

Implications of P/F or S/U grading schema in Bb Learn

Instructors who upload final grades from Bb Learn to Campus Solutions use the grading schema that is assigned to the course when it is originally created by the SIS integration process. Most courses use the Campus Connection Undergrad and Grad GRD grading schema. With this schema, the acceptable grade values include: A, B, C, D, I, F (Failure – Attended), FN (Failure - Stopped Attending), FNN (Failure - Never Attended).

In these cases, instructors should leave the CC Final Grade value blank for those students approved for P/F or S/U	Display Options: Grade Roster Action: *Grade Roster Type Final Grade Display Unassigned Roster Grade Only Not Reviewed
