

Biochemistry and Molecular Biology 2014

Biochemistry Minor

Minor Requirements

Required Credits: 16

Required Courses

All minor courses must be selected in consultation with a Biochemistry adviser.	16
---	----

Total Credits	16
---------------	----

Minor Requirements and Notes

- A minimum of 8 credits must be taken at NDSU.
- The student and adviser will complete a substitution form with the courses to be used for the biochemistry minor. This form will also require the signature of the department chairperson before being submitted to the Office of Registration and Records for verification of minor program completion.
- Note: This minor will not be available for view in the Student Advisement/Requirement Report in Campus Connection.
