

Name: Adam Johnson

Major: Industrial Engineering & Management

Hometown: Fargo, ND

Why did you choose NDSU?

NDSU has a great engineering program at a low cost. Plus, I can be close to family and friends.

Why did you choose your major?

Since high school, I knew I was interested in the engineering and business fields. After a lot of research and talking to industrial engineer relatives of mine, I found IME to be a great fit! As soon as I completed my first year at NDSU, I knew IME was going to be a blast.

What extra-curricular activities/organizations are you involved in?

Institute of Industrial and Systems Engineers- Officer
Engineering Ambassadors
Innovation Challenge
Internships

How has NDSU prepared you for your future?

NDSU has opened doors for me with their Career Fair event. I have gotten a couple internships now from this event with great companies in the area.

What are your future plans?

After receiving my B.S in IE &M, I hope to work for a couple years as a Logistics Engineer at a company I currently intern for. Then I will take my Professional Engineer Exam. After a few more years of working as a PE, I want to go back to school for an MBA degree.

What are your thoughts about Fargo?

Fargo is a great town. I grew up here my whole life and I wouldn't want to live anywhere else. It's not too big, not too small. We have a ton of restaurants and community events. And above all, it's the home of the Bison.

What advice would you give to a prospective student?

Please start practicing good organization skills. It is very important to manage your time wisely when going to Engineering School. It can be as easy as keeping a calendar and daily planner to stay on schedule.
