Login

What are your username and passphrase?
Your NDSU Username and Passphrase are the same credentials that you use to log into NDSU computer labs or office workstation computers. If you forgot your username or password you can recover it at [Accounts](#) or contact the [IT Help Desk](#) by phone or in person for assistance.

 For security reasons, please Logout and exit your web browser when you are done accessing services that require authentication!

- IBC Admin config

Project Information

Only NDSU faculty and staff are permitted to serve as the Principal Investigator of a protocol. Students may serve as co-investigators, if needed.

PI* Wilkinson, Amanda S ✕ ▾

Project Department

Project Department* VP for Research (4000) ✕ ▾

Sub-Project Department Select one ▾

Office of the Provost > VP for Research

Title*

Is this a continuation to an old protocol?

CONTINUE

1. If you are not the Principal Investigator, you may select the PI from the drop-down list by typing in a few letters of their name, the person creating the application will automatically be added to the research team.
2. Once you continue from this screen, a unique protocol number will be assigned to you.
3. Any field with an asterisk (*) is required for submission.
4. If you see  hover over for help text

Risks:* 

test

Describe risks for human, animal or plant/environmental health posed by the agents listed above and what safety measures will be taken.

Protocol ID	PI Name	Title	Stage	Status	Submission Date	Meeting	Expiration Date
IBC20210000	Amanda S Wilkinson	testing the system	Initial Protocol Application	Draft Submission Pending			

- Once a protocol has been assigned a number it can be found in the search IBC panel.
- You will see a list of all of your protocols in this table and their current status.
- If you stop working on a protocol prior to submission, this is the where you find it again to continue.
- Be sure to “Save” the document periodically as the program does not auto-save.

This section will create the most changes by adding additional panels based on protocol type selections

- If you select rDNA you will see the added panel with the red arrow. (See next pages for additional panels for rDNA)
- If you select Infectious agents you will see the panel with the yellow arrow. This is the only additional panel for IA.
- If you select Human blood you will see the panel with the green arrow. This is the only additional panel for HB.
- *Biosafety containment will be added for all projects

There are 4 options for rDNA use.

- This protocol will involve:
- 1 **Creating Transgenic Animals**
 - 2 Crossing and/or Using Transgenic Animals
 - 3 Generating and/or Using rsNA Materials
 - 4 Generating and/or Using Transgenic Plants

1

Modals:

 Add Lab Location

A modal will pop up allowing you to enter lab locations. All modals contain required questions. These can be used multiple times and will create a table within the protocol.

Lab Location ×

Building*

Activity description

Date/Year of last laboratory safety audit 

Have all the corrective actions required by the Office of Safety been implemented by the laboratory? Yes No

× Cancel + Save

 Add Lab Location

Protocol Submission:

You may check the completeness of the application at any time by clicking “Check Validations.” (at the bottom of the screen)

This will tell you if there are any required sections that have been missed. You can click in the red box and it will take you to the section that needs correction or additional information.

✓ Application saved: 05/24/2022 10:33 AM

- ✗ 'Title' is required
- ✗ 'Non-Technical Synopsis:' is required
- ✗ 'Project Category' is required
- ✗ Detailed Project Description required.
- ✗ Missing Materials for rsNA: Adenovirus
- ✗ Enter at least 1 Gene in the table or upload the genes file
- ✗ 'This project will be conducted at Biosafety Level (BSL)' is required
- ✗ 'Specify activity that create aerosols.' is required
- ✗ 'Describe mitigation measures to be used.' is required
- ✗ 'PPE required for the biohazard agent manipulation (check all that apply):' is required
- ✗ 'Select all used:' is required

You will see this box if complete and ready for submission.

“Submit for Approval” will take you to the PI attestation and final submission.

✓ Application saved: 05/24/2022 10:35 AM
✓ All data field validation requirements are currently being met.

Requirements Panel:

1. Once the study has been submitted, you can view the “next steps” in the review process via the Requirements Panel

Status	Requirement	Completion State
Draft Submission Pending	Submit Protocol	Ready
PI Certification Pending	Certify Protocol (PI)	Not ready
Pre-submission Requirements	Approval by VP: Colleen M Fitzgerald	Not ready
	Complete training on Citi: Amanda S Wilkinson	✔Completed
IBC Review Pending	IBC Admin Processing	Not ready

2. Training for all members of the research team must be completed before the study can be reviewed. You can see the status of Team members training in the Requirements panel. If the panel states “Completed” in the Completion State column, the training is current/complete. If it states “Ready” the individual has not completed the training requirement OR the training could not be matched because two different email addresses are used in the Novelution and the CITI training systems. To correct this individual may either:
 - a. Add their “CITI email address” to their Novelution profile, or
 - b. Change their Primary email address in CITI (citiprogram.org) to match their Novelution email.
1. The Department Chair/Head, Dean or VP is automatically notified that a study needs their approval. Once approved, and the protocol is ready for review, the IBC Review Pending requirement will show as “Ready.”

IBC Review Pending ⓘ	IBC Admin Processing	Ready
