

Current Problems:

- Separate device-specific platforms
- Cluttered delivery of data

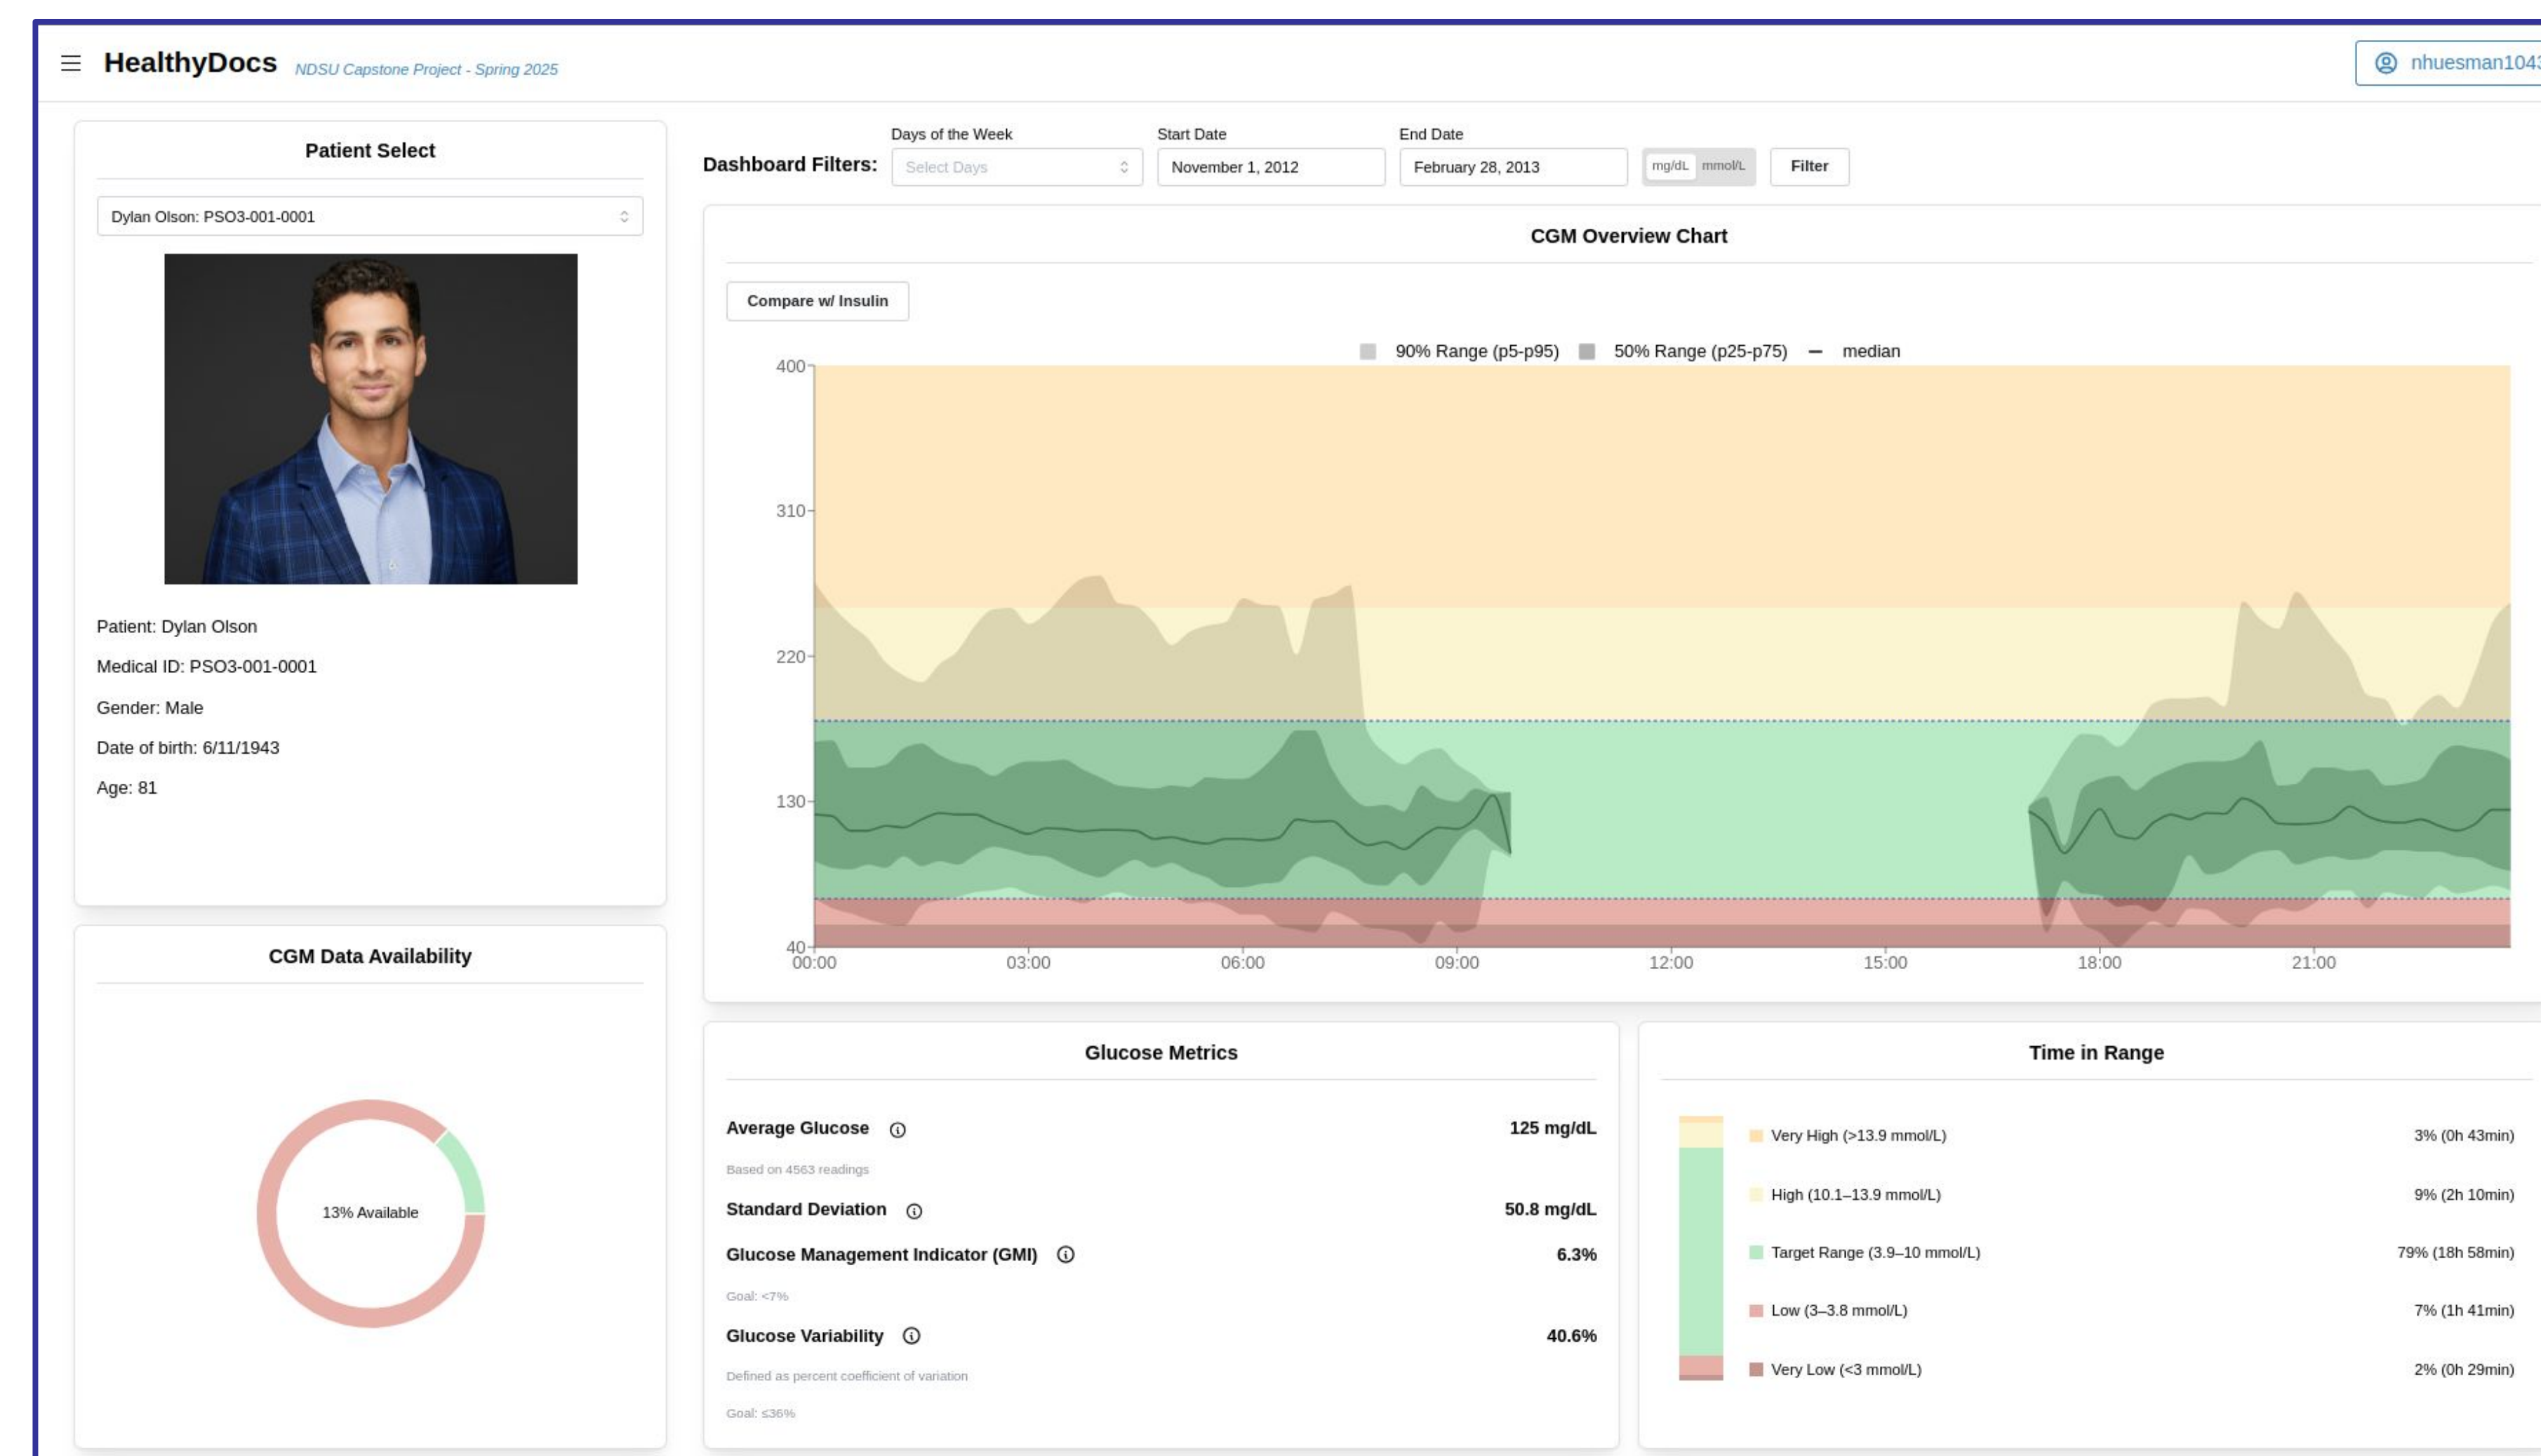

Solution:

- Unify medical device and EHR data into a single application
- Clear summary graphics

Method:

