

Learning Disabilities:

Practical Information for the Classroom Teacher

Instructor Name: Dr. Karen Lea
Phone: 509-891-7219
Office Hours: 8 a.m. to 5 p.m. PST Monday - Friday
Email: karen_lea@virtualeduc.com
Address: Virtual Education Software
23403 E Mission Avenue, Suite 220F
Liberty Lake, WA 99019
Technical Support: support@virtualeduc.com

Introduction

Learning Disabilities: Practical Information for the Classroom Teacher is an interactive computer-based instruction course that provides an introduction to the field of Learning Disabilities for special education teachers, general classroom teachers, integration teachers, and related professionals, especially those working in the areas of language, psychology, and counseling.

This computer-based instruction course is a self-supporting program that provides instruction, structured practice, and evaluation all on your home or school computer. Technical support information can be found in the Help section of your course.

Course Materials (Online)

Title: *Learning Disabilities: Practical Information for the Classroom*
Publisher: Virtual Education Software, inc. 2001, Revised 2002, Revised 2010, Revised 2013, Revised 2016, Revised 2019, Revised 2022
Instructor: Dr. Karen Lea

Academic Integrity Statement

The structure and format of most distance-learning courses presume a high level of personal and academic integrity in completion and submission of coursework. Individuals enrolled in a distance-learning course are expected to adhere to the following standards of academic conduct.

Academic Work

Academic work submitted by the individual (such as papers, assignments, reports, tests) shall be the student's own work or appropriately attributed, in part or in whole, to its correct source. Submission of commercially prepared (or group prepared) materials as if they are one's own work is unacceptable.

Students are required to view/read each screen in each exercise of each chapter. Screens, exercises and chapter content may not be skipped. Students are also required to access and read all content in each course handout. A participant who fails to complete the entire course in the manner intended and as outlined, may have their grade reduced or fail the course. It is the student's responsibility to contact the facilitator, instructor-of-record, or VESi registrar if there is any question as to the manner in which this course is to be completed.

Aiding Honesty in Others

The individual will encourage honesty in others by refraining from providing materials or information to another person with knowledge that these materials or information will be used improperly.

Violations of these academic standards will result in the assignment of a failing grade and subsequent loss of credit for the course.

Expected Learning Outcomes

As a result of this course, participants will demonstrate their ability to:

- Identify warning signs of learning disabilities
- Implement modifications and accommodations for individuals with learning disabilities
- Collaborate in assessment to determine existence of a learning disability
- Collaborate with parents, guardians, and the community to provide effective teaching

Course Description

This course will provide you with a foundational knowledge of learning disabilities and with practical ways you can help students who have disabilities in your classroom.

Chapter 1: Definition & Characteristics

This section focuses on the foundational knowledge of learning disabilities. At the end of this section, students will be able to:

- Understand the definition of a learning disability
- Articulate the characteristics of a learning disability

Chapter 2: Assessment

Assessment is an integral part of the identification and education of children with learning disabilities. Its main purpose is to improve learning. In this section of the course, we will look at both the discrepancy model and the RTI model used to assess and identify learning disabilities. At the end of this section, students will be able to:

- Articulate a foundational knowledge of assessing for learning disabilities
- Assess strategies in classroom scenarios

Chapter 3: Adaptions & Modifications

This section focuses on accommodations and modifications educators can make in the classroom. We will look at general teaching techniques that will actually raise the quality of teaching in the classroom and are beneficial when used for the whole class. Then we will look at accommodations and modifications for specific learning disabilities. Your objectives for this section are to: (a) analyze classroom situations to decide the best accommodation and/or modification to be used, and (b) analyze your own teaching to raise the quality of teaching by integrating general teaching techniques.

Chapter 4: Parent & Specialist Collaboration

Collaborating, or working well as a team, is vital to meeting the needs of all students, but especially those of students with learning disabilities. In this last section of the course, we will look at general educators collaborating with specialists and parents. Included will be a discussion of IEP meetings and of ways to handle conflict. Your objectives for this course are to: (a) understand the principles of collaborating with others, and (b) understand the importance of handling conflict.

