Amendment to NDSU Technology Action Plan – “Student Clicker Buy-Back during Vendor Transition”

There are two changes that are needed to this TFAC proposal from the Fall 2011 accepted proposals:

1. The Project Duration will be from December 1, 2011 to March 30, 2012 instead of to January 31, 2012. Due to unforeseen workloads during December and January, we need February and March of 2012 to distribute the clicker buy-back awards. This will coincide with February buy-back of textbooks and allow time for us to advertise the rebates again if they are not all claimed right away during February.

2. Because there were approximately 800 students who used the old “Pulse” clickers during fall semester 2011, awarding 500 $20 rebates wouldn’t cover the fall semester usage, much less the many more students who have “Pulse” clickers from past semesters. Because the final award was ¼ of the amount we first requested, we would like to reduce the rebates from $20 to $10 so that 1000 students can benefit. (The total award is for $10,000)

This has been reviewed by Rian Nostrom and Marc Wallman, who have both agreed with the changes.
