

7TH

Annual Phi Kappa Phi

FACULTY LECTURESHIP

KALPANA KATTI
UNIVERSITY DISTINGUISHED
PROFESSOR

MONDAY

FEBRUARY 22

7 P.M.

(VIA ZOOM)

Kalpna Katti is a renowned researcher in the field of biomaterials and has made important contributions in bone tissue engineering, cancer scaffolds and biomimetics.

Her research group has successfully developed bone mimetic scaffolds that create cancer tumors in advanced stages of cancer metastasis to the bone, enabling humanoid testing of anti-cancer drugs, understanding late-stage cancer progression and developing new interventional technologies.

Katti leads the NDSU Center for Engineered Cancer Test-Beds and the NSF EPSCoR Center for Cellular Biointerfaces in Science and Engineering. She has more than 190 publications in journals, conference proceedings and book chapters. She is named Fellow of American Society of Biological and Biomedical Engineering.

She is an NSF CAREER awardee and a fellow of the American Institute for Medical and Biological Engineering. Her many honors include the Waldron Award for excellence in research, the Peltier Award for teaching innovation and the 52nd Faculty Lectureship at NDSU. She received the Roon Award from the Federation of Coatings Technologies, the most cited award from the journal Colloids and Interfaces for 2004-2007, and the Presidential Scholar Award from the Microscopy Society of America.