Student Expectations

As a student you will be expected to:

- Students are required to view/read each screen in each exercise of each chapter. Screens, exercises and chapter content may not be skipped. Students are also required to access and read all content in each course handout.
- Complete all four section examinations, showing a competent understanding of the material presented. **You must obtain an overall score of 70% or higher, with no individual exam score below 50%, and successfully complete ALL writing assignments to pass this course. *Please note: Minimum exam score requirements may vary by college or university; therefore, you should refer to your course addendum to determine what your minimum exam score requirements are.**
- Complete a review of any section on which your examination score was below 50%.
- Retake any examination, after completing an information review, to increase that examination score to a minimum of 50%, making sure to also be achieving an overall exam score of a minimum 70% (**maximum of three attempts**). ***Please note: Minimum exam score requirements may vary by college or university; therefore, you should refer to your course addendum to determine what your minimum exam score requirements are.**
- Complete all course journal article and essay writing assignments with the minimum word count shown for each writing assignment.
- Complete a course evaluation form at the end of the course.

Examinations

At the end of each chapter, you will be expected to complete an examination designed to assess your knowledge. You may take these exams a total of three times. Your last score will save, not the highest score. After your third attempt, each examination will lock and not allow further access. The average from your exam scores will be printed on your certificate. However, this is not your final grade since your required writing assignments have not been reviewed. Exceptionally written or poorly written required writing assignments, or violation of the academic integrity policy in the course syllabus, will affect your grade. As this is a self-paced computerized instruction program, you may review course information as often as necessary. You will not be able to exit any examinations until you have answered all questions. If you try to exit the exam section before you complete all questions, your information will be lost. You are expected to complete the entire exam in one sitting.

Writing Assignments

All assignments are reviewed and may impact your final grade. Exceptionally or poorly written assignments, or violation of the Academic Integrity Policy (see course syllabus for policy), will affect your grade. Fifty percent of your grade is determined by your writing assignments, and your overall exam score determines the other fifty percent. ***Refer to the Essay Grading Guidelines, which were sent as an attachment with your original course link. You should also refer to the Course Syllabus Addendum, which was sent as an attachment with your original course link, to determine if you have any writing assignments in addition to the Critical Thinking Questions (CTQ) and Journal Article Summations (JAS). If you do, the Essay Grading Guidelines will also apply.***

Your writing assignments must meet the minimum word count and are not to include the question or your final citations as part of your word count. In other words, the question and citations are not to be used as a means to meet the minimum word count.

Critical Thinking Questions

There are four CTQs that you are required to complete. You will need to write a minimum of 500 words (maximum 1,000) per essay. You should explain how the information that you gained from the course will be applied and clearly convey a strong understanding of the course content as it relates to each CTQ. To view the questions, click on REQUIRED ESSAY and choose the CTQ that you are ready to complete; this will bring up a screen where you may enter your essay. Prior to course submission, you may go back at any point to edit your essay, but you must be certain to click SAVE once you are done with your edits.

You must click SAVE before you write another essay or move on to another part of the course.

Journal Article Summations

You are required to write, in your own words, a summary on a total of three peer-reviewed or scholarly journal articles (one article per JAS), written by an author with a Ph.D., Ed.D. or similar, on the topic outlined within each JAS section in the “Required Essays” portion of the course (blogs, abstracts, news articles or similar are not acceptable). Your article choice must relate specifically

to the discussion topic listed in each individual JAS. You will choose a total of three relevant articles (one article per JAS) and write a thorough summary of the information presented in each article (you must write a minimum of 200 words with a 400 word maximum per JAS). Be sure to provide the URL or the journal name, volume, date, and any other critical information to allow the facilitator to access and review each article.

To write your summary, click on REQUIRED ESSAYS and choose the JAS that you would like to complete. A writing program will automatically launch where you can write your summary. When you are ready to stop, click **SAVE**. Prior to course submission you may go back at any point to edit your summaries but you must be certain to click SAVE once you are done with your edits. For more information on the features of this assignment, please consult the HELP menu.

You must click SAVE before you write another summary or move on to another part of the course.

