“Best time of my life, but with a valuable educational portion as well.”
“The culture in the United States is so fast-paced when really our patients need a listening ear more often than we provide. I will be more understanding as a nurse and culturally competent.”
“Everything about this experience was unique and a once in a lifetime thing.”
“This trip put me in a situation where I was a minority so understanding that first-hand really made me have so much more respect for other people. Being in a different country makes you appreciate your own culture and look at yourself differently.”
