NIH Biosketches

In the instructions for the NIH biosketch, it says, “When citing articles that fall under the Public Access Policy, were authored or co-authored by the applicant and arose from NIH support, provide the NIH Manuscript Submission reference number (e.g., NIHMS97531) or the PubMed Central (PMC) reference number (e.g., PMCID234567) for each article.”

Q: How do I know if my articles have an NIH Manuscript reference number or a PMC number?

A: To find out if your articles have an NIH Manuscript reference number or a PMC reference number, search by your name in both PubMed (http://www.ncbi.nlm.nih.gov/pubmed) and PubMed Central (http://www.ncbi.nlm.nih.gov/pmc/). Searching by your name allows you to find any articles you had authored or co-authored that had been supplied to these databases.

Under Advanced Search on both databases, select Author as the field and search for Lastname, Firstname as well as other ways that your name could have been listed differently (e.g., with middle initial).

After clicking on an article, in PubMed these numbers are located under the keywords section (http://www.ncbi.nlm.nih.gov/pubmed/24561541) and in PubMed Central, they are located in the upper-right hand corner (http://www.ncbi.nlm.nih.gov/pmc/articles/PMC3743671/). PubMed only provides the PMCID numbers while PubMed Central also provides the NIHMSID numbers.

Also see this on including PMCID in Citations: http://publicaccess.nih.gov/include-pmcid-citations.htm

If you have questions or need more information on locating these numbers for your grant proposal – contact:
