State University
• Reindl, Katie, Assistant Professor of Biological Sciences, Ph.D., 2006, North Dakota State University
• Reiser, Mary, Adjunct Professor of Biological Sciences, Ph.D., 1988, Arizona State University
• Richardson, J.L., Adjunct Professor of Geosciences, Ph.D., 1974, Iowa State University
• Robinson, Michael D., James A. Meier Associate Professor of Psychology, Ph.D., 1996, University of California, Davis
• Rodgers, Kenton R., Professor of Chemistry and Biochemistry, Ph.D., 1988, University of Iowa
• Roesler, Richard R., Adjunct Professor of Coatings and Polymeric Materials, Ph.D., 1969, University of Washington
• Rokke, Paul D., Professor of Psychology; Department Chair, Ph.D., 1985, University of Houston
• Routledge, Clay, Assistant Professor of Psychology, Ph.D., 2005, University of Missouri-Columbia
• Rudesill, James T., Emeritus Professor of Chemistry and Biochemistry, Ph.D., 1957, Purdue University
• Saini-Eidukat, Bernhardt, Associate Professor of Geology; Department Chair, Ph.D., 1991, University of Minnesota
• Sather-Wagstaff, Sean, Assistant Professor of Mathematics, Ph.D., 2000, University of Utah
• Sawicki, Charles A., Associate Professor of Physics, Ph.D., 1975, Cornell University
• Schwert, Donald P., Professor of Geology; Director, Center for Science, Mathematics, Engineering and Technology Education, Ph.D., 1978, University of Waterloo, Canada
• Scoby, Donald R., Emeritus Professor of Biological Sciences, Ph.D., 1968, North Dakota State University
• Shappell, Nancy, Adjunct Professor of Biological Sciences, Ph.D., 1988, Virginia Polytechnic Institute and State University
• Sheridan, Mark A., James A. Meier Professor of Biological Sciences, Ph.D., 1985, University of California, Berkeley
• Shreve, Warren E., Professor of Mathematics; Department Chair, Ph.D., 1967, University of Nebraska
• Sibi, Mukund P., Distinguished and James A. Meier Professor of Chemistry and Biochemistry, Ph.D., 1980, City University of New York
• Sinha, Mahendra K., Emeritus Professor of Physics, Ph.D., 1961, Pennsylvania State University
• Sivaguru, Jayaraman, Assistant Professor of Chemistry and Biochemistry, Ph.D., 2003, Tulane University
• Skerry, Brian, Adjunct Professor of Coatings and Polymeric Materials, Ph.D., 1980, University of Manchester, U.K.
• Skogen, Madeleine K., Emeritus Professor of Mathematics, M.S., 1960, North Dakota State University
• Slanger, William D., Adjunct Professor of Statistics, Ph.D., 1975, Cornell University
• Slator, Brian M., Professor of Computer Science; Department Head, Ph.D., 1988, New Mexico State University
• Sparks, Robert B., Associate Professor Emeritus of Chemistry and Biochemistry, Ph.D., 1972, University of South Dakota
• Srivastava, D.K., Professor of Chemistry and Biochemistry, Ph.D., 1980, Banaras Hindu University, India
• Stockwell, Craig A., James A. Meier Associate Professor of Biological Sciences, Ph.D., 1995, University of Nevada, Reno
• Sugihara, James M., Emeritus Professor of Chemistry and Biochemistry, Ph.D., 1947, University of Utah
• Sun, Wenfang, Associate Professor of Chemistry and Biochemistry, Ph.D., 1995, Institute of Photographic Chemistry, Chinese Academy of Science
• Sutton, Jeffrey C., Adjunct Professor of Biological Sciences, Ph.D., 1979, Michigan State University
• Swenson, Rodney, Adjunct Professor of Psychology, Ph.D., 1985, University of North Dakota
• Swenson, Orven F., Associate Professor of Physics, Ph.D., 1982, Air Force Institute of Technology
• Tallman, Dennis E., Research Professor of Coatings and Polymeric Materials, Ph.D., 1968, Ohio State University
• Tang, Jingpeng, Adjunct Professor of Computer Science, Ph.D., 2002, North Dakota State University
• Taylor, Larry D., Senior Lecturer of Mathematics, M.S., 1997, North Dakota State University
• Teder-Sälejärvi, Wolfgang A., Associate Professor of Psychology, Ph.D., 1994, University of Helsinki, Finland
• Terpstra, Jeffrey T., Associate Professor of Statistics, Ph.D., 1997, Western Michigan University
• Travers, Steven, Assistant Professor of Biological Sciences, Ph.D., 1998, University of California, Santa Barbara
• Tucker, Robert, Adjunct Professor of Chemistry and Biochemistry, Ph.D., 1967, Iowa State University
• Ubhaya, Vasant A., Professor of Computer Science, Ph.D., 1971, University of California, Berkeley
• Ungar, Abraham A., Professor of Mathematics, Ph.D., 1973, Tel Aviv University, Israel
• Vahl, Christopher, Assistant Professor of Statistics, Ph.D., 2005, Kansas State University
• Van Amburg, Gerald L., Adjunct Professor of Biological Sciences, Ph.D., 1969, Texas A&M University
• Vick, Brady A., Adjunct Professor of Chemistry and Biochemistry, Ph.D., 1975, North Dakota State University
• Vinograd, Robert E., Emeritus Professor of Mathematics, Ph.D., 1952, Moscow State University, D.Sc., 1960, Moscow State University, Russia
• Voronov, Andriy, Assistant Professor of Coatings and Polymeric Materials, Ph.D., 1994, Lviv Polytechnic Institute, Ukraine
• Wagner, Alexander, Associate Professor of Physics, Ph.D., 1997, Oxford University
• Webster, Dean C., Professor of Coatings and Polymeric Materials, Ph.D., 1984, Virginia Polytechnic Institute and State University
• Wettstein, Greg, Adjunct Professor of Computer Science, Ph.D., 1988, North Dakota State University
• White, Alan R., Adjunct Professor of Biological Sciences, Ph.D., 1981, University of North Carolina
• Wisenden, Brian, Adjunct Professor of Biological Sciences, Ph.D., 1993, University of Western Ontario
• Withnell, Gary D., Adjunct Professor of Physics, Ph.D., 1980, North Dakota State University
• Wittrock, David A., Professor of Psychology, Ph.D., 1990, State University of New York, Albany
• Wonderlich, Stephen A., Adjunct Professor of Psychology, Ph.D., 1985, University of Missouri
• Xu, Dianxiang, Assistant Professor of Computer Science, Ph.D., 1995, Nanjing University, China
• Zhang, Weiyi, Assistant Professor of Computer Science and Operations Research, Ph.D., 2007, Arizona State University
• Zhao, Pinjing, Assistant Professor of Chemistry and Biochemistry, Ph.D., 2003, Cornell University
