

## Business need

The health of farmers is suffering, especially mental health. Our project is a web app with info and resources to improve well-being, focused on the agricultural community.

## Admins & Users

We follow the story of the 2 prime users the app servers!

Admins are here to provide resources and knowledge on wellness topics

## Challenges

The main thing that set FarmWell apart from other projects is that our client is a startup consisting of a very small group of people. This had benefits, but keeping a singular vision of what FarmWell would turn into was difficult.

Meet with  
Client to  
discuss  
ideas

Get client  
feedback to  
refine  
deliverables

Discuss  
scope and  
begin  
development

Using built-in CMS  
they can track and  
improve the site for  
all users

Those in the ag  
industry who are  
seeking wellness
