

2002 SURFACE MINING REPORT

**For Minerals
Other Than Coal**

SUMMARY OF SURFACE MINING REPORT FOR MINERALS OTHER THAN COAL

The North Dakota State Soil Conservation Committee was designated by the Legislature to administer the Surface Mining Reports Law, which requires any person conducting surface mining operations for minerals other than coal, to comply with the reporting requirements of Chapter 38-16 (North Dakota Century Code).

The Law requires any person conducting surface mining operations for minerals, other than coal, who, within one calendar year, removes 10,000 cubic yards or more of earthen material or products, including overburden, or affects one-half acre or more, in combined mining operations to report. Minerals included are: cement rock, clay, gravel, limestone, manganese, molybdenum, peat, potash, pumicite, salt, sand, scoria, sodium sulfate, stone, zeolite, or other minerals, but does not include coal.

The Surface Mining Reports Law also requires the State Soil Conservation Committee to prepare and transmit to local soil conservation districts a report giving information about surface mining operations and reclamation activities conducted during the preceding calendar year.

Included in the Surface Mining Report is a list of surface mining operators and their surface mining activities for calendar year 2002.

There were 15 surface mining operators reporting for the calendar year 2002. The following are approximate total operations according to the reports submitted:

1.	Acres affected	203.85	
2.	Minerals mined		
	A) Gravel & Sand	1,300,560	cubic yards
	B) Clay	202,320	cubic yards
	C) Rock	80,090	cubic yards
	D) Scoria	2,240	cubic yards
	TOTAL	1,585,210	cubic yards
3.	Overburden disturbed	231,739	cubic yards

There are 43 pits ranging in size from .25 to 34 acres. Minerals mined were gravel, sand, clay, rock and scoria.
