Subject: Scholarship Application Information
Importance: High

Good morning,

Scholarship applications are open for all current students in the College of Engineering beginning this Sunday, January 15th and will be accepted until March 15th. Starting this year, the application process has moved to an online system called Academic Works. To complete the online scholarship application, please visit <https://www.ndsu.edu/onestop/finaid/scholarships/> and click on the “Apply Now” button. You will then be asked to log in using the same credentials that you use for Blackboard. We hope you find the system easy to use. For a quick tutorial on using Academic Works, I encourage you to watch this 2-minute [video](#).

Many scholarship opportunities in the College of Engineering require only the completion of the online general scholarship application. Once you complete your general scholarship application, you will be matched with scholarships for which you immediately qualify – no further action is required. Some scholarship opportunities require the completion of supplemental question(s), so after completing the general scholarship application, be sure to check your “recommended opportunities” for additional action which may be required.

Please note that if you have already completed the online general scholarship application, be sure to log back into Academic Works beginning on January 15th to see if you have any “Recommended” opportunities that you may need to provide additional answers for.

External scholarship opportunities will also be listed on the Academic Works site; however, each external scholarship requires a separate, unique application.

Please let me know if you have any questions about the scholarship process.

Thanks,

Sheri Eberle
