

Title

Innovations in Diabetes Care: 2025 ADA Standards and Pregnancy Updates

Course Description:

In this webinar, we will explore the key updates in the 2025 ADA Standards of Care, focusing on medications, monitoring, and technology in diabetes management. We will also review the latest guidelines for managing diabetes in pregnancy, with an emphasis on target glucose ranges using continuous glucose monitoring (CGM) and the importance of individualized treatment plans. Participants will learn how to design treatment strategies for diabetes patients with comorbid conditions to address acute and chronic complications.

Date

3/11/2025

Time

12:00 pm

Location

Fargo, ND

Learning Objectives:

Upon successful completion of this knowledge-based course, pharmacists should be able to:

1. Describe key updates in the 2025 ADA Standards of Care related to medications, monitoring, and technology
2. Examine recent innovations in diabetes management, including new medications, continuous glucose monitoring (CGM), and insulin delivery systems
3. Discuss the latest guidelines and recommendations for managing diabetes in pregnancy
4. Design a treatment plan taking into account individualized factors to address acute and chronic complications

Upon successful completion of this knowledge-based course, pharmacy technicians should be able to:

1. Describe key updates in the 2025 ADA Standards of Care related to medications, monitoring, and technology
2. Examine recent innovations in diabetes management, including new medications, continuous glucose monitoring (CGM), and insulin delivery systems
3. Discuss the latest guidelines and recommendations for managing diabetes in pregnancy
4. Support the pharmacist in designing a treatment plan that takes into account individualized factors to address acute and chronic complications
