AGRICULTURAL COMMUNICATION

OVERVIEW
Agricultural communication is one of four programs in the Department of Communication. This course of study is for students who have strong interests in both agriculture and communication. The agricultural communication major combines the resources and expertise of two units, communication and agriculture, to produce trained communicators who can explain science, technologies and complex agricultural issues to diverse audiences. Students will complete an applied capstone course in their final semester. Students choose communication at NDSU for many reasons:

- **More time to explore your interests**- Your first year is used to explore your options, making it possible to switch between four different communication majors.
- **Guidance on choosing a career**- In COMM 101: Majors and Careers in Communication, you will meet others in your major, learn more about possible careers and find campus resources that help you achieve your professional goals.
- **Hands-on learning**- You will have multiple ways to apply what you are learning through course projects, consulting for local organizations and participating in national competitions.
- **Built in communities**- You can connect with other students, while building your resume, through the many student organizations affiliated with the communication department.

- **Professional experience**- We help you find and benefit from internships in your field through our relationships with local and regional employers. Internships often lead to full-time jobs.

Students majoring in Agricultural Communication are encouraged to be active members of Agribusiness Club, Agricultural Communicators of Tomorrow, Sigma Alpha Professional Agricultural Sorority and/or the Saddle and Sirloin Club. They may also be interested in joining AD Club or the department's chapter of the Public Relations Student Society of America (PRSSA).

CAREER OUTCOMES

According to the Bureau of Labor Statistics, employment in the agricultural communication field is expected to grow 12% from 2020 to 2030, faster than the average for all occupations. The median annual wage for agricultural communication was $60,600 in May 2020.

In 2022, graduates from NDSU had a 93% success rate, meaning 72% reported being employed and 21% of graduates are continuing their education within 6 months of graduating. For detailed career outcomes by specific program, visit career-advising.ndsu.edu/career-outcomes-report.

SAMPLE COURSES

IMPORTANT DISCLAIMER: A Sample Program Guide provides an unofficial guide of program requirements and should be used by prospective students who are considering attending NDSU in the future. It is NOT an official curriculum and should NOT be used by current NDSU students for official degree planning purposes. Note that the official curriculum used by current NDSU students can vary from the Sample Program Guide due to a variety of factors such as, but not limited to, start year, education goals, transfer credit and course availability. To ensure proper program completion, enrolled students should utilize Degree Map and Schedule Planner in Campus Connection and consult regularly with their academic advisor.
