The NDSU-Noyce Intern program provides $450/week for six weeks of summer funding to early career undergraduate students working in STEM (i.e. Science, Technology, Engineering, or Mathematics) disciplines for summer research experiences at NDSU. Research experiences in this context can be defined very broadly, and are not restricted to the laboratory.

This is a way to recruit potential undergraduate research students into your labs at no cost to you for six weeks.

We are now accepting applications for the summer 2010. Deadline for their applications is 5 pm, March 2, 2010.

Students majoring in any STEM discipline with fewer than 60 completed semester credits at the end of spring 2010 semester are eligible to apply.

For information and student application forms visit [www.ndsu.edu/csme/noyce](http://www.ndsu.edu/csme/noyce)

Faculty interested in hosting Noyce Interns or with any questions should contact Lisa Montplaisir at [lisa.montplaisir@ndsu.edu](mailto:lisa.montplaisir@ndsu.edu) or at 1-6155

NDSU-Noyce is supported by a National Science Foundation grant DUE-0833268.
