JMP 14 Pro Installation for MAC
Before You Start

- Make sure you have uninstalled all existing JMP components from your computer.
- To uninstall JMP components, click Go -> Applications.
- If you find JMP as a software listed, move it to trash.
1. Insert the DVD or USB.
2. Locate and double-click on the “JMP-install.dmg” as shown in the screenshot below:

3. Unpack the package when prompted.
4. Click Continue.

5. Click Continue again
6. Insert your user name and password when prompted and click continue.

7. After the installation is done click close. It usually takes 5-10 minutes.
8. Start JMP Pro 14 from Launchpad.
