

COVID-19 Vaccine Recommendations

	KIDS	PREGNANT WOMEN	ADULTS
AAP/ACOG/AAFP GUIDANCE	AAP (American Academy of Pediatrics) recommends vaccination for all children under 2 , plus high-risk kids and those living with high-risk individuals; also “permissive” for others if parents desire protection.	ACOG (American College of Obstetricians and Gynecologists) recommends vaccination at any point during pregnancy , planning to conceive, postpartum, or while lactating.	AAFP (American Academy of Family Physicians) recommends all adults 18 years and older receive a vaccine, especially if you are 65+, at increased risk for severe infection, or have never received a COVID-19 vaccine.
FDA LABEL	6 mos - 17 years old with 1+ high-risk condition (Approval ages vary by product)	Anyone with 1+ high-risk condition; pregnancy is noted on CDC’s “at risk” list	Adults 65+ years old 18-64 years old with 1+ high-risk condition
CURRENT CDC/ACIP GUIDANCE	CDC has removed routine recommendations for healthy children , including under 2; now uses shared clinical decision-making — i.e., offer based on physician-parent discussion.	CDC no longer recommends vaccination for pregnant women . Recommendation has been withdrawn; pregnant people no longer on routine schedule, but is available through shared clinical decision making.	Shared clinical decision making for everyone 6 months and older.