Instructor Description

Karen Lea holds a Ph.D. in education, has TEFL certification, and is Project Management Professional certified. Dr. Lea has fifteen years' experience teaching at the K-12 level and another seventeen years' experience teaching education and leadership courses at the undergraduate and post-graduate levels. Currently she is an assessment developer at Western Governor's University. Dr. Lea has been professionally published more than 15 times and has served on more than a dozen panels and boards, including serving on the NCATE (CAEP) Board of Examiners.

Contacting the Instructor

You may contact the instructor by emailing karen_lea@virtualeduc.com or by calling 509-891-7219 Monday through Friday, 8:00a.m.–5:00p.m. PST. Phone messages will be returned within 24 hours. Phone conferences will be limited to ten minutes per student, per day, given that this is a self-paced instructional program. Please do not contact the instructor about technical problems, course glitches, or other issues that involve the operation of the course.

Technical Questions

If you have questions or problems related to the operation of this course, please try everything twice. If the problem persists please check our support pages for FAQs and known issues at www.virtualeduc.com and also the Help section of your course.

If you need personal assistance then email support@virtualeduc.com or call 509-891-7219. When contacting technical support, please know your course version number (it is located at the bottom left side of the Welcome Screen) and your operating system, and be seated in front of the computer at the time of your call.

Minimum Computer Requirements

Please refer to VESi's website: www.virtualeduc.com or contact VESi if you have further questions about the compatibility of your operating system.

Refer to the addendum regarding Grading Criteria, Course Completion Information, Items to be Submitted, and how to submit your completed information. The addendum will also note any additional course assignments that you may be required to complete that are not listed in this syllabus.

COURSE SYLLABUS ADDENDUM

Important - Please Read - Do Not Discard

It is each student's responsibility to read all course materials, including course syllabus and addendum, and to know and understand the course requirements, exam score minimum requirements, and deadlines. Students enrolled in VESi courses are required to check their email for any communications regarding the course until their final grade is posted with the college or university. Once your course materials are received by VESi and have been reviewed, the GRADE IS FINAL.

Grading Criteria:

You must obtain an overall score of 70% or higher, with no individual exam score below 50%, and successfully complete ALL writing assignments to pass this course. This course requires a minimum overall passing grade of "C-" to receive credit. The average from your exam scores will be printed on your certificate. However, this is not your final grade since your required writing assignments have not been reviewed. Exceptionally written or poorly written required writing assignments, or violation of the academic integrity policy in the course syllabus, will affect your grade. Fifty percent of your grade is determined by your writing assignments, and your overall exam score determines the other fifty percent.

No grade will be submitted for partial completion of course assignments, regardless of partial score. An F will be reported if course is not completed by the end of the term enrolled. Exceptions only apply to those that request an extension (must have extenuating circumstances) prior to course deadline.

Letters will be assigned as follows:

90% to 100%	A
80% to 89%	B
70% to 79%	C
69% - lower	F

Course Completion Information:

Grading will take approximately two weeks from the time your materials are received by the instructor, after which we will submit grades to the college/university weekly. If you have a timeline to meet certain school or state requirements, please keep this time period in mind when planning your course completion dates.

Course Completion Instructions:

- Once you have completed all of the course requirements, follow the instructions from the Complete Course toolbar to submit your materials to VESi's office for processing. You can only submit the course ONE TIME. Be sure that you have completed all requirements and exams.
- Course Evaluation: Please take a moment to fill out the course evaluation which is also found under the Complete Course toolbar.
- Print Certificate: You can print a copy of your course certificate for your records. Print Certificate: You can print a copy of your course certificate for your records.

Accessing your NDSU Transcript:

After the grade for your course(s) is posted, approximately two weeks after the course submission, you can access your NDSU transcript for documentation of course completion and performance.

Instructions are found at this link: [Transcript Instructions | Continued Learning | NDSU](#)

Drops & Refunds:

Once learners have received the course materials, they are no longer eligible for a refund. Appeals will be considered on a case-by-case basis.

Questions or Concerns:

Please direct any questions or concerns regarding this class to ndsudce@ndsudce.edu. Please include the title of the course in your correspondence.