- Iterative development
- Usability feedback from leading diabetes researchers

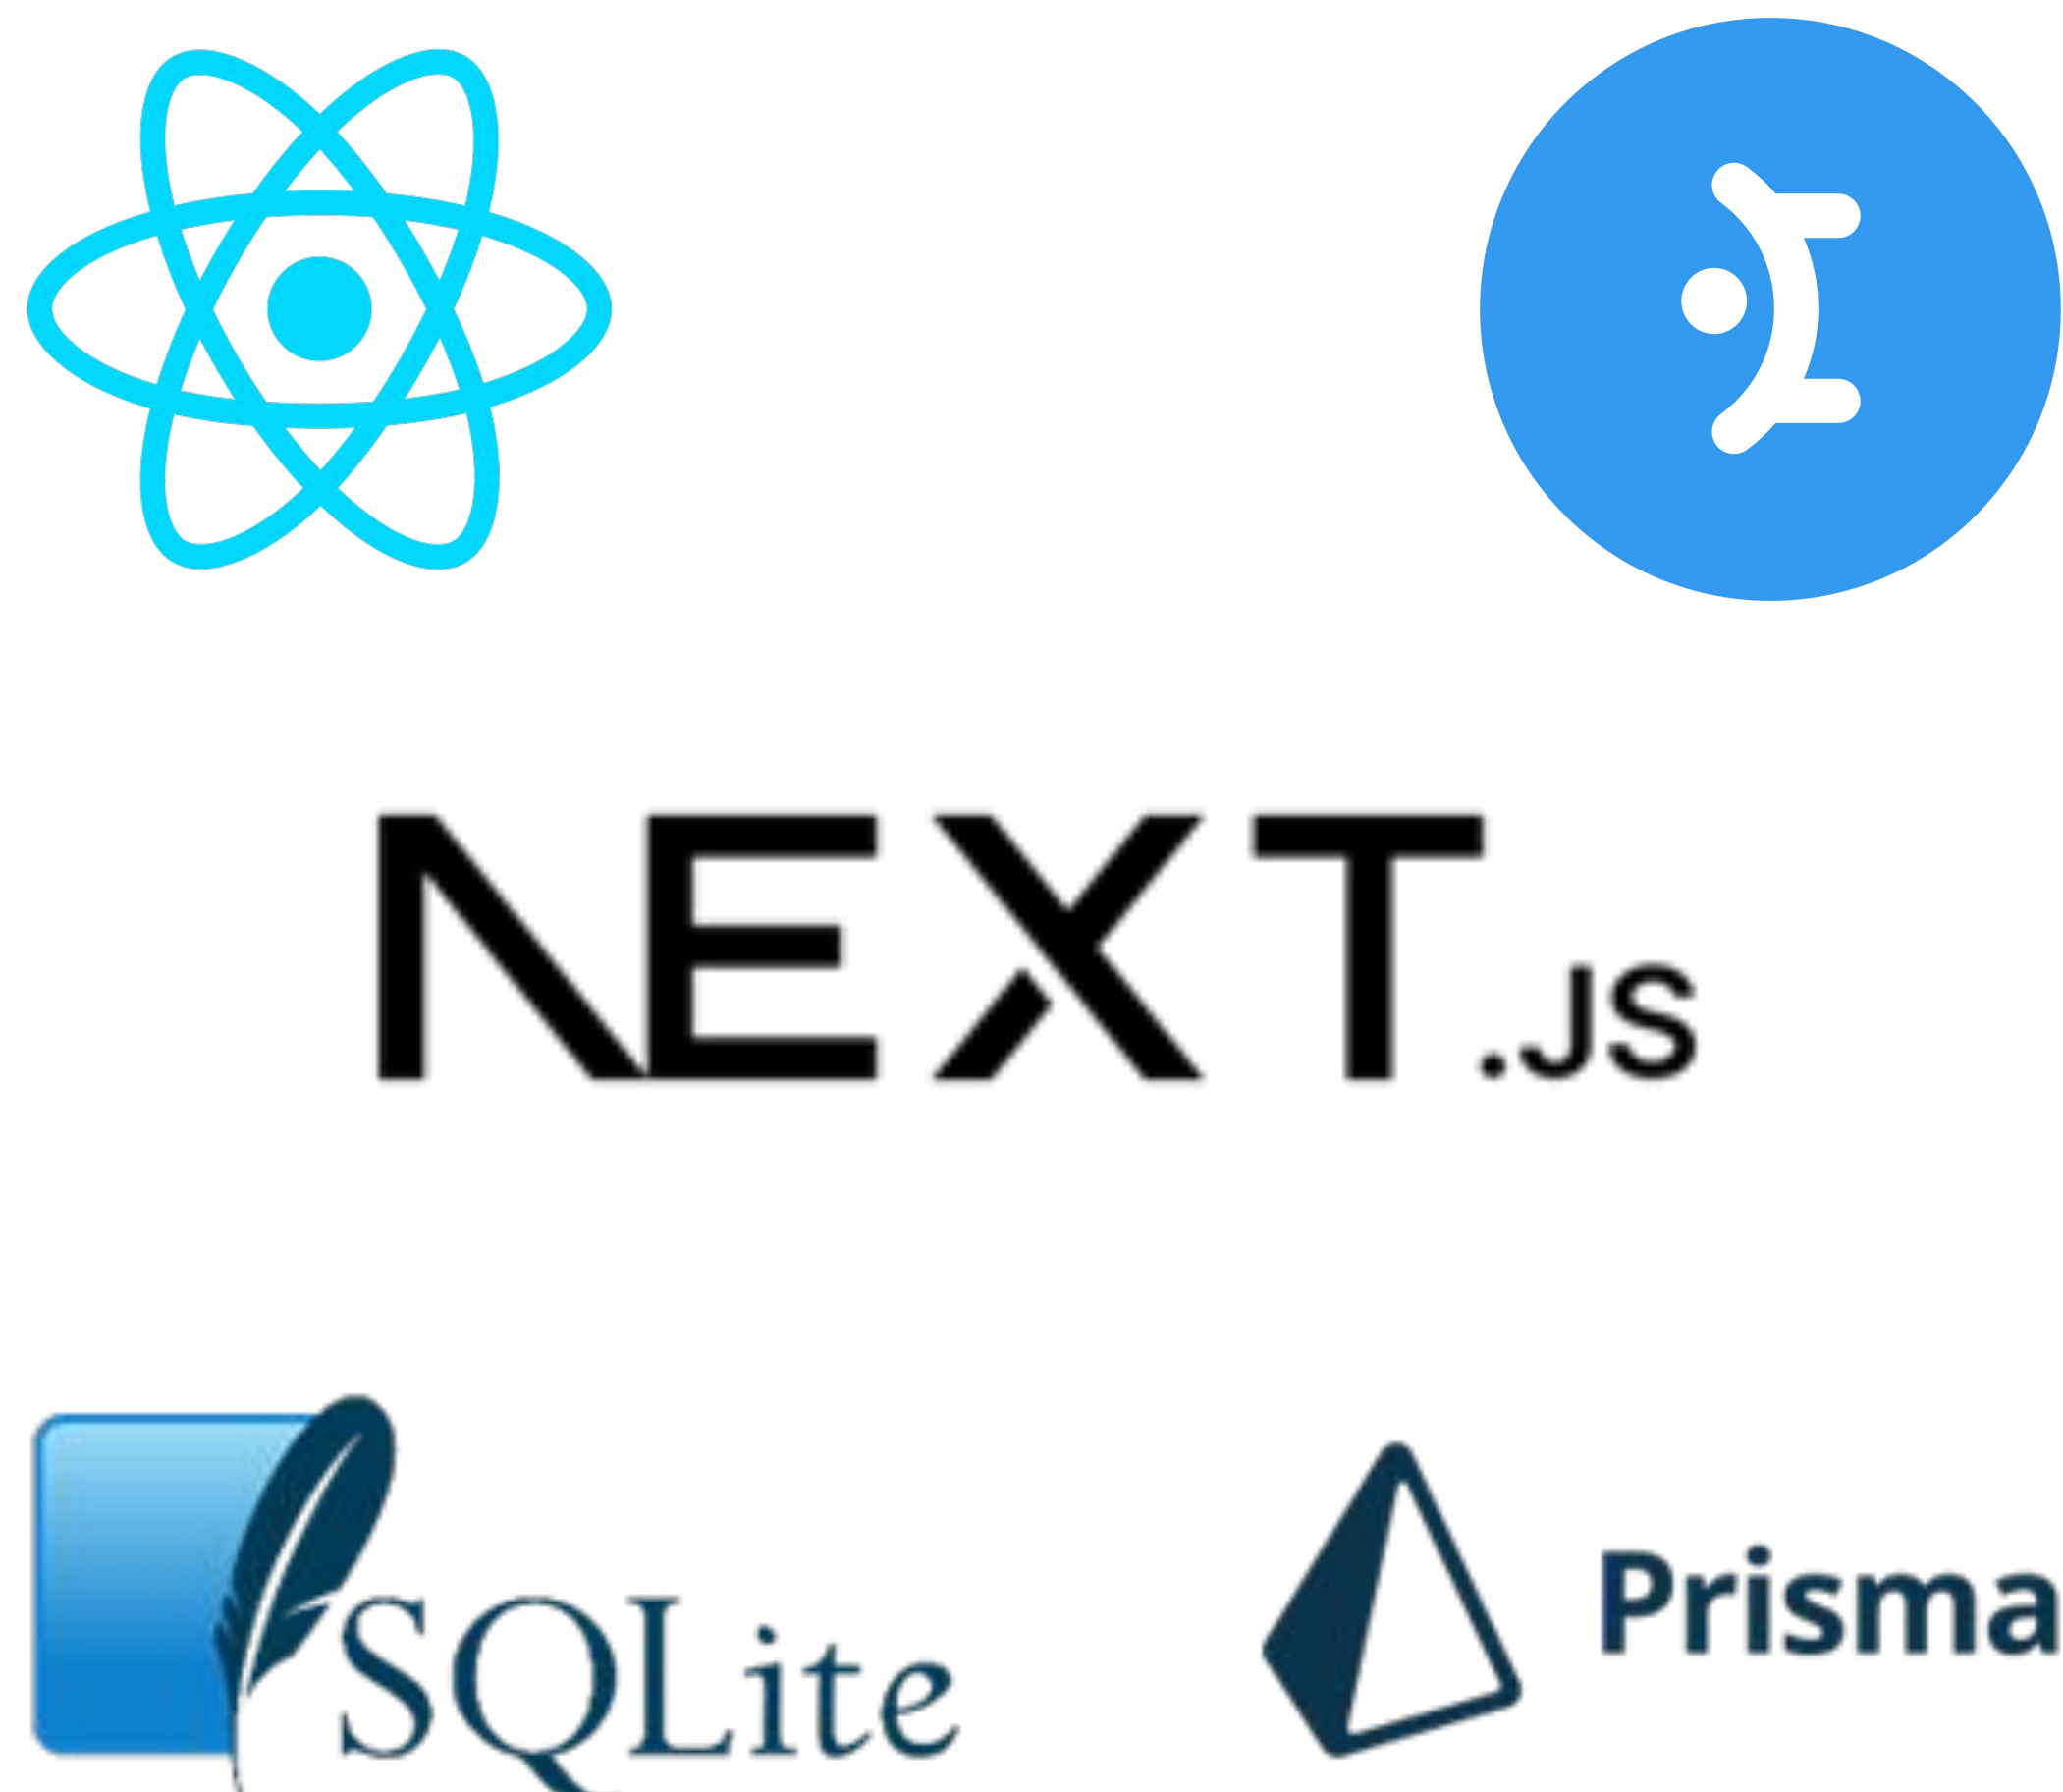

HealthyDocs is a web application that streamlines diabetes care by unifying data from multiple medical devices into easy-to-read summary graphics, helping clinicians make faster, more informed decisions.

Key Features

- Advanced CGM overview chart
- User Friendly Interface
- Time in Range Bar Chart
- Secure authentication
- Intelligent Data Filtration
- Visualization of aggregate CGM & Insulin delivery data
- User and maintenance manuals

Tools

Device Page

- View data points by device
- Filter by date and time range
- Spot trends across devices
