TEXT: Course notes will be available on the course website. You may also consider purchasing “An
Introduction to Homological Algebra” by J. Rotman

include categories and functors, exact sequences, (co)chain complexes, Mayer-Vietoris sequences, Tor
and Ext. Applications to other fields will be stressed.

I will update your grades throughout the semester at the NDSU Blackboard site.

HOMEWORK: I will assign homework on a weekly basis. Exercises will be assigned in class on Fridays
and solutions will be due at the beginning of class on the next Friday. Assignments will also be listed
on the course webpage. Each section of homework will be worth the same amount. Late homework
will only be accepted under extreme circumstances. If you have a conflict with any of the homework
due dates, make alternative arrangements with me beforehand.

Students are encouraged to work on assignments in small groups, but each member of the class is
required to turn in a neatly written, organized set of solutions. Students will receive no credit for
solutions with no work or justification. I reserve the right to deduct points for messy papers. You
may even consider using \LaTeX to typeset your solutions.

ATTENDANCE: While attendance is not explicitly required, it is worth 10% of your grade. I will
take attendance each class period. Officially excused absences will not be counted against you, but
you must document such situations with me personally.

COURSE NOTES: I will be typing course notes during the semester. I will periodically update the
notes on the course webpage. I will give extra credit to people who find typos in the notes; credit will
be given to the first person who tells me about a given typo.
