Discussion Starters
1. Think of a time when you’ve ended a program. How did you reach that decision? What guidance from the presentation today will you use in the future to inform your thinking about how to end a program?

2. Consider the statement, “Actions express priorities.” Based on your department’s actions, what seem to be your department’s priorities? How have you handled low-priority but popular programs?

3. What challenges do you face when it comes time to end a program? How have you (or will you) responded to these challenges?
