THE PROGRAM
NDSU’s Department of Mathematics is a research-oriented unit featuring 18 full-time faculty members and 27 graduate students. Our outstanding student-faculty ratio provides a supportive environment where graduate students have meaningful, regular interactions with faculty.

Our faculty members are recognized researchers in the areas of algebra, analysis, applied mathematics, combinatorics, geometry, mathematics education and topology. At NDSU, graduate students gain important teaching experience with extensive professional development opportunities so our graduates are teacher-scholars who are prepared for both academic and non-academic positions.

Our department is dedicated to increasing opportunities for underrepresented groups in mathematics. For instance, 40 percent of our graduate alumni since 2007 are women.

NDSU AND FARGO-MOORHEAD
NDSU is a student-focused, land-grant, research university. It is ranked by the Carnegie Commission on Higher Education among the top 108 public and private universities in the country in the category of “Research Universities/Very High Research Activity.” NDSU enrolls more than 14,500 students, including almost 2,500 graduate students.

Fargo is the largest city in North Dakota, with a population of approximately 100,000. With Moorhead, Minn., the metropolitan area has about 190,000 people. Fargo-Moorhead is a vibrant community with a college-town atmosphere combined with a low cost of living. Fargo is served by several major airlines, as well as bus and rail transportation.

SUPPORT
Most graduate students receive teaching assistantships and tuition waivers during the academic year. Summer teaching assistantships also are available. All applicants are considered for this funding.

APPLICATION
Go to http://math.ndsu.nodak.edu/graduate/applicant.shtml for information about applying to our program. Applications received by March 1 will receive full consideration.

CONTACT INFORMATION
