Capture Internal Audio in YuJa Videos (Windows Users)

To capture audio while playing YouTube videos, PowerPoint slides with audio, etc. while recording a YuJa video, Windows users must take an additional step before starting to record:

1. Open YuJa > Create Recording
2. Select “Audio” from the configuration menu on the left
3. Slide the button to the right to turn Mic Source – 2 ON
4. Select Internal Audio from the Mic Source – 2 drop-down list, if necessary

5. Change other settings as needed > Start
