Unmanned Aircraft System Procedure

Indoor sUAS Flights in NDSU Facilities

Indoor flights are not regulated by the Federal Aviation Administration, however, potential safety hazards and damage to the facility must be considered. These risks vary substantially with the size and type of aircraft. To minimize risk, indoor flights in NDSU facilities are restricted to rotorcraft aircraft with a weight limit of 4.4 lbs (2 kg). Flights should not be conducted directly over people.

All indoor flight activities in NDSU facilities must be coordinated with Facilities Management. A [Facility/Grounds Use Agreement](#) must be submitted and approved prior to conducting flights.

An incident report must be submitted to the NDSU Safety Office within 24 hours if an incident or accident occurs.
