Project Overview/ Budget Summary

The project has successfully been initiated and completed. The equipment requested has been useful in the use of the classroom for student improvement of seminars and demonstrations. We are currently in production stages of three educational films for meat processing and scientific based discussions on importance of meat science. The inclusion of the retail television has allowed the students to be showcased in their studies and work as well as updating the community on relevant data of the harvested red meat and meat industry topics. The use of the camera's, laptop, and televisions we have improved both student activities this past semester to include new meat items created by students and voted by customers. The educational use of the camera's videography aspect is used to document classroom activities and post to the social media outlets and inside the meat lab. We did not spend the excess of \$729.48.
