

Multiple Research Assistant Positions available for PhD students

<https://seekingalpha.com/article/4330100-battery-cells-tesla-lose-competition-for-independence>

We are seeking talented students to join our research on fuel cells, lithium ion batteries and supercapacitors. The positions will be available to start in the summer or fall of 2021. Full consideration will be given to applicants who meet the following requirements/expectations:

- Highly self-motivated
- Reliable
- Willing to work hard (at least for the number of hours every weekday that we agree on!)
- Materials science or chemistry background
- Skilled in material synthesis and electrochemical measurements

The recruitment will be conducted through either the **Electrical and Computer Engineering program** or the **Materials and Nanotechnology (MNT) Program** at NDSU.

Electrical and Computer Engineering program:
