

Sanford Children's Hospital

Child Life Practicum Program

The Child Life Practicum will allow students to obtain anywhere from 3 credits of field experience (Equivalent to 123 hours). Students will partake in observation within the healthcare setting, where qualified students will gain practical knowledge about the Child Life profession.

The primary goal of Sanford's Child Life Practicum program is to provide an opportunity for students to evaluate the strengths and limitations of their current knowledge and to broaden their understanding of the Child Life profession.

Students will have the opportunity to become familiar with medical play, pre-operative and pre-procedural preparation, coping facilitation, planning and supervising developmentally appropriate activities while working with individuals and/or groups. The Practicum is designed to facilitate the student's growth as a professional by allowing observation of the daily work of a Certified Child Life Specialist.
